SECTION 1. BASIC INFORMATION AND DATA

Document Overview

This document contains the Pennsylvania Actuarial Memorandum for Federated Mutual Insurance Company's (Federated's) small group block of business. The rates in this filing will apply to new and renewing ACA-compliant policies effective January 1, 2017. This actuarial memorandum is submitted in conjunction with the Pennsylvania Actuarial Memorandum Rate Exhibits. It is intended to replace the version dated July 11, 2016

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered Pennsylvania Actuarial Memorandum Rate Exhibits. This information may not be appropriate for other purposes.

This information is intended for use by the State of Pennsylvania Insurance Department to assist in the review of Federated's small group rate filing. However, we recognize that this memorandum may become a public document. Milliman makes no representations or warranties regarding the contents of this memorandum to other users. Likewise, other users of this memorandum should not place reliance upon this actuarial memorandum that would result in the creation of any duty or liability for Milliman under any theory of law.

Variability of Results

Differences between projections in this analysis and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent the assumptions in this memorandum are not realized.

Interpretation of Law/Regulations

The analysis in this report is based on our current understanding of federal and state rules and regulations. To the extent that these rules and regulations continue to evolve, our work may be subject to change. Milliman is not a law firm. Nothing in this correspondence should be construed as legal advice. In the event a legal interpretation is required, we recommend review by legal counsel.

Data Reliance

In performing this analysis, I relied on data and other information provided by Federated Mutual Insurance Company. I have not audited or verified this data and other information. If the underlying data or information is inaccurate or incomplete, the results of our analysis may likewise be inaccurate or incomplete.

I performed a limited review of the data used directly in the analysis for reasonableness and consistency and have not found material defects in the data. If there are material defects in the data, it is possible that they would be uncovered by a detailed, systematic review and comparison of the data to search for data values that are questionable or for relationships that are materially inconsistent. Such a review was beyond the scope of the assignment.

A data reliance letter is attached to the Part III Actuarial Memorandum included in this filing.

A. Company Information

1. Company Legal Name: Federated Mutual Insurance Company
   NAIC #: 13935
2. Market: Small Group
3. Exchange status: Off only
4. Effective Date: January 1, 2017
5. Average rate change request: 30.4% (calculated in Table 10 of the PA Rate Exhibits, see Table 1.3 below)

6. Range of rate change request: 16.9%-31.9% (plan level increases calculated in Table 10 of the PA Rate Exhibits)
7. Product: PPO
8. Rating Areas: 9 (Federal rating regions)
9. Metal Levels: Platinum, Gold, Silver, Bronze
10. Current number of covered lives: 4,542
    Current number of policyholders: 253 (groups)
11. Number of plans offered in 2017: 31
12. Corresponding contract form #: GH 37 01 (01-17 ed.)
    SERFF Tracking#: FEMC-130532688
    Binder SERFF Filing #: FEMC-PA17-125059197
13. HIOS Issuer ID: 80148

B. Rate History and Proposed Variations in Rate Changes

The historical rate adjustments for Federated's ACA-compliant block of small group business from 2014-2016 are illustrated below in Table 1.1 (2014 was the first year that ACA-compliant policies were sold.) Note that there have been product terminations, plan modifications, and new plans introduced over this time period. Rate changes for plans that were terminated were calculated assuming that members would choose to enroll in the most similar ACA plan offered by Federated upon renewal.

The proposed 2017 rate increase provided in Table 1.1 was calculated for members enrolled in an ACA-compliant plan as of January 2016. Some of those members have not yet renewed onto a 2016 rate level. The increase assumes that those members will renew at their next renewal date onto the most similar 2016 plan design. The average rate increase reflects the weighted average 2017 table rate over the weighted average 2016 table rate (including the impact of the third quarter 2016 rate filing on third and fourth quarter enrollees) for those members. The proposed 2017 rate increase will be lower for members renewing in third and fourth quarter, and higher for members renewing in the first and second quarter.

Note that the rate increase reported in Table 1.1 is consistent with the rate increase reported in the Part III Actuarial Memorandum, but does not equal the rate increase shown in SERFF and Table 10 of the Pennsylvania Actuarial Memorandum Rate Exhibits (PA Rate Exhibits). This is due to differences in the methodology used in the PA Rate Exhibits and the methodology prescribed in the Unified Rate Review (URR) instructions (some of the key differences are described throughout this memorandum).

Table 1.1
Federated Mutual Insurance Company
Historical and Proposed Rate Adjustments

Date	Rate Adjustment	SERFF Tracking #
January 1, 2015	-6.6%	FEMC-129616121
January 1, 2016	6.7%	FEMC-130017955
July 1, 2016	15.0%	FEMC-130466230
Proposed January 1, 2017[1]	25.8%	FEMC-130532688

[1] Increase shown represents a blend of the increase for members who received the July 1, 2016 increase and those who did not (i.e. those sold or renewed in the first two quarters of the year).

The 2017 proposed rate adjustment varies by plan because there were uniform modifications in benefit designs for some plans, the benefit factors were re-priced, and the area factors were revised. Table 1.2 shows how the rate increase varies by plan. The average rate increase reflects the weighted average 2017 table rate over the weighted average 2016 table rate (including the impact of the third quarter 2016 rate filing on third and fourth quarter enrollees) for members enrolled as of January 2016. To be clear, the rate increases by plan will reflect a blend of the rate increase over rates filed for January 1, 2016 (for first and second quarter enrollees), and the additional increase over the third quarter filing effective July 1, 2016 (for third and fourth quarter enrollees). For plans that don't have any membership as of January 2016, the rate increase reflects the statewide average mix of members by area and enrollment quarter as of January 2016. The average rate increases reported in Table 1.2 are consistent with the proposed rate increase reported in Table 1.1, and will differ from the average increases by plan in the PA Rate Exhibits as those also use a different methodology.

1707A	80148PA0040026	7	15.6%
1628A	80148PA0040028	2,154	28.4%
1629A	80148PA0040029	1,338	26.4%
1708A	80148PA0040030	509	23.6%
1709A	80148PA0040031	70	26.9%
1710A	80148PA0040032	-	New in 2017
1711A	80148PA0040033	-	New in 2017

C. Average Rate Change

Table 1.3 provides the average proposed rate increase effective January 1, 2017 calculated using three different methodologies: 1) based on the URR instructions, 2) based on the methodology in Table 10 of the PA Rate Exhibits, and 3) based on the methodology in Table 11 of the PA Rate Exhibits. There are several reasons why the rate increases differ under these methodologies, including:

1. The rate increase in the PA Rate Exhibits is calculated based on the ratio of the calibrated plan adjusted index rates (CPAIR) in 2016 and 2017 (weighted on January 2016 membership), while the URR instructions direct you to calculate the average rate increase using the weighted average current and revised table rates across the current mix of membership as of January 2016.
2. The 2016 and 2017 normalization factors reflected in the CPAIRs in Table 10 of the PA Rate Exhibits are calculated across the projected mix of membership in 2016 and 2017, respectively. When rating factors change from one year to the next (e.g., area factors, plan factors), the calibration factors used to normalize the 2016 and 2017 rates may not fully account for mix differences between the two years.
3. The CPAIRs reflect an age 21 rate level, while the average rate increase under the URR methodology reflects the mix of membership by age as of January 2016. Even though the rating age factors are prescribed by law and are not changing, plan and area mix varies by age, and so the average rate increase calculated will differ depending on whether it is weighted by revenue or by membership. The average rate increase calculated according to the URR instructions is revenue weighted, and the average rate increase in Table 11 of the PA Rate Exhibits is member weighted.

All rate increases shown in Table 1.3 reflect a blend of the rate increase over rates from the 2016 filing effective January 1, 2016 and rates from the third quarter filing effective July 1, 2016. The rate increase for third and fourth quarter enrollees will be lower and the rate increase for first and second quarter enrollees will be higher.

Table 1.3
Federated Mutual Insurance Company
Proposed Rate Increase

Description	Rate Increase
Average Percent Rate Change Requested[1]	25.8%
Rate Increase – PA Rate Exhibits methodology, Table 10[2]	30.4%
Rate Increase – PA Rate Exhibits methodology, Table 11[3]	26.3%

[1] Consistent with the URR instructions.
[2] Consistent with Table 10 in the PA Rate Exhibits and the SERFF Rate Review Detail screen.
[3] Consistent with the rate increase calculated in Table 11 in the PA Rate Exhibits.

D. Membership Count

There are 4,542 members and 253 policies (i.e., groups) enrolled in Federated's ACA-compliant plans in Pennsylvania as of January 31, 2016. See Table 1 of PA Rate Exhibits for the distribution of membership by age for the experience period (2015), as of January 31, 2016, and for the projection period.

E. Benefit Changes

We understand from Federated that there were no material changes in covered benefits from the experience period to the projection period, and that the plans in this filing provide coverage for the Essential Health Benefits (EHBs) required by the 2017 EHB Benchmark Plan. Cost sharing changes (i.e., uniform modifications) are being made to the following plans (by HIOS ID) in 2017 so that they remain within the actuarial value (AV) de minimis range.

- 80148PA0040005
- 80148PA0040014
- 80148PA0040018
- 80148PA0040023

- 80148PA0040024
- 80148PA0040025
- 80148PA0040026
- 80148PA0040030
- 80148PA0040031

The cost sharing changes were valued as part of the benefit pricing model used to create the AV and Cost Sharing Values (i.e., induced utilization and pricing AVs) for 2017. The model was calibrated to Federated's average nationwide small group allowed experience in 2015 and trended forward to the midpoint of 2017. Note that the pricing estimates from this model exclude expected differences in the health status of members expected to choose a particular plan. Specifically, every benefit plan was valued assuming the same cohort of members was enrolled in it.

A more detailed explanation of the benefit analysis is provided in Section 3.

F. Experience Period Claims and Premium

Table 2 in the PA Rate Exhibits provides Federated's Pennsylvania small group experience data (including ACA and transitional) for calendar year 2015, with claims paid through January 31, 2016. An adjustment was made for estimated IBNR. The data reported in Table 2 is consistent with the data reported in Section I of Worksheet I in the URRT.

Key details on the data included in Table 2 include:

- Earned premiums were provided by Federated from their internal systems. Federated has stated that it does not expect to pay any minimum medical loss ratio (MLR) rebates for 2015 incurrals. The sum of earned premiums and estimated risk adjustment transfers in Table 2 will tie to earned premium entered in Section I of the URRT.
- Medical and prescription drug allowed and paid claim experience was provided by Federated. Medical claims are processed by Federated using their internal data systems. Prescription drug claims are generally processed by a Pharmacy Benefit Manager (PBM). Allowed and paid claims in Table 2 will tie to Section I of the URRT once they are reduced for the prescription drug rebates shown.
- Federated does not have private reinsurance.
- Federated does not offer any benefits in addition to EHBs.
- Federated has no capitation arrangements for these products.
- Experience period risk adjustment payments were estimated by Federated, and reflect risk adjustment accruals reported in the 2015 financial statements.
- There were no Federal reinsurance recoveries in the experience period, since reinsurance benefits are not offered in the small group market.

G. Credibility of Data

The method used to determine credibility of the base period experience was based on an internal Milliman study of commercial credibility. The study uses an approach similar to the one used by CMS to develop a credibility formula for Medicare Advantage/Prescription Drug plans, where:

$$\text{Credibility} = \sqrt{\frac{\text{Experience Member Months}}{\text{Full Credibility Threshold}}}$$

The full credibility threshold was set to 48,000 member months. This threshold was estimated to have a similar level of predictive accuracy as the CMS requirement for prediction accuracy in the Medicare Advantage space (i.e., within 10% of the actual value, 95% of the time, if the only source of variability is random fluctuations in claim costs).

The single risk pool data reported in Table 2 of the PA Rate Exhibits includes experience for members enrolled in both ACA plans and transitional plans. Since Federated does not expect any members enrolled in a transitional plan

in the base period to enroll in an ACA plan in the projection period, we only counted base period ACA member months when determining the credibility to apply.

Since base period experience for Pennsylvania is also included in the nationwide credibility manual rate, a downward adjustment was applied to the experience period credibility in order to avoid double counting the base period experience. This adjustment was calculated by taking into consideration the proportion of the manual rate experience that is from the Pennsylvania base experience.

The calculation of the credibility of the base period experience is shown below in Table 1.4.

Table 1.4
Federated Mutual Insurance Company
Credibility of Base Period Experience

Description	Value	Annotation
Member Months - Base Experience	31,010	(a)
Member Months - Manual Rate	444,959	(b)
Full Credibility Threshold – Member Months	48,000	(c)
% Base Experience in the Manual Rate	7.0%	(d) = (a)/(b)
Credibility of Base Experience (no adjustment)	80.4%	(e) = sqrt[(a)/(c)]
Adjusted Credibility of Base Experience	**78.9%**	**(f) = [(e)-(d)] / [1-(d)]**

Table 2b in the PA Rate Exhibits shows the experience period manual rate data. Nationwide calendar year 2015 experience for members enrolled in Federated's small group ACA-compliant plans was combined to develop a fully credible manual rate. Adjustments were made to the manual rate to account for trend (as shown in Table 3b), expected changes in Rx rebates, and anticipated differences between the demographics, area, benefits, provider network mix, and morbidity in the experience period and the projection period.

The experience rate from Table 2 (adjusted to a PMPM basis) was blended with the manual rate from Table 2b (adjusted to a PMPM basis) to calculate the rate shown in Table 2c. The following formula was used to blend the two PMPM rates.

Blended Rate PMPM (Table 2c) = Experience Rate PMPM (Table 2) × 78.9% + Manual rate PMPM (Table 2b) × 21.1%

Note that the member month value in Table 2c was set to 1 so that the values are reported are on a PMPM basis.

Table 4b shows Federated's historical nationwide small group ACA experience. Transitional experience was not included in Table 4b since only ACA experience was used in the development of the manual rate.

H. Trend Identification

Table 3 in the PA Rate Exhibits shows the proposed annual medical and prescription drug allowed claim cost and utilization trends. The service category trends are consistent with those entered in Worksheet I, Section II of the URRT.

The annual allowed trend used to project claims from 2015 to 2017 was 7.0%, made up of 1.4% utilization trend and 5.5% cost trend. Note that the trend factors shown in Table 3 and the URRT reflect an additional adjustment to shift the midpoint from a calendar year basis to the average rate effective period for first quarter rates (based on Federated's anticipated mix of enrollment by month throughout the year). Since Federated applies quarterly rate increases (described below), this adjustment will reflect the average number of months deviation from the midpoint of each quarter (July 1, October 1, January 1, April 1).

Trends were developed based on historical trends in Federated's nationwide commercial group experience data (small and large group), Milliman internal benchmark trends, and actuarial judgment.

Federated's historical nationwide allowed trends were in the range of 3-4% in 2012 and 2014, and in the range of 7-8% in 2015. Network changes occurring during 2013 caused trends to decrease materially in that year, but Federated does not expect to experience network effects of the same magnitude going forward (moreover, prospective network changes are accounted for separately in each state's rate development where applicable).

We referenced two of Milliman's internal sources for benchmark trends: the 2016 Commercial Health Cost Guidelines™ (HCGs), and the Standard & Poor's Healthcare Claim Index Database (S&P). Nationwide 2016 benchmark allowed claim cost trends from the HCGs were in the range of 4-12%, and nationwide small group benchmark allowed claim cost trends from the S&P have been in the range of 2-8% over the last several years.

Based on our review of these sources and Federated's historical trend data, our annual prospective allowed claim cost trend assumption was set at 7% for 2015-2017.

I believe that the approach used to develop the trend rate used in this filing provides the best estimate of prospective secular trends for 2015 to 2017. These trends are then further adjusted through the use of the other projection factors described in the filing to be specific to each of Federated's risk pools (i.e., each state).

Federated intends to recognize trend on a quarterly basis. The quarterly trend adjustment will be 1.96%.
The quarterly trend adjustment reflects the assumed annual trend of 7.0%, with an upward adjustment of 1.0% to account for the leveraging impact of fixed cost sharing.

I. Historical Experience

Historical experience for Federated's small group business in Pennsylvania (including non-ACA and ACA business) is shown in Table 4 of the PA Actuarial Memorandum Exhibits. As described above, medical and prescription drug allowed and paid claim experience was provided by Federated. Medical claims are processed by Federated using their internal data systems. Allowed claims are reported directly in the system, and are not calculated from other fields. Prescription drug claims are processed by a Pharmacy Benefit Manager.

Federated's historical experience shown in Tables 4 and 4b was not used directly in the development of trend assumptions for a variety of reasons. In general, Federated's data shows volatility when it is broken down at the service category level. Furthermore, we believe it is difficult to accurately adjust for confounding factors reflected in each plan's historical trends such as the following:

- Marketplace and behavioral changes in response to reforms under the Affordable Care Act;
- Population changes, including demographics, geography, and morbidity;
- Changes in benefit design and seasonality; and
- Contracted reimbursement changes with providers, including the significant network changes that occurred in 2013. Section 1.H above provides a more detailed explanation and support for the assumptions used.

SECTION 2. RATE DEVELOPMENT & CHANGE

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5 in the PA Rate Exhibits shows the development of the Projection Period Index Rate, the Market Adjusted Index Rate, and total allowed claims.

The Experience Period Index Rate shown in Table 5 reflects the blended experience and manual rate from Table 2c. The experience period index rate was then adjusted to reflect the demographics, area, benefits, provider network cost level, and morbidity level anticipated in the projection period. Note that the projection factors shown in Table 5 reflect a blend of the adjustments applied to the Pennsylvania experience period data and the nationwide manual rate data. In rate development, the two rates were adjusted to the projection period separately. The projected values were then blended together and trended to the average rate effective period to calculate the index rate for the projection period.

The adjustment factors for the Pennsylvania experience rate and the manual rate are described in more detail below.

Pennsylvania Experience Rate Adjustments

Change in Morbidity

The “Change in Morbidity" factor includes two adjustments.

The first adjustment reflects the impact of removing transitional experience from the single risk pool in the projection period, since Federated does not expect its transitional population to enroll in ACA-compliant plans in 2017. This factor is calculated as the ratio of experience period allowed claims PMPM for the ACA population over experience period allowed claims PMPM for the entire single risk pool.

The second adjustment reflects anticipated differences between the average morbidity of the ACA population in the experience period and the average morbidity of the population anticipated to be enrolled in ACA plans in the projection period. This factor is calculated as the ratio of the estimated morbidity level of the projected population over the estimated morbidity level of the ACA population in the experience period.

The morbidity level of the ACA population in the experience period was estimated using age/gender adjusted silver HHS-HCC risk scores calculated using data provided by Federated. An adjustment was made to high risk scores to mirror a pooling adjustment made to allowed claims (essentially, truncating and pooling risk scores across Federated’s nationwide small group block). The large claim pooling adjustment is described in more detail below under *Large Claim Pooling*.

Morbidity in the projection period was estimated based on the volume and morbidity levels of persisting ACA members and expected new sales. The following assumptions were used to estimate morbidity for these cohorts:

- The morbidity of Federated’s existing ACA members in Pennsylvania will not change materially from the experience period to the projection period, and 80% of existing members will persist at each annual renewal.
- New sales in 2016 and 2017 will follow the average morbidity level across Federated’s existing ACA members nationwide that were new enrollees in 2015 (those not previously enrolled in one of Federated’s non-ACA plans).

Change in Benefits

An adjustment was made to reflect anticipated changes in utilization due to cost sharing from the experience period to the projection period. This includes the impact of plan design changes (that is, uniform modifications made to cost sharing to remain within the actuarial value (AV) de minimis range), as well as changes in the mix of membership by plan from the experience period to the projection period.

The impact of differences in utilization due to cost sharing between the experience period and the projection period was calculated using induced utilization factors from Milliman's 2016 Commercial HCGs. The adjustment factor was calculated as the average induced utilization factor across the anticipated plan mix in the projected period over the average induced utilization factor across the plan mix in the experience period. The induced utilization factors from the HCGs reflect expected differences in utilization due to cost sharing for a standard population, and exclude expected differences in the health status of members expected to choose a particular plan.

Changes in Demographics and Geography

Adjustments were made to reflect the anticipated impact of differences between the average age, gender, and geographic mix in the experience period and projection period. The impact of changes in demographics is shown as the "Change in Demographics" factor in Table 5, while the impact of geography changes is shown in the "Change in Other" factor.

The demographic change factor was developed by calculating the ratio of the average age/gender factor for the population anticipated to be enrolled in the projection period to the average age/gender factor for the population in the experience period. The age/gender factors used in this calculation were from Milliman's 2016 Commercial HCGs.

The geographic change factor was calculated by taking the ratio of the average area factor expected in the projection period over the average area factor in the experience period. The area factors have been updated for 2017, and are described in Section 5.

Change in Network

Federated had two network options in 2015, and will have one network in 2017. The "Change in Network" adjustment factor includes the impact of cost differences between the average mix of enrollment across the two networks in the experience period and the single network offered in the projection period.

Cost level information for each network was provided by Federated based on their network contracting arrangements. The network change factor was calculated as the ratio of the average network cost level expected in the projection period over the average network cost level in the experience period.

Changes in Rx rebates

A small adjustment was made to account for anticipated differences in Rx rebates in the experience period and projection period. This adjustment is reflected in the "Change in Other" factor in Table 5.

Large Claim Pooling

An adjustment was made to account for the impact of pooling large claims in the experience period.

Federated's ACA claims (allowed charges) above an annual threshold of $250,000 per member (for medical and prescription drug services combined) were pooled and spread across Federated's 2015 nationwide small group ACA block on a per member per month basis.

This adjustment is reflected in the "Change in Other" factor in Table 5.

Manual Rate Adjustments

Change in Morbidity

Population morbidity adjustments were made to account for anticipated differences between the morbidity underlying the manual rate and the morbidity of the projected population. The morbidity adjustment was calculated as the ratio of the estimated morbidity level of the projected ACA population in Pennsylvania over the estimated morbidity level of

the manual rate ACA population in the experience period, and is reflected in the "Change in Morbidity" factor in Table 5.

Experience period morbidity was estimated using age/gender adjusted silver HHS-HCC risk scores, as described above for the Pennsylvania experience rate adjustment. Assumptions made to estimate the morbidity level in the projection period were also described above.

Change in Benefits

The manual rate was adjusted for the anticipated differences in utilization due to cost sharing from the data underlying the manual rate in the experience period to the population anticipated to be enrolled in the projection period. This includes the impact of differences in plan designs, as well as changes in the mix of membership by plan from the experience period to the projection period. The impact of this adjustment is reflected in the "Change in Benefits" factor in Table 5.

The impact of differences in utilization due to cost sharing between the experience period manual rate and the projection period was calculated using induced utilization factors from Milliman's 2016 Commercial HCGs (see Section 3). The adjustment was calculated as the average induced utilization factor across the anticipated plan mix in the projected period over the average induced utilization factor across the plan mix underlying the manual rate data in the experience period. The induced utilization factors from the HCGs reflect expected differences in utilization due to cost sharing for a standard population, and exclude expected differences in the health status of members expected to choose a particular plan.

Changes in Demographic and Geography

Population adjustments were made to account for differences between the age/gender and geographic mix underlying the manual rate data, and the age/gender and geographic mix of members anticipated to be enrolled in 2017. The impact of changes in demographics is shown as the "Change in Demographics" factor in Table 5, while the impact of geography changes is shown in the "Change in Other" factor.

The demographic adjustment was calculated as the ratio of the average age/gender factor for the population anticipated to be enrolled in the projection period to the average age/gender factor for the manual rate population in the experience period. The age/gender factors used in this calculation were from Milliman's 2016 Commercial HCGs.

Geographic area adjustments were made to account for differences between expected cost levels due to area in the manual rate data, and expected cost levels due to area for the members anticipated to be enrolled in Pennsylvania in 2017. Area adjustments were applied at two different levels in the manual rate development:

- *State adjustment.* The nationwide manual rate was first adjusted to reflect the cost and utilization level in Pennsylvania in the experience period. This adjustment was developed using Milliman's 2016 Commercial HCGs and state provider discount information provided by Federated. It reflects differences in Federated's network contracting arrangements as well as differences in utilization and practice patterns in Pennsylvania relative to the nationwide average.
- *Rating area adjustment.* The manual rate was further adjusted to account for anticipated changes in the distribution of membership by rating region within the state from the experience period to the projection period. The adjustment was calculated as the average area factor for the population anticipated to be enrolled in the projection period to the average area factor for the population in Pennsylvania in the experience period. The intra-state area factors were updated for 2017, and are described in Section 5. These factors do not reflect differences in morbidity, demographics, or benefits.

Changes in Network

The nationwide manual rate was adjusted to reflect the network cost level anticipated in the projection period using two steps.

- The nationwide manual rate was first adjusted to reflect the network cost level in Pennsylvania in the experience period (using the *state adjustment* described above in the Demographic and Geography Adjustments section).
- Next, we applied an adjustment to account for anticipated changes in network cost level in Pennsylvania between the experience period and the projection period. Cost level information used for this purpose was provided by Federated based on their network contracting arrangements.

This adjustment is reflected in the "Change in Other" factor in Table 5.

Changes in Rx Rebates

A small adjustment was made to account for anticipated differences in Rx rebates in the experience period and projection period. This adjustment is reflected in the "Change in Other" factor in Table 5.

Projected Index Rate

Table 2.1 summarizes the adjustments described above for the experience rate and the manual rate to develop projected EHB allowed claims for Federated's small group single risk pool in Pennsylvania. The allowed claims shown in Table 2.1 are trended to the first quarter rate effective period (that is, it has not yet been trended to the midpoint of the average rate effective period – this adjustment is applied in Table 2.2).

Note that the "Change in Other" factor in Table 5 of the PA Rate Exhibits includes an adjustment to reflect the impact of a difference between the allowed cost trend used to project the base period experience to the rate effective period (shown in Table 3), and the trend factor used to develop the quarterly rate adjustment. These trend factors will be different for the following reasons:

- The trend factor calculated in Table 5A is not an annual rate. It references the trend from Table 3, which includes an adjustment to shift the midpoint from a calendar year basis to the average rate effective period for first quarter rates (based on Federated's anticipated mix of enrollment by month throughout the year). Since Federated applies quarterly rate increases (described below), this adjustment will reflect the average number of months deviation from the midpoint of each quarter (July 1, October 1, January 1, April 1). The average annual allowed trend assumed in pricing is 7.0%.
- The quarterly trend factor used in rate development includes an adjustment to account for the leveraging impact of fixed cost sharing, while the calculated trend factor in Table 5A of the PA Rate Exhibits does not include this adjustment.

Table 2.1 Federated Mutual Insurance Company Projected EHB Allowed Claims – First Quarter Rate Effective Period			
Description	**Experience**	**Manual[1]**	**Total**
2015 Index Rate PMPM	$470.41	$464.26	
<u>Single Risk Pool Adjustments</u>			
Trend to Projection Period (2.09 years)[2]	1.152	1.152	
Population Morbidity[3]	0.947	0.964	
State Adjustment (manual rate only)[4]	1.000	0.985	
Net Pooling Charge	0.909	1.000	
Demographics	1.011	1.002	
Geographic Area	0.999	0.999	
Induced Utilization	0.981	1.012	
Provider Network	0.999	0.999	
Rx Rebates	0.999	0.999	
Adjusted Index Rate PMPM	$462.13	$514.27	
Credibility	78.9%	21.1%	100.0%
Projected EHB Allowed Claims PMPM			**$473.13**
Difference between allowed trend and the quarterly trend factor [5]			1.003
Projected Allowed EHB Claims PMPM – Table 5			***$474.54***

[1] The manual rate reflects Federated's nationwide calendar year 2015 ACA small group experience.

[2] Reflects an additional adjustment to shift the midpoint from a calendar year basis to the average rate effective period for first quarter rates (based on Federated's anticipated mix of enrollment by month throughout the year). Since Federated applies quarterly rate increases (described below), this adjustment will reflect the average number of months deviation from the midpoint of each quarter (July 1, October 1, January 1, April 1).

[3] Includes adjustments for: 1) the impact of removing transitional experience from the single risk pool in the projection period, and 2) anticipated morbidity differences between the ACA population included in the experience period index rate, and the projected ACA population.

[4] For the manual rate, reflects the *state adjustment* described below under Credibility Manual Rate Development. The *rating area adjustment* (also described below under Credibility Manual Rate Development) is reflected in the Geographic Area projection factor.

[5] Reflects the difference between the allowed cost trend used to project the base period experience to the rate effective period (shown in Table 3), and the trend factor used to develop the quarterly rate adjustment. The quarterly trend adjustments used in pricing are shown in Table 2.2 below.

Table 2.2 shows an illustration of the quarterly Index Rates, as well as the Projection Period Index Rate.

Table 2.2 Federated Mutual Insurance Company Small Group Index Rates Reflecting Quarterly Trends					
Description	**Quarter 1**	**Quarter 2**	**Quarter 3**	**Quarter 4**	**Total SRP**
Member Months	14,517	5,852	7,466	19,937	47,772
Base Allowed Claims PMPM[1]	$473.13	$473.13	$473.13	$473.13	$473.13
Months of Trend	0.00	3.00	6.00	9.00	5.06
Annual Trend Rate[2]	8.1%	8.1%	8.1%	8.1%	8.1%
Projection Period Index Rate PMPM[3]	$473.13	$482.40	$491.85	$501.49	**$489.03**

[1] Base allowed claims PMPM are consistent with the Projected EHB Allowed Claims shown in Table 2.1.
[2] Includes the leveraging impact of fixed cost sharing.
[3] Reflects the Index Rate for Projection Period shown on Worksheet 1, Section III of the URRT, and the Adjusted Allowed EHB Claims PMPM in Table 5 of the PA Rate Exhibits.

Market-Adjusted Index Rate

The Index Rate was adjusted for the allowable market-wide modifiers to develop the Market Adjusted Index Rate, as shown below in Table 2.3. This includes an adjustment for the expected net risk adjustment transfer in 2017 (the development of this assumption is described in Section 1.F). Because Federated is not offering plans on the exchange, there are no marketplace user fees.

Since the 2017 Index Rate PMPM is on an allowed basis and reflects the average quarterly trend, the net risk adjustment value was divided by the average paid-to-allowed ratio for the single risk pool and trended to the midpoint of the rate effective period.

The Market Adjusted Index Rate is not calibrated. That is, it reflects the expected average demographic and area characteristics of the single risk pool in 2017.

Table 2.3 Federated Mutual Insurance Company Market Adjusted Index Rate		
Description	**Value**	**Annotation**
2017 Index Rate PMPM	$489.03	(a)
Market Adjustments (paid basis)		
Net Risk Adjustment	$39.78	(b)
Average quarterly trend adjustment[1]	1.034	(c)
Market Adjustments (rate effective period)		
Net Risk Adjustment	$41.11	(d)=(b)*(c)
Paid-to-Allowed Ratio	0.843	(e)
Market Adjustments (allowed basis)		
Net Risk Adjustment	$48.75	(f)=(d)/(e)
Market Adjusted Index Rate PMPM	**$537.77**	**(g)=(a)+(f)**

[1] Trend to the midpoint of the average rate effective period (including the impact of leveraging due to fixed cost sharing).

B. Retention Items

Non-benefit expenses, profit, and risk load were provided by Federated.

Administrative Expense Load

The load for administrative expenses, excluding taxes and fees, is 11.0%. This load consists of 10.0% in general administrative expenses and 1.0% in commission expenses.

Profit (or Contribution to Surplus) & Risk Margin

Federated is targeting a profit margin of 3.08% before federal income tax (FIT) for Pennsylvania.

Taxes and Fees

Taxes and fees for 2017 include Pennsylvania state premium taxes, ACA fees for the Patient Centered Outcomes Research Trust Fund (PCORTF), and the risk adjustment user fee.

Note that the Health Insurer Tax for 2017 is zero, consistent with CMS guidance. The prorated impact of the Health Insurer Tax for plans that provide coverage in 2018 has not been included, nor has the prorated impact of the Health Insurer Tax for 2016 plans that provide coverage in 2017. Federated is assuming that the impact of the Health Insurer Tax after accounting for these offsetting adjustments will be immaterial over the 2017 rate effective period.

As Federated does not intend to offer any products on the exchange, there are no marketplace user fees.

Federated has chosen to allocate all administrative expenses, taxes, fees, and profit as an equal percentage of premium across all plans.

The following table illustrates the development of the administrative expense load, profit and risk load, and taxes and fees entries in Worksheet 1, Section III of the URRT and in Table 6 in the PA Rate Exhibits. Note that the risk adjustment user fee is reported separately in the URRT and in Table 6, so it is not shown in Table 2.4.

Table 2.4
Federated Mutual Insurance Company
Illustration of Retention Expenses

Retention Description	PMPM	% Premium	Basis	Annotation
Administrative Expense Load				
General Administrative Load	$52.16	10.0%	% of Premium	(a)
Commission Expense	$5.37	1.0%	% of Premium	(b)
Subtotal: Administrative Expense Load	$57.53	11.0%		(c)=(a)+(b)
Profit and Risk Load				
Target Profit (after FIT)	$10.48	2.0%	% of Premium	(d)
Subtotal: Profit and Risk Load	$10.48	2.0%		(d)
Taxes and Fees				
Pennsylvania State Premium Taxes[1]	$10.94	2.1%	% of Premium	(e)
PCORTF	$0.19	0.0%	PMPM	(f)
Health Insurer Fee	$0.00	0.0%	% of Premium	(g)
Federal Income Taxes	$5.64	1.1%	% of Premium	(h)
Subtotal: Taxes and Fees	$16.78	3.2%		(i)=(e)+(f)+(g)+(h)
Total Retention	**$84.79**	**16.2%**		**(j)=(c)+(d)+(i)**

[1] Includes state and local taxes, licenses, and fees.

C. Normalized Market-Adjusted Projected Allowed Total Claims

Table 7 of the PA Rate Exhibits provides the requested normalization factors weighted by projected membership for 2016 and 2017, respectively. To be clear, the normalization factors for 2016 reflect the projected mix of membership assumed in 2016 pricing, and the normalization factors for 2017 reflect the projected mix of membership expected for 2017. As described above in Section 1, the rate increase calculated after normalization may still reflect mix differences if the rating factors change between 2016 and 2017.

Age Calibration Factor

The age curve calibration factors were calculated as the weighted average age factor based on the projected distribution of membership by age and the standard age curve, applying an age factor of 0 for children in excess of the rating limit. The average whole number age was then determined by finding the age of a member that would have the closest factor to the weighted average age curve factor.

The age curve calibration factors and the average whole number ages for 2016 and 2017 are shown below in Table 2.5.

Table 2.5 Federated Mutual Insurance Company Calculation of the Age Curve Calibration Factor			
	Projected Age Distribution[1]		**Average Age**
Age Band	**2016**	**2017**	**Rating Factors**
0-20 (first 3)[2]	21.2%	21.5%	0.635
0-20 (4+)[3]	1.6%	1.6%	0.000
21-24	5.9%	5.9%	1.000
25-29	7.3%	7.7%	1.056
30-34	8.3%	8.2%	1.178
35-39	7.7%	7.8%	1.240
40-44	8.3%	8.2%	1.332
45-49	9.9%	9.2%	1.570
50-54	12.1%	11.5%	1.956
55-59	10.6%	11.0%	2.430
60-63	5.8%	6.1%	2.837
64+	1.4%	1.4%	3.000
Total	100.0%	100.0%	
Age Curve Calibration	**1.430**	**1.430**	
Weighted Average Age	**45**	**45**	

[1] Assuming membership is evenly distributed within each age band.
[2] Reflects the first three children on a family contract.
[3] Reflects the fourth and greater children on a family contract.

Prior to applying the allowable rating factors for age and geography, the Plan Adjusted Index Rates need to be divided by the age curve calibration factor.

Geographic Calibration Factor

The geographic calibration factors are equal to the weighted average geographic rating factor based on the projected distribution of membership by geographic area, and the area factors. Table 2.6 below shows the calculation of the geographic calibration factors for 2016 and 2017. Note that the 2017 area factors are updated from 2016. The development of these factors is described in Section 5.

Table 2.6 Federated Mutual Insurance Company Calculation of the Geographic Calibration Factor				
	2016		2017	
Rating Area	**Distribution**	**Area Factor**	**Distribution**	**Area Factor**
Rating Area 1	3.0%	0.970	2.1%	0.890
Rating Area 2	0.0%	0.970	1.5%	0.920
Rating Area 3	3.4%	1.000	2.5%	0.920
Rating Area 4	5.9%	0.970	11.4%	0.950
Rating Area 5	2.6%	0.970	0.5%	0.820
Rating Area 6	38.2%	1.000	33.9%	1.030
Rating Area 7	10.4%	1.000	11.9%	0.880
Rating Area 8	25.8%	1.130	28.5%	1.090
Rating Area 9	10.8%	1.000	7.9%	0.890
Calibration Factor	100.0%	**1.030**	100.0%	**1.001**

Prior to applying the allowed rating factors for age and geography, the Plan Adjusted Index Rates need to be divided by the geographic calibration factor.

Tobacco and Network Factors

Federated has chosen not to rate by tobacco use. Federated only offers one network in Pennsylvania, so the provider network adjustment is 1.00 for all plans.

Benefit Richness

The Projected Allowed Total Claims are already normalized around the single risk pool in the projection period, so no additional adjustment is required here.

D. Components of Rate Change

Table 8 shows the components of the change in the proposed 2017 Calibrated Plan Adjusted Index Rate PMPM (CPAIR) over the 2016 CPAIR. Note that the 2016 CPAIRs in Table 10 of the PA Rate Exhibits have been adjusted to reflect the impact of the third quarter rate increase filing. However, the build-up illustrated in Table 8 is based on base period allowed claims and the projection adjustments used in the original 2016 filing.

Base period allowed claims before normalization (row B in Table 8) for 2016 reflect blended base period allowed claims for the 2016 Pennsylvania experience based rate and the 2016 nationwide manual rate. This is consistent with the calculation of total base period allowed claims for 2017 (from Table 5).

For 2017, the Change in Miscellaneous Items (row G in Table 8) reflects the difference between the average quarterly trend adjustment used in pricing and the trend values calculated in Table 5A. See Section 2A of this memo for a more detailed explanation of this difference.

For 2016, the Change in Miscellaneous Items reflects the following adjustments:

- The full impact of the average quarterly trend adjustment, including the average impact of leveraging of fixed cost sharing.
- The difference between the retention calculated from the CPAIR in row A of Table 8 and the retention assumed in the original 2016 filing. The retention components are calculated based on the percentage of premium values from Table 9 and the CPAIR in row A. As described above, the CPAIR in Table 8 reflects the rate increase implemented in the third quarter of 2016, so the PMPM retention components calculated in the

table are overstated from the original 2016 filing. The Change in Miscellaneous Items includes an adjustment to remove the impact of the third quarter filing from the retention values reported.

The values in row H of Table 8 are different from row A for the following reasons:

- The 2016 CPAIR reflects the impact of the third quarter rate increase filing, while the values in row H reflect the original 2016 filing. That is, the rate increase displayed in row H approximates the cumulative rate change over the prior 12 months, while the rate increase in row A approximates the rate change that will be experienced by members on average (with the first and second quarter members receiving the impact of both the quarterly filing and the 2017 annual filing and the third and fourth quarter members only receiving the annual filing increase).
- The average 2016 and 2017 CPAIRs (row A) are weighted on the mix of members by plan in January 2016, but they are normalized around projected mix of membership assumed in pricing.
- The adjustments under row D (Change in Normalized Allowed Claims Adjustment Components) and row E (Change in Allowable Plan Adjusted Level Components) reflect the projected mix of membership assumed in pricing for 2016 and 2017, while the adjustments under row F (Change in Retention Components) reflect the mix of membership by plan as of January 2016 for both years (since they're calculated as a percentage of the average CPAIR in row A).

SECTION 3. PLAN RATE DEVELOPMENT

The development of the Calibrated Plan Adjusted Index Rates from the Market Adjusted Index Rate is provided in Table 10 of the PA Rate Exhibits. Note that the rate increase calculated in Table 10 will not equal the rate increase calculated according to the URR instructions for the following reasons:

- The calculated 2016 and 2017 CPAIRs reflect first quarter rates for a 21 year old. That is, they are member weighted, not revenue weighted.
- The overall average rate increase will vary by region, since the area factors are changing in 2017. The breakdown of the rate increase by region does not happen until Table 11 in the PA Rate Exhibits.
- The 2016 CPAIRs are trended to the average rate effective period assumed in pricing for 2016, and do not reflect the actual distribution of enrollment by quarter as of January 2016. Since the quarterly trend factor is changing from 2016 to 2017, the rate increase will vary by quarter and will be impacted by the assumed mix of membership by quarter.

Support for the allowable plan level adjustments shown in columns K through P and R through T is provided below.

Induced Demand and Pricing AV

Induced demand factors (i.e., Benefit Richness) and paid-to-allowed ratios (i.e., Pricing AVs) for each plan were developed using Milliman's 2016 Commercial HCGs. The data underlying the HCGs corresponds to large employer experience.

Data from Milliman's HCGs were calibrated to Federated's average nationwide small group allowed experience in 2015 for the ACA plan with the most enrollment, and trended forward to the midpoint of 2017. An adjustment was made to reflect regional cost and utilization levels. The regional adjustment reflects anticipated differences in network contracting arrangements and the underlying cost level of services provided in Pennsylvania relative to the other states where Federated operates. For clarity, this adjustment reflects geographic variations expected among groupings of states with similar cost levels, and was developed using the *state adjustments* and network change adjustments described in Section 2A.

Allowed and paid estimates for each plan were then developed by applying Federated's plan designs, including adjustments for coverage and cost sharing, at the detailed service category level. The induced demand factors shown in Table 10 reflect expected differences in allowed values by plan, and the Pricing AVs reflect the expected paid-to-allowed ratio for each plan. The allowed and paid estimates from this analysis exclude expected differences in the health status of members expected to choose a particular plan. Specifically, every benefit plan was effectively valued assuming the same cohort of members was enrolled in it.

Note that the overall average Pricing AV calculated in Table 10 does not equal the average paid-to-allowed value shown in Worksheet 1, Section III of the URRT for two reasons:

- The value in the URRT is weighted on induced utilization and membership, while the value in Table 10 is weighted on membership only.
- The value in the URRT reflects the projected mix of membership by plan over the rate effective period, while the value in Table 10 is weighted on the mix of membership as of January 2016.

Similarly, the overall average Induced Demand factor does not equal 1.00 because it is weighted on membership as of January 2016 instead of projected membership over the 2017 rate effective period.

Benefits in Addition to EHBs

Federated does not offer any benefits in addition to EHBs.

Provider Network Adjustment

Federated will only offer one network in Pennsylvania in 2017, so the provider network adjustment is 1.00 for all plans.

Catastrophic Eligibility

This adjustment is not applicable to the small group market.

Tobacco Surcharge Adjustment

Federated has chosen not to apply a tobacco surcharge.

Admin Costs, Taxes, Fees, and Profit

Federated has chosen to allocate administrative expenses, taxes, and fees as an equal percentage of premium for all plans. Support for these retention items was provided in Section 2B.

SECTION 4. PLAN PREMIUM DEVELOPMENT FOR 21-YEAR OLD NON-TOBACCO USER

Table 11 in the PA Rate Exhibits calculates the average change in the age 21-year old premium rate. Since the CPAIRs entered in Table 10 reflect the impact of the third quarter rate increase filing, this rate increase approximates the change over current rates.

SECTION 5. PLAN FACTORS

A. Age and Tobacco Factors

Federated's age rating factors follow the age rating curve prescribed by CMS. Federated has chosen not to rate by tobacco use.

B. Geographic Factors

Federated's geographic rating factors have been updated for 2017 based on Federated's historical allowed claim cost data (risk-adjusted to remove the impact of morbidity differences by area) and benchmark area factors from Milliman's HCGs. In order to mitigate the rate change experienced by members due to changes in area rating factors, an adjustment was also made to partially dampen the transition from Federated's current area factors to the new factors.

The original and revised area factors are shown below in Table 5.1.

Table 5.1
Federated Mutual Insurance Company
Geographic Rating Factors

	Area Factor		Normalized Area Factor[1]	
Rating Area	**2016**	**2017**	**2016**	**2017**
Rating Area 1	0.970	0.890	0.940	0.889
Rating Area 2	0.970	0.920	0.940	0.919
Rating Area 3	1.000	0.920	0.969	0.919
Rating Area 4	0.970	0.950	0.940	0.949
Rating Area 5	0.970	0.820	0.940	0.819
Rating Area 6	1.000	1.030	0.969	1.029
Rating Area 7	1.000	0.880	0.969	0.879
Rating Area 8	1.130	1.090	1.095	1.089
Rating Area 9	1.000	0.890	0.969	0.889

[1] Normalized around projected 2017 membership.

C. Network Factors

Federated will only offer one network in Pennsylvania in 2017, so the provider network adjustment is 1.00 for all plans.

D. Service Area Composition

The plans included in this filing will be offered in all rating areas (in their entirety).

E. Composite Rating

Federated does not use composite rating.

SECTION 6. ACTUARIAL CERTIFICATIONS

I am a Principal & Consulting Actuary with the firm of Milliman, Inc. Federated Mutual Insurance Company engaged me to provide the opinion herein.

Guidelines issued by the American Academy of Actuaries require actuaries to include their professional qualifications in all actuarial communications. I am a member of the American Academy of Actuaries, and I meet its qualification standards to perform the analysis and render the actuarial opinion contained herein.

I certify to the best of my knowledge and judgment:

1. All factor, benefit, and other changes from the prior approved filing have been disclosed in the actuarial memorandum.

2. New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.

3. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.

Differences between the projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience.

PART II WRITTEN DESCRIPTION JUSTIFYING THE RATE INCREASE

The purpose of this document is to provide a brief, non-technical, consumer-oriented explanation of the rate increase subject to review.

Scope and range of the rate increase

The average rate increase for the small employer health insurance product included in this filing is 30.4%. The increase varies between 16.9% and 31.9% across plans enrolled as of January 2016. These rate increases are calculated using the methodology required by the State of Pennsylvania. The increase for members within a plan will also vary, since other factors within the filing are changing. The main drivers of the rate increase include:

- Projected increases in medical utilization and cost (commonly referred to as “trend”).
- An increase in anticipated risk adjustment transfer payments. Under healthcare reform, the government operates a risk adjustment program that transfers premium dollars from plans with healthier than average members to plans with relatively less healthy members. When 2016 premium rates were set, very little information on how this program would affect Federated was available. Now that more information is available, Federated expects that it will have to pay more money into the program than was expected when 2016 rates were set.

The rate increase varies by plan because of changes in deductibles and other cost sharing values required under federal rules, and also based on updated analysis of the relative cost of each plan design. It will also vary because Federated is revising the rating factors for each geographical rating area in Pennsylvania, and by renewal date. Federated has already revised rates upward for groups sold or renewing in the last half of 2016. The increases above include the impact of this increase on the groups sold or renewed in the first half of 2016 which are still on a lower rate level. There are a total of 4,542 covered lives in Pennsylvania that will be affected by the rate increase as of January 2016.

Financial experience of the product

Federated’s 2015 historical claim experience for Affordable Care Act (ACA) plans in Pennsylvania has been worse than expected in pricing, and risk adjustment transfer payments are expected to be higher than originally expected, resulting in significant losses.

At the time that original 2016 rates were developed, Federated expected the health status of its population would be similar to the statewide average. Federated’s current expectation for 2016 and 2017 is that its members in Pennsylvania will be healthy relative to the statewide average, resulting in transfer payments into the risk adjustment pool. However, any estimates of risk adjustment for 2015, 2016, and 2017 are still subject to significant uncertainty, particularly for insurers with small market share like Federated.

Historical experience suggests that a rate increase is needed in 2017 to cover the costs of the population anticipated to be enrolled. The rate increase is expected to improve the projected financial experience of the product.

Changes in medical service costs

Federated expects there to be an annual increase of 8% in medical cost and utilization on claim cost after member cost sharing (7% on allowed cost before member cost sharing) between 2015 and 2017. This is based on a review of industry trends and Federated’s historical experience. Costs for prescription drugs and outpatient services are expected to increase at a higher rate, while costs for inpatient and professional services are expected to increase at a lower rate.

Changes in benefits

There are minor differences in cost sharing between the plans offered in 2016 and the plans that will be offered in 2017 (in order to comply with federal actuarial value requirements), but there are no material differences in covered

benefits. The changes in cost sharing design have a small impact on the overall rate increase, but do contribute to differences in the increase that applies to each benefit plan.

Administrative costs and anticipated profits

As a percentage of premium, administrative costs are expected to decrease from 2016 to 2017, driven by the expiration of the federal reinsurance program and the suspension of the Health Insurer Tax for the 2017 payment year.

EXHIBIT 1. GENERAL INFORMATION

Document Overview

This document contains the Part III Actuarial Memorandum for Federated Mutual Insurance Company's (Federated's) small group block of business. The rates in this filing will apply to new and renewing ACA-compliant policies effective January 1, 2017. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template. It is intended to replace the version dated June 23, 2016.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I Unified Rate Review Template, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes. Please note that certain values in this actuarial memorandum will differ slightly from values reported in the URRT in cases where the URRT requires rounding rules different than those used in rate development.

This information is intended for use by the State of Pennsylvania Insurance Department, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of Federated's small group rate filing. However, we recognize that this memorandum may become a public document. Milliman makes no representations or warranties regarding the contents of this memorandum to other users. Likewise, other users of this memorandum should not place reliance upon this actuarial memorandum that would result in the creation of any duty or liability for Milliman under any theory of law.

Variability of Results

Differences between projections in this analysis and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent the assumptions in this memorandum are not realized.

Interpretation of Law/Regulations

The analysis in this report is based on our current understanding of federal and state rules and regulations. To the extent that these rules and regulations continue to evolve, our work may be subject to change. Milliman is not a law firm. Nothing in this correspondence should be construed as legal advice. In the event a legal interpretation is required, we recommend review by legal counsel.

Company Identifying Information

Company Legal Name: Federated Mutual Insurance Company
State: The State of Pennsylvania has regulatory authority over these policies.
HIOS Issuer ID: 80148
Market: Small Group
Effective Date: January 1, 2017

Company Contact Information

Primary Contact Name: Kelly Rooks
Primary Contact Telephone Number: 1-800-533-0472 ext. 444-6871
Primary Contact Email: groupratefiling@fedins.com

Description of Benefits

The form listed above is a Preferred Provider Organization (PPO) health insurance product marketed to small employers. Benefits are comprehensive in nature, and include prescription drugs.

Each plan included in this filing provides coverage for the essential health benefits, has an annual out-of-pocket limit, and has an actuarial value that complies with one of the four metal tiers.

EXHIBIT 2. PROPOSED RATE INCREASE(S)

Table 2.1 provides the estimated average, minimum, and maximum rate increase effective January 1, 2017.

Table 2.1 Federated Mutual Insurance Company Proposed Rate Increase			
	Rate Increase		
Description	**Average[1]**	**Q1 & Q2[2]**	**Q3 & Q4[3]**
Minimum	-2.3%	11.5%	-2.3%
Maximum	47.2%	47.2%	29.9%
Average	25.8%	35.1%	21.1%

[1] Represents a blend of the increase for members who received the July 1, 2016 increase and those who did not (i.e. those sold or renewed in the first two quarters of the year).
[2] Represents the rate increase over the initial filing effective January 1, 2016.
[3] Represents the rate increase over the third quarter filing effective July 1, 2016.

The rate increases provided in Table 2.1 are calculated for members enrolled in an ACA-compliant plan as of January 2016. Some of those members have not yet renewed onto a 2016 rate level. The increases assume that those members will renew at their next renewal date onto the most similar 2016 plan design. The minimum and maximum values are on a member basis.

The average rate increase reflects the weighted average 2017 table rate over the weighted average 2016 table rate for those members. A base rate modification filing for rates effective in the third or fourth quarter 2016 was recently approved and is reflected in Table 2.1. Therefore, rate increases for members renewing in the third and fourth quarters will be lower, and rate increases for members enrolling in the first and second quarters will be higher. This is one reason for the wide spread range from the minimum to maximum rate increase shown in the table. The rate increase also varies from member to member because the plan and area factors are being revised in this filing, as described below.

Note that the average rate increase shown in Table 2.1 will not equal the Product Rate Increase % displayed on Worksheet 2 of the URRT. This is because the rate increase shown in Table 2.1 reflects the average increase weighted on a snapshot of existing members renewing their plans, while the Product Rate Increase % weights the prior 12-month cumulative rate change on projected 2017 membership and current average premium.

The Pennsylvania Insurance Department prescribes a methodology for calculating the rate increase that differs from the methodology outlined in the Unified Rate Review instructions. Therefore, the average, minimum, and maximum rate increases referenced in this memorandum will not equal the rate increases reported in other Pennsylvania-specific documents or in SERFF.

Reason for Rate Increase

The rates for these products are being revised to account for the following factors:

- The impact of differences between the average morbidity, demographic mix, and plan mix that were projected for the single risk pool in 2016 and the morbidity, demographic mix, and plan mix underlying the population anticipated to be enrolled in the single risk pool in 2017. Exhibits 5 and 6 provide additional detail on the population morbidity and mix assumptions.
- The impact of cost and utilization trend from 2016 to 2017, as well as the impact of differences between the 2016 and 2017 quarterly trend factors. The trend assumptions are described in more detail in Exhibit 5.

- Differences between the net risk adjustment transfer estimate reflected in 2016 premium rates and the net risk adjustment transfer estimate reflected in 2017 premium rates. Exhibit 9 provides detail on the net risk adjustment transfer estimate for 2017.
- Differences in plan designs and pricing between 2016 and 2017.
- Changes in administrative costs, taxes and fees, and profit between 2016 and 2017. Exhibit 10 provides a breakdown of the non-benefit expense and profit assumptions for 2017.

Rate Increase Variations by Plan

Given that there were uniform modifications in benefit designs for some plans, and the benefit factors were re-priced between 2016 and 2017, the rate increase varies by plan.

EXHIBIT 3. EXPERIENCE PERIOD PREMIUM AND CLAIMS

Paid Through Date

The experience reported on Worksheet 1, Section I of the URRT includes earned premium and claims incurred in Pennsylvania for the period of January 1, 2015 through December 31, 2015, with claims paid through January 31, 2016. An adjustment was made for estimated IBNR, as described in more detail below.

Premiums (net of MLR Rebate) in Experience Period

Table 3.1 below shows experience period earned premium, expected risk adjustment receivables, expected MLR rebates, and earned premium net of risk adjustment receivables and MLR rebates on a per member per month (PMPM) basis for the single risk pool (including ACA and transitional experience). Earned premiums were provided by Federated from their internal systems. The expected risk adjustment amount is based on Federated's accrual for 2015 financial reporting. Federated has stated that it does not expect to pay any rebates for 2015 incurrals.

Table 3.1 Federated Mutual Insurance Company Premium Net of Risk Adjustment Receivables and MLR Rebates	
2015 earned premium PMPM	$378.17
Expected risk adjustment receivables (payables) PMPM	($55.83)
2015 MLR rebates PMPM	$0.00
2015 earned premium net of risk adjustment receivables and MLR rebates PMPM	**$322.34**

Allowed and Incurred Claims Incurred During the Experience Period

The experience reported on Worksheet 1, Section I of the URRT shows earned premium, allowed claims, and paid claims for the period of January 1, 2015 through December 31, 2015, with claims paid through January 31, 2016.

Medical and prescription drug allowed and paid claim experience was provided by Federated. Medical claims are processed by Federated using their internal data systems. Allowed claims are reported directly in the system, and are not calculated from other fields. Prescription drug claims are processed by a Pharmacy Benefit Manager (PBM). Federated has no capitation arrangements for these products.

Completion factors for medical services and prescription drugs were provided by Federated at the service category level on an allowed and paid basis. Federated estimates IBNR using traditional actuarial practices and experience for their entire block of group medical business, which consists of similar products in 23 states. Completion factors are calculated across the entire block of group medical business due to the small amount of experience in each state. Federated has stated that reserves for the experience period were neither unusually high nor unusually low.

Table 3.2 below shows the percentage of total reported paid and allowed claims processed inside and outside of Federated's claim systems, and the percentage of claims estimated to be incurred but not yet reported as of January 2016.

Table 3.2 Federated Mutual Insurance Company Experience Period Allowed Claims, Paid Claims, and IBNR				
	Medical		Prescription Drugs[1]	
Service Type	Allowed	Paid	Allowed	Paid
% Processed internally	93.5%	92.7%	5.1%	5.5%
% Processed externally	0.0%	0.0%	93.9%	93.3%
% IBNR	6.5%	7.3%	1.0%	1.2%

[1] Claims processed internally are for drugs dispensed in a professional, inpatient, or outpatient setting with line item billing.

Upon review of Federated's utilization data, it appeared that consistent utilization counts representing the same type of service were not available, and the average charge results per unit implied by the data did not appear to be reliable based on those counts. Therefore, the average charge values by service category in Worksheet 1, Section II were developed based on benchmark data from Milliman's 2016 Commercial *Health Cost Guidelines*™ (HCGs), calibrated to Federated's population. The corresponding utilization counts were calculated based on the per member per month values and the assumed average charge.

EXHIBIT 4. BENEFIT CATEGORIES

Mapping of Federated Reporting Categories to URRT Service Categories

Federated categorizes utilization and cost information by benefit category using their internal claim reporting categories. Table 4.1 provides Federated's service categories, and the mapping from Federated category to URRT category.

Table 4.1
Federated Mutual Insurance Company
Mapping from Federated Reporting Category to URRT Service Category

Federated Reporting Category	URRT Service Category
Inpatient Facility	Inpatient Hospital
Outpatient Facility	Outpatient Hospital
Professional	Professional
Other and Miscellaneous	Other Medical
Pharmacy	Prescription Drug
[1]	Capitation

[1] Federated did not have capitation arrangements in the experience period, and there are no capitation arrangements anticipated for the projection period.

Federated's Methodology for Assigning Claims to a Reporting Category

Federated's internal claim system uses the following methodology to assign claims to their internal reporting categories.

Inpatient Facility

Facility and accommodation charges that appear on an 837I or UB with an accommodation charge.

For charges that are combined into a single fee due to provider billing or network arrangements, all charges (professional and facility) are assigned to the facility category.

Outpatient Facility

Facility charges that appear on an 837I or UB without an accommodation charge.

For charges that are combined into a single fee due to provider billing or network arrangements, all charges (professional and facility) are assigned to the facility category.

Professional

Provider charges that appear on 837P or HCFA that are not included for services covered under "Other"

Other and Miscellaneous

Charges submitted on and 837P or HCFA bill for Ambulance Services, Dental, Durable medical Equipment, Home Health Care, Medical Supplies, Prosthetics or Orthotics. Also includes any other services not attributed to one of the other categories.

Pharmacy

Charges processed by a PBM for prescription drugs dispensed by network pharmacies and charges for prescription drugs dispensed in a professional, inpatient, or outpatient setting with line item billing. The amount reported in Worksheet 1 of the URRT is net of pharmacy rebates.

"Other" Utilization Description in the URRT

The utilization description in the URRT is listed as "Other" for the "Other" service category, which includes a mix of visits, cases, and procedures.

EXHIBIT 5. PROJECTION FACTORS

This section includes a description of the factors used to project the experience period allowed claims to the projection period, as well as supporting information on how these factors were developed.

Changes in the Morbidity of the Population Insured

The morbidity change factor includes two adjustments.

The first adjustment reflects the impact of removing transitional experience from the single risk pool in the projection period, since Federated does not expect its transitional population to enroll in ACA-compliant plans in 2017. This factor is calculated as the ratio of experience period allowed claims PMPM for the ACA population over experience period allowed claims PMPM for the entire single risk pool.

The second adjustment reflects anticipated differences between the average morbidity of the ACA population in the experience period and the average morbidity of the population anticipated to be enrolled in ACA plans in the projection period. This factor is calculated as the ratio of the estimated morbidity level of the projected population over the estimated morbidity level of the ACA population in the experience period.

The morbidity level of the ACA population in the experience period was estimated using age/gender adjusted silver HHS-HCC risk scores calculated using data provided by Federated. An adjustment was made to high risk scores to mirror a pooling adjustment made to allowed claims (essentially, truncating and pooling risk scores across Federated's nationwide small group block). The large claim pooling adjustment is described in more detail below under Other Adjustments.

Morbidity in the projection period was estimated based on the volume and morbidity levels of persisting ACA members and expected new sales. The following assumptions were used to estimate morbidity for these cohorts:

- The morbidity of Federated's existing ACA members in Pennsylvania will not change materially from the experience period to the projection period, and 80% of existing members will persist at each annual renewal.
- New sales in 2016 and 2017 will follow the average morbidity level across Federated's existing ACA members nationwide that were new enrollees in 2015 (those not previously enrolled in one of Federated's non-ACA plans).

Changes in Benefits

The "Other" adjustment reflects anticipated changes in utilization due to cost sharing from the experience period to the projection period. This includes the impact of plan design changes (that is, uniform modifications made to cost sharing to remain within the actuarial value (AV) de minimis range), as well as changes in the mix of membership by plan from the experience period to the projection period.

The impact of differences in utilization due to cost sharing between the experience period and the projection period was calculated using induced utilization factors from Milliman's 2016 Commercial HCGs. The adjustment factor was calculated as the average induced utilization factor across the anticipated plan mix in the projected period over the average induced utilization factor across the plan mix in the experience period. The induced utilization factors from the HCGs reflect expected differences in utilization due to cost sharing for a standard population, and exclude expected differences in the health status of members expected to choose a particular plan.

Changes in Demographics and Geography

The "Other" adjustment reflects the anticipated impact of differences between the average age, gender, and geographic mix in the experience period and projection period.

The demographic change factor was developed by calculating the ratio of the average age/gender factor for the population anticipated to be enrolled in the projection period to the average age/gender factor for the population in the experience period. The age/gender factors used in this calculation were from Milliman's 2016 Commercial HCGs.

The geographic change factor was calculated by taking the ratio of the average area factor expected in the projection period over the average area factor in the experience period. The area factors have been updated for 2017, and are described in Exhibit 17.

Other Adjustments

In addition to the benefit, demographic, and geographic adjustments described above, the "Other" factor also includes the impact of network changes, minor differences between Rx rebates in the experience period and anticipated Rx rebates in the projection period, and large claim pooling.

Network changes

Federated had two network options in 2015, and will have one network in 2017. The "Other" adjustment factor includes the impact of cost differences between the average mix of enrollment across the two networks in the experience period and the single network offered in the projection period.

Cost level information for each network was provided by Federated based on their network contracting arrangements. The network change factor was calculated as the ratio of the average network cost level expected in the projection period over the average network cost level in the experience period.

Changes in Rx rebates

A small adjustment was made to account for anticipated differences in Rx rebates in the experience period and projection period.

Large claim pooling

An adjustment was made to account for the impact of pooling large claims in the experience period.

Federated's ACA claims (allowed charges) above an annual threshold of $250,000 per member (for medical and prescription drug services combined) were pooled and spread across Federated's 2015 nationwide small group ACA block on a per member per month basis.

Trend Factors (cost/utilization)

The trend factors reflect anticipated changes due to medical and prescription drug inflation, and anticipated changes in utilization. Trends were developed based on Milliman internal benchmark trends, historical trends in Federated's nationwide commercial group experience data (small and large group), and actuarial judgment.

The annual allowed trend used to project claims from 2015 to 2017 was 7.0%, made up of 1.4% utilization trend and 5.5% cost trend. Note that the trend factors shown on Worksheet 1 of the URRT reflect an additional adjustment to shift the midpoint from a calendar year basis to the average rate effective period for first quarter rates (based on Federated's anticipated mix of enrollment by month throughout the year). Since Federated applies quarterly rate increases (described below), this adjustment will reflect the average number of months deviation from the midpoint of each quarter (July 1, October 1, January 1, April 1).

Federated intends to recognize trend on a quarterly basis. The quarterly trend adjustment will be 1.96%.
The quarterly trend adjustment reflects the assumed annual trend of 7.0%, with an upward adjustment of 1.0% to account for the leveraging impact of fixed cost sharing.

EXHIBIT 6. CREDIBILITY MANUAL RATE DEVELOPMENT

Source and Appropriateness of Experience Data Used

Federated sells similar small group products in 23 states throughout the country. Nationwide calendar year 2015 experience for members enrolled in ACA plans was combined to develop a fully credible manual rate.

Adjustments Made to the Data

Adjustments were made to the manual rate to account for trend, expected changes in Rx rebates, and anticipated differences between the demographics, area, benefits, provider network mix, and morbidity in the experience period and the projection period.

Trend (Cost/Utilization)

The manual rate data was trended to the midpoint of the projection period using the allowed trends shown in Exhibit 5.

Population Morbidity Adjustments

Population morbidity adjustments were made to account for anticipated differences between the morbidity underlying the manual rate and the morbidity of the projected population. The morbidity adjustment was calculated as the ratio of the estimated morbidity level of the projected ACA population in Pennsylvania over the estimated morbidity level of the manual rate ACA population in the experience period.

Experience period morbidity was estimated using age/gender adjusted silver HHS-HCC risk scores, as described above in Exhibit 5. Assumptions made to estimate the morbidity level in the projection period were also described in Exhibit 5.

Benefit Adjustments

The manual rate was adjusted for the anticipated differences in utilization due to cost sharing from the data underlying the manual rate in the experience period to the population anticipated to be enrolled in the projection period. This includes the impact of differences in plan designs, as well as changes in the mix of membership by plan from the experience period to the projection period.

The impact of differences in utilization due to cost sharing between the experience period manual rate and the projection period was calculated using induced utilization factors from Milliman's 2016 Commercial HCGs. The adjustment was calculated as the average induced utilization factor across the anticipated plan mix in the projected period over the average induced utilization factor across the plan mix underlying the manual rate data in the experience period. The induced utilization factors from the HCGs reflect expected differences in utilization due to cost sharing for a standard population, and exclude expected differences in the health status of members expected to choose a particular plan.

Demographic and Geography Adjustments

Population adjustments were made to account for differences between the age/gender and geographic mix underlying the manual rate data, and the age/gender and geographic mix of members anticipated to be enrolled in 2017.

The demographic adjustment was calculated as the ratio of the average age/gender factor for the population anticipated to be enrolled in the projection period to the average age/gender factor for the manual rate population in the experience period. The age/gender factors used in this calculation were from Milliman's 2016 Commercial HCGs.

Geographic area adjustments were made to account for differences between expected cost levels due to area in the manual rate data, and expected cost levels due to area for the members anticipated to be enrolled in Pennsylvania in 2017. Area adjustments were applied at two different levels in the manual rate development:

- *State adjustment.* The nationwide manual rate was first adjusted to reflect the cost and utilization level in Pennsylvania in the experience period. This adjustment was developed using Milliman's 2016 Commercial HCGs and state provider discount information provided by Federated. It reflects differences in Federated's network contracting arrangements as well as differences in utilization and practice patterns in Pennsylvania relative to the nationwide average.
- *Rating area adjustment.* The manual rate was further adjusted to account for anticipated changes in the distribution of membership by rating region within the state from the experience period to the projection period. The adjustment was calculated as the average area factor for the population anticipated to be enrolled in the projection period to the average area factor for the population in Pennsylvania in the experience period. The intra-state area factors were updated for 2017, and are described in Exhibit 17. These factors do not reflect differences in morbidity, demographics, or benefits.

Provider Network Adjustments

The nationwide manual rate was adjusted to reflect the network cost level anticipated in the projection period using two steps.

- The nationwide manual rate was first adjusted to reflect the network cost level in Pennsylvania in the experience period (using the *state adjustment* described above in the Demographic and Geography Adjustments section).
- Next, we applied an adjustment to account for anticipated changes in network cost level in Pennsylvania between the experience period and the projection period. Cost level information used for this purpose was provided by Federated based on their network contracting arrangements.

Rx Rebate Adjustment

A small adjustment was made to account for anticipated differences in Rx rebates in the experience period and projection period.

Inclusion of Capitation Payments

There are no capitated services in the experience used to develop the manual rate, and Federated does not anticipate capitation arrangements in the projection period.

EXHIBIT 7. CREDIBILITY OF EXPERIENCE

Description of Credibility Method Used

The method used to determine credibility of the base period experience was based on an internal Milliman study of commercial credibility. The study uses an approach similar to the one used by CMS to develop a credibility formula for Medicare Advantage/Prescription Drug plans, where:

$$\text{Credibility} = \sqrt{\frac{\text{Experience Member Months}}{\text{Full Credibility Threshold}}}$$

The full credibility threshold was set to 48,000 member months. This threshold was estimated to have a similar level of predictive accuracy as the CMS requirement for prediction accuracy in the Medicare Advantage space (i.e., within 10% of the actual value, 95% of the time, if the only source of variability is random fluctuations in claim costs).

Resulting Credibility Level Assigned to the Base Period Experience

The single risk pool data reported in Worksheet 1 of the URRT includes experience for members enrolled in both ACA plans and transitional plans. Since Federated does not expect any members enrolled in a transitional plan in the base period to enroll in an ACA plan in the projection period, we only counted base period ACA member months when determining the credibility to apply.

Since base period experience for Pennsylvania is also included in the nationwide credibility manual rate, a downward adjustment was applied to the experience period credibility in order to avoid double counting the base period experience. This adjustment was calculated by taking into consideration the proportion of the manual rate experience that is from the Pennsylvania base experience.

The calculation of the credibility of the base period experience is shown below in Table 7.1.

Table 7.1
Federated Mutual Insurance Company
Credibility of Base Period Experience

Description	Value	Annotation
Member Months - Base Experience	31,010	(a)
Member Months - Manual Rate	444,959	(b)
Full Credibility Threshold – Member Months	48,000	(c)
% Base Experience in the Manual Rate	7.0%	(d) = (a)/(b)
Credibility of Base Experience (no adjustment)	80.4%	(e) = sqrt[(a)/(c)]
Adjusted Credibility of Base Experience	**78.9%**	**(f) = [(e)-(d)] / [1-(d)]**

EXHIBIT 8. PAID TO ALLOWED RATIO

The following table provides support for the average paid-to-allowed ratio shown in Worksheet 1, Section III of the URRT. The table also demonstrates that the ratio is consistent with membership projections by plan included in Worksheet 2.

Table 8.1 Federated Mutual Insurance Company Average Paid-to-Allowed Factor Support	
Description	**Value**
Average projected allowed PMPM[1] Average projected incurred claims PMPM[1], [2]	$473.13 $399.03
Average projected paid-to-allowed ratio[3]	**84.3%**
Average AV metal value[4]	**81.9%**

[1] Member month-weighted average from Worksheet 2, Section IV.
[2] Expected risk adjustment transfer payments have been removed from incurred claims on Worksheet 2 before calculating the average.
[3] Consistent with Worksheet 1, Section III.
[4] Based on actuarial values calculated using the federal actuarial value calculator, weighted on projected allowed cost by metal level.

Paid-to-allowed ratios for each plan were developed using Milliman's 2016 Commercial HCGs. The data underlying the HCGs corresponds to large employer experience.

Data from Milliman's HCGs were calibrated to Federated's average nationwide small group allowed experience in 2015 for the ACA plan with the most enrollment, and trended forward to the midpoint of 2017. An adjustment was made to reflect regional cost and utilization levels. The regional adjustment reflects anticipated differences in network contracting arrangements and the underlying cost level of services provided in Pennsylvania relative to the other states where Federated operates. For clarity, this adjustment reflects geographic variations expected among groupings of states with similar cost levels, and was developed using the *state adjustments* and network change adjustments described in Exhibit 6.

Allowed and paid estimates for each plan were then developed by applying Federated's plan designs, including adjustments for coverage and cost sharing, at the detailed service category level. Allowed estimates by plan reflect expected differences in utilization due to cost sharing (induced utilization), and paid values reflect expected differences in induced utilization and plan liability. Note that the allowed and paid estimates exclude expected differences in the health status of members expected to choose a particular plan. Specifically, every benefit plan was effectively valued assuming the same cohort of members was enrolled in it.

Projected plan-level paid and allowed values were weighted together by projected membership to calculate the overall averages. The average projected paid-to-allowed factor shown in Table 8.1 reflects the ratio of projected average paid claims PMPM divided by projected average allowed claims PMPM.

EXHIBIT 9. RISK ADJUSTMENT AND REINSURANCE

Experience Period Risk Adjustments PMPM

Experience period risk adjustment payments were estimated by Federated, and reflect actual risk adjustment accruals reported in the 2015 financial statements. The estimated net risk adjustment transfer payment per ACA member from Federated to the risk adjustment pool for 2015 is $56.67 PMPM. The PMPM risk adjustment transfer reported in Exhibit 3 is per single risk pool member (i.e., includes both ACA and transitional member months in the denominator).

The URRT instructions state that Allowed Claims which are not the issuer's obligation (Worksheet 2, Section III) should include member cost sharing, risk transfer charges or payments associated with the risk adjustment program, and reinsurance payments received. For Federated, experience period Allowed Claims which are not the issuer's obligation will be negative when the estimated risk adjustment payment for 2015 exceeds member cost sharing for the plan.

Projected Risk Adjustments PMPM

In estimating the risk adjustment transfer payment for 2017, consideration was given to the CMS transfer formula, which includes the induced demand factor, geographical cost factor, risk score, and allowable rating factors for Federated and the market, and the statewide average premium.

As a carrier with small market share, Federated faces significant uncertainty regarding the market level factors in the formula, so risk adjustment results are volatile and difficult to predict. In order to mitigate some of this risk, Federated considered its risk adjustment position on a nationwide basis (across the 23 states where it operates), and made adjustments to allocate the nationwide prediction to each state. Federated also considered the emerging and limited data available for 2015 from simulation studies and interim CMS reports where those were available, as well as the potential impact of changes in the risk adjustment model coefficients CMS has published for 2017.

The risk adjustment transfer reflected in this filing was estimated in two steps, based on: 1) expected differences between the age, gender, plan, and area mix of Federated's projected population in Pennsylvania relative to the statewide average (assuming that - other than these differences - Federated's population morbidity will be similar to the market in 2017), and 2) the morbidity level of the projected population in Pennsylvania relative to Federated's nationwide average morbidity level.

Based on these estimates, Federated believes that its block will generate a transfer payment into the Pennsylvania risk adjustment pool in 2017. The projected risk adjustment transfer payment is $39.65 PMPM, or $39.78 PMPM net of risk adjustment user fees, which is 7.60% of premium.

Experience Period ACA Reinsurance Recoveries Net of Reinsurance Premium

Reinsurance recoveries are not offered in the small group market. Therefore, experience period reinsurance recoveries net of reinsurance premium are equal to the 2015 reinsurance contribution amount, or $3.67 PMPM.

Projected Reinsurance Recoveries Net of Reinsurance Premium

The transitional reinsurance program will end with the 2016 benefit year, so no reinsurance contributions are included for 2017.

EXHIBIT 10. NON BENEFIT EXPENSES AND PROFIT & RISK

Non-benefit expenses, profit, and risk load were provided by Federated.

Administrative Expense Load

The load for administrative expenses, excluding taxes and fees, is 11.0%. This load consists of 10.0% in general administrative expenses and 1.0% in commission expenses.

Profit (or Contribution to Surplus) & Risk Margin

Federated is targeting a profit margin of 3.08% before federal income tax (FIT) for Pennsylvania.

Taxes and Fees

Taxes and fees for 2017 include Pennsylvania state premium taxes, ACA fees for the Patient Centered Outcomes Research Trust Fund (PCORTF), the risk adjustment user fee, and the health insurer tax (note that the health insurer tax for 2017 is zero, consistent with CMS guidance). As Federated does not intend to offer any products on the exchange, there are no marketplace user fees.

Federated has chosen to allocate all administrative expenses, taxes, and fees as an equal percentage of premium across all plans.

Retention Components – URRT Worksheet 1, Section III

The following table illustrates the development of the administrative expense load, profit and risk load, and taxes and fees entries in Worksheet 1, Section III of the URRT. Note that the risk adjustment user fee is reported separately on the URRT, so it is not shown in Table 10.1.

Table 10.1
Federated Mutual Insurance Company
Illustration of Retention Expenses by URRT, Worksheet 1 Category

Retention Description	PMPM	% Premium	Basis	Annotation
Administrative Expense Load				
General Administrative Load	$52.16	10.0%	% of Premium	(a)
Commission Expense	$5.37	1.0%	% of Premium	(b)
Subtotal: Administrative Expense Load	$57.53	11.0%		(c)=(a)+(b)
Profit and Risk Load				
Target Profit (after FIT)	$10.48	2.0%	% of Premium	(d)
Subtotal: Profit and Risk Load	$10.48	2.0%		(d)
Taxes and Fees				
Pennsylvania State Premium Taxes[1]	$10.94	2.1%	% of Premium	(e)
PCORTF	$0.19	0.0%	PMPM	(f)
Health Insurer Fee	$0.00	0.0%	% of Premium	(g)
Federal Income Taxes	$5.64	1.1%	% of Premium	(h)
Subtotal: Taxes and Fees	$16.78	3.2%		(i)=(e)+(f)+(g)+(h)
Total Retention	**$84.79**	**16.2%**		**(j)=(c)+(d)+(i)**

[1] Includes state and local taxes, licenses, and fees.

EXHIBIT 11. PROJECTED LOSS RATIO

Federal Medical Loss Ratio Methodology

The projected loss ratio based on the prescribed federal Medical Loss Ratio (MLR) methodology is 86.6%. The following table demonstrates Federated's MLR calculation. It includes the single risk pool ACA business in calendar year 2017. It does not include small group transitional business, or the impact of prior years.

Table 11.1 Federated Mutual Insurance Company Projected Federal Medical Loss Ratio – 2017		
Description	**ACA-Compliant**	**Annotation**
Member Months	47,772	
MLR Numerator Calculations		
Paid Claims PMPM	$399.03	(a)
Claim-Related Retention (QI/Health IT) PMPM	$0.00	(b)
Risk Adjustment Paid (Received) PMPM	$39.65	(c)
MLR Numerator	$438.68	(d)=(a)+(b)+(c)
MLR Denominator Calculations		
Premium PMPM	$523.60	(e)
Premium-Related Retention (Taxes & Fees) PMPM[1]	$16.91	(f)
MLR Denominator	$506.70	(g)=(e)-(f)
Medical Loss Ratio[2]	**86.6%**	**(h)=(d)/(g)**

[1] Includes the Health Insurer Tax, state premium taxes, federal income taxes, the risk adjustment administrative fee, and PCORTF.
[2] Does not include the impact of a credibility adjustment, since the MLR without the adjustment already exceeds the minimum of 80%.

Pennsylvania Anticipated Loss Ratio

The anticipated loss ratio, calculated as the ratio of incurred claims to earned premium over the rate effective period, without any reference to MLR adjustments for risk adjustment, quality improvement expenses, or taxes and fees, is 76.2%. The expected loss ratio for the rate effective period is 83.8% (calculated as incurred claims plus risk adjustment transfer payments divided by earned premium) and does not vary by duration. The anticipated loss ratio exceeds the loss ratio threshold set forth in 31 Pa. Code §89.83(c)(1).

Table 11.2 Federated Mutual Insurance Company Anticipated Loss Ratio – 2017		
Description	**ACA-Compliant**	**Annotation**
Earned Premiums	$523.60	(a)
Incurred Claims	$399.03	(b)
Expected Risk Adjustment Transfer Payments	$39.65	(c)
Anticipated Loss Ratio	**83.8%**	**(d)=[(b)+(c)]/(a)**

EXHIBIT 12. SINGLE RISK POOL

Federated's rates were developed using a single risk pool, established according to the requirements in 45 CFR section 156.80(d). They reflect all covered lives for every non-grandfathered product/plan combination in the State of Pennsylvania small group health insurance market.

Note that the single risk pool includes transitional products/plans for purposes of the base rate experience; however, the experience for these policies is not used in the projection, since Federated does not expect any of its existing transitional members to enroll in an ACA-compliant plan in 2017.

EXHIBIT 13. INDEX RATE

Experience Period Index Rate

The Index Rate for the experience period reflects the allowed claim level PMPM for essential health benefits (EHBs). It includes base period experience for small group ACA-compliant and non-ACA compliant transitional policies. Since there were no non-EHBs offered in the base period, the Experience Period Index Rate is equal to experience period allowed claims PMPM reported on Worksheet 1 of the URRT. The Index Rate reflects the average morbidity of the single risk pool during the experience period, and has not been adjusted for payments or charges under the risk adjustment program.

Projection Period Index Rate

The Index Rate for the projection period is a measurement of the expected average allowed claims PMPM for EHB benefits. The Projection Period Index Rate reflects the projected mix of membership by age/gender, area, plan, and morbidity expected to be enrolled in the single risk pool (ACA-compliant policies) during the 2017 rate effective period.

The Projection Period Index Rate has not been adjusted for payments and charges projected under the risk adjustment program.

Table 13.1 summarizes the adjustments made to the Experience Period Index Rate to develop the Projection Period Index Rate for Federated's small group single risk pool in Pennsylvania. The Projection Period Index Rate is trended to the first quarter rate effective period (that is, it has not yet been trended to the midpoint of the average rate effective period – this adjustment is applied in Table 13.2).

Table 13.1
Federated Mutual Insurance Company
Projection Period Index Rate Development

Description	Experience	Manual[1]	Total
2015 Index Rate PMPM	$470.41	$464.26	
Single Risk Pool Adjustments			
Trend to Projection Period (2.09 years)[2]	1.152	1.152	
Population Morbidity[3]	0.947	0.964	
State Adjustment (manual rate only)[4]	1.000	0.985	
Net Pooling Charge	0.909	1.000	
Demographics	1.011	1.002	
Geographic Area	0.999	0.999	
Induced Utilization	0.981	1.012	
Provider Network	0.999	0.999	
Rx Rebates	0.999	0.999	
Adjusted Index Rate PMPM	$462.13	$514.27	
Credibility	78.9%	21.1%	100.0%
Projection Period Index Rate PMPM[5]			**$473.13**

[1] The manual rate reflects Federated's nationwide calendar year 2015 ACA small group experience.
[2] Reflects an additional adjustment to shift the midpoint from a calendar year basis to the average rate effective period for first quarter rates (based on Federated's anticipated mix of enrollment by month throughout the year). Since Federated applies quarterly rate increases (described below), this adjustment will reflect the average

number of months deviation from the midpoint of each quarter (July 1, October 1, January 1, April 1).
[3] Includes adjustments for: 1) the impact of removing transitional experience from the single risk pool in the projection period, and 2) anticipated morbidity differences between the ACA population included in the experience period index rate, and the projected ACA population.
[4] For the manual rate, reflects the *state adjustment* described in Exhibit 6. The *rating area adjustment* (also described in Exhibit 6) is reflected in the Geographic Area projection factor.
[5] Reflects the Projection Period Index Rate for rates effective January 1, 2017, consistent with the URRT instructions. Quarterly index rates adjusted for trend are shown in Table 13.2.

The development of the adjustments shown in Table 13.1 were described in Exhibits 5 and 6 for the experience-based and credibility manual rates, respectively. The credibility adjustment was described in Exhibit 7.

Small Group Quarterly Index Rates

Federated intends to recognize trend on a quarterly basis. The quarterly trend adjustment will be 1.96%. The quarterly trend adjustment reflects an assumed annual trend of 7.0%, with an upward adjustment of 1.0% to account for the leveraging impact of fixed cost sharing.

Table 13.2 shows an illustration of the quarterly Index Rates, as well as the total single risk pool Projected Index Rate.

Table 13.2
Federated Mutual Insurance Company
Small Group Index Rates Reflecting Quarterly Trends

Description	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Total SRP
Member Months	14,517	5,852	7,466	19,937	47,772
Base Allowed Claims PMPM[1]	$473.13	$473.13	$473.13	$473.13	$473.13
Months of Trend	0.00	3.00	6.00	9.00	5.06
Annual Trend Rate	8.1%	8.1%	8.1%	8.1%	8.1%
Single Risk Pool Projected Allowed Claims PMPM	$473.13	$482.40	$491.85	$501.49	$489.03

[1] Base allowed claims PMPM are consistent with the Projection Period Index Rate PMPM shown in Table 13.1.

EXHIBIT 14. MARKET ADJUSTED INDEX RATE

The Index Rate from Exhibit 13 was adjusted for the allowable market-wide modifiers to develop the Market Adjusted Index Rate, as shown below in Table 14.1. This includes an adjustment for the expected net risk adjustment transfer in 2017 (the development of this assumption was described in Exhibit 9). Because Federated is not offering plans on the exchange, there are no marketplace user fees.

Since the 2017 Index Rate PMPM is on an allowed basis and reflects the average quarterly trend, the net risk adjustment value was divided by the average paid-to-allowed ratio for the single risk pool and trended to the midpoint of the rate effective period.

The Market Adjusted Index Rate is not calibrated. That is, it reflects the expected average demographic and area characteristics of the single risk pool in 2017.

Table 14.1
Federated Mutual Insurance Company
Market Adjusted Index Rate

Description	Value	Annotation
2017 Index Rate PMPM	$489.03	(a)
Market Adjustments (paid basis)		
Net Risk Adjustment	$39.78	(b)
Paid-to-Allowed Ratio	0.843	(c)
Market Adjustments (allowed basis)		
Net Risk Adjustment	$47.16	(d)=(b)/(c)
Average quarterly trend adjustment[1]	1.034	(e)
Market Adjusted Index Rate PMPM	**$537.77**	**(f)=(a)+(d)*(e)**

[1] Trend to the midpoint of the average rate effective period.

EXHIBIT 15. PLAN ADJUSTED INDEX RATE

The Market Adjusted Index Rate from Exhibit 14 was adjusted to develop the Plan Adjusted Index Rates using the allowable rating adjustments, as described below in more detail.

Actuarial Value and Cost Sharing Adjustment (Plan Adjustment)

The AV & Cost Sharing Values adjust the Market Adjusted Index Rate to the expected net (paid) claim cost level for each plan (based on the induced utilization level and paid-to-allowed ratio estimated for the plan). The development of the induced utilization and paid-to-allowed ratios was described in detail in Exhibit 8. The AV & Cost Sharing Values include the impact of expected differences in utilization due to cost sharing, but do not reflect expected health status differences by plan.

Federated has chosen not to apply a surcharge for tobacco users.

Provider Network Adjustment

Federated will only offer one network in Pennsylvania in 2017, so the provider network adjustment is 1.00 for all plans.

Adjustment for Benefits in Addition to EHBs

Federated does not offer any benefits in addition to EHBs.

Administrative Expenses, Taxes, and Fees

Federated has chosen to allocate administrative expenses, taxes, and fees as an equal percentage of premium for all plans. The administrative expenses included in this filing are described in detail in Exhibit 10.

Table 15.1 demonstrates the Plan Adjusted Index Rate development for each plan included in this filing.

Table 15.1
Federated Mutual Insurance Company
Projection Period Plan Adjusted Index Rate Development

Plan	Market Adjusted Index Rate	AV & Cost Sharing	Provider Network Adjustment	Benefits in Addition to EHBs	Admin Costs excl. Market-place Fees	Plan Adjusted Index Rate
1601A	$537.77	0.954	1.000	1.000	1.193	$612.17
1602A	$537.77	0.839	1.000	1.000	1.193	$538.33
1603A	$537.77	0.730	1.000	1.000	1.193	$468.26
1604A	$537.77	0.711	1.000	1.000	1.193	$455.95
1701A	$537.77	0.714	1.000	1.000	1.193	$458.13
1606A	$537.77	0.721	1.000	1.000	1.193	$462.51
1607A	$537.77	0.690	1.000	1.000	1.193	$442.47
1608A	$537.77	0.700	1.000	1.000	1.193	$449.37
1609A	$537.77	0.575	1.000	1.000	1.193	$369.15
1610A	$537.77	0.933	1.000	1.000	1.193	$598.94
1611A	$537.77	0.811	1.000	1.000	1.193	$520.19
1612A	$537.77	0.824	1.000	1.000	1.193	$528.67
1613A	$537.77	0.802	1.000	1.000	1.193	$514.84

Table 15.1 Federated Mutual Insurance Company Projection Period Plan Adjusted Index Rate Development						
Plan	Market Adjusted Index Rate	AV & Cost Sharing	Provider Network Adjustment	Benefits in Addition to EHBs	Admin Costs excl. Market-place Fees	Plan Adjusted Index Rate
1702A	$537.77	0.715	1.000	1.000	1.193	$458.90
1615A	$537.77	0.795	1.000	1.000	1.193	$510.20
1616A	$537.77	0.845	1.000	1.000	1.193	$542.53
1617A	$537.77	0.782	1.000	1.000	1.193	$501.53
1703A	$537.77	0.682	1.000	1.000	1.193	$437.84
1619A	$537.77	0.695	1.000	1.000	1.193	$446.03
1620A	$537.77	0.665	1.000	1.000	1.193	$426.51
1621A	$537.77	0.796	1.000	1.000	1.193	$510.56
1704A	$537.77	0.684	1.000	1.000	1.193	$438.89
1705A	$537.77	0.691	1.000	1.000	1.193	$443.58
1706A	$537.77	0.556	1.000	1.000	1.193	$356.94
1707A	$537.77	0.551	1.000	1.000	1.193	$353.26
1628A	$537.77	0.970	1.000	1.000	1.193	$622.13
1629A	$537.77	0.837	1.000	1.000	1.193	$536.95
1708A	$537.77	0.713	1.000	1.000	1.193	$457.27
1709A	$537.77	0.602	1.000	1.000	1.193	$386.26
1710A	$537.77	0.792	1.000	1.000	1.193	$508.32
1711A	$537.77	0.657	1.000	1.000	1.193	$421.72

The Plan Adjusted Index Rates are not calibrated. That is, they reflect the average demographic and area characteristics of the single risk pool in 2017.

Experience Period Plan Adjusted Index Rates

The Experience Period Plan Adjusted Index Rates shown on Worksheet 2 of the URRT for each plan reflect the Plan Adjusted Index Rates reported on Worksheet 2 of the 2015 URRT.

EXHIBIT 16. CALIBRATION

A single calibration factor is applied to the Plan Adjusted Index Rates from Exhibit 15 to calibrate rates for the expected age and geographic distribution of the population anticipated to be enrolled in the projection period. The single calibration factor is applied uniformly across all plans.

Age Calibration Factor

The age curve calibration factor is 1.430. The approximate weighted average age, rounded to a whole number, for the single risk pool is 45.

The age curve calibration factor was calculated as the weighted average age factor based on the projected distribution of membership by age and the standard age curve, applying an age factor of 0 for children in excess of the rating limit (as allowed for in the 2017 URR instructions).

The average whole number age was then determined by finding the age of a member that would have the closest factor to the weighted average age curve factor.

Prior to applying the allowable rating factors for age and geography, the Plan Adjusted Index Rates need to be divided by the age curve calibration factor.

Geographic Calibration Factor

The geographic calibration factor is equal to the weighted average geographic rating factor based on the projected distribution of membership by geographic area, and the area factors shown in Exhibit 17. The geographic calibration factor is 1.001.

Prior to applying the allowed rating factors for age and geography, the Plan Adjusted Index Rates need to be divided by the geographic calibration factor.

Table 16.1 demonstrates the calibration performed for each plan.

Table 16.1
Federated Mutual Insurance Company
Calibrated Plan Adjusted Index Rate

Plan	Plan Adjusted Index Rate	Age Calibration Factor	Geographic Calibration Factor	Total Calibration Factor	Calibrated Plan Adjusted Index Rate
1601A	$612.17	1.430	1.001	1.432	$427.57

EXHIBIT 17. CONSUMER ADJUSTED PREMIUM RATE DEVELOPMENT

The Consumer Adjusted Premium Rate is the final premium rate charged to a member. It is the product of the Calibrated Plan Adjusted Index Rate, the applicable quarterly trend adjustment, the age rating factor, and the geographic rating factor (Federated has chosen not to rate by tobacco use). Each allowable rating factor is described in more detail below.

Small Group Quarterly Trend Adjustment

Since the Index Rate, Market Adjusted Index Rate, and the Plan Adjusted Index Rate reflect the member weighted average premium over the rate effective period, the Plan Adjusted Index Rate is multiplied by a quarterly trend factor in the calculation of the Consumer Adjusted Premium Rate. Table 17.1 shows the adjusted trend factor for each quarter and how it was developed.

Table 17.1
Federated Mutual Insurance Company
Quarterly Trend Adjustments

Trend Effective Date	Quarterly Trend Factor	Member Month Weights	Weighted Average Trend Factor	Adjusted Trend Factor
January 1, 2017	1.0000	0.3039	1.0336	0.9675
April 1, 2017	1.0196	0.1225	1.0336	0.9865
July 1, 2017	1.0396	0.1563	1.0336	1.0058
October 1, 2017	1.0599	0.4173	1.0336	1.0255

Age Rating Factors

Federated's age rating factors follow the age rating curve prescribed by CMS, as shown below in Table 17.2.

Table 17.2
Federated Mutual Insurance Company
Age Rating Factors

Age Band	Rating Factor	Age Band	Rating Factor	Age Band	Rating Factor	Age Band	Rating Factor
0-17	0.635	29	1.119	41	1.302	53	2.040
18	0.635	30	1.135	42	1.325	54	2.135
19	0.635	31	1.159	43	1.357	55	2.230
20	0.635	32	1.183	44	1.397	56	2.333
21	1.000	33	1.198	45	1.444	57	2.437

28	1.087	40	1.278	52	1.952	64+	3.000

Geographic Rating Factors

Federated's geographic rating factors are shown below in Table 17.3. Area factors have been updated for 2017 based on Federated's historical allowed claim cost data (risk-adjusted to remove the impact of morbidity differences

by area) and benchmark area factors from Milliman's HCGs. In order to mitigate the rate change experienced by members due to changes in area rating factors, an adjustment was also made to partially dampen the transition from Federated's current area factors to the new factors.

Table 17.3 Federated Mutual Insurance Company Geographic Rating Factors				
	Area Factor		Normalized Area Factor[1]	
Pennsylvania Area	**2016**	**2017**	**2016**	**2017**
Region 1	0.970	0.890	0.940	0.889
Region 2	0.970	0.920	0.940	0.919
Region 3	1.000	0.920	0.969	0.919
Region 4	0.970	0.950	0.940	0.949
Region 5	0.970	0.820	0.940	0.819
Region 6	1.000	1.030	0.969	1.029
Region 7	1.000	0.880	0.969	0.879
Region 8	1.130	1.090	1.095	1.089
Region 9	1.000	0.890	0.969	0.889

[1] Normalized on 2017 projected ACA distribution

Sample Consumer Adjusted Premium Rate Calculation

Table 17.4 provides an example Consumer Adjusted Premium Rate calculation for an individual age 44 in rating region 6 enrolling in the third quarter.

Table 17.4 Federated Mutual Insurance Company Sample Consumer Adjusted Premium Rate Development		
Description	**Value**	**Annotation**
Calibrated Plan Adjusted Index Rate for 1628A	$434.53	(a) ; from Table 16.1
Age Factor for age 44	1.3970	(b) ; from Table 17.2
Region 6 Area Factor	1.0300	(c) ; from Table 17.3
Quarterly Trend Adjustment (Q3)	1.0058	(d) ; from Table 17.1
Consumer Adjusted Premium Rate	**$628.87**	**(e)=(a)*(b)*(c)*(d)**

The premium for family coverage is determined by summing the Consumer Adjusted Premium Rates for each individual family member, provided at most three child dependents under age 21 are taken into account.

EXHIBIT 18. AV METAL VALUES

The Actuarial Value (AV) metal values included on Worksheet 2 are entirely based on the federal AV Calculator, as populated by Federated. Table 18.1 summarizes these values for each plan.

Table 18.1
Federated Mutual Insurance Company
AV Metal Values

Plan Name	AV		Plan Name	AV		Plan Name	AV		Plan Name	AV
1601A	0.905		1610A	0.903		1619A	0.717		1708A	0.720

1609A	0.620		1703A	0.718		1629A	0.809			

EXHIBIT 19. AV PRICING VALUES

Table 19.1 summarizes all adjustments included in the AV Pricing Value.

The AV Pricing Value represents the cumulative effect of the adjustments made by Federated to move from the Market Adjusted Index Rate to the Plan Adjusted Index Rate. The AV & Cost Sharing Values include the impact of expected differences in utilization due to cost sharing, but do not reflect expected health status differences by plan (as described in Exhibits 8 and 15).

Table 19.1
Federated Mutual Insurance Company
AV Pricing Values

Plan	AV & Cost Sharing	Provider Network Adjustment	Benefits in Addition to EHBs	Admin Costs excl. Market-place Fees	AV Pricing Value
1601A	0.954	1.000	1.000	1.193	1.138
1602A	0.839	1.000	1.000	1.193	1.001

1711A	0.657	1.000	1.000	1.193	0.784

EXHIBIT 20. MEMBERSHIP PROJECTIONS

The Pennsylvania membership projections (as displayed in Worksheet 2) are based on Federated's existing Pennsylvania ACA membership as of January 2016, and the following assumptions provided by Federated:

- Federated's existing members will either lapse, renew their existing plan, or map to a renewal plan upon renewal in 2017.
- Federated will enroll 1,272 new members in ACA plans during 2016 and 2017.
- Federated will have an annual retention rate of 80% from January 2016 through December 2017 for ACA members who are not in their first policy year.
- New members will follow the nationwide average demographic mix of Federated's existing ACA small group members who were new enrollees in 2014 through January 2016 (i.e., those that were not previously enrolled in one of Federated's non-ACA plans).
- New members follow the average area distribution of Federated's existing small group block of business (including transitional) in Pennsylvania.
- New membership was allocated to plan based on projections provided by Federated.
- None of Federated's existing non-ACA compliant transitional groups will move to an ACA plan during 2017.

Cost sharing reduction plans are not applicable for the small group market.

EXHIBIT 21. TERMINATED PRODUCTS

Table 21.1 includes the list of plans that have terminated since the experience period or will terminate upon renewal in 2017, as well as a plan crosswalk showing how these plans were mapped to a renewal plan for 2017.

Plans that are renewing either did not change or changed within the standards of federal uniform modification requirements. Plans that are terminated were mapped to the 2017 plan with the most similar benefit design and cost sharing structure.

All plans included in this filing are PPO plans and all plans under product FHC 14 were in effect during the experience period.

EXHIBIT 22. PLAN TYPE

There are no differences between Federated's actual plan types and the plan type selected in the drop-down box in Worksheet 2, Section I of the Part I Unified Rate Review Template.

EXHIBIT 23. WARNING ALERTS

There are three warning alerts that occur on Worksheet 2.

1. The Total Premium value in Section III of Worksheet 2 does not tie to Premiums (net of MLR Rebate) in Experience Period in Section I of Worksheet 1. This is because: 1) the Plan Adjusted Index Rate on Worksheet 2 reflects the projected mix of members in 2015, and premiums shown on Worksheet 1 reflect the actual mix of business sold, 2) a Plan Adjusted Index Rate is not entered for non-single risk pool plans, per the URRT instructions, and 3) risk adjustment payments are now included in premium on Worksheet 1, but they are not included in premium on Worksheet 2.
2. Total Incurred claims, payable with issuer funds in Section III of Worksheet 2 does not tie to Incurred Claims in the Experience Period on Worksheet 1 because the value on Worksheet 2 includes the impact of risk adjustment payments and the value on Worksheet 1 does not.
3. Incurred Claims PMPM in Section III of Worksheet 2 does not tie to Incurred Claims in the Experience Period on Worksheet 1 because the value on Worksheet 2 includes the impact of risk adjustment payments and the value on Worksheet 1 does not.

EXHIBIT 24. EFFECTIVE RATE REVIEW INFORMATION (OPTIONAL)

Company Financial Information

The following information was provided by Federated.

Risk Based Capital: Federated Mutual is primarily a property/casualty insurance company. Health insurance is approximately 29% of premiums. Overall, Federated's RBC is approximately 2,037% of Authorized Control Level.

Company Surplus: As of December 31, 2015, Federated Mutual Insurance Company had a surplus of $2.86 billion.

EXHIBIT 25. RELIANCE

In performing this analysis, I relied on data and other information provided by Federated Mutual Insurance Company. I have not audited or verified this data and other information. If the underlying data or information is inaccurate or incomplete, the results of our analysis may likewise be inaccurate or incomplete.

I performed a limited review of the data used directly in the analysis for reasonableness and consistency and have not found material defects in the data. If there are material defects in the data, it is possible that they would be uncovered by a detailed, systematic review and comparison of the data to search for data values that are questionable or for relationships that are materially inconsistent. Such a review was beyond the scope of the assignment.

A data reliance letter is attached to this Actuarial Memorandum.

EXHIBIT 26. ACTUARIAL CERTIFICATION

I am a Principal & Consulting Actuary with the firm of Milliman, Inc. Federated Mutual Insurance Company engaged me to provide the opinion herein.

Guidelines issued by the American Academy of Actuaries require actuaries to include their professional qualifications in all actuarial communications. I am a member of the American Academy of Actuaries, and I meet its qualification standards to perform the analysis and render the actuarial opinion contained herein.

I certify to the best of my knowledge and judgment:

1. The projected Index Rate is:
    - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102)
    - Developed in compliance with the applicable Actuarial Standards of Practice
    - Reasonable in relation to the benefits provided and the population anticipated to be covered
    - Neither excessive nor deficient based on my best estimates of the 2017 small employer market

2. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV was calculated in accordance with actuarial standards of practice.

4. The geographic rating factors used reflect only differences in the cost of delivery, and do not include differences for population morbidity by geographic area.

5. The CMS Actuarial Value Calculator was used to determine the AV Metal Values shown in Worksheet 2, Section I of the Part I Unified Rate Review Template for all plans.

The Part I Unified Rate Review Template (URRT) does not demonstrate the process used to develop proposed premium rates. It is representative of information required by Federal regulation to be provided in support of the review of rate increases, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

The information provided in this actuarial memorandum is in support of the items illustrated in the URRT and does not provide an actuarial opinion regarding the process used to develop proposed premium rates. It does certify that rates were developed in accordance with applicable regulations, as noted.

Differences between the projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience.

Federated Mutual Insurance Company
2017 ACA Small Group Rate Filings

Statement Regarding Accuracy of Data and Reliance on Assumptions Provided by Federated Mutual Insurance Company

I, Andrew Tackmann, hereby affirm that to the best of my knowledge and belief, the underlying data sources and information, described in the attached, provided by Federated Mutual Insurance Company (Federated) and relied upon by Milliman for use in preparing 2017 small group ACA filings are accurate and complete.

Further, I acknowledge that in preparing the rate filing documents, Milliman has relied on certain assumptions provided by Federated as described in the attached, and I affirm that to the best of my knowledge and belief, these assumptions are consistent with Federated's reasonable expectations regarding the 2017 performance of the small group ACA products.

Federated Mutual Insurance Company
2017 ACA Small Group Rate Filings

List of Data, Information, and Assumptions Received from Federated Mutual Insurance Company and Relied upon by Milliman

Data Received

- Data and information used in developing Federated's 2016 rate filing packages
- Medical and pharmacy claim databases received on 2/12/2016
- Claim diagnosis codes and pharmacy rebates received on 2/18/2016
- Exposure database containing enrollment and earned premium received on 2/16/2016
- Actuarial values calculated for 2017 plans using the federal Actuarial Value Calculator
- 2014 TPIR risk adjustment reports and the 2015 interim TPIR reports
- 2017 provider networks and cost information
- Risk adjustment accruals as of 12/31/2015
- 2014 MLR information
- Plan mapping crosswalks
- 2017 plan designs received on 2/26/2016
- 2017 new sales projections
- Trend information and completion factors
- Retention assumptions
- Expense assumptions, including Federated's target profit margins for this business
- 2017 HIOS IDs
- Summaries of risk adjustment simulation study results for calendar year 2015
- Filing contact information
- Company financial information for the actuarial memorandum

FEDERATED INSURANCE®

Assumptions

- Federated performed the actuarial value (AV) calculation for each 2017 plan design using the 2017 CMS Actuarial Value Calculator. We relied on Federated's assessment that all plan designs could be appropriately valued using the tool, and understand that there were no modifications made to the standard tool.
- The distribution of new sales in 2016 and 2017 by demographics, area, and plan.
- None of Federated's existing non-ACA compliant transitional groups will move to an ACA plan during 2017.
- The morbidity level of new sales in 2016 and 2017.
- Products to be offered cover all essential health benefits (EHBs) in all states and no non-EHBs in any states. Changes to the benchmark plans in Federated's states for 2017 will not have a material impact on pricing.
- Federated's portfolio of plans all comply with applicable mental health/substance abuse parity requirements.
- Estimated MLR rebates expected to be paid for 2015 incurrals.
- The methodology used to assign claims to Federated's internal service categories.
- Prescription drug contracted reimbursement changes between 2015 and 2017 are not expected to have material impacts on pricing, other than a minor adjustment applied to Rx rebates.
- Federated will experience an annual group persistency rate of 80% on the ACA business during 2016 and 2017 renewals.
- Federated does not have any capitated services or private reinsurance arrangements.
- Federated offers standalone dental plans in states that do not require dental to be embedded. In states that require dental to be embedded, we relied on Federated's estimate of the pricing impact.
- Miscellaneous assumptions documented in various phone conversations, meetings, emails, and letters.
