Geisinger
Health Plan

May 16, 2019

Ms. Tracie Gray – Director
Bureau of Life, Accident and Health Insurance
Pennsylvania Insurance Department
Email tgray@pa.gov
Phone: 717-705-7257

Dear Ms. Gray:

The following is in response to the Department's guidance as of April 3, 2019:

1. Company Name & NAIC#: Geisinger Quality Options – NAIC# 12743
2. Market: Small Group
3. Off Exchange only
4. Effective date of coverage: January 1, 2020
5. Average rate change: 17.8%
6. Range of rate change requested: 15.4% to 23.9%
7. Total additional annual revenue generated from the proposed rate change: $18,699,004
8. Product: PPO
9. Rating areas: 2, 3, 5, 6, 7, and 9 (no changes from 2019)
10. Metal Levels & Catastrophic Plans: Platinum, Gold, Silver and Bronze plans
11. Current number of covered lives and of policyholders as of 2/1/19: 16,094 covered lives and 9,865 policyholders
12. Number of plans offered in 2020: 10 platinum plans, 21 gold plans, 10 silver plans and 2 bronze plans (for a total of 43 plans); Number of plans offered in 2019: 11 platinum plans, 22 gold plans, 10 silver plans and 2 bronze plans (for a total of 45 plans)
13. Contract form #: M-152-121-F Rev. 1/20, M-152-243-F Rev. 1/20, M-152-122-F Rev. 1/20, M-152-367-F Dev. 1/20; SERFF #: GSHP-131915683; Binder ID #: GSHP-PA20-125092066
14. HIOS issuer ID: 75729; HIOS submission tracking#: 75729-1488942398695937030

For a detailed explanation of our rate development, please refer to the "**actuarial memorandum and attestation**" uploaded in SERFF under the "**supporting documentation**" tab.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

Kurt J. Wrobel, FSA, MAAA
Chief Financial Officer and Chief Actuary

cc. Sarah MacDerment, FSA, MAAA, Actuarial Director
Everard Riley, ASA, MAAA, Associate Actuary
Devon Dietrich, Actuarial Analyst

Geisinger Health Plan may refer collectively to Geisinger Health Plan, Geisinger Quality Options, Inc., and Geisinger Indemnity Insurance Company, unless otherwise noted.

# Attachment I

# Rate Change Summary

## Geisinger Quality Options – Small Group Plans

Rate request filing ID # GSHP-131915683 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

### Overview

| | |
|---|---|
| Initial requested average rate change: | 17.8%[1] |
| Revised requested average rate change: | 18.1[1] |
| Range of requested rate change: | 15.7% - 24.2% |
| Effective date: | 1/1/2020 |
| Mapped Members: | 16,094 |
| Available in: | Rating Areas 2, 3, 5, 6, 7 and 9 |

### Key information

**Jan. 2018-Dec. 2018 financial experience**

| | |
|---|---|
| Premiums | $88,190,030 |
| Claims | $79,665,668 |
| Administrative expenses | $7,526,911 |
| Taxes & fees | $2,189,564 |
| Company made (after taxes) | **-$1,192,113** |

**How it plans to spend your premium**
This is how the insurance company plans to spend the premium it collects in 2020:

| | |
|---|---|
| Claims: | 86.3% |
| Administrative: | 8.0% |
| Taxes & fees: | 3.7% |
| Profit: | 2.0% |

The company expects its annual medical costs to increase **7.85%**.

### Explanation of requested rate change

Geisinger Quality Options has proposed an overall base rate increase of 18.1% for Small Group PPO members effective January 1, 2020 through December 1, 2020. The actual range of proposed rate increases vary from a minimum of 15.7% to a maximum of 24.2%. The key drivers of this increase are the change in base period claims and change in Network. The total projected 2020 administrative costs are slightly higher than those used for the current 2019 rates. As required by federal regulations and using the Federally prescribed MLR methodology, the projected loss ratio exceeds 80%. There were minimal benefit changes proposed for 2020 to maintain the desired metallic level.

[1] Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Geisinger Health Plan

July 12, 2019

Ms. Tracie Gray – Director
Bureau of Life, Accident and Health Insurance
Pennsylvania Insurance Department
Email tgray@pa.gov
Phone: 717-705-7257

Dear Ms. Gray:

The following is in response to the Department's questions on July 5, 2019:

1. Company Name & NAIC#: Geisinger Quality Options – NAIC# 12743
2. Market: Small Group
3. Off Exchange only
4. Effective date of coverage: January 1, 2020
5. Average rate change: 18.1%
6. Range of rate change requested: 15.7% to 24.2%
7. Total additional annual revenue generated from the proposed rate change: $18,991,130
8. Product: PPO
9. Rating areas: 2, 3, 5, 6, 7, and 9 (no changes from 2019)
10. Metal Levels & Catastrophic Plans: Platinum, Gold, Silver and Bronze plans
11. Current number of covered lives and of policyholders as of 2/1/19: 16,094 covered lives and 9,865 policyholders
12. Number of plans offered in 2020: 10 platinum plans, 21 gold plans, 10 silver plans and 2 bronze plans (for a total of 43 plans); Number of plans offered in 2019: 11 platinum plans, 22 gold plans, 10 silver plans and 2 bronze plans (for a total of 45 plans)
13. Contract form #: M-152-121-F Rev. 1/20, M-152-243-F Rev. 1/20, M-152-122-F Rev. 1/20, M-152-367-F Dev. 1/20; SERFF #: GSHP-131915683; Binder ID #: GSHP-PA20-125092066
14. HIOS issuer ID: 75729; HIOS submission tracking#: 75729-1488942398695937030
15. Summary of changes made in response to questions dates June 18, 2019:
    a. Revisions were made the Actuarial Memorandum Exhibits
        i. In response to #23, Table 9 cell K78
        ii. In response to #48, Table 5 cell C31, Table 6 cell C54 and D54 and Table 10 column S
    b. Revisions were made to the Actuarial Memorandum in response to the Department's questions #4, #20d, #28 and #48.
        i. These changes are highlighted in yellow
16. Summary of changes made in response to questions dated July 5, 2019:
    a. Revisions were made the Actuarial Memorandum Exhibits
        i. In response to #10, Table 5 cell D17
        ii. In response to #12, Table 7 cell K52 and Table 10 column L
        iii. In response to #17, Table 7 cells K49 and K50, Table 10 cells T4 and T5
        iv. As a result of the above changes the projected premium changed, therefore the admin as a % of premium was also updated, Table 6 cell C50, C51 and C52 and Table 10 column R

Revisions were made to the Actuarial Memorandum in response to the Department's question #4 as well as the items noted above.

v. These changes are highlighted in yellow
vi. The overall increase and range of increases changed as a result to the changes above.

For a detailed explanation of our rate development, please refer to the "**actuarial memorandum and attestation**" uploaded in SERFF under the "**supporting documentation**" tab.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

Kurt J. Wrobel, FSA, MAAA
Chief Financial Officer and Chief Actuary

# Actuarial Memorandum – Small Group GQO

## 1.Basic Information and Data

**General Information**

**Company Identifying Information** (as included in **Table 0**)

Company Legal Name: Geisinger Quality Options State: Pennsylvania

HIOS Issuer ID: 75729

NAIC Number: 12743 Market: Small Group

Effective Date: 1/1/2020

**Company Contact Information**

Primary Contact Name: Sarah MacDerment

Primary Contact Phone: 570-214-2348

Primary Contact email address: smmacderment@thehealthplan.com

**Filing Information**

HIOS Submission Tracking Number: 75729-1488942398695937030

Contract Form Number: M-152-121-F Rev. 1/20, M-152-243-F Rev. 1/20, M-152-122-F Rev. 1/20, M-152-367-F Dev. 1/20

SERFF Number: GSHP-131915683

Binder ID Number: GSHP-PA20-125092066

**Rate History and Proposed Variations in Rate Changes**

**Rate History**

The recent historical rate increases are summarized in the table below.

| Year | SERFF ID | Average Increase | Minimum Increase | Maximum Increase |
|---|---|---|---|---|
| 2015 | GSHP-129625169 | 24.3% | 21.2% | 26.9% |
| 2016 | GSHP-130072619 | 9.9% | -7.9% | 11.6% |
| 2017 | GSHP-130558380 | -0.3% | -5.9% | 1.4% |
| 2018 | GSHP-131024110 | 8.2% | 1.1% | 17.6% |
| 2019 | GSHP-131502028 | -3.7% | -12.6% | 3.7% |

For 2015 - 2019, the increases were not uniform but varied by plan.

**Proposed Rate Increase**

This filing applies to PPO products, sold on and off exchange in rating areas 2, 3, 5, 6, 7 and 9. There will be 10 platinum plan, 21 gold plans, 10 silver plans, and 2 bronze plans, for a total of 43 plans offered in 2020.

As of February 2019, 16,094 covered lives and 9,865 policyholders will be impacted by this filing. The proposed overall rate increase is 18.1**%** but is not uniform by plan. The increases range from 15.7% to 24.2%. Table 10 shows the increases at the plan level. These increases vary by plan due to benefit changes necessary to maintain the desired metal level as well as changes in pricing factors.

**Average Rate Change**

The average rate change from Table 10, cell AC15 is 18.1% and is entered as the "percent rate change requested" in the SERFF Rate Review Detail Screen. It is the change in the Calibrated Plan-adjusted Index rate (as instructed by the Department). In addition, the change in 21-year-old non-tobacco premium PMPM, as calculated in Table 11, cell AN13, is 19.5%.

**Membership Count**

Table 1 shows the average age and the member months in the experience period of calendar year 2018, as well as the average age and the current members as of February 1, 2019 by age range. The projected member months for the rating period are also included.

**Benefit Changes**

To maintain current metal tier levels, several existing plans experienced cost sharing adjustments that were necessitated by the 2020 AV calculator. The first item we looked to update was the Maximum Out of Pocket. After that, we looked at the additional cost sharing elements to maintain metallic level. The 'Benefit Change' tab in the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx" summarizes the changes made by HIOS ID.

**Reason for Rate Increase**

The components of this rate increase are:

- Single Risk Pool experience (i.e. the "Base period allowed claims before normalization" on Table 8) which is more adverse than assumed in current rates;
- Medical Inflation;
- Utilization trend;
- Changes in administrative expenses;
- Changes in ACA fees;
- Changes in Risk Adjustment;

Each of these components is discussed in detail later in this document and are displayed in Table 8 of the exhibits.

## Experience Period Claims and Premium

**Paid Through Date**

The Experience Period data provided in the URRT Worksheet 1, Section I and in Table 2 is incurred in calendar year 2018 and paid through February 2019. As discussed below, the data in Table 2 of the exhibits is consistent with the data provided in the URRT in Worksheet 1, Section 1 (except for the incurred claims and the allowed claims). This includes only experience for ACA compliant plans and does not include experience for transitional business.

**Premiums (net of MLR Rebate) in Experience Period**

Premiums include earned premiums for calendar year 2018 for the Single Risk Pool. Premiums are not reduced by taxes and/or assessments. MLR rebates are not expected to be paid for this block of business. Initial estimates of rebates have been completed utilizing the methodology required for the CY 2018 rebate filing. Estimates suggest that the individual market MLR will be above the minimum MLR target of 80%.

**Allowed and Incurred Claims Incurred During the Experience Period**
The Experience Period Claims are based on small group ACA compliant business incurred and paid claims with IBNR added for the tail of claims incurred but not paid. Allowed claims are calculated by combining paid claims and estimated member cost share. The same IBNR factors were used for both paid and allowed claims. The IBNR factors were based on legal-entity and market segment level claim lag tables. This method is appropriate to assure proper credibility and because timing of claims payment to providers does not vary by market or product.

There were no non-EHB benefits in the experience period.

Geisinger outsources several benefits and therefore has capitation expenses. The capitated expenses cover chiropractic services, nurse line, mental health services and quality fund/ PQS. The capitation amount for the experience period is displayed on Table 2 and is included in both the Incurred Claims and Allowed Claims on Worksheet 1 of the URRT. The capitation charges are uniform and do not vary by age. The historical capitation amounts are on the "Capitation" tab of the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

Pharmacy rebates are listed on Table 2. These rebate dollars would be removed from the Ultimate Incurred Claim liability to the insurer and are removed from the Incurred Claims and the Allowed Claims on Worksheet 1 of the URRT.

The estimated risk adjustment for the experience period is based on an external analysis performed by the Pennsylvania Insurance Department. They estimated the Risk Adjustment transfer payment based on the population risk scores relative to an assumed market average risk score and market average premium.

The calendar 2018 loss ratio, as displayed on Table 2 is 90.33%. The Federal MLR calculation that determines if a rebate is necessary is more complex than the MLR displayed on Table 2. For example, the Federal MLR calculation allows issuers to combine 3 years of experience when determining if a rebate is necessary.

**Benefit Categories**
Benefit categories are determined by the classification of claims in the Milliman Health Cost Guidelines.

**Credibility of Data**
The Credibility Manual Rate is a combination of our GHP and GQO experience, giving us an even more credible manual rate than if we determined them separately by product. Combining the GHP and GQO Single Risk Pools also aids in consistency between the products. Historically, we have seen enrollment move between our GHP and GQO products, so it is very important that our premium rates are consistent. To avoid double counting the Experience Period and avoid complicated adjustments to reflect the expected distribution of enrollment in each segment, the credibility of the Experience Period is set to 0.0%. This approach is consistent with the Actuarial Standard of Practice #25.

The credibility manual data is shown in Table 2b. Since the credibility manual data is given a weight of 100%, the "blended" data would be the same as the data in Table 2b.
The experience period data in Table 2 or 4 does not include data for any transitional business.

**Adjustments Made to the Data**
The population represented in the Experience Period is expected to continue into the Projection Period. The Projected Allowed Experience Claims are adjusted for changes as described in the section below.

**Morbidity Adjustments**
We view the small group ACA as fairly stable and therefore expect the morbidity of the base period to continue into the projection period.

**Changes in Benefits**
We have no planned changes to the scope of benefits covered.

**Changes in Demographics**
We are applying a 1.0% adjustment factor to account for the unfavorable demographic shift between CY2018 and February 2019. This adjustment factor is developed on the "Manual_Age_Factor" tab of file "PID_Response_Exhibits_GQO_SG_071219.xlsx". The Change in Demographics factor on Table 5 is 1.010 and is 1.549/1.533.

**Change in Network**
To account for the Geisinger Global Risk Arrangement, which began in July 2018, a network adjustment factor is used. The claims experience in Table 2, does not reflects payment transfers as a result of the Geisinger Global Risk Arrangement. An adjustment on Table 5 is necessary to account for a full year of the global risk arrangement. The factor is .93.

**Change in Other**
The capitation amount paid for our private reinsurance, as well as the recoveries from that program are reflected in the "Other" factor. Only slight changes are expected. This is developed on the "Reinsurance" tab in the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

**<u>Trend Identification</u>**
Experience data was trended using an annual trend of 7.87%. Table 3b shows the breakdown between service category and cost vs. utilization. Table 3b uses the PMPM by service category to weight to develop the total composite trend. Trend factors are projected for unit cost and utilization components:

- Unit cost trend factors are based on recorded anticipated increases in facility and professional fees from the Experience to Projection Period. These increases are composited across all facilities and provider groups.
- Utilization trend projections are based on least-square regression modeling, taking into account historical claims patterns, anticipated economic activity and changes in care patterns.
- Seasonality adjustments are made to the claims to account for changes in work days.
- Further adjustments have been made to the trends to reflect expected changes due to new medical management initiatives that are expected to yield savings in the projection period.

Our trends are analyzed at a higher level than these individual segments and are the same for the experience data and the credibility manual data. Due to the lack of stability in the ACA experience, we based our trends on data from our commercial large group experience. Table 4b is provided for this large group experience.
The Composite URR Trend in Table 5, Cell C12 is 1.163 and is used to project the experience period data to the rating period. The aggregate URR Trend reported in Worksheet I, Section 2 is 597.60 / 513.70 = 1.163 and matches the Composite Trend in Table 3 of the Department's rate exhibits.

**Historical Experience**

Table 4 includes the most recent 48 months of data with run out through February 2019. Allowed claims are calculated by combining paid claims and estimated member cost share. As mentioned above, Table 4b displays the large group data that was used to determine the trends used.

As requested by the Department, the most recent 48 months of data for our transitional (non-ACA non-GF) Small Group GQO block is:

| Non-ACA PPO | 2015 | 2016 | 2017 | 2018 |
|---|---|---|---|---|
| Premium | $87,291,847 | $77,777,845 | $70,560,453 | $61,935,057 |
| Incurred Claims | $65,976,559 | $64,920,284 | $59,806,168 | $53,240,989 |
| Member Months | 210,310 | 173,640 | 151,194 | 130,528 |

## 2. Rate Development & Change

**Development of Projected Index Rate, Market-Adjusted Index Rate & Total Allowed Claims**

**Single Risk Pool**

The Single Risk Pool has been established in accordance with the requirements in 45 CFR 156.80(d) as was discussed previously in the Experience Period Premium and Claims section.

**Index Rate**

The Experience Period Index Rate is based on the manual Allowed Claims PMPM and is the starting value on Table 5. The Credibility Manual Rate is a combination of our GHP and GQO experience, giving us an even more credible manual rate. No benefits were covered in addition to Essential Health benefits in the policies being offered.

The Projected Index Rate for this Single Risk Pool is the Adjusted Projected Allowed EHB Claims PMPM and is the manual rate. The projected claims reflect the trend and benefits described earlier in this memorandum. As discussed above, the Manual Data is weighted 100% since it includes the Actual Experience Data as well as the experience data for our ACA compliant GHP business. If we gave any weight to the Actual Experience Data, it would be double counted since it is also in the Manual Data.

**Market Adjusted Index Rate**

The Market Adjusted Index Rate and Market Adjusted Total Allowed Claims are calculated in Table 5. The Projected Index Rate is converted to a paid basis by multiplying by the Projected Paid to Allowed ratio.

**Paid to Allowed Ratio**

The Projected Paid to Allowed Average Ratio is 0.894 and is displayed on Table 5. It is determined for the Projection Period based on the combination of our GHP and GQO member weighted average Pricing AV for each plan times the projected member months in each plan. This is consistent with the calculation on Table 10 in cell K15, except that it combines both our GHP and GQO plans. This same factor is used in both our GHP and GQO filings to help maintain appropriate relativities between the plans. There are variations between the AV Pricing Values and the AV Calculator values because of different cost structures and management approaches than what is reflected in the national average data used in the AV Calculator.

**Projected Risk Adjustments PMPM**
Our Small Group Exchange population had a healthier risk profile than the state average in 2018 resulting in potential payment transfers into the Risk Adjustment program. Premium levels for 2020 need to incorporate the expected payment into the Risk Adjustment program. We have used the Department's estimated 2018 Risk Adjustment for the starting point for 2020.

The risk adjustment model applied to the 2020 contract year will be an updated version of what was used for 2018. Specifically, the coefficients will be changing. We have used a 3rd party consultant's tool to analyze the impact on our population. The result is an expected increase in transfer payment and is applied to the actual payment transfer from 2018. The expected payment transfer for 2020 is shown on Table 5 as -40.92.

All of our small group plans are sold Off Exchange, so there is no Exchange user Fees to include. The allowable market-wide modifiers (risk adjustment of -$40.92 and Exchange User Fees of $0.00) are added to this paid basis PMPM. This PMPM is then converted back to an allowed basis, again using the projected paid to allowed ratio. Any non-EHB claims would then be added to this value if we had some but we don't so this PMPM is the Market-Adjusted Projected Total Allowed Claims PMPM, $616.52 as shown on Table 5 in cell C42.

## Retention Items

**Administration Expense**
Administration expenses are based on activity-based allocation by product for calendar year 2020. This methodology applies for all variable costs and all fixed costs. For the 2020 plan year, we are combining the GHP and GQO estimates to create one overall PMPM estimate. Again, this helps maintain appropriate relativities between the GHP and GQO plans. The historical administrative exhibits are displayed on the 'Administrative_Expense' tab of the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx". Table 6 provides a breakdown of the administrative expenses, as well as the taxes and fees. The administrative expenses are developed as a PMPM expense, but applied as a consistent percentage of premium and do not vary by plan. The proposed percentage of premium for 2020 is 7.98% and is shown in both Tables 6 and 10.

**Agent/Broker Fees and Commissions**
Commissions for Small Group ACA business are paid based on the schedules in the files "Broker Commissions Fiscal Year 2019.pdf". The amount they receive is based on their entire employer group book of business with Geisinger (not just their small group ACA book). Broker commissions do not vary by geographic location, metal level, plan or enrollment type (open enrollment vs SEP enrollment). The development of the broker commission is displayed on the 'Commission' tab of the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

**Quality Improvement Initiatives**
The Quality Initiatives amount is based on the latest estimate for this product. They are reported on line 6.6 of the Supplement Health Care Exhibit of the Annual Statement. The estimated % of premium is 1.80% and is calculated using the PMPM of $11.49 that is displayed on the 'Quality_Improvement' tab of the file 'PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx'.

**Profit & Risk Margin**
The risk margin is set at 2% of premium. This risk margin is applied consistently across all plans.

**Taxes, Fees, and Subsidies**
For 2020, the federal government will again collect the Health Insurer Provider Fee. For this product, we include 2.81% in cell C57. Federal Income tax will also be collected. It is calculated on the "Taxes" tab of the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

**Projected Loss Ratio**
The anticipated loss ratio is 91.5**%** in aggregate as shown below using the Federally-prescribed MLR methodology:
MLR Numerator = Projected Claims + Quality Initiatives + Risk Adjustment = 509.96 + 11.49 + -40.92 = 562.36
MLR Denominator = Projected Premiums – Taxes and Fees = 638.47 – 0 – 23.88 = 614.60
Federal MLR = 562.36 / 614.60 = 91.5%

**Normalized Market-Adjusted Projected Allowed Total Claims**
The Market-Adjusted Projected Allowed Total Claims is normalized using the projected average factors for age, geography, tobacco, benefit richness (induced demand) and network. These average factors for 2019 and 2020 are displayed on Table 7.

**Projected Membership**
For the overall Small Group ACA market, membership is expected to remain approximately at the current levels. February 2019 membership is expected to best represent calendar year 2020 in total for the Small Group ACA market. There is no enrollment in the discontinued plans and therefore they are labeled as discontinued not mapped. Projected membership is used to calculate the normalization factors discussed below.

**Normalization Factors**
**Age Factor**
The federal age curve, as shown in Table 12, is used to determine a normalization factor to account for the age mix of business used in generating the Index Rate. The average age factor includes a factor of 0 for non-billable members. The average factors for 2019 and 2020 are shown on Table 7 and are developed on the 'Age_Calibration' tab of the file "PID_Response_Exhibits_GQO_SG_071219.xlsx".

**Geographic Factor**
The geographic rating area factors used to determine premium rates are shown on Table 13. These factors are consistent with the current approved factors. The normalization factor is determined using these factors weighted using projected membership by area and is shown on the 'Area_Calibration' tab of the file "PID_Response_Exhibits_GQO_SG_071219.xlsx".

**Tobacco Factor**
We are not applying a tobacco load in 2020.

**Benefit Richness (Induced Demand)**
Induced Demand factors are applied to each metallic to reflect the expected utilization, not the expected health status. To ensure revenue neutrality, a normalization factor is applied. The average benefit richness factor shown on Table 7.

**Network Factors**
For 2020, Geisinger is introducing a new network into this ACA market. This network is called the "Geisinger Choices PPO" and is a tiered provider network. Our historical provider network is divided into two tiers. There is no adjustment factor so a factor of 1.00 is shown in Table 14.

**Components of Rate Change**
Table 8 shows the components of the Rate Change developed in this filing. The key drivers of the increase are the change in base period claims and change in Network as part of the change in the "URRT Other" category. Table 9 supports the calculations in Table 8.

Row A approximately equals Row H.

The amounts shown in the 2019 columns for B, C, and D match those entered in the 2019 column in the plan year 2019 rate filing. The amounts shown in the 2019 columns for A, E, F and H do not match those entered in the 2019 rate filing due to the shift in enrollment between what was projected in the 2019 rate filing and the Feb 2019 enrollment.

## 3. Plan Rate Development
The projected market-adjusted index rate is used to develop the calibrated plan adjusted index rates in columns AA of Table 10. Each plan's rate is developed as the product of the market-adjusted index rate, the allowable factor and calibration for age, geography and tobacco.

Each plan is identified as either modified, new, discontinued & not mapped, or existing. Column G lists the metallic tier. Column H is the value we calculated using the HHS Actuarial Value Calculator. Screen shots of this calculation are provided in
file "AV_Screenshots_GQO_SmGrp_050619.pdf." The Actuarial Certification, at the end of this document, includes attestation that the Federal AV calculator was used to determine the metallic values. Please also refer to the "AV_UniquePlanDesignJust_GQO_SmGrp_051419.pdf" document for further details. Columns L and N were normalized using projected (CY2020) membership. The supporting exhibit for column L ["Benefit Richness (induced demand)"] is shown on the 'Induced_Util_Exhibit' tab of the file "PID_Response_Exhibits_GQO_SG_071219.xlsx".

## 4. Plan Premium Development for 21-Year-Old Non-Tobacco User
The projected calibrated plan-adjusted index rate is used to develop the 21-year-old non-tobacco premium in the individual market. These rates are displayed on Table 10, column AA. Table 11 uses the 21-year-old non-tobacco premiums from Table 10, adjusted by the current approved geographic factors (from Table 13), to develop the 21-year-old non-tobacco premiums by rating area.

## 5. Plan Factors
The Consumer Adjusted Premium Rates are developed by applying the following allowable rating factors to the calibrated Plan Adjusted Index Rates:

1. Age – reflecting the HHS defined age curve
2. Geographic – as discussed above

The final Premium rates for all filed benefit plans are displayed in the QHP Rating Template.

**Network Factors**
As we discussed above, there will be 2 networks in 2020. Both have a rating factor of 1.00. Our established network is not changing, but is now referred to as the "Geisinger All-Access PPO" network.

**Service Area Composition**
GHP will maintain the same counties of operation from 2019. All counties and service areas are defined in the QHP Service Area template. These service areas are defined on the "Service Areas" tab of the file "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

**Composite Rating**
Composite rating is not used.

**Plan Type**
All plan offerings meet the plan type definitions available in the URRT Worksheet 2, Section I.

**Changes to URRT**
We acknowledge that each time the URRT is changed in SERFF, it will also be updated in HIOS.

**Reliance**
We relied on the Department's projected risk adjustment payment for 2020. We relied on Milliman for their classification of benefit categories in the claim data. We have also relied on a 3rd party's risk adjustment model analysis tool, to model the changes to the model.

**Additional Exhibits**
The following required exhibits have been uploaded in SERFF under the tabs noted next to the exhibit:
• Department Plan Design Summary – submitted under the "Rate/Rule Schedule" tab;
• Service Area Map – submitted under the "Supporting Documentation" tab.

---

**Actuarial Certification**
I certify that:

1. I am a member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform this work.
2. The projected Index Rate is:
    a. In compliance with all applicable state and Federal regulations including 45 CFR 156.80(d)(1)
    b. Developed in compliance with the applicable Actuarial Standards of Practice,
    c. Is reasonable in relation to the benefits provided and the population anticipated to be covered,
    d. Is neither excessive nor deficient based on available information.
3. The Index Rate is used to develop the plan level rates using only the allowable modifiers in accordance with 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2).
4. The essential health benefits are determined in accordance with 45 CFR Part 156.
5. The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
6. The Federal AV Calculator was utilized, with an acceptable alternative methodology when appropriate, to determine the AV Metal Values shown on Table 10 and in Worksheet 2, Section I of the URRT, following ASOP 50. Please refer to the "AV_UniquePlanDesignJust_GQO_SmGrp_051419.pdf" document for further details.
7. All factor, benefit and other changes from the prior (2019) approved filing have been disclosed in the actuarial memorandum.
8. New plans have not been considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.

9. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.

I confirm that the rates submitted comply with the ACA rating requirements and with the Single Risk Pool per market requirement. The URRT does not demonstrate the process used to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

| Rating Area 7 | 1.1620 |
| Rating Area 9 | 0.9870 |

**RFJ Part II - Consumer Friendly Justification**
**Geisinger Quality Options**
**Small Group**

Geisinger Quality Options has proposed an overall base rate increase of 18.1% for Small Group PPO members effective January 1, 2020 through December 1, 2020. The actual range of proposed rate increases vary from a minimum of 15.7% to a maximum of 24.2%. The key drivers of this increase are the change in base period claims and change in Network. The total projected 2020 administrative costs are slightly higher than those used for the current 2019 rates. As required by federal regulations and using the Federally prescribed MLR methodology, the projected loss ratio exceeds 80%. There were minimal benefit changes proposed for 2020 to maintain the desired metallic level.

| 2020 Rates Table Template v9.0 | *All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl +* |
|---|---|
| | *If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.* |
| | *If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age ba* |
| | *If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.* |
| | *To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.* |

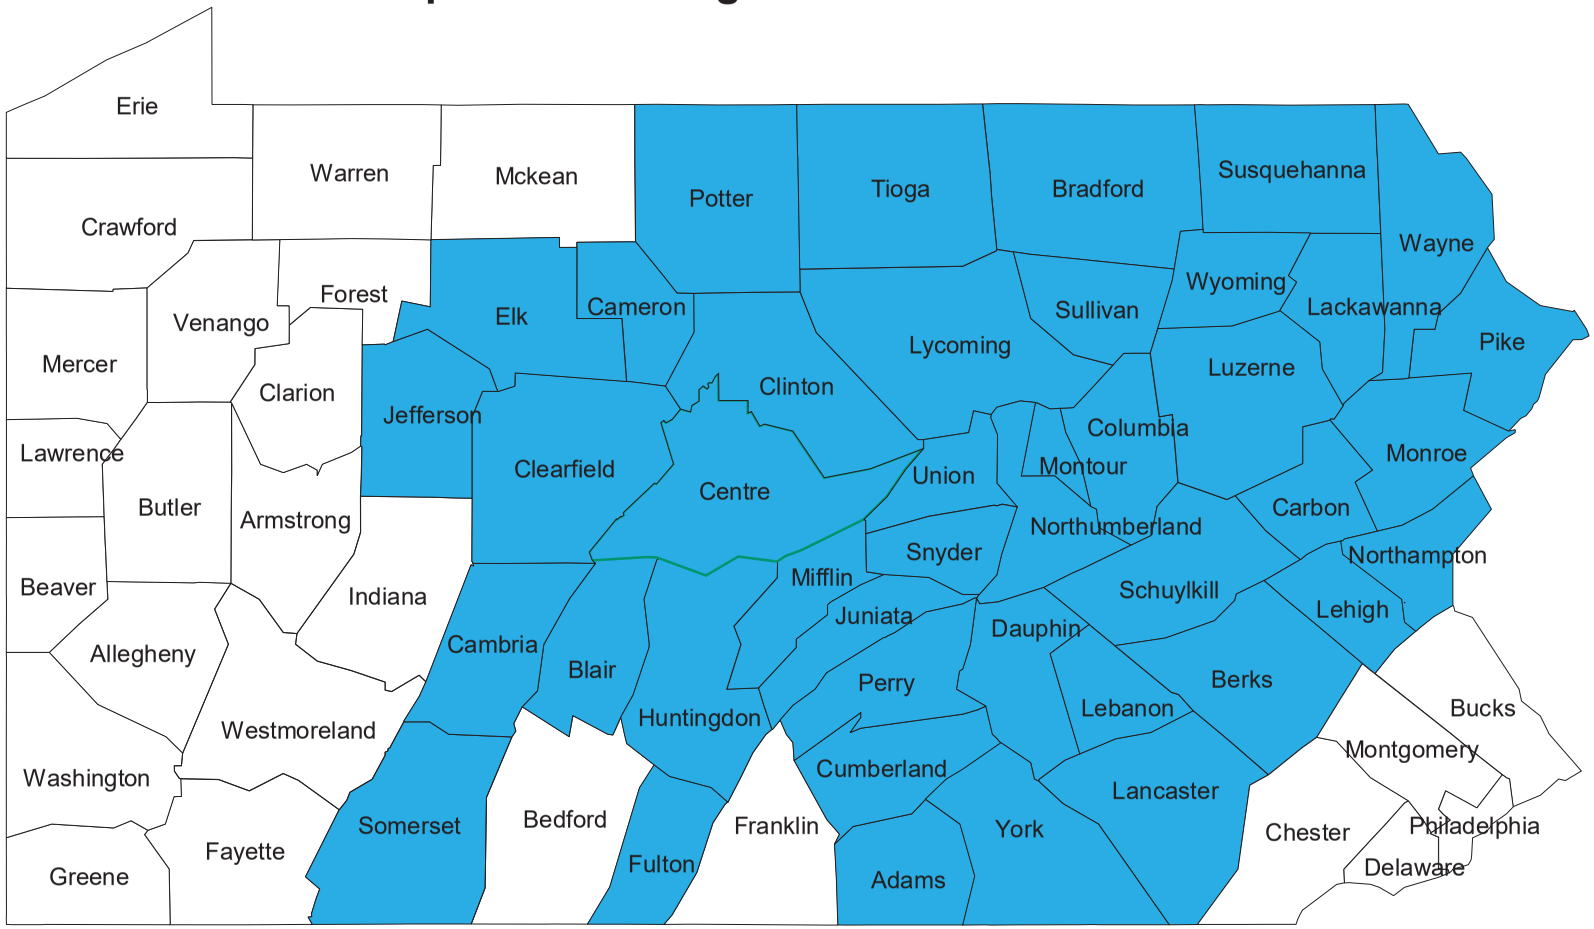
# 2019 and 2020 Service Area

## Issuer: Geisinger Quality Options (Issuer 75729)

## Market: Small Group - Off Exchange



**Key**:
2019 and 2020 Off-exchange service area

Geisinger Quality Options

Small Group Filing for 2020

Response to Questions

SERFF Tracking Number: GSHP-131915683

1. Please confirm that the Tables in the 'I Data' tab is populated with unadjusted data specific to the GQO small group market for ACA-compliant plans only.

Confirmed

2. Please clarify the data source and markets used in populating the 'I.b.Manual' Tab.

Tables on the I.b.Manual tab are all populated with data sourced from our data warehouse which compiles data from our claim payment, billing and vendor systems. Tables 2b and 3b show GHP and GQO combined small group market experience. Table 4b is populated with data for the large group market as requested to support our trend assumptions.

3. The updated URR instructions require a quantitative impact of rate increase drivers. Please provide the approximate rate increase percentage contributed by each of the drivers listed page 2 of the actuarial memorandum.

The quantitative impacts are either from Table 8 or Table 9 and are shown here to match the updated file named "2020_SmGrp_GQO_PAAMExhibits_062119.xlsm".

- Single Risk Pool experience (i.e. the "Base period allowed claims before normalization" on Table 8) which is more adverse than assumed in current rates; 10.2% from cell F72 on Table 8
- Medical Inflation and Utilization trend; 0.2% from cell F77 on Table 8
- Changes in administrative expenses; 1.4% from cell F90 on Table 8
- Changes in ACA fees; 2.1% from cell F91 on Table 8
- Changes in Risk Adjustment; 3.3% = (40.92– 28.31)/ 382.32 The PMPMs from Table 9, cells J76 and K76, over the PMPM from 2019 in Table 8, cell C70

4. Page 1 of the actuarial memorandum says the filing is requesting a 17.8% decrease, however, it is an increase. Please correct.

This has been corrected.

5. Please provide discussion and calculations of factors applied to reflect changes in benefits for 2020 by plan.

On table 5, we used a 1.0 benefit change factor as the scope of covered benefits has not changed.

6. Please provide an exhibit that shows, by HIOS Plan ID, summary benefit and cost sharing changes for 2020 relative to the 2019 design for all plans to be offered in 2020. Include Pricing AV columns for 2019 and 2020. Please show the approved 2019 Pricing AVs for all plans in the 2019 column and the proposed 2020 Pricing AVs in the 2020 column. Also provide a supporting worksheet that shows the quantitative development of the proposed factors.

Please see the worksheet named "Benefit Changes" of the file named "PID_Response_Exhibits_GQO_SG_062119.xlsx". Please refer to question #32b for the development of the pricing AV factors.

7. The updated URR instructions require an explanation of how morbidity was removed from impacting the variations in rate increases. Please provide this explanation.

The change in morbidity does not vary by plan. We projected claims at the aggregate level and not at the plan level therefore morbidity does not vary by plan.

8. Regarding Adjustment Data Validation process (RADV):
a. Please describe any adjustments or considerations made due to the Risk Adjustment Data Validation process (RADV).
No adjustments were made due to RADV. We do not fully understand the impact to plan year 2020 at this time.
b. As you know CMS is performing a risk adjustment validation starting with 2017 risk adjustment data. We are considering allowing an estimate of the impact of risk adjustment modifications in rate filings as an adjustment to the projected risk adjustment. Before implementation, we are soliciting feedback from our issuers on the pros and cons of the inclusion of this adjustment. If allowed, all issuers would be required to submit an estimate. The estimate may be $0. Please provide any feedback that you would like us to consider.
We do not know how to adjust for RADV in our risk adjustment estimates, especially when you consider the significant lag time and complexity of the issue. We have large population and mix changes from year to year and do not know how to account for insufficient documentation of that changing population, at this time.
9. Please explain the 0.9238 completion factor applied to July 2017 as well as the 0.9475 completion factor applied to February 2018 in Table 4, considering the months surrounding these months are considered much more complete.
As the mix of services change from month to month, so do the completion factors. They do not always increase or decrease in a smooth pattern from month to month.
10. Please explain why the prescription drug rebates and capitation are included in the paid claims in Table 4 such that the completion factors are applied to the rebates and capitation. Please explain whether these amounts were also included in the derivation of the IBNP factors used.
Prescription drug rebates are not included in the incurred claims on Table 4. They are in a separate column titled Prescription Drug Rebates. Capitation is not included in development of IBNR and does not have completion factors applied.
11. Explain why the completion factors on Table 4b are not used to calculate incurred claims on Table 4.
Table 4b is large group experience while Table 4 is Small Group experience. The completion factors are different for these markets.
12. Please provide detail on the adjustments to the experience trend from Table 4b listed on page 4 of the Actuarial Memorandum under “Trend Identification”.
Table 4b is our large group market experience. As instructed on page 13 of the PID instructions, Table 4b was provided as this was the data used to develop our trends. This data is not adjusted to the experience trend.
13. As a supplemental exhibit, please provide an exhibit similar to Table 4b populated with GHP/GQO small group ACA-compliant data only. Please ensure that this is raw unadjusted data. Also include the following monthly data
a. The average age factor;
b. The average geographic factor;
c. The average tobacco factor;
d. The average benefit factor; and
e. The normalized average pmpm

Please see the worksheet named "Table 4c" of the file named "PID_Response_Exhibits_GQO_SG_062119.xlsx". Our data warehouse does not include the ACA rating factors. We are able to review the current enrollment and add this information in order to determine the calibration factors. This process would take several weeks to accurately include this data for Table 4.

14. Please explain why you believe the membership nearly tripled in 2017, and why you expect continued stability for 2020 from February 2019 membership.

In 2017, we moved our Extra plans from an GHP platform to a GQO platform. We believe this to be the reason for the movement in membership. We are optimistic that we will be able to maintain our current membership.

15. Why are the outpatient hospital cost trends so much lower than inpatient and professional, considering the utilization trends are so much higher?

Geisinger projects unit cost and utilization trends individually using historical experience, regression analysis, and actuarial judgement for each component separately. The unit cost trends for facility and professional services are projected based on expected changes in the underlying contracted rates. Utilization trend is not a component of unit cost trend.

16. Were trends adjusted for unexpected large claims? If so, please explain the process.

Trends are developed from historical experience after removing the reimbursement from our reinsurance. That is, trends are developed removing large claims. Large claims are included in the reinsurance estimates, which is further explained in #33.

17. Are trends adjusted due to fluctuation in large claim amounts? If so, please explain how.

Please see the response to #16 above.

18. If adjustments are made for large claim pooling, was the federal risk adjustment program considered?

There was no adjustment made for large claim pooling outside of our adjustment for reinsurance, which is further explained in #33.

19. Please provide detail on the development of each of the trend components (cost, utilization, and induced demand) by service category.

Please refer to the file named "Trend Documentation.pdf"

20. Regarding the Global Risk Arrangement

a. Please provide a detailed discussion of this arrangement, including the parties involved;

Please see the file titled 'VBRS Memo FINAL-shared.pdf'.

b. If this arrangement is for something other than changes in the provider network, why do you believe Table 5 cell d18 is the appropriate place to include this adjustment?

We believe Table 5 cell D18 is the more appropriate place for this adjustment because it reflects a change in our provider network.

c. Please provide quantitative support for the development of the 0.93 network factor.

The Global Risk Arrangement defines a new relationship with our clinical enterprise, through the Value Based Risk Share (VBRS). Our network factor on Table 5 is our best representation of the impact the VBRS will have on the Small Group GQO market. It would not be meaningful to review historical claims when valuing this prospective risk arrangement.

d. The PA AM indicates that the claims experience in Table 2 reflects payment transfers as a result of this arrangement. Please explain. Also, revise Table 2 to show unadjusted data.

The PA AM has been corrected. Table 2 does not include payment transfers as a result of the Global Risk Arrangement.

e. Please explain why you do not have separate network actors in Tables 10 and 14 for the Global Risk Arrangement reflected in the Change in Network factor in Table 5.

The Global Risk Arrangement is not a new network but impacts all our networks. We do not believe a network factor is the appropriate way to reflect the impact of the arrangement. As submitted, we believe the most appropriate way to reflect the impact is with the Change in Network adjustment on Table 5.

21. How was the 5% annual trend applied to the capitation amounts included on the URRT determined?

Please see the worksheet named "Capitation" of the file named "PID_Response_Exhibits_GQO_SG_062119.xlsx". The 5% trend was selected using actuarial judgement and was influenced by the historical capitation trends for all our filings.

22. The capitation includes a Quality Fund/PQS payment. According to the URRT Instructions, allowed claims should not include payments for services other than medical care provided such as medical management, quality improvement, etc. Given this, explain why you believe it is appropriate to include this payment in capitation. Also, explain the difference between these payments and the quality improvement initiatives payment.

Quality Fund/PQS is not an administrative expense and therefore does not meet the federal definition of a quality incentive payment. The term "Quality Fund" is internal Geisinger nomenclature and should not be confused with the quality incentive category referenced in the federal guidelines. This expense is not directly related to specific claims and is allocated to lines of business using a PMPM, which is included here in capitation since those expenses are on a PMPM basis.

23. Please discuss why the capitation amount in Table 9 shows a value of $7.11 for 2020 and why the URRT Wkst 1 shows projected amount of $15.98

This was an error. Table 9 has been updated to reflect the combined GHP and GQO projected capitation of $16.02. There was no change to the rates due to this.

24. The URR instructions specify that the URRT should reflect the index rate for the quarter being changed (i.e. 1Q2020 in this filing) and not an average of the quarterly trended index rates. Please correct the index rate on the URRT WS1 to reflect the $557.12 calculated in the PAAM and not the $569.60.

We have corrected the updated "URRT_GQO_SmGrp_2020_062119.xlsm" file to reflect the 1Q2020 index rate.

25. In Table 5, quantitatively show the development of the paid to allowed factor of 0.894.

The Allowed ratio of 0.894 is calculated in column (8) of the "Induced_Util_Exhibit" tab of the "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx" file.

26. Please explain why the demographic shift factor was calculated using a weighted average age factor for 2020 essentially using a factor of 0 for the members without premium to a weighted average factor for 2018 using actual age for all members.

Upon further review we believe it would be appropriate to include the members with no premium in both weighted averages, as was done in the 2018 weighted average. We expect that changing this would increase the filed rates by an additional 0.2%.

27. Please provide quantitative support for the impact of changes to the risk model to the risk adjustment. Additionally, please provide the completed risk adjustment formula with all assumptions used.

We have used the Department's estimated 2018 Risk Adjustment as the starting point for 2020. We combine our GHP and GQO experience to provide greater consistency. The Department's estimate is $25.00 PMPM. This is calculated as (-$860,276 + -$3,883,201) / (16,868 + 172,899) = -$25.00 PMPM. Calendar year enrollment is from Table 2 for each market. Next, we used a 3rd party consultant's tool to analyze the impact of the coefficient changes. The result of the tool is an impact of a 63.7% increase. We applied this increase to the Department's estimate to arrive at -$40.92 = -$25.00*1.637.

28. The risk adjustment transfers should be included as an adjustment in the MLR numerator and not the denominator. Please correct. Please note the risk adjustment user fee of $0.18 PMPM should be included with taxes and fees in the adjustment to the MLR denominator. Please provide detail discussion and exhibits showing where this is included.

The Actuarial Memorandum has been updated to reflect this change in the MLR calculation. The risk adjustment user fee is now shown in Table 6 of the updated exhibits.

29. We see that the induced demand factors are normalized to a factor of 1.0 for GHP and GQO product offerings, however, we believe the single risk pool requirements require that the induced demand factors should be normalized for each company separately. Please provide updated materials which normalize the induced demand for GQO on its own.

The 2020 Unified Rate Review Instructions, section 1.5 on page 7 states under Single Risk Pool: "The single risk pool, as specified in 45 CFR 156.80(a-c), includes ALL non-grandfathered covered persons (lives) an issuer has in a state, within a market (individual, small group, or combined)."

It is our interpretation that an issuer should use all available information to estimate the total Small Group market projected allowed PMPM in the state. Page 3 of the Actuarial Memorandum describes that we believe that combining the experience of Geisinger Health Plan and Geisinger Quality Options is a better representation of the Single Risk Pool. Our intention is to accurately project the Single Risk Pool experience based on all available information for that Single Risk Pool and we believe that combining the experience of HMO, POS and PPO products will accomplish that.

30. Please explain why the induced demand factors for the platinum plans are the same as the gold plans.

Due to the change in contracting, Geisinger Health System believes that the increased utilization for Platinum level plans in preventive and other low-cost services will lead to reduced utilization in higher cost services. The overall effect will be the induced utilization that we filed for 2019 and we are not changing this assumption in 2020.

31. The gold/bronze induced demand relativities are around 11.6%, and the silver/bronze induced demand relativities are around 9.9% which is higher than the 8% ratio gold/bronze and the 5% ratio silver/bronze included in the HHS risk adjustment model. Please provide narrative and quantitative support for these induced demand factors, including discussion how health status is excluded.

The HHS Risk Adjustment Model is based on national claims data. We do not believe this accurately reflects the best estimate for induced demand factors. The induced demand factors do not include health status.

32. Regarding the Induced Utilization Exhibit

a. Please confirm that the ratio in Column (9) represents the pure induced utilization for each plan.

Confirmed

b. Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the AV and cost sharing factors for each plan. Please note that it is assumed that the AV and cost sharing factor includes the average tobacco factor.

Geisinger develops the paid to allowed factor shown in Column (6) of the Induced Utilization Exhibit and shown in the Pricing AV column of Table 10 from a rating model that determines a paid to allowed ratio based on the specific plan cost sharing. The rating model uses a claims probability distribution to determine values of deductible, coinsurance and out-of-pocket maximums. The rating model uses average utilization and cost to determine values for copays. The AV and cost sharing factors are shown as required in the Induced Utilization Exhibit by multiplying the paid to allowed ratio by the average tobacco factor.

c. Please provide any additional justification for induced utilization assumptions in the Company's pricing.

We believe the induced utilization factors are actuarially appropriate.

d. Please confirm that each plan's induced utilization factor was normalized by an aggregate factor, and that the resulting sum product (against 2/1/2019 membership or the projected membership distribution) produces

Please see the worksheet named "Induced_Util_Exhibit" of the file named "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

e. Please quantitatively demonstrate the calculation of the induced calibration factor.

Please see the worksheet named "Induced_Util_Exhibit" of the file named "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

f. Please quantitatively show and provide a detailed description as to how the induced demand factor shown in Table 7 relates to the induced utilization factors calculated in the "Induced Utilization Exhibit" shown in the Actuarial Memorandum.

The pre-normalization factors can be determined by multiplying column (9) of the Induced Utilization Exhibit by the factor shown in Table 7 cell K52.

33. Regarding Reinsurance

a. Please describe the reinsurance arrangement

We have reinsurance on all our Commercial products, including ACA compliant plans. Our attachment point is $750,000 with 90% coinsurance. Our coverage excludes professional services, but covers all other services (inpatient, outpatient and drug).

b. Please confirm that the July 2018 – June 2019 pmpm is the actual contracted pmpm amount.

Confirmed

i. What is the year-to-date associated reinsurance recovery pmpm for this period.

For Small Group GQO July 2018 – June 2019 there have been no reinsurance recoveries.

c. In projecting the reinsurance pmpm for rating period, Geisinger applies a 15% annual increase in the pmpm. Please support this assumption.

This was a general assumption based on the recent experience of high dollar claims. After we submitted the filing, we did receive our reinsurance renewal. The increase from the carrier was 64%.

34. Please provide the total commissions paid and the member months associated with those payments for calendar year 2018 for small group ACA-Compliant business.

The calendar year 2018 member months for GQO small group ACA-compliant business is shown on table 1 as 172,899. Broker Commissions for this period are $2,005,394.

35. The calibration factors seem to be based on the projected membership of both GQO and GHP. Please note per the single risk pool requirements the calibration factors for GHP and GQO should be calculated and applied separately.

The projected 2020 Index Rate which has been developed is the same between the GHP and GQO Small Group rate filings. Because the projected Index Rate is the same between the two filings, the projected mix of membership by age and gender, geographic rating area, tobacco use, and morbidity is also being projected to be the same.

36. Please explain why you used an age calibration factor that excluded members with $0 premium, rather than including those members using a factor of 0. This was used both on the URRT Wkst 2 and on Table 10.

Our interpretation of the guidance was to remove the members with $0 premium from the calibration.

37. Please provide discussion and detail for the development of projected administrative expenses compared to experience period administrative expenses, and the development and appropriateness of the trend used. Discuss whether exchange user fees are included or excluded in the historical experience shown on the Administrative Expense tab of the additional exhibits worksheet.

CY20 projected administrative expenses are based primarily on the FY 2020 budget. The FY 2020 budget is developed at the department level after meeting with each department head and assessing what is required in the upcoming year to best serve our members. The departmental budgets are then reviewed and approved by GHP's Leadership Team (CEO, CFO, and Chief Officers). Exchange user fees are not included in the historical administrative expense exhibit.

There are several factors causing the admin increase from CY18 to CY20, including:

1. Shared Services allocation
2. Full year impact of increased staffing in several areas
3. Facets depreciation
4. Special Investigations Unit investment in Change Healthcare Fraud, Waste, and Abuse software
5. Rx Vendor Solutions

All projected administrative expenses are appropriate.

38. What portion of the general administrative expenses are for marketing? We assume sales and marketing are under this category. If they are not, where are they? Please provide breakdown of the general administrative expense item.

As shown in the worksheet named “Administrative Expense” of the file named “PID_Response_Exhibits_GQO_SG_062119.xlsx”, marketing expense accounts for 1% of administrative expenses.

39. Please provide detail supporting the geographic factors buildup including discussion regarding how changes in morbidity were not included.

The geographic factors used in the filing are consistent with the current approved factors. As is stated in the Actuarial Certification, the geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.

40. Please provide detail on the alternative method used for the AV calculation, the adjustments to the benefits used in the AV calculator (approach 1) and show calculations of the adjustments.

Please see the worksheet named “AV Calculator” in the file named “PID_Response_Exhibits_GQO_SG_062119.xlsx”.

41. Please comment on whether the care management efforts between the HMO, POS and PPO products vary. If so, wouldn't the retention costs also vary?

Care management efforts do not vary by product.

42. Please provide discussion and mapping document discussing whether or not members from plans terminated in 2018 were mapped to new or existing plans in 2019.

Please see the worksheet named "2018 to 2019 Mapping" of the file named "PID_Response_Exhibits_GQO_SG_062119". This shows that all the discontinued 2018 plans were mapped to 2019 plans and is also shown on Table 10 of the 2019 filing.

43. Please provide total amount of reserves.

The year end reserve for CY2018 for GQO Small Group ACA is $6,676,366.

44. Please provide discussion of any changes to pharmacy formulary and where those changes were reflected in the trends.

The routine changes to the formulary that occur every year are included in the trend regression analysis without any explicit adjustment. There were no significant formulary changes brought up in discussion with the pharmacy team when developing the trend projections.

45. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to the 50% coinsurance for that category.

The professional copays on the expanded bronze plans for primary and specialty care are below 50% coinsurance. The expanded bronze plans in this market have a primary care copay of $30 and a specialty copay of $60. Projected average cost per visit for this population for primary care is $96 and for specialty is $195.

46. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost pmpms for calendar years 2015 – 2018, as applicable.

Please see the worksheet named "Projected vs Actual" of the file named "PID_Response_Exhibits_GQO_SG_062119.xlsx".

47. Please provide an exhibit showing the actual experience for calendar years 2014 – 2018 and the projections for 2019 for the following categories: Member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy. Also show how this reconciles with the Annual Financial Statements for those periods. financial gains and losses.

Please see the worksheet named "Financial Performance" of the file named "PID_Response_Exhibits_GQO_SG_062119.xlsx". This requested information does not include the risk adjustment transfer payments and does not accurately reflect the experience of this market. Annual Financial Statements are reported on a paid basis and do not reconcile to this data as shown since it is on an incurred basis.

48. We have repurposed row 54 to capture RA User Fees. Please provide the RA User Fee percentage and pmpm amount in cells C54 and D54, respectively.

The filing has been updated to reflect this change. The RA User Fee has been moved from Table 5 to Table 6. This has slightly changed the rate projections due to moving this fee out of the Index Rate and into taxes and fees.

49. Please explain the derivation of the Health Insurance Provider fee included in the Taxes tab of the additional exhibits worksheet. In particular, explain the development of the Expected Premium from Data Year and Premium in fee year.

Please see the worksheet named "Taxes" of the file named "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx". The expected national premium and

expected Geisinger premium in the data year are based on historical totals trended to the data year period at an assumed 7% annual trend. Geisinger premium is total entity premium for all markets that are subject to this fee. The data year Geisinger premium is adjusted as required to calculate the net premium. The estimated fee is then determined as Geisinger premium divided by national premium, multiplied by the applicable amount.

a. Provide the actual paid HIT fees on a pmpm and percent of premium for calendar years 2018 and 2016.

Please see the worksheet named "HIT" of the file named "PID_Response_Exhibits_GQO_SG_062119.xlsx". This fee is determined for all insurance markets and Geisinger entities combined and does not reflect the % of premium or PMPM for any specific entity and/or market. Each of the ACA market rate filings assigns a % of premium charge appropriately using the methodology shown on the worksheet named "Taxes" in the file named "PA_Act_Memo_Additional_Exhibits_GQO_SmGrp_051519.xlsx".

50. The PA AM indicates that a new tiered provider network is being offered in areas 3,6,7 and 9 with a network factor of 1.00. The All-Access PPO network also has a network factor of 1.00 and is offered in areas 1,2,3,5,6,7 and 9. Both networks will be offered in areas 3, 6, 7 and 9. Please discuss the differences in these networks and why they both have a factor of 1.00.

The new tiered network is filed and approved as a distinct network offered only in a limited number of counties. The providers and the contracts in both networks are the same. There is no network adjustment applied, therefore both have a 1.00 factor.

51. Please confirm that you have tested to ensure that the PID rate exhibits and the Federal rates template included in this filing and in the binder are all the same.

Confirmed.

# TREND DOCUMENTATION

Utilization trends were determined by analyzing historical trend patterns and using regression analysis to project future utilization per 1000 members. These projected trends were adjusted to account for medical management initiatives that have taken place or will take place in future time periods. The adjustments to the regression analysis were determined during meetings with Actuarial Services, Medical Management and/or Pharmacy Department leadership. Unit Cost trends are determined by using a Unit Cost Forecast Model maintained by our Actuarial Services and Provider Network Management teams. The forecast model determines future unit cost trends for Inpatient, Outpatient and Professional services using expected contract unit cost changes and historical provider mix. There are also adjustments made to the pharmacy unit cost trends to account for expected pharmacy changes as suggested by our Pharmacy Department leadership. There is an additional mix trend component included in all the trends which was developed to account for an overall impact of intensity/mix. This trend component encompasses changes in provider mix, changes in unit cost intensity, increased costs due to technology, provider coding changes just to name a few. We have used the experience of our HMO and PPO Large Group market to develop our trends. This ensures we have credible data for the development of trends for all markets. The provider contracts are the same for all Commercial products.

**Inpatient trends:** Unit Cost trends are determined using the Unit Cost Forecast Model as explained above. From discussions with our Medical Management leadership we adjust inpatient utilization trends from the regression analysis for medical management initiatives when appropriate.

**Outpatient trends:** Unit Cost trends are determined using the Unit Cost Forecast Model as explained above. From discussions with our Medical Management leadership we adjust outpatient utilization trends from the regression analysis for medical management initiatives when appropriate.

**Professional trends:** Unit Cost trends are determined using the Unit Cost Model as explained above. From discussions with our Medical Management leadership we adjust outpatient utilization trends from the regression analysis for medical management initiatives when appropriate.

**Pharmacy trends:** Pharmacy trends are selected using regression analysis and actuarial judgement after having discussions with our Pharmacy Department leadership about their expectation of future pharmacy costs. Historical utilization trends are used to separate the total allowed PMPM trend into the utilization, unit cost and mix components. The unit cost trends are calculated from the assumed total allowed PMPM trend removing the utilization and mix components. The increase in unit cost trend is to account for increased costs in specialty and high cost biologics which are not accounted for in the historical trends or in our regression analysis.

Geisinger Quality Options
Small Group Filing for 2020
Response to Questions Round 2
SERFF Tracking Number: GSHP-131915683

1. Follow up to question 5 and 6: Thank you for the additional exhibit requested. What we are looking for is the benefit change factors used for plans that had benefit changes, such as the MOOP and deductible increasing. For those plans, we would like to see how the benefit changes affected the pricing AV values, so we can determine the reasonableness of the resulting pricing AVs as compared to what they would be without the benefit changes. Please provide the breakdown by plan to show the change in pricing AV without benefit changes and the pricing AV with the benefit changes and the effect of the benefit changes themselves.
Please see the worksheet named "Benefit Changes" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx".
2. Follow up to question 9: Did some large claims come in relatively late that decreased the completion factors for July 2017 and February 2018? Were claims being held for a large provider until a contract could be settled? Please provide logical reasoning behind these factors.
There are high dollar accruals effecting the factors. These are for claims that we are expecting to pay, but, have not paid yet. For July 2017, we have one claim for $300k and for Feb 2018 we have 2 claims, one for $200k and the other one for $150k.
3. Follow up to question 10: We disagree that Table 4 in the original and revised PAAM exhibits (and new Table 4c) do not include capitation or prescription drug rebates in the paid claims column. Using values shown in Table 2 for paid and ultimate incurred to compare to the sum of the values shown in Table 4 for the incurred claims column (paid) and the ultimate incurred claims column over each month in CY2018, you can see that the difference in the values equals the capitation and prescription drug rebate. Thus, the question remains to be answered. Please explain why the prescription drug rebates and capitation are included in the paid claims in Table 4 such that the completion factors are applied to the rebates and capitation. Please explain whether these amounts were also included in the derivation of the IBNP factors used.
We have removed capitation from all columns and added back in prescription drug rebates to incurred claims and ultimate incurred claims columns in the worksheet named "Table 4c" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx". As previously stated, capitation is not included in the derivation of completion and completion was not applied to capitation expense. Prescription drug rebates are not included in the derivation of completion and completion was not applied to prescription drug rebates. We have populated each version of Table 4 with the claims experience from our data systems. Completion is applied at the claim level within our data systems. We are not applying a completion factor at the level of detail shown in Table 4. We are simply providing the claims data and the completion factor at this level to accurately show ultimate incurred claims in the format provided.
4. Follow up to question 11 and 13: Table 4b you state is large group experience, which you use for trends. Since Table 2b and Table 4b do not match, please correct Table 4c provided with your responses to reflect the values in Table 2b. These should be the Table 4c values except please remove the

capitation and prescription drug rebates from the values in Table 4c in the incurred claims and ultimate incurred claims columns. You can tell they are included in Table 4c by adding the ultimate incurred for each of the months in calendar 2018, then subtracting the total capitation and prescription drug rebates listed in Table 2b, which results in the ultimate incurred claims (and paid claims) prior to capitation and prescription drug rebates shown in Table 2b. In addition, the completion factors shown in Table 4b, you state, are based on large group experience. The PAAM Actuarial Memorandum on page 3 states that, "The IBNR factors were based on legal-entity level claims completion tables which include individual and group experience." When you update Table 4c values to equal values on Table 2b, please show the IBNR factors based on the experience used and described in the Actuarial Memorandum. We note that with the addition of Table 4c provided in your response, there are now 3 different sets of completion factors shown.

It is correct that Table 4, Table 4b and Table 4c all include different claims. Table 4 includes claims for GQO small group ACA market only. This data is not used in developing trends, therefore, Table 4b is provided and includes the claims of our commercial large group market. Table 4c is the combined GHP and GQO claims data for the small group ACA market as requested.

We have removed capitation from all columns and we have also added prescription drug rebates to the incurred claims and ultimate incurred claims columns in the worksheet named "Table 4c" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx".

Upon further review, the sentence referenced on page 3 of the Actuarial Memorandum is confusing and perhaps misleading. The completion factors are determined separately by entity and market, meaning individual completion factors are developed separate from group completion factors. We have changed the sentence in the memo to "The IBNR factors were based on legal-entity and market segment level claim lag tables. ~~claims completion tables~~ ~~which include individual and group commercial experience~~."

5. Follow up to question 15: Please provide qualitative and quantitative support for the unit cost trends for inpatient, outpatient and professional. Explain occurrences driving the unit cost trend lower for outpatient hospital. Tables reflecting changes in contracted rates with distributions of expected usage by contract would be appropriate.

Unit Cost trends are determined by using a Unit Cost Forecast Model maintained by our Actuarial Services and Provider Network Management teams. The forecast model estimates future unit cost trends for Inpatient, Outpatient and Professional services using expected contract unit cost changes and historical provider mix. Our interpretation of the 'Instructions" tab of the Completeness and Redaction Checklist was that the Department would not request specific provider contract information. Due to Geisinger's size, providing contract specific information would be detrimental to our competitive position.

6. Follow up to question 19: Please provide quantitative support including historical analysis with adjustments for forward looking changes used to develop the utilization and induced demand trends. Include items mentioned on page 4 of the Actuarial memorandum for the medical management savings.

Please see the worksheet named "Explanation" in the file named "PID_Response_Trend_Support_071219.xlsx".

7. Follow up to question 20b: The document provided entitled, "VBRS Memo FINAL-Shared.pdf" does not describe any change in the underlying network. Based on the description of the accounting for this

arrangement, this seems more like a unit cost trend factor, to account for different contractual arrangements. The supporting correspondence indicates that this arrangement was approved by the PID.

a. Please provide the details of the PID approval.

The PID approval is the file named "Geisinger PID IDS ltr of no objection 18_08_10.pdf".

b. The Department's website shows instructions for filing HMO/IDS arrangements but do not reference PPOs. Please discuss where guidance is provided for the PPO/IDS arrangement.

In submitting the VBRS arrangement to the Department, we filed the HMO and PPO together, following the HMO instructions that provide for filing the arrangement with the Department following initial submission to Department of Health.

c. What percentage of the ACA population is covered by this arrangement.

The small group ACA population as of February 2019 has about 84% of the population covered by the VBRS arrangement.

8. Follow up to question 20c: As previously requested, please provide quantitative and qualitative support for the development of the 0.93 network factor. Include numerical effect on 2018, and the projection to 2020 claims to account for a full year's effect versus only a half year's effect in the base period, savings on utilization expected, etc., as appropriate.

The Global Risk Arrangement defines a new relationship with our clinical enterprise, through the Value Based Risk Share (VBRS). Our network factor on Table 5 is our best representation of the impact the VBRS will have on the Small Group GHP market. It would not be meaningful to review historical claims when valuing this prospective risk arrangement.

9. Follow up to question 22: Please fully describe what the Quality Fund/PQS payment is for, what services are provided, whether it is an incentive program.

Quality Fund/PQS are provider pay-for-quality incentive programs with the intent of improving HEDIS results. Quality Fund/PQS were allocated to the experience period used in the rate filings based on member months. The funds set aside for the program are paid to the doctors based on their results and are expected to benefit all Geisinger Quality Options and Geisinger Health Plan members utilizing Geisinger Clinic physicians through increased cost efficiency and higher quality care. For financial reporting and federal MLR filing requirements this expense is a medical expense and not an administrative expense.

a. Your response did not address why you believe it is appropriate to include this payment in capitation, given the URRT Instructions. Please explain.

The URRT instructions provide only "preferred definitions" of service category. We believe capitation is the appropriate category to use since this is the only category using a PMPM value for a fixed expense. This expense should not be included in facility or professional services since this is not billed by facilities or physicians. This program is also not linked to specific services and does not meet the "preferred definition" of other services. This expense is determined annually and allocated by member months, much like a capitated arrangement.

10. Follow up to question 26: We agree that you should include all members, whether a premium is paid or not, since the demographic factor is meant to project changes in claims costs for changes in demographics. Please make this change and update tables and documentation.

The demographic factor used on Table 5 has been updated to include all members. The worksheets named "Feb_Age_Factor" and "Manual_Age_Factor" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx" show the calculation of the demographic factor.

11. Follow up to question 27: Please provide the detail with each component of the risk adjustment transfer formula, as requested. Please provide narrative and quantitative support for the 63.7% adjustment to the risk score based on the impact of the coefficient change, providing information on the elements driving the change.

We do not have a completed risk adjustment formula calculated and therefore, cannot share each component with you. We have used the 2018 Risk Adjustment transfer payment as the starting point for 2020. We combine our GHP and GQO experience to provide greater consistency and accuracy. We then used the results of the 3rd party consultant's tool to analyze the impact of the coefficient changes to the model. The tool uses risk scoring components (prevalence rates of condition categories and demographic buckets) and rescoring the risk scores of our population and the market wide population captured in 2018 in their reports using 2020 risk coefficients as published by CMS. The tool does not make any assumption on changes in market morbidity from 2018 to 2020. It only measures the differences in relative risk due to coefficient changes published by CMS. We also note that the market wide population did not include every issuer in PA.

12. Follow up to question 29: We believe that the use of combined data from two separate companies to develop manual rates is not unreasonable. However, when developing each companies separate rates, the induced demand factors must be normalized separately for each companies' projected experience. Therefore, please update the calculations to reflect the projected member months separately for GHP and GQO.

We believe that the combined GHP and GQO experience is our best estimate of the projection period. We continue to see year over year changes in enrollment that make pricing in this market extremely difficult. By separately normalizing the entities rate development we will risk creating adverse selection. We do not agree that the single risk pool regulation requires us to do each entity individually as we are one single issuer.

However, as instructed by the rate reviewer, we have changed the induced demand factor normalization as shown in the file named "2020_SmGrp_GQO_PAAMExhibits_071219.xlsx".

13. Follow up to question 31 and 32c: As previously requested, please provide justification, both qualitative and quantitative, for the induced utilization factors shown in Table 10. Provide source of data, adjustments to remove health status by plan, and calculations for each plan. Stating that the factors do not reflect health status does not allow another actuary to determine the reasonableness of that statement. ASOP 41, section 3.2 states, "In the actuarial report, the actuary should state the actuarial findings, and identify methods, procedures, assumptions, and data used by the actuary with sufficient clarity that another actuary qualified in the same practice area could make an objective appraisal of the reasonableness of the actuary's work as presented in the actuarial report."

Because Geisinger presents a small piece of the ACA market (less than 15% statewide) we believe the competitor's data is more credible than ours when trying to determine induced demand for the market. We look to the competitors to ensure the broader accuracy of the induced demand factors we apply.

We have used the competitor's filings and we are assuming the competitors have made adjustments to remove health status from their analysis as required.

14. Follow up to question 31b: As requested, please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the AV and cost sharing factors for a bronze plan, a silver plan and a gold plan.

Geisinger develops the paid to allowed factor shown in Column (6) of the Induced Utilization Exhibit and shown in the Pricing AV column of Table 10 from a rating model that determines a paid to allowed ratio based on the specific plan cost sharing. The rating model uses a claims probability distribution to determine values of deductible, coinsurance and out-of-pocket maximums. The rating model uses average utilization and cost to determine values for copays. We have provided an example of 3 plans in the worksheet named "Pricing AV" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx".

15. Follow up to question 32d: Please update the normalization of the induced utilization factor to reflect GQO membership only.

Please see the worksheet named "Induced_Util_Exhibit" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx".

16. Follow up to question 32e and 32 f: As part of the information provided in response to the follow up question 31 and 32c, please provide the pre-normalized values by plan which aggregate to the induced demand factor shown in Table 7 cell K52.

Please see column (10) on the worksheet named "Induced_Util_Exhibit" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx".

17. Follow up to question 35: There is a large disparity in the member month projections for GHP (15,900) and GQO (193,128). As noted in question 35, the single risk pool requires the calibration factors for GHP and GQO to be calculated and applied separately. Therefore, please update the calculations to reflect the projected member months separately for GHP and GQO.

We believe that the combined GHP and GQO experience is our best estimate of the projection period. We continue to see year over year changes in enrollment that make pricing in this market extremely difficult. By separately calibrating the allowable rating factors for the entities rate development we will risk creating adverse selection. We do not agree that the single risk pool regulation requires us to do each entity individually as we are one single issuer.

However, as instructed by the rate reviewer, we have changed the induced demand factor normalization as shown in the file named "2020_SmGrp_GQO_PAAMExhibits_071219.xlsx". The worksheets named "Age_calibration" and "Area_calibration" of the file named "PID_Response_Exhibits_GQO_SG_071219.xlsx" have also been updated to reflect this change.

18. Follow up to question 40: We think we understand the math behind the alternative method used. However, for documentation purposes, please provide the narrative behind the alternative method used.

Geisinger Health Plan uses three separate tiers of generic drugs within the Pharmacy benefit. The three tiers are labeled Zero, Generic Preferred, and Generic Nonpreferred. We use total allowed amounts for each of the three tiers to get the percentage in each tier. We then use these percentages to weight the three copay levels together to get the final generic copay amount used in the AV Calculator for each plan.

19. Follow up to question 47: Financial statements should be on an incurred basis, as IBNP reserves adjust the paid basis to reflect the ultimate incurred. We understand the data requested does not include the risk adjustment transfers. What we are looking for is for you to reconcile these results to the financial statements. Please make those adjustments to show how the results reconcile.

We have reviewed the annual financial statements and found that the closest exhibit to reconcile this data is the Analysis of Operations by Lines of Business on page 7. For the years provided, the small group ACA market has made up 7% - 35% of the total GQO experience shown in this exhibit for the commercial market line of business in column 2. The information we supplied in response to question 47 accounts for only 7% - 35% of the underwriting gain (loss) on line 24 of page 7. The remaining 93% - 65% of the underwriting gain (loss) is attributable to other GQO commercial lines of business. This includes ACA individual, non-ACA individual (grandfathered and transitional), small group (transitional) and large group markets. Also, the annual financial statements report premium net of the ACA risk adjustment transfer payments.

20. As requested, you have added the RA User Fees in Table 6. Please identify where offsetting adjustments were made elsewhere.

The RA User Fee was previously included in the Projected Risk Adjustment PMPM row of Table 5. We removed the impact of the RA User Fee from Table 5 when we added it into Table 6.

21. In response to the Department's RADV survey, issuers indicated that they did not include an adjustment in the initial submission, as there was no supportable reason for a RADV adjustment in the 2020 rate submission. Therefore, the Department has determined that there should be no RADV adjustments in the 2020 rate filings; please modify the filing accordingly, if necessary.

Acknowledged. We did not make an adjustment for RADV therefore we have no adjustment to make to our filings.

22. If the risk adjustment results released on June 28, 2019 are inconsistent with your projected assumptions, you may modify the risk adjustment transfer amount in Table 5. Supporting documentation must be provided for all modification. If such a modification is made, revise all the documents and exhibits impacted and the PA Actuarial Memorandum to discuss this change. This change must be made with your responses due by July 12, 2019.

The risk adjustment results released on June 28, 2019 were consistent with our projected assumptions, therefore no adjustment to our filings have been made.

# Geisinger Health Plan and Geisinger Quality Options Trend Support
# ACA Market Rate Filings effective 2020

Here is a list of the worksheets in this file and a brief description of each worksheet.

| Sheet Names | Visible | Approximate Size | Description |
|---|---|---|---|
| Explanation | Visible | 8.31 kb | Explains the process to go from each worksheet below to the Summary, which matches Table 3 in Actuarial Memorandum Exhibits. |
| Summary | Visible | 13.86 kb | Links to the other worksheets remain intact to demonstrate the trend calculations. |
| Trend Decision Tree | Visible | 16.06 kb | Explains the selection process for trends. Regression trends were used, however, they were adjusted as explained below. |
| Comm_LG_Medical_Util | Visible | 107.38 kb | Inpatient, outpatient and professional utilization review and forecast. |
| Comm_LG_Medical_PMPM | Visible | 84.02 kb | Inpatient, outpatient and professional allowed PMPM review and forecast. |
| Comm_LG_Pharmacy_Util | Visible | 90.03 kb | Pharmacy utilization review and forecast. |
| Comm_LG_Pharmacy_UC | Visible | 90.08 kb | Pharmacy unit cost review and forecast. |
| Comm_LG_Pharmacy_PMPM | Visible | 90.80 kb | Pharmacy allowed PMPM review and forecast. |
| Trend_Summary_FY2020 | Visible | 17.05 kb | This worksheet summarizes and combines the GHP and GQO large group market data. |
| GHP_LG_FY2020 | Visible | 106.45 kb | Updated for FY2020 Geisinger Health Plan review and forecast. |
| GQO_LG_FY2020 | Visible | 106.07 kb | Updated for FY2020 Geisinger Quality Options review and forecast. |

## Description of process:

The worksheets that begin with Comm LG contain the trend study done for the FY 2019 Budget. This trend review is completed once per year and the results are used for all budgeting and rate filings until updated. Each service category is reviewed with medical management and pharmacy departments for reasonableness and to incorporate adjusts for initiatives to reduce overall health plan expenditures. In some cases, a specific trend is selected and in other cases a specific utilization per 1000 members, unit cost or allowed PMPM are selected for the forecast period.

The worksheets labeled as FY2020 are the updated trend analysis for the FY 2020 Budget. When performing this update Geisinger was in the middle of transitioning between data warehouses and the utilization figures included in our data sources were not correct. Due to this limitation the updated trend study only reviewed and projected total allowed PMPM. The worksheet named Trend Summary FY 2020 combines the trends selected for each entity into one projection. This was used for all budgeting and rate filings. Since the ACA market rate filings require a utilization and unit cost trend in certain exhibits, the previous year's trend study was used to allocate the total allowed PMPM. This calculation is shown on the worksheet named Summary.

The Summary worksheet displays each relevant trend component and includes links to the appropriate worksheet in order to show how we determined the amounts shown in Table 3.

The exception here is the unit cost trends. Unit Cost trends for inpatient, outpatient and professional services are developed by reviewing contracted rate increases and historical total allowed costs by facility and provider. Due to Geisinger’s size, providing contract specific information would be detrimental to our competitive position.

| Commercial | | Inpatient | Outpatient | Professional | Rx |
|---|---|---|---|---|---|
| | Unit Cost | 2.22% | 0.91% | 2.37% | 14.31% |
| | Utilization | 0.03% | 2.75% | 0.67% | 0.99% |
| | Intensity/Mix | 3.90% | 6.16% | 1.15% | -2.93% |
| **FY 2019** | Composite Trend | 6.24% | 10.07% | 4.24% | 12.06% |
| **FY 2020 Update** | Composite Trend | 9.03% | 9.81% | 4.85% | 7.59% |
| **Table 3** | Unit Cost | 3.21% | 0.89% | 2.71% | 9.01% |
| | Utilization | 0.04% | 2.68% | 0.77% | 0.62% |
| | Intensity/Mix | 5.65% | 6.00% | 1.32% | -1.85% |
| | Composite Trend | 9.08% | 9.81% | 4.87% | 7.66% |
