PROPOSED RATE INCREASE

The changes to the single risk pool gross premium average rate per member per month (PMPM) from calendar year 2015 to calendar year 2017 were incorporated into the pricing and reflected in the Unified Rate Review Template. The changes are driven by factors including: changes in market-wide population risk morbidity and covered services, increasing unit costs for medical services, increasing utilization of medical services, increasing fees and taxes imposed by the federal government, anticipated costs to administer the plan, anticipated revenue or payments due to market-wide risk adjustment, and the discontinuance of net reinsurance payments from the Federal Transitional Reinsurance Program.

The weighted average increase across KHPE plans based on projected membership, inclusive of the impact of benefit and cost sharing changes, is 3.7%. The minimum increase is 1.2% and the maximum increase is 5.8%.

WORKSHEET 1: DATA COLLECTION TEMPLATE

SECTION I: EXPERIENCE PERIOD PREMIUM AND CLAIMS

PAID THROUGH DATE

Experience period premium, claims, and member months are obtained from the company's internal data warehouse. The claims data is collected for incurred dates from January through December 2015 and paid through January 2016. Earned premiums and member months are for January through December 2015. The data are for all direct-written small group business of KHPE in the Commonwealth of Pennsylvania

PREMIUMS (NET OF MLR REBATE) IN EXPERIENCE PERIOD

Earned Premiums (net of MLR Rebate) in Experience Period are developed by summing the earned premium reported in the company's internal data warehouse and adjusting for MLR rebates, if any, for the period. Although 2015 federal MLR rebate calculations are not final as of the writing of this memorandum, no federal MLR rebates are expected for calendar year 2015, so no adjustment to earned premium for MLR rebates is needed.

The calculation for federal minimum loss ratio rebates is based on 2013, 2014, and 2015 experience of earned premium, incurred claims, quality improvement expenses, and taxes. The three years of experience is blended for all segments.

ALLOWED AND INCURRED CLAIMS INCURRED DURING THE EXPERIENCE PERIOD

Paid-to-Date and Incurred Claims, and Member Months

Insurer fee-for-service claims expenses and member liabilities for dates of service in January 2015 through December 2015 and paid through January 2016 are sourced from the IBCFOC's internal data warehouse. The claims and member liabilities are completed with incurred but not reported (IBNR) adjustments to develop ultimate incurred insurer fee-for-service claims expenses and member liabilities for the January through December 2015 period. Capitation amounts are also sourced from the internal data warehouse for the January through December 2015 period but they are not adjusted for IBNR.

Allowed Claims

Allowed claims are determined by separately obtaining paid-to-date fee-for-service claims and member cost-sharing amounts, applying claim lag factors to those amounts to estimate ultimate incurred fee-for-service claims and member-sharing amounts and adding them together with capitation amounts.

Allowed claims do not include ineligible claims, payments for services other than medical care provided, recovery payments related to internal large claim pooling mechanisms, or active live reserves.

IBNR Development

Medical fee for service incurred but not reported (IBNR) claims are modeled through the use of standard claim lag methodologies. A range of results is developed, and a provision for adverse deviation is applied. The provision for adverse deviation is dependent on many factors such as stability, size, product mix, etc.

The completion factors are developed annually in the 2Q – 3Q period. We do not believe our IBNR is unusually high or unusually low for incurred 2015 paid through January 2016.

Experience Period Index Rate

The Index Rate of Experience Period is estimated by removing cost and utilization trend from the Index Rate for Projection Period.

SECTION II: ALLOWED CLAIMS, PMPM BASIS

BENEFIT CATEGORIES

Utilization and Unit Cost data for allowed claims in the experience period are provided in Section II. The data is provided by benefit category using a standardized indicator from the internal data warehouse that assigns each claim line to a category based on the type of provider and the location of the service. The utilization and unit cost data are provided for the following categories: Inpatient Hospital admits, Outpatient Hospital visits, Professional visits, Other Medical visits, Capitation per member per month (PMPM), and Prescription Drug scripts.

Experience Period capitation is reported as a per member per month (PMPM) value. In order to complete the URRT, the Utilization per 1,000 statistics for capitated services only is reported as 1,000 so that the appropriate capitation PMPM is reported.

PROJECTION FACTORS

The estimated incurred claims experience on an allowed basis for January 2015 through December 2015 is projected to the future rating period by several factors. Factors were calculated from the combined experience of QCC and KHPE.

Changes in Population Risk Morbidity

Experience period allowed claims are adjusted to account for differences in the average morbidity of the single risk pool population underlying the experience and the anticipated population in the projection period. This adjustment reflects changes in the small group market-wide morbidity due to

one or more of the following: guarantee issue, the individual mandate, Medicaid and CHIP migration, take-up of insurance by the previously uninsured, health status of the newly insured, enrollment from prior high risk pools, subsidy effects, dumping of enrollment from group markets to the individual market, and market-wide impact of transitional products/plans.

Changes in Other Factors

Experience period allowed claims are adjusted to account for differences in the single risk pool population underlying the experience and the anticipated population in the projection period pertaining to several factors not due to changes in morbidity or the costs and utilization of medical care. This adjustment reflects: additional benefits required to be covered as essential health benefits; recently mandated benefits required by state law that are not reflected in the experience period data; benefits in the experience that are removed for the projection period; anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period; changes in demographic characteristics of the single risk pool experience period population and the projection period population (including age, gender, region, and tobacco use); changes in the provider network (adding or removing a provider system or introducing a limited network option); and anticipated changes in pharmacy rebates.

Trend Factors

a. Annualized Cost Trend

Annual cost trend reflects changes in costs of medical treatment due to medical inflation and changes in the distribution of services across network providers. The trend value is developed by reviewing historical medical costs for the single risk pool and adjusting them for anticipated future provider contracting reimbursement levels. The data is normalized for changes in age, benefit changes during the experience period, changes to provider contracts, and prescription drug formulary, and new drugs brought to market.

b. Annualized Utilization Trend

Annual utilization trend reflects the change in the number of units per 1,000 members for a fixed level of illness burden and includes changes due to the mix and intensity of services provided and changes related to shifts in product mix. It also includes effects of selection, if any, since this cannot be reflected in the relative cost of the various products and plans offered.

CREDIBILITY MANUAL RATE DEVELOPMENT

The experience period claims for the single risk pool are determined to be fully credible; therefore no credibility adjustment is required.

SECTION III: PROJECTED EXPERIENCE

PAID TO ALLOWED RATIO

The Projected Allowed Experience Claims PMPM shown in Worksheet 1 represents projected allowed claims experience PMPM for the projected portfolio of plans. The Paid to Allowed Average Factor in Projection Period adjusts the allowed down to Projected Incurred Claims before ACA reinsurance and risk adjustment for the population anticipated to be covered in the projection period. The Projected Incurred Claims before ACA reinsurance and risk adjustment represents the net amount of incurred insurer claim liability expected in the projection period, net of member cost sharing and cost sharing paid by HHS on behalf of low-income members. It reflects the average benefit level anticipated during the projection period. The ratio was calculated using incurred (before ACA reinsurance and risk adjustment) and allowed PMPMs from worksheet two of the URRT.

RISK ADJUSTMENT AND REINSURANCE

Projected Risk Adjustment PMPM

Projected Risk Adjustment is accounted for in Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated risk adjustment transfer amounts for the projection period. The amount reflects the projected morbidity for the single risk pool for IBCFOC in the projection period.

The estimated risk adjustment revenue for all of the plans in the risk pool is developed using the following methodology. We recognize that the HHS payment transfer formula implies that the projected incurred claims based solely on the experience period single risk pool claims need to be adjusted by the ratio of the current statewide market's risk relative to allowable rating factor (ARF) for age compared to the single risk pool's risk relative to ARF presented during the experience period. This adjustment, together with the assumed future changes in population risk morbidity, results in the issuer's pricing being consistent with the anticipated morbidity level of the future statewide market.

Estimating the current statewide market's risk and ARF is difficult, because we do not have access to the relevant data from other carriers operating in this market. In order to gain insight, we participated in the Wakely Consulting Group's risk adjustment reporting project for this market. Our assumptions are the result of a combination of measurements based on Wakely's reports and our own actuarial judgment.

The anticipated risk adjustment transfer revenue is allocated proportionally based on plan premium. The Projected Risk Adjustment is subtracted from Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated receipt of risk adjustment transfer amounts for the projection period.

When the projected risk adjustment amounts for KHPE and QCC are combined, the result is consistent with the projection made in our initial submission, and is comparable to the Wakely projection. We also considered 2014 risk transfer results.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium (Individual Market Only)

With the expiration of the reinsurance program at the end of the 2016 benefit year, there is no reinsurance premium assumed in the rates.

NON-BENEFIT EXPENSES AND PROFIT & RISK

Administrative Expense Load
An Administrative Expense Load is applied to Projected Incurred Claims to reflect expenses related to quality improvement and fraud detection/recovery and other expenses of operating a business, broker commissions, and premium payment processing fees.

Profit & Risk Load/Contribution to Surplus
A Profit & Risk Load/Contribution to Surplus for the single risk pool is applied to Projected Incurred Claims for the projection period, if applicable.

Taxes and Fees
A Taxes & Fees load is applied to Projected Incurred Claims to pass through the fees and taxes levied by the federal and state governments.

PROJECTED LOSS RATIO

The projected loss ratio for the single risk pool is estimated to exceed 80% reflecting premium adjustments permitted by the federal MLR calculation.

SINGLE RISK POOL

The single risk pool reflects all covered lives for every small group non-grandfathered product and plan combination for KHPE in the state of Pennsylvania. It is established according to the Single Risk Pool requirements in 45 CFR § 156.80(d).

INDEX RATE

The Index Rate is defined as the EHB portion of projected allowed claims divided by all projected single risk pool lives. The Index Rate is the same value for all non-grandfathered plans for KHPE small group Plans in Pennsylvania. The Index Rate reflects the twelve month projection for calendar year 2017. It has been developed following the specifications of 45 CFR § 156.80(d)(1).

MARKET ADJUSTED INDEX RATE

The Market Adjusted Index rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules: federal reinsurance program adjustment, risk adjustment and exchange user fees. The Market Adjusted Index Rate reflects the average demographic characteristics of the single risk pool.

PLAN ADJUSTED INDEX RATE

The Plan Adjusted Index Rate is calculated as the issuer Market Adjusted Index Rate adjusted for all allowable plan level modifiers defined in the market rating rule. These include actuarial value and cost sharing adjustment, provider network, delivery system and utilization management adjustment, adjustment for benefits in addition to the EHBs, impact of specific eligibility categories for the catastrophic plan and administrative costs.

CALIBRATION

The plan adjusted index rate is projected for all products using the same anticipated age distribution and the mandated age curve. Therefore the consumer adjusted premium rate is the plan adjusted index rate divided by the average age, geographic and tobacco factors for the expected distribution. The average age of the combined small group risk pool population is 46.

The Average Age factor is the weighted average age factor based on the projected membership. The Tobacco Factor is calculated as the projected average factor for tobacco users multiplied by the projected tobacco use prevalence.

There is only one geographic rating area for this filing. The geographic rating area factor for this filing is 1.0.

WORKSHEET 2: PRODUCT-PLAN DATA COLLECTION

AV METAL VALUES

The AV Metal Values included in Worksheet 2 of the URRT were valued using the AV Calculator, where possible, otherwise the AV Metal Values were developed under an alternate methodology. Actuarial certifications required by 45 CFR Part 156, §156.135 are provided in a separate document.

AV PRICING VALUES

The AV Pricing Value represents the cumulative effect of adjustments made by plan to move from the Market Adjusted Index Rate to the Plan Adjusted Index Rate.

MEMBERSHIP PROJECTIONS

Enrollment is projected based on current and anticipated enrollment by plan. Items impacting these projections include changes in the size of the market due to introduction of guarantee issue requirements and the individual mandate.

B. RATE HISTORY AND PROPOSED VARIATIONS IN RATE CHANGES

January 1, 2014	Initial Filing	INAC- 128999672
January 1, 2015	8.40%	INAC- 129626509
October 1, 2015	-0.30%	INAC- 130111004
January 1, 2016	6.88%	INAC- 129955625

The historical rate changes varied by metallic tier based on plan benefits as illustrated via the Pricing AV.

Proposed rate changes vary by metallic tier and plan based on projected experience and plan benefit changes.

C. AVERAGE RATE CHANGE

The average proposed rate change is 3.7%. The changes to the single risk pool gross premium average rate per member per month (PMPM) from calendar year 2015 to calendar year 2017 are incorporated into the pricing and reflected in the Unified Rate Review Template.

The change in 21-year-old Non-Tobacco Premium PMPM calculated in Table 11, Cell AZ13 is 3.7%.

D. MEMBERSHIP COUNT

Table 1 illustrates the Experience Period member-months, Current Period members as of February 1, 2016, and Projected Rating Period Member-months by ages.

E. BENEFIT CHANGES

Benefit changes were made to the following plans to assure compliance with Actuarial Value requirements.

F. EXPERIENCE PERIOD CLAIMS AND PREMIUMS

Table 2 illustrates the experience period claims and premiums using calendar year data. The data is consistent with the data reported in Section 1 of Worksheet I of the URRT.

Experience period premium, claims, and member months are obtained from the company's internal data warehouse. The claims data is collected for incurred dates from January through December 2015 and paid through January 2016. Earned premiums and member months are for January through December 2015. The data are for all direct-written individual business of KHPE in the Commonwealth of

Pennsylvania, including out-of-network claims written by KHPE but paid by QCC for POS plans. No private reinsurance was applicable.

Projected Risk Adjustment PMPM

Non-EHB benefits are illustrated separately in cell H26. Capitation is uniform by age for the experience period. Net pharmacy rebates are illustrated in cell J26.

Projected Risk Adjustment is accounted for in Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated risk adjustment transfer amounts for the projection period. The amount reflects the projected morbidity for the single risk pool for IBCFOC in the projection period.

The estimated risk adjustment revenue for all of the plans in the risk pool is developed using the following methodology. We recognize that the HHS payment transfer formula implies that the projected incurred claims based solely on the experience period single risk pool claims need to be adjusted by the ratio of the current statewide market's risk relative to allowable rating factor (ARF) for age compared to the single risk pool's risk relative to ARF presented during the experience period. This adjustment, together with the assumed future changes in population risk morbidity, results in the issuer's pricing being consistent with the anticipated morbidity level of the future statewide market.

Estimating the current statewide market's risk and ARF is difficult, because we do not have access to the relevant data from other carriers operating in this market. In order to gain insight, we participated in the Wakely Consulting Group's risk adjustment reporting project for this market. Our assumptions are the result of a combination of measurements based on Wakely's reports and our own actuarial judgment.

The anticipated risk adjustment transfer revenue is allocated proportionally based on plan premium. The Projected Risk Adjustment is subtracted from Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated receipt of risk adjustment transfer amounts for the projection period.

When the projected risk adjustment amounts for KHPE and Independence Blue Cross (QCC) are combined, the result is consistent with the projection made in our initial submission, and is comparable to the Wakely projection. We also considered 2014 risk transfer results.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium (Individual Market Only)

The Federal Transitional Reinsurance Program is not applicable for 2017.

G. CREDIBILITY OF DATA

The experience period data is considered 100% credible.

H. TREND IDENTIFICATION

Table 3 identifies the proposed annual medical and prescription drug allowed claims cost and utilization trends. These data match the data illustrated in Section 2 of Worksheet I of the URRT. Additional discussion is provided in Section I, Historical Experience.

I. HISTORICAL EXPERIENCE

Table 4 illustrates historical experience from 2014 through 2015 for the product line.

a. Annualized Cost Trend

Annual cost trend reflects changes in costs of medical treatment due to medical inflation and changes in the distribution of services across network providers. The trend value is developed by reviewing historical medical costs for the single risk pool and adjusting them for anticipated future provider contracting reimbursement levels. The data is normalized for changes in age, benefit changes during the experience period, changes to provider contracts, and prescription drug formulary, and new drugs brought to market.

b. Annualized Utilization Trend

Annual utilization trend reflects the change in the number of units per 1,000 members for a fixed level of illness burden and includes changes due to the mix and intensity of services provided and changes related to shifts in product mix. It also includes effects of selection, if any, since this cannot be reflected in the relative cost of the various products and plans offered.

J. TERMINATED PLANS

2. RATE DEVELOPMENT AND CHANGE

A. DEVELOPMENT OF PROJECTED INDEX RATE, MARKET-ADJUSTED INDEX RATE, & TOTAL ALLOWED CLAIMS

Table 5 illustrates the development of the Projected Index Rate and Market-Adjusted Index Rate beginning with the Experience Period Index Rate.

Changes in Population Risk Morbidity

Experience period allowed claims are adjusted to account for differences in the average morbidity of the single risk pool population underlying the experience and the anticipated population in the projection period. This adjustment reflects changes in the small group market-wide morbidity due to one or more of the following: guarantee issue, the individual mandate, Medicaid and CHIP migration, take-up of insurance by the previously uninsured, health status of the newly insured, enrollment from prior high risk pools, subsidy effects, dumping of enrollment from group markets to the individual market, and market-wide impact of transitional products/plans.

Changes in Other Factors

Experience period allowed claims are adjusted to account for differences in the single risk pool population underlying the experience and the anticipated population in the projection period pertaining to several factors not due to changes in morbidity or the costs and utilization of medical care. This adjustment reflects: additional benefits required to be covered as essential health benefits; recently mandated benefits required by state law that are not reflected in the experience period data; benefits in

the experience that are removed for the projection period; anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period; changes in demographic characteristics of the single risk pool experience period population and the projection period population (including age, gender, region, and tobacco use); changes in the provider network (adding or removing a provider system or introducing a limited network option); and anticipated changes in pharmacy rebates.

B. RETENTION ITEMS

Table 6 illustrates the retention items, expressed as percentages of premium. Administrative expenses are calculated and applied on a PMPM basis. When expressed as a percentage of premium, these will vary by premium size. Consistent with conversations with our State regulator, no Pricing load was applied for the Managed Care Assessment levied pursuant to Article VIII-I of the Pennsylvania Code, as it will be separately reimbursed.

Administrative Expenses		9.89%
General and Claims	3.68%	
Agent/Broker Fees and Commissions	5.74%	
Quality Improvement Initiatives	0.47%	
Taxes and Fees		4.12%
PCORI Fees	0.05%

Profit/Contingency		2.00%
Total Retention		16.01%

C. NORMALIZED MARKET-ADJUSTED PROJECTED ALLOWED TOTAL CLAIMS

Table 7 compares the normalization factors used in this filing to those used in the 2016 filing. The changes in the factors reflect small differences from the projected populations in 2016 and 2017.

D. COMPONENTS OF RATE CHANGE

Table 8 illustrates the components of rate change, based on inputs form other sections of the Rate Exhibits. The results in Row H are similar to the values in Row A of Table 8.

Data in Table 9 was taken from the 2016 URRT with the exceptions of Risk Adjustment and Reinsurance which were revised to project company-specific values.

3. PLAN RATE DEVELOPMENT

Table 10 is populated with plan information consistent with entries in the 2017 URRT. Plan mappings, where applicable, are illustrated in Column F of Table 10.

Attached to this actuarial memorandum are exhibits providing actuarial certifications for the use of alternate methods of calculating the Actuarial Value, where applicable, as well as required support for the calculations.

4. PLAN PREMIUM DEVELOPMENT FOR 21-YEAR OLD NON-TOBACCO USER

Table 11 is populated from other sections of the Rate Exhibits, along with the population by age and rating area for the Projection Period.

5. PLAN FACTORS

Tables 12, 13, and 14 illustrate the factors used in pricing for age, tobacco, geographic rating area, and network. To be consistent with our Consumer rating, we are proposing to use the tobacco factors approved for 2016 in 2017 rating in consideration of the additional premium required for Individual Plans by the terminating of the federal reinsurance program.

6. ACTUARIAL CERTIFICATION

I, [redacted], am Director & Actuary of Commercial Markets for the Independence Blue Cross Family of Companies. I am a member of the Society of Actuaries and the American Academy of Actuaries with the education and experience necessary to perform the work necessary and meet the Qualification Standards of the American Academy of Actuaries to render the qualified actuarial opinion contained herein. The developed rates and memorandum have been prepared in conformity with appropriate Actuarial Standards of Practice and the Academy's Code of Professional Conduct.

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the premium rates and allowable rating factors. Rather, it represents information required by Federal regulation to be provided in support of the review of gross premium rate increases, for certification of qualified health plans for Federally facilitated exchanges, and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I hereby certify that, to the best of my knowledge and judgment, the following:

- The projected index rate is:

  —In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.08(d)(1) and 147.106);

—Developed in compliance with applicable Actuarial Standards of Practice;

—Reasonable in relation to the benefits provided and the population anticipated to be covered; and

—Neither excessive nor deficient.

- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The AV Calculator was used to determine the AV Metal Values illustrated in Worksheet 2 of the Part I Unified Rate Review Template for all plans, unless an alternate methodology was required. If an alternate methodology was used to calculate the AV Metal Value for at least one plan offered, a copy of the actuarial certification required by 45 CFR Part 156, §156.135 will be included.
- All factor, benefit, and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.
