CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

ACTUARIAL MEMORANDUM
Small Group Rates
Effective January 1, 2023

General Information

Company Information

- Company Legal Name: Capital Advantage Assurance Company – CAAC
- State: PA
- HIOS Issuer ID: 45127
- Market: Small Group
- Effective Date: 1/1/2023

PID Company Information

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2023
- Average Rate Change: 9.1%
- Range of Requested Rate Change: -9.3% to 11.4%
- Total additional annual revenue generated from the proposed rate change: $25,768,685
- Product: PPO and EPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 36,726/23,118
- 2023 Number of Plans/Change from 2022: 39/+2
- Contract Form #: C23-CAAC-SGP
- Form Filing SERFF #: CABC-133252170 & CABC-133252238
- Binder SERFF #: CABC-PA23-125113440
- HIOS Issuer ID: 45127

Company Contact Information

- Primary Contact Name: [redacted]
- Primary Contact Telephone Number: [redacted]
- Primary Contact Email Address: [redacted]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital Blue Cross (Capital), submits rates for products to be made available to all small groups effective January 1, 2023.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2019	CABC-131455101	0.7%
Small Group	CAAC	1/1/2020	CABC-131921797	11.3%
Small Group	CAAC	7/1/2020	CABC-132294731	7.0%
Small Group	CAAC	1/1/2021	CABC-132352718	-6.9%
Small Group	CAAC	10/1/2021	CABC-132750915	-4.6%
Small Group	CAAC	1/1/2022	CABC-132795876	4.9%

Average Rate Change

CAAC is proposing an aggregate annual 9.1% rate change, which varies by plan. The rate change is calculated in PA Rate Exhibits Part III, Table 10, cell AC15.

The key drivers of the rate change, and approximate impact, are as follows:

- Future cost and utilization: 6.0%
- Higher than average claim cost and utilization in 2021: 6%
- Expected morbidity improvement: -3%
    - COVID-19 becomes endemic
    - Pent-up demand subsides

Membership

Membership is shown in PA Rate Exhibits Part I, Table 1. The average age is 38.

Benefit Changes 2022-2023

A summary of proposed 2023 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2023. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for CAAC in the small group market.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2021 and December 31, 2021.

Transitional membership is not included in PA Rate Exhibits Table 2 or URRT.

Paid Through Date: Claims in the BEP are paid through February 28, 2022

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments (CSR does not apply to Small Group).
- Capital only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from Capital's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and

regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.

4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.
5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims\ = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to the amounts sent by the Department on 6/30/2022.

Loss Ratio in BEP: Loss ratio is 87.75%

Credibility of Data

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from Capital subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. The credibility manual BEP includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2021 and December 31, 2021. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.24%

Trend levels reflect Capital's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. Capital uses the following to project future costs:

    a. Vendor Physician Cost Model and Internal Hospital Contracting Model
        i. The medical cost models use best estimates of Capital Blue Cross (Capital)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the Capital book of business level for all commercial business.
    b. Internal Prescription Drug Trend Model
        i. Price Inflation
        ii. Contract Pricing
        iii. Member Cost-Sharing
        iv. Units per Script
        v. Brand/Generic Mix
        vi. Therapeutic Mix
        vii. Cost per Script
        viii. Pipeline (new drugs)

2. Utilization Considerations:
    a. Intensity of medical services rendered
    b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
    c. Further migration from brand prescription drugs to generic prescription drugs
    d. Favorable impacts of value based benefits designs
    e. Medical utilization estimates reviewed by Capital's Chief Medical Officer

3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.

4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.

5. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. Capital strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in URRT come directly from Capital's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Morbidity Adjustment", and PA Rate Exhibits, Table 5. The morbidity factor is applied to remove a portion of the impact of COVID-19 from the claims projection. Capital estimates approximately 6% of Group and Individual claims in 2021 are attributable to COVID-19. We expect this will lessen going into 2023, but COVID-19 will continue to incur additional costs, and the inflationary pressures started by the pandemic may remain.

The above factor is found in Exhibit Q, Morbidity Factor Calculation.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2021 to 2023. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from Capital's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: A network adjustment is applied to show the value of implementing EPO and 2-tier PPO network plans in the projection period. The value is calculated as:

$$Network\ Factor = ([Projected\ MM\ by\ Plan] \times [Network\ Factor\ by\ Plan]) \div [Total\ Projected\ MM]$$

Other Adjustments: No other adjustment is applied to the BEP.

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

Index Rate

The experience period index rate is CAAC's allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits.* This number is reflected in Worksheet 1 of URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
    a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates

b. BEP Member Months

2. Develop BEP *Paid and Incurred Claims*:

$$BEP\ Paid\ and\ Incurred\ Claims = \frac{BEP\ Paid\ Claims}{Completion\ Factor}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP\ Paid\ and\ Incurred\ Claim\ PMPM = \frac{BEP\ Paid\ and\ Incurred\ Claims}{BEP\ Member\ Months}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

$$Trended\ Claim\ PMPM = [BEP\ Paid\ and\ Incurred\ Claim\ PMPM] \times (1 + [Trend\%])^{Trend\ Months/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$Projected\ Paid\ and\ Incurred\ Claims\ PMPM = [Trended\ Claim\ PMPM] \times [Benefit\ Adjustment] \times [Morbidity\ Adjustment] \times [Other\ Adjustment]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Other Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services

that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$Benefit\ Level\ Adjustment = \frac{Average\ Manual\ Cost\ in\ Projection\ Period}{Manual\ Cost\ of\ Base\ Plan}$$

c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$Base\ Plan\ Paid\ and\ Incurred\ Claims\ PMPM = \frac{Benefit\ Adjusted\ Paid\ and\ Incurred\ Claims\ PMPM}{Benefit\ Level\ Adjustment}$$

d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$Benefit\ Relativity\ A = \frac{Manual\ Cost\ of\ Benefit\ A}{Manual\ Cost\ of\ Base\ Plan}$$

e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:

   i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than $1000.

   ii. Adjustments for plan designs that fall outside of the actuarial cost model.

a. So the *Projected Claims PMPM by Benefit* is:

$$Projected\ Claims\ PMPM\ Benefit\ A = Projected\ Claims\ PMPM\ Base\ Plan \times Pricing\ Relativity\ A$$

b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in the projection period. The *Total Projected Claims PMPM* :

$$= Projected\ Claims\ PMPM\ Benefit\ A\ \times Expected\ Member\ Dist\ of\ Benefit\ A + Projected\ Claims\ PMPM\ Benefit\ B \times Expected\ Member\ Dis\ of\ Benefit\ B + \cdots$$

7. The Paid-To-Allowed Ratio is then:

$$Paid\ to\ Allowed\ Ratio = \frac{Total\ Projected\ Claims\ PMPM}{Projected\ Allowed\ Claims\ at\ Current\ Benefits}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$[Market\ Adjusted\ Index\ Rate] = ([Index\ Rate]\ x\ [Paid\ to\ Allowed\ Ratio] - [Projected\ Incurred\ Reinsurace\ Recoveries] - [Projected\ Incurred\ Risk\ Adjustment\ PMPM] + [Exchange\ Fees\ PMPM]) \div [Paid\ to\ Allowed\ Ratio]$$

Projected Incurred Risk Adjustments PMPM:

Relevant to 2023 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2023. The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2020-2021 risk adjustment results
5. Market improvement in coding risk: Capital's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that Capital is disadvantaged in the market. This will drive Capital's relative risk to the market down over time.

The 2023 projected risk adjustment PMPM is set equal to the 2021 amount sent by the Department on 6/30/22.

Projected Incurred Reinsurance Recoveries:

Reinsurance does not apply to the small group market.

Exchange Fee PMPM:

CAAC only offers off-exchange plans in the small group market, so the exchange fee is $0.

The exchange fee PMPM is calculated as:

$$Exchange\ Fee\ PMPM = [Avg\ 2023\ On - Exchange\ Premium\ PMPM] \times [\%\ Members\ On - Exchange]$$

Where

$$[Avg\ 2023\ On - Exchange\ Premium\ PMPM = [Avg\ 2022\ On - Exchange\ Premium\ PMPM\ \times (1 + [Avg\ Proposed\ Rate\ Change])$$

See Exhibit K for the development of the Market Adjusted Index Rate.

Retention Items

Administrative Expense Load:

1. Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of $0.22 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
2. Administrative Expense: Calculated using an allocation method from Capital's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to Capital small group products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.
    a. Value-Based Benefits (VBB): Standard with each plan, Capital Blue Cross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
        i. Complete biometric screening and receive a gift card.

ii. Meeting biometric measure or finish online coaching program and receive a gift card reward.
iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
iv. Fees are included in overall administrative expense fee discussed above.
v. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

3. Broker Expense: Calculated based on Capital's explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. Attached please find the proposed 2023 broker agreements – redacted versions. Files are as follows:
    a. Redacted Standard Producer Master Agreement: "SG_22-67_Initial_CAAC_PPO_SPMABrokerGroupRedacted_Supporting_20220518.pdf "
    b. Redacted Preferred Producer Master Agreement: "SG_22-67_Initial_CAAC_PPO_PPMABrokerGroupRedacted_Supporting_20220518.pdf "
4. Additional Quality Improvement: QI amounts applied in rating equal 0.0%. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 2, "Profit & Risk Load", and PA Rate Exhibits Table 6.

Taxes and Fees:

1. Exchange Fee: N/A
2. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, "Taxes and Fees", and PA Rate Exhibits, Table 6.

See Exhibit H as well as PA Rate Exhibits Table 6 for all retention values.

Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC's actuarial cost model. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of

service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

2. Induced Demand: Induced Demand: Please see Table 8. Induced Demand is calculated as:

$$[Pricing\ AV]^2 - [Pricing\ AV] + 1.24$$

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

3. Provider Network: CAAC is offering five networks: PPO, Valley Advantage EPO, Capital Advantage EPO, PPO Choice (2-tiered PPO), Performance PPO (2-tiered PPO), and PPO Choice Select (2-tiered PPO). The network factors are the same across each plan in the network.
    a. The Valley Advantage EPO plan is built around St. Luke's delivery system and is available in Lehigh and Northampton counties.
        i. St. Luke's offers savings over area hospitals in IP, OP and professional settings.
        ii. We assume that 75% of claims are attributable to a St. Luke's facility (EPO plans are offered as multi-options within the counties, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. The rating factor of 0.90 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        iv. See Exhibit O1 for the development of the EPO network factor.
        v. The network factor is unchanged from 2022.
    b. The Capital Advantage EPO plan is built around UPMC Pinnacle's delivery system and is available in Cumberland, Dauphin and Perry counties.
        i. Pinnacle offers savings over area hospitals in IP, OP and professional settings.
        ii. We assume that 75% of claims are attributable to a UPMC Pinnacle's facility (EPO plans are offered as multi-options within the counties, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. The rating factor of 0.90 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        iv. See Exhibit O2 for the development of the EPO network factor.
        v. The network factor is unchanged from 2022.

    c. The PPO Choice tiered design allows members to choose lower cost providers within their region. The product is offered in Adams (7), Berks (7) and Lancaster (7) counties.

Please see the following Excel workbook for the quantitative analysis performed to develop the PPO Choice network factor:

- SG_22-67_Initial_CAAC_PPO_PPOChoiceRegion7_Supporting_CONF_20220518.xlsx

The analysis was performed using all Capital Commercial Group PPO business.

The following steps describe the analysis:

1. Gather 2021 Capital Commercial PPO, region 7 allowed claims by provider and type of service (IP, OP, Professional). (Data tab)
2. Use Medicare benchmark pricing as of 6/30/2021 to compare contracted pricing by provider. (CommercialIP, CommercialOp tabs)
    a. Capital's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity.
3. Analysis tab:
    a. Gather region 7 claims by IP/OP provider. Professional claims are categorized as "Other" and are assumed to be priced the same across all providers.
    b. Identify providers as PPO Choice (tier 1) or Other (tier 2). PPO Choice tier 1 providers are listed in "Tier1Providers".
    c. Reprice claims:
        i. Assume 75% of claims from tier 2 providers will move to tier 1 providers at their contracted price. Claims are repriced at region-specific, claim-weighted average tier 1 provider pricing (calculation is found on tab Tier1Providers).
        ii. Assume 100% of claims already with tier 1 providers will remain with the same tier 1 provider, priced at the PPO Choice contracted price. The PPO Choice pricing is either the same as regular PPO pricing or discounted. The discount, if any, is found in columns S and T. Claims are repriced at the provider-specific pricing adjusted for the PPO Choice discount, if any.
    d. Compare the total repriced claims to the original claims. [Repriced Claims]/[Original Claims] -1 = Medical Discount. (Analysis tab, cell AG6).
    e. Medical Claims make up approximately 80% of total claims, so the final network factor is [Medical Discount] x 0.8 = Final Contracting Discount. (Analysis tab, cell AJ8).
4. The Final Contracting Discount is displayed in Rate Development, Exhibit O3 – PPO Choice Network Factor.

d. The Performance PPO tiered design allows members to choose lower cost providers within their region. The product is offered in Franklin (9), Lebanon (9), Lehigh (6), Northampton (6), Adams (7) and York (7) counties.

   Please see the following Excel workbooks for the quantitative analysis performed to develop the Performance PPO network factor:

   - SG_22-67_Initial_CAAC_PPO_PerfPPORegion6_Supporting_CONF_20220518.xlsx
   - SG_22-67_Initial_CAAC_PPO_PerfPPORegion7_Supporting_CONF_20220518.xlsx
   - SG_22-67_Initial_CAAC_PPO_PerfPPORegion9_Supporting_CONF_20220518.xlsx

The analysis was performed using all Capital Commercial Group PPO business. The network factor in the Small Group ACA market cannot vary by region, but because this product is offered in other market segments, and this analysis is to encompass all market segments, it is segmented by region. For Small Group ACA, the member-weighted average of the network discount is applied to every plan regardless of region.

The following steps describe the analysis. Region 6 is used as an example.

1. Gather 2021 Capital Commercial PPO, region 6 allowed claims by provider and type of service (IP, OP, Professional). (Data tab)
2. Use Medicare benchmark pricing as of 6/30/2021 to compare contracted pricing by provider. (CommercialIP, CommercialOp tabs)
   a. Capital's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity.
3. Analysis tab:
   a. Gather region 6 claims by IP/OP provider. Professional claims are categorized as "Other" and are assumed to be priced the same across all providers.
   b. Identify providers as Performance PPO (Performance PPO tier 1) or Other (Performance PPO tier 2). Performance PPO tier 1 providers are Wellspan, Lancaster General Hospital, Hershey, and St. Luke's.
   c. Reprice claims:
      i. Assume 50% of claims from tier 2 providers will move to tier 1 providers at their contracted price. Claims are repriced at

region-specific, claim-weighted average tier 1 provider pricing (calculation is found on tab PerfPPOProviders).

ii. Assume 100% of claims already with tier 1 providers will remain with the same tier 1 provider, priced at the Performance PPO contracted price. The Performance PPO pricing is either the same as regular PPO pricing or discounted. The discount, if any, is found in columns S and T. Claims are repriced at the provider-specific pricing adjusted for the Performance PPO discount, if any.

d. Compare the total repriced claims to the original claims. [Repriced Claims]/[Original Claims] -1 = Medical Discount. (Analysis tab, cell AG6).

e. Medical Claims make up approximately 80% of total claims, so the final network factor is [Medical Discount] x 0.8 = Final Contracting Discount. (Analysis tab, cell AJ8).

4. The Final Contracting Discount is displayed in Rate Development, Exhibit O4 – Performance PPO Network Factor for each region.

e. The PPO Choice Select tiered design allows members to choose lower cost providers within their region. The product is offered in Cumberland (9), Dauphin (9), Perry (9), and York (7) counties.

Please see the following Excel workbooks for the quantitative analysis performed to develop the PPO Choice Select network factor:

- SG_22-67_Initial_CAAC_PPO_PPOChoiceSelectRegion7_Supporting_CONF_20220518.xlsx
- SG_22-67_Initial_CAAC_PPO_PPOChoiceSelectRegion9_Supporting_CONF_20220518.xlsx

The analysis was performed using all Capital Commercial Group PPO business. The network factor in the Small Group ACA market cannot vary by region, but because this product is offered in other market segments, and this analysis is to encompass all market segments, it is segmented by region. For Small Group ACA, the member-weighted average of the network discount is applied to every plan regardless of region.

The following steps describe the analysis. Region 7 is used as an example.

1. Gather 2021 Capital Commercial PPO, region 7 allowed claims by provider and type of service (IP, OP, Professional). (Data tab)
2. Use Medicare benchmark pricing as of 6/30/2021 to compare contracted pricing by provider. (CommercialIP, CommercialOp tabs)
    a. Capital's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a

percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity.

3. Analysis tab:
    a. Gather region 7 claims by IP/OP provider. Professional claims are categorized as "Other" and are assumed to be priced the same across all providers.
    b. Identify providers as PPO Choice Select (tier 1) or Other (tier 2). PPO Choice Select tier 1 provider is UPMC.
    c. Reprice claims:
        i. Assume 50% of claims from tier 2 providers will move to tier 1 providers at their contracted price. Claims are repriced at region-specific, claim-weighted average tier 1 provider pricing (calculation is found on tab Tier1Providers).
        ii. Assume 100% of claims already with tier 1 providers will remain with the same tier 1 provider, priced at the PPO Choice Select contracted price. The PPO Choice Select pricing is either the same as regular PPO pricing or discounted. The discount, if any, is found in columns S and T. Claims are repriced at the provider-specific pricing adjusted for the PPO Choice Select discount, if any.
    d. Compare the total repriced claims to the original claims. [Repriced Claims]/[Original Claims] -1 = Medical Discount. (Analysis tab, cell AG6).
    e. Medical Claims make up approximately 80% of total claims, so the final network factor is [Medical Discount] x 0.8 = Final Contracting Discount. (Analysis tab, cell AJ8).
4. The Final Contracting Discount is displayed in Rate Development, Exhibit O5 – PPO Choice Select Network Factor for each region.

4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Retention Items section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibrated Plan Adjusted Index Rates

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in Capital. Age factors are applied in accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_22-67_Initial_CAAC_PPO_List-Billed_Supporting_20220518.xlsb for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the Capital member-weighted average by region.

Geographic factors are unchanged from 2022.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[Calibrated\ Plan\ Adjusted\ Index\ Rate] = [Plan\ Adjusted\ Index\ Rate] \div ([Age\ Curve\ Calibration] \times [Geographic\ Factor\ Calibration]\ x\ [Tobacco\ Factor])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$[Member - Level\ Consumer\ Adjusted\ Premium\ Rate] = [Calibrated\ Plan\ Adjusted\ Index\ Rate] \times [Age\ Factor] \times [Geographic\ Factor] \times [Tobacco\ Factor]$$

2. $[Family\ Consumer\ Adjusted\ Premium\ Rate] = \sum[Member - Level\ Consumer\ Adjusted\ Premium\ Rate]$
   With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

Plans: 45127PA0010161, 45127PA0010199, 45127PA0010054, 45127PA0010057, 45127PA0010084, 45127PA0010194 use alternative method 156.135(b)(2) to establish AV. SG_22-67_Initial_CAAC_PPO_UniquePlanDesign_Supporting_20220518 includes a detailed explanation of the approach.

All other AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

See find AV screenshots included with this submission:

AV Pricing Values

All AV Pricing values were developed using Capital's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of URRT were developed by assuming that moderate decline in enrollment and similar distribution to current.

Projected versus Actual MLR

Exhibit R shows a history of projected versus actual MLR and Member Months. Projected comes from the 2018-2020 filings. Actual comes from Table 4.

	MLR		Member Months	
Calendar Year	Actual	Pricing	Actual	Pricing
2018	80.22%	83.34%	776,880	914,304
2019	76.55%	85.00%	504,647	813,342
2020	75.83%	84.40%	367,958	480,000

Claim Cost Projection

Exhibit S shows a history of claim cost projection versus actual from 2018-2021 filings.

Actuarial Statement

I, [redacted], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [redacted], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
    a. Actuarial Standard of Practice No. 5, "Health and Disability Claims"
    b. Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans"
    c. Actuarial Standard of Practice No. 12, "Risk Classification"
    d. Actuarial Standard of Practice No. 23, "Data Quality"
    e. Actuarial Standard of Practice No. 25, "Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage"
    f. Actuarial Standard of Practice No. 26, "Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer

Health Benefit Plans"

g. Actuarial Standard of Practice No. 41, "Actuarial Communications".

2. The index rate is:
    a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
    b. Developed in compliance with the applicable Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
    e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in were calculated in accordance with actuarial standards of practice.

4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.

    a. The analysis was
        i. conducted by a member of the American Academy of Actuaries, and
        ii. performed in accordance with generally accepted actuarial principles and methods.

5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.

6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.

7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.

8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2023 Rate Filing Justification.

TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated June 15, 2022. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Trend leveraging calculation workbook
- Revised rate development workbook
- Revised PPO Choice, PPO Choice Select and Performance PPO calculation workbooks
- Revised PAAM exhibits
- Revised URRT
- Revised rates (PA and Federal templates)
- Revised memos – Actuarial, Cover Letter

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 1: Correction to URRT WS2 membership
- Question 2: Correction to Table 10 metallic tier
- Question 4: Modification to trend: leveraging
- Question 6: Correction to Paid-to-Allowed calculation, trend
- Question 7: Modification to projected risk adjustment
- Question 9: Correction to Table 10, unique plans
- Question 10: Modification to PPO Choice, PPO Choice Select, and Performance PPO network factors

Healthcare benefit programs issued or administered by Capital Blue Cross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company®, and Keystone Health Plan® Central. Independent licensees of the Blue Cross Blue Shield Association. Communications issued by Capital Blue Cross in its capacity as administrator of programs and provider relations for all companies.

If you have any questions regarding this filing, please call me at [redacted] (or via email at [redacted]) or [redacted] at [redacted] ([redacted]). Thank you for your assistance in this matter.

Sincerely,

[redacted]

[redacted], ASA, MAAA
Director, Actuarial Services
Capital BlueCross

Enclosures

[redacted], ASA, MAAA, Vice President and Chief Actuary, Actuarial Services
[redacted], Corporate Counsel

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Question and Answer
Small Group Rates
Effective January 1, 2023

With this response, please find corresponding Q&A Exhibits in SG_22-67_Initial_CAAC_PPO_Q&AExhibits1_Supporting_20220624.xlsx

Question 1. Per Table 1 of the PAAM Exhibits, the number of members for the current period is 36,726. However, the membership in the URRT, WKST 2, is 36,741. Please explain this discrepancy or update as necessary.

Answer 1. The URRT Wkst 2 membership has been updated to reflect the membership in Table 1 of the PAAM Exhibits.

Question 2. Per Table 10 of the PAAM Exhibits, the metal level listed in the Metallic Tier (Column G) column is not consistent with the Marketing Name (column D). Please update.

Answer 2. The Metallic Tier in column G has been updated to be consistent with the Marketing Name in column D.

Question 3. Please explain why the Age and Geographic calibration factors are based on the current enrollment and not the projected enrollment.

Answer 3. The Age and Geographic calibration factors are based on the current enrollment because Capital assumes projected enrollment distribution will follow current enrollment distribution patterns.

Question 4. .The following questions/concerns pertain to Capital's trend development:

a. It appears that both SG and IND had the same Year 1 and Year 2 raw trends. Please provide a narrative that describes to what extent IND data was considered in the SG trend development.
b. Please provide a narrative that explains what is meant by "Cost trends are determined at the Capital book of business level for all commercial business."
c. For each of the Year 1 trends, please explain what is in the denominator when determining the trend.
d. On page 5 of the actuarial memorandum an internal drug trend model is referenced. Please provide a narrative on how future drug rebates are incorporated within the drug trend model and what impact this had in the development of the drug trend. If drug rebates are not considered in the drug trend please explain where they are considered and the impact incorporated into the rate development.
e. Noted under the utilization considerations section please provide a narrative on what is meant by "medical utilization estimates reviewed by Capital's Chief Medical

Officer". Please provide the impact to utilization that this consideration had for each URRT category.

f. Please provide quantitative support for the 0.1% leveraging adjustment utilized on the 'Exhibit E_Trend' tab.
g. Please explain what is driving the -1.0% change in utilization for URRT benefit categories Inpatient Hospital and Other Medical. Please also explain what is driving the +1.1% change in utilization for URRT benefit category Prescription Drugs
h. Please confirm that it is reasonable for the annual trend to stay constant in PAAM Exhibit table 5a row 32 considering the trend estimates that were determined for years 1 and 2.

Answer 4.

a. Historical data is not used to develop trends. Cost trends are determined by future contracting changes with hospitals and physicians. The same contracts apply to Small Group and Individual.
b. In addition to the explanation in a., average trends are developed using allowed claim distributions across all commercial lines of business.
c. The denominator is the midpoint of the base experience period.
d. Rx rebates are considered in the drug trend model. Rx rebates are projected to trend at the same rate as overall drug cost and utilization trends. Therefore, it is appropriate to trend drug net rebates at the stated Rx trend.
e. Annually, the actuarial team meets with our Chief Medical Officer to discuss utilization trends by market segment based on provider conversations and emerging trends in the medical community. Those utilization adjustments are found on Exhibit E: Trend for each URRT category.
f. Please see SG_22-67_Initial_CAAC_PPO_Leveraging_Supporting_20220624.xlsx , tab: LeveragingSGAllData. In order to determine the future impact of leveraging, including the impact of increasing cost sharing due to allowed costs rising, the exhibit shows a claim probability distribution with allowed amounts by range. The data is 2021 CBC ACA single risk pool population. The average AV in the Small Group market is approximately 0.85. From the data, I can infer that a deductible (applying to all services) of $1,417 is equal to 85% AV for this population. Using that deductible amount, I can measure incurred claims and member cost-sharing trend, given an allowed trend of 6.0%. Claims are trended in a database in order to move claims into the correct buckets. You can see that the total allowed amounts are increasing at 6.0% annually (columns P and Z). Given the deductible and allowed trend, incurred claims trend at 6.6%, member cost-share at 1.3% and leveraging is 6.6%-6.0% = 0.6%. Given this analysis, we are modifying the leveraging factor from 0.1% to 0.3%, still under the 0.6% calculated for market competitive reasons.
g. The -1.0% utilization adjustment to Inpatient Hospital reflects continued movement from IP to OP services. For prescription drugs, typically the utilization trend runs between 0.5%-2.0%. Rx trend modeling is at a granular level, focused on therapeutic categories and key drugs in these categories. There is not one particular category driving the trend utilization projection. Rather, it is an accumulation across all categories.

h. I confirm this approach is reasonable given the neglible differences between year 1 and year 2 trends.

Question 5. The following questions/concerns pertain to the COVID adjustment:

a. Please provide a breakdown by major service category, entity, and product for the $52,992,325.21 in COVID costs reported on the "Exhibit Q_Morbidity" tab. If possible, please further break down the cost into those associated with treatment, vaccinations, and testing.
b. Please provide detailed qualitative support (e.g., diagnosis code and/or procedure code lists) for the identification process of COVID claims.
c. Please explain how it was determined that roughly 3% of COVID costs seen in 2021 will continue into 2023.
d. What impact, if any, is COVID having on the PY23 rates. If the rates are impacted, please provide a qualitative explanation and quantitative exhibit demonstrating the effect of COVID. Have you adjusted trend at all? Has the base experience been adjusted at all?

Answer 5.

a. Please see Q&A Exhibit 1 for the COVID costs by the requested breakdown.
b. Please see Q&A Exhibit 1a for the criteria used to pull COVID claims.
c. Given that COVID accounts for 6.2% of BEP claims, a morbidity adjustment between -6.2% and 0% seems reasonable. We expect COVID to continue to have an impact both on medical inflation (i.e. nursing shortages, hospitals asking to renegotiate contracts), and costs directly attributable to treatment and testing of the virus. We expect those costs to be less than the base year, 2021. Beyond those assumptions, our knowledge of the future is limited. We estimate 3% as a midpoint of the reasonable possibilities.
d. 2023 rates are only impacted by the BEP COVID claims (reduced as described in part c). Trends and the BEP have not been adjusted.

Question 6. The following questions/concerns pertain to the Paid-to-Allowed Ratio calculations:

a. In the Paid Claim PMPM buildup please explain why only Year 1's trend is used.
b. Please confirm that the leveraging adjustment factor 0.1% is being handled correctly in both the paid claims trended PMPM and the allowed claims trended PMPM.
c. On the "PMPMs" tab, the starting paid to allowed ratios by plan were grossed up by approximately 19% uniformly (i.e., 0.854 / 0.718 - 1), which also increases the induced demand. This is causing some plans to have pricing AVs, which should reflect the percentage of allowed costs covered by the plan, to be over 1.0. Please provide support as to why this adjustment is necessary and appropriate to apply a uniform manner across all plans. In addition, please provide support for the pricing AVs for some plans being above 1.0.

Answer 6.

a. This has been corrected to use the average of year 1 and year 2 trends.
b. While leveraging is a paid claims metric, the format of the filing and templates do not allow paid trend to differ from allowed trend. Any additional trend applied to the

allowed claims due to leveraging is negated in the paid-to-allowed ratio calculation. So if leveraging was not applied to allowed, the paid-to-allowed ratio would be slightly higher, but the resulting premium rates would be the same.

c. The pricing AV is calculated relative to the paid-to-allowed ratio. So as an example, if a platinum plan has a pricing AV of 1.039 and the paid-to-allowed ratio is 0.875, the benefits are 1.039/.875 -1 = 19% richer than the average plan in the projection period. It is important to note that the average pricing AV in Table 10 matches the pricing AV calculated in Exhibit G, so rates are not inflated. Relativities are developed from Capital's manual cost model.

Question 7. The following questions/concerns pertain to Capital's risk adjustment:

a. Please provide support for applying no changes to the 2021 risk adjustment PMPM results in projecting the 2023 information, which includes the assumption of no change in the relative risk for the Company relative to statewide.
b. Please provide support for assuming no changes to the statewide average premium would occur between 2021 and 2023.
c. Please provide a brief narrative on what has led to Capital's high churn rate.
d. Other than a high churn rate, what does Capital believe are the other drivers when it comes to the change in risk adjustment from 2022 to 2023?
e. Given the high churn rate, please explain why it is reasonable to assume the same risk adjustment estimate as determined based off CY2021 results.

Answer 7.

a. Rate development is being performed on an experience-net-risk-adjustment basis. That means that we are neither making an issuer-specific morbidity adjustment to the base experience period claims or to risk adjustment. This approach assumes that experience net risk adjustment is the best predictor of future experience.
b. Please see Q&A Exhibit 2 for a history of change in statewide average premiums. Given recent history, we are assuming Small Group 2023 average premiums will rise 4.5% over 2022, for a total change over 2021 of 9.2%. The 2023 projected risk adjustment amount is being modified to reflect this change. The new calculation is found in Exhibit K, Market Adjusted Index Rate.
c. Capital's churn rate in the Small Group market is mostly attributable to two factors: First, UPMC leaving the Small Group insured market in 2021, with most of those members moving to Capital. Secondly, the offering of Small Group ASO products drawing members out of the insured market.
d. No other factors in the Small Group market would have a significant impact to risk adjustment.
e. The rationale is the same as explained in bullet a. above. Capital is assuming a steady state when using experience net risk adjustment as the basis of our projection.

Question 8. The following question pertains to commissions:

a. In the PAAM Exhibits, Table 6, the commission is listed as $22.07 pmpm. Please provide the quantitative development for determining the commission pmpm.
b. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment

Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please explain in detail the reason for the difference. Note that federal law prohibits different compensation to agents and brokers for coverage in the same benefit year based on whether the enrollment is during an SEP or during OEP.

Answer 8.

a. The broker commission PMPM comes directly from Capital's financial reporting as of March 2022. The broker commission amount paid per contact is unchanged from 2022 to 2023 and we expect the percentage of brokered groups to remain the same into 2023.
b. These situations do not apply to Small Group, but will be addressed in the Individual filing responses.

Question 9. The following questions/concerns pertain to AVs:

a. It is noted in the Unique Plan Design—Supporting Documentation and Justification file that an acceptable alternate method was used per Code of Federal Regulation (CFR) 156.135(b)(2). Please correct the applicable entries in Table 10 column I in the PAAM Exhibits.
b. On page 19 of the actuarial memorandum, it is stated that actuarial judgement is utilized in AV Pricing values. Please provide a narrative on why actuarial judgement is utilized in the development of Pricing AVs and a detailed quantitative exhibit that shows the pricing AV that the actuarial cost model produced and the adjustment that was made based on judgement for each applicable HIOS ID.

Answer 9.

a. The entries in Table 10 column I have been updated for applicable HIOS plans.
b. Capital uses Milliman, Inc. Health Cost Guidelines Commercial Rating Structures (for active employees) to develop benefit relativities, which translate into pricing AVs. Below, I am pulling from Milliman's methodology description. Anything in quotations is directly from Milliman, Inc.
"Milliman utilizes an enrollment and utilization database of full medical and prescription drug claims experience for over 78 million lives, of which approximately 41 million lives were selected and used as the primary source in developing the [model]. Other sources include a database of inpatient admission representing a large percentage of all admissions nationwide, retail pharmacy information, and other reference data sources." CBC adjusts nationwide data to CBC's average costs and contracting in our service area.

Capital uses the actuarial cost model noted above to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and

out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

The reference to actuarial judgment in the memorandum is a general statement to show that the model is evaluated regularly to ensure pricing relativities are reasonable. For this filing, all pricing AVs are developed in the Milliman model.

Question 10. The following questions/concerns pertain to Network factors:

a. For each of the "Exhibit O…" EPO tabs, please provide quantitative support for the assumed savings for each network (e.g., 27%, 17%, and 8% for the Valley EPO network) as well as the projected movement in claims to the more favorable network hospitals (e.g., 75% to St. Luke's for the Valley EPO network).
b. The PPO Choice Network is not a new network for PY23, please explain why an analysis cannot be done that is similar to what was done in the CAAC's IND rate filing?
c. Please produce a detailed quantitative exhibit similar to that of the IND rate filing that shows each network's raw loss ratio and buildup to a risk adjusted loss ratio for all of CAAC's SG networks.
d. The following questions pertain to the PPO Choice Supporting Excel file:
    i. Please explain the significance of column Q on the "Analysis" tab
    ii. Please provide a quantitative exhibit that supports the 75% given in cell B1 on "Analysis" tab
    iii. Please explain what exactly is being normalized for in columns M through O
    iv. Please explain how age, gender, morbidity, etc. is being normalized for in your Analysis
    v. Please confirm that medical claims make up 80% of total claims; PAAM Exhibit Data tab shows 81% medical claims
e. The following questions pertain to the Performance PPO network factor development:
    i. Please provide a quantitative exhibit that supports the assumption that 50% of tier 2 claims will move to tier 1.
    ii. Please confirm that 50% of tier 2 claims will move to tier 1 was actually used and where the 50% exists in the calculation.

Answer 10.

a. Valley Advantage EPO and Capital Advantage EPO network factors are unchanged from 2022, continuing to use the same methodology used in the 2022 CAAC rate filing. Please advise if the Department would like the same justification workbooks added to the 2023 filing. A new analysis has not been performed, so data remains the same as last year.
b. PPO Choice is not a popular offering in the Small Group market and therefore is not credible. Additionally, it is only being offered in Berks and Lancaster county in 2023, which differs from the base experience period.
c. Please see Q&A Exhibit 3 for the buildup of the Risk Adjusted Loss Ratio.
d.
    i. Please ignore column Q. This model was adopted from other pricing models that used column Q as a variable. Column Q is not used in this factor development.

Column Q has been hidden (hidden to prevent column references from changing) from this and all other network development supporting excel files.

ii. 75% is a general assumption given that some claims will not move from tier 2 hospitals due to patient preferences. Because tiered products are not widely selected, we have limited data to show how these plans influence member behavior.

iii. Claims in M through O are being normalized to a Medicare pricing benchmark of 1.0. They are then repriced to PPO Choice pricing (claims that move to tier 1) or to the same pricing of that particular hospital.

iv. Age, gender, and morbidity are assumed to be the same between a PPO and PPO Choice product. No assumption is made for differences. This analysis is only meant to reprice claims based on member behavioral changes when using the 2-tier product (members are more likely to use tier 1 providers if enrolled in PPO Choice product).

v. The PPO Choice supporting file is being corrected to apply 0.81 as the percentage of medical claims, consistent with the URRT. Any change to the resulting network factor is reflected in Exhibit O3. Please note that given this discrepancy, all network supporting excel files have been updated to use 0.81 instead of 0.80. Any change to network factors are reflected in the O3, O4 and O5. The change is minimal.

e.

i. 50% is a general assumption given that some claims will not move from tier 2 hospitals due to patient preferences. Because tiered products are not widely selected, we have limited data to show how these plans influence member behavior.

ii. I confirm that 50% of tier 2 claims are modeled to move to tier 1. This is shown in column R of the Analysis tab and used to reprice claims in columns Y to AA.

Question 11. Please explain what is driving the gap between the Actual and Pricing MLRs and what has been done in particular to narrow this gap

Answer 11. Please see Q&A Exhibit 4 for a table of projected and actual MLRs, claims, and risk adjustment; along with rate increase, pricing morbidity and trend applied in those years. 2018-2019 are driven by both claim and risk adjustment mis-estimations. 2020 is an anomaly due to COVID claim suppression, but is also impacted by risk adjustment, and the applied morbidity factor. Risk adjustment estimates are better starting in 2021 once 2019 results became available. Starting in 2021, we see actual results worse than expected. Since then we have taken rate increases of 4.9% and proposed 9.1%, or an average of 7% over the two years. This aligns with trend plus additional rate for the impact of COVID seen in 2021 and expected to partially continue into 2023.

Question 12. The following questions pertain to exhibit S:

a. It is noted that in 2020 paid claims came in 12.3% lower than anticipated. If the full amount is not due to COVID, what else is responsible for the favorable experience?

Answer 12.

a. In 2020, Capital refiled their Q3/Q4 Small Group rates. During the refiling, Capital's new projected paid amount was $575.44. The refiling accounts for 2.3% of the reason paid claims in 2020 were lower than projected. The remaining 10% is due to COVID.

Question 13. The following questions pertain to the Public Health Emergency:

a. With the public health emergency scheduled to end prior to the start of PY23, how has the rate development been affected? Has any adjustment been made to morbidity? Please provide support for any adjustments.

Answer 13.

a. No adjustments have been made.

Question 14. Please provide an exhibit which demonstrates that the criteria for the expanded bronze plan(s) have been meet.

Answer 14. Please see Q&A Exhibits 5 and 5a for a comprehensive list of all CBC Individual and Small Group expanded bronze plans, and supporting analysis. For the PCP copay analysis, 2021 CBC ACA PCP data is used, trended at 7.25% for 2 years to 2023. The analysis shows that a $50 PCP is less than 50% of the average 2023 PCP visit cost.

Question 15. Please explain how a change in member behavior to use service types such as telehealth more frequently than in the past and how a reversion back to more traditional service types is considered in your trend development.

Answer 15. Capital pays providers the same contracted rate for both in person and telehealth visits, so no adjustment has been applied for telehealth. Our trend does reflect increases in professional utilization (+1%) and decreases in hospital IP utilization (-1%).

Question 16. Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Answer 16. I confirm that the exhibits above have been tested to ensure that rates are identical.

Expanded Bronze Plan Review

This review checks that each plan with an Expanded Bronze metal level meets the
1. Meet the requirements to be a high deductible health plan within the meaning of 26 U.S.C. 223(c)(2).

OR

2. Pay for at least one major service before the deductible with reasonable cost sharing.
-*Major services* are defined as the below list of benefits.
-*Reasonable cost sharing* is defined as a coinsurance less than or equal to 50% or a copay less than or equal to a benefit-specific copay limit defined by the state. The values are set to default to $0 and states may update the values below.

	Copay	Coins
Primary Care Visits	$50	50%
Specialist Visit	$0	50%
Emergency Room Services	$0	50%
Inpatient Hospital Services (e.g.,	$0	50%
Generic Drugs	$0	50%
Preferred Brand Drugs	$0	50%
Specialty Drugs	$0	50%

Allowed	Visits	Cost per Visit	Trend	2023 Cost Per Visit	Max Copay	Copay Applied
$17,649,144	$199,061	$88.66	7.25%	$101.98	$50.99	$50

Re: **Capital Advantage Assurance Company**
Small Group Rates
Filing No 22-67
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated July 6, 2022. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Revised rate development workbook
- Revised PAAM exhibits
- Revised URRT
- Revised PA Rate template (only updates are to PPO Choice and PPO Choice Select counties)
- Revised memos – Actuarial, Cover Letter
- Initial Rate Change Summary
- Public filing PDF

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 6: Update to 2021 risk adjustment due to the final CMS transfer amount published on June 30th. This amount changed by less than one dollar due to the Department's original estimate rounded to the nearest dollar. This change did not impact the projected RA transfer amount or rates.
- On June 16, the Department approved our PPO Choice Select network in the following counties: Cumberland, Dauphin, Perry and York. It was not approved in Adams and Lebanon. Due to this change, Capital has updated the PA Plan Design and Rate template to exclude Adams and Lebanon from PPO Choice Select. Rates have not changed since the last submission.

Healthcare benefit programs issued or administered by Capital Blue Cross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company®, and Keystone Health Plan® Central. Independent licensees of the Blue Cross Blue Shield Association. Communications issued by Capital Blue Cross in its capacity as administrator of programs and provider relations for all companies.

- Due to the change in the PPO Choice Select Network, Capital requests to add Adams county into our PPO Choice product offering. Adams county offered PPO Choice in 2022, but was not originally planned for 2023 due to the new PPO Choice Select network offering. Capital has updated the PA Plan Design and Rate template to include Adams county in PPO Choice. PPO Choice rates have not changed since the last submission.

If you have any questions regarding this filing, please call me at [redacted] (or via email at [redacted]) or [redacted] at [redacted] ([redacted]). Thank you for your assistance in this matter.

Sincerely,

[redacted]

[redacted], ASA, MAAA
Director, Actuarial Services

Question and Answer
Small Group Rates
Effective January 1, 2023

With this response, please find corresponding Q&A Exhibits in SG_22-67_Initial_CAAC_PPO_Q&AExhibits2_Supporting_20220714.xlsx

Question 1. Please confirm that the change in Q1 had no impact on rates.

Answer 1. I can confirm the update to the URRT Wkst 2 membership has no impact on rates.

Question 2. The following questions pertain to the response received in Q4:

a. Please explain how the response to part c and part f is consistent with part a's response that historical data is not used to develop trends.
b. What would the Rx trend have been without considering rx rebates?
c. Given the level of precision seen throughout the rate filing, for future filings please consider adjusting the logic that all 4 renewal quarters have the same trend in table 5a to be more precise.

Answer 2.

a. The part c response is meant to explain that we measured contracted provider increases from the midpoint of the BEP to the midpoint of 2022. So if average contracted provider cost across all Capital commercial business increased 1% on 10/1/2021 and another 2% on 1/1/2022, and another 3% of 5/1/2022, the year 1 annual cost trend is 1.01 x 1.02 x 1.03 - 1 = 6.1%. Actual historical claims trends are not used, only historical contracted increases are used.
b. Because Rx rebates are projected to trend at the same rate as Rx costs, the Rx trend is unchanged by rebates.
c. We have noted this request and will review for 2024 filings.

Question 3. The following questions pertain to the response received in Q7:

a. For how long has SG membership moving to an ASO product been an issue?
b. What percentage of membership would Capital estimate move to an ASO product each year and has that percentage decreased over time?
c. What impact does this have on morbidity and risk adjustment?

Answer 3.

a. Capital has witnessed groups who tend to have favorable risk scores move to an ASO product since 4th quarter 2018. The likely cause of this movement is because Capital offers similar products in ASO as SG insured, and groups with favorable risk scores receive a lower premium with ASO products compared to SG products.

b. Capital estimates roughly 2% of membership moves towards an ASO product each year. Towards 2018 and 2019, Capital was witnessing higher membership transition up to 10%. However, the transition has reached a steadier 2% in recent years.
c. With the slowing of the transition in recent years, groups moving from SG to ASO does not impact morbidity or risk adjustment projections.

Question 4. As a follow-up to question 5, please provide the breakdown of COVID costs by market (e.g., Individual vs Small Group) in addition to the breakdown by entity and major service category. Additionally, please explain why a flat 3% was assumed for all major service categories, versus varying an adjustment by major service category

Answer 4. Please see Q&A Exhibit 1 for the COVID costs by market, entity, and major service category. A flat 3% was used due to unknowns around the future impacts of COVID.

Question 5. As a follow-up to question 6, please explain how a grossed-up paid-to-allowed ratio can be above 1.0, as is the case with the platinum plans. The ratio should reflect the percentage of allowed costs covered by the plan (i.e., the plan is not expected to pay more than what is contractually allowed).

Answer 5. The pricing AV is calculated relative to the paid-to-allowed ratio. So as an example, if a platinum plan has a pricing AV of 1.039 and the paid-to-allowed ratio is 0.875, the benefits are 1.039/.875 -1 = 19% richer than the average plan in the projection period. It is important to note that the average pricing AV in Table 10 matches the pricing AV calculated in Exhibit G, so rates are not inflated. Relativities are developed from Capital's manual cost model.

Capital's manual cost model is a benefit relativity model. Although it does not explicitly calculate AV (i.e. the percentage of allowed costs covered by the plan), it does accurately calculate the benefit relativities between plans (i.e. gold and silver plan are roughly 10% different in paid claim costs). The pricing AVs are only grossed so that the average pricing AV is equal to the calculated paid-to-allowed ratio. This way, plans are not over or underpriced – they are all relative to the average. Relativities stay the same after grossing up. And induced demand is normalized to 1.0, so not to inflate or suppress rates.

The URRT instructions refer to the pricing AV as the AV and Cost Sharing Design of Plan factor. Neither the instructions nor the URRT template limit this factor to be below 1.0. Capital has treated the factor as a relativity factor, relative to the average paid-to-allowed ratio. To further show the impact of our method, here is an example:

Platinum PPO 0/0/15 Rx 0:
Metal AV: 0.914
Metal AV Induced Demand: 1.161 (AV^2-AV + 1.24)
Pricing AV: 1.039
Induced Demand: 1.138
Proposed Calibrated PAIR: 599.11

Gold PPO 1000/0/25 Rx 0:

Metal AV: 0.803
Metal AV Induced Demand: 1.082 (AV^2-AV + 1.24)
Pricing AV: .937
Induced Demand: 1.05
Proposed Calibrated PAIR: 506.56

Relativity of Gold to Platinum Plan using Metal AV and Metal AV Induced Demand: (0.803 x 1.082)/(0.914 x1.161) = 0.818

Actual Pricing Relativity of Gold Platinum Plan: 506.56/599.11 = .845

Given the differences in models, these answers are within a reasonable range.

Question 6. Please update the 2021 experience period risk adjustment amount, in Table 2, to reflect the final CMS risk adjustment amount released on June 30th.

Answer 6. The risk adjustment amount has been updated to reflect the amount released by CMS on June 30th.

Question 7. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the final CMS transfer amount published on June 30th, please provide narrative and detailed supporting data to justify the proposed changes.

Answer 7. The risk adjustment amount in Table 5 was not adjusted.

Question 8. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Answer 8. I confirm that the exhibits above have been tested to ensure that rates are identical.

Question 9. Please ensure that the 7/14/22 versions of the following items are posted in SERFF with your July 14th response to this data call.

a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
b. PA Actuarial Memorandum
c. PA Actuarial Memorandum Exhibits
d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")
e. URRT
f. Federal Rate Template
g. Part III: Actuarial Memorandum
h. Updated Rate Change Request Summary (Attachment I)
i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Answer 9. I confirm the requested information has been submitted.

Re: **Capital Advantage Assurance Company**
Small Group Rates
Filing No 22-67
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate

Dear Ms. Swartz:

By this filing Capital Blue Cross, on behalf of its wholly owned subsidiary Capital Advantage Assurance Company, submits to the Department Small Group Rates effective January 1, 2023.

The following is a summary of the rate filing:

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2023
- Average Rate Change: 9.1%
- Range of Requested Rate Change: -9.4% to 11.4%
- Total additional annual revenue generated from the proposed rate change: $25,716,365
- Product: PPO and EPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 36,726/23,118
- 2023 Number of Plans/Change from 2022: 39/+2
- Contract Form #: C23-CAAC-SGP
- Form Filing SERFF #: CABC-133252170 & CABC-133252238
- Binder SERFF #: CABC-PA23-125113440
- HIOS Issuer ID: 45127

Healthcare benefit programs issued or administered by Capital Blue Cross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company®, and Keystone Health Plan® Central. Independent licensees of the Blue Cross Blue Shield Association. Communications issued by Capital Blue Cross in its capacity as administrator of programs and provider relations for all companies.

In support of this filing, I have included an Actuarial Memorandum with supporting exhibits, URRT, Consumer Friendly Justification, Rates Table Template, and PA Plan Design Summary and Rate Tables.

If you have any questions regarding this filing, please call me at [redacted] (or via email at [redacted]) or [redacted] at [redacted] ([redacted]. Thank you for your assistance in this matter.

Sincerely,

[redacted]

Attachment I

Rate Change Summary

Capital Advantage Assurance Company (CAAC) – Small Group Plans

Rate request filing ID # CABC-133252091 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at https://www.insurance.pa.gov/Companies/ProductAndRateRequire/Pages/default.aspx

Overview

Initial requested average rate change:	9.1%[1]
Revised requested average rate change:	N/A[1]
Range of requested rate change:	-9.3% - 11.4%
Effective date:	1/1/2023
Mapped Members:	36,726
Available in:	Rating Area 6, Rating Area 7, and Rating Area 9

Key information

Jan. 2021-Dec. 2021 financial experience

Premiums	$233,197,626
Claims	$204,619,333
Administrative expenses	$25,176,344
Taxes & fees	$(5,190,819)
Company made (after taxes)	**$8,592,767**

How it plans to spend your premium
This is how the insurance company plans to spend the premium it collects in 2023:

Claims:	86.98%
Administrative:	10.43%
Taxes & fees:	0.59%
Profit:	2.00%

The company expects its annual medical costs to increase **6.24%**.

Explanation of requested rate change

The key drivers of the rate change, and approximate impact, are as follows:

- Future cost and utilization: 6.0%
- Higher than average claim cost and utilization in 2021: 6%
- Expected morbidity improvement: -3%
    - COVID-19 becomes endemic
    - Pent-up demand subsides

[1] Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital Blue Cross (Capital), submits rates for products to be made available to all small groups effective January 1, 2023.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2019	CABC-131455101	0.7%
Small Group	CAAC	1/1/2020	CABC-131921797	11.3%
Small Group	CAAC	7/1/2020	CABC-132294731	7.0%
Small Group	CAAC	1/1/2021	CABC-132352718	-6.9%
Small Group	CAAC	10/1/2021	CABC-132750915	-4.6%
Small Group	CAAC	1/1/2022	CABC-132795876	4.9%

Average Rate Change

CAAC is proposing an aggregate annual 9.1% rate change, which varies by plan. The rate change is calculated in PA Rate Exhibits Part III, Table 10, cell AC15.

The key drivers of the rate change, and approximate impact, are as follows:

- Future cost and utilization: 6.0%
- Higher than average claim cost and utilization in 2021: 6%
- Expected morbidity improvement: -3%
    - COVID-19 becomes endemic
    - Pent-up demand subsides

Membership

Membership is shown in PA Rate Exhibits Part I, Table 1. The average age is 38.

Benefit Changes 2022-2023

A summary of proposed 2023 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2023. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for CAAC in the small group market.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2021 and December 31, 2021.

Transitional membership is not included in PA Rate Exhibits Table 2 or URRT.

Paid Through Date: Claims in the BEP are paid through February 28, 2022

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments (CSR does not apply to Small Group).
- Capital only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from Capital's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and

regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.

4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.
5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims\ = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to the amounts sent by the Department on 6/30/2022.

Loss Ratio in BEP: Loss ratio is 87.75%

Credibility of Data

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from Capital subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. The credibility manual BEP includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2021 and December 31, 2021. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.24%

Trend levels reflect Capital's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. Capital uses the following to project future costs:

    a. Vendor Physician Cost Model and Internal Hospital Contracting Model
        i. The medical cost models use best estimates of Capital Blue Cross (Capital)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the Capital book of business level for all commercial business.
    b. Internal Prescription Drug Trend Model
        i. Price Inflation
        ii. Contract Pricing
        iii. Member Cost-Sharing
        iv. Units per Script
        v. Brand/Generic Mix
        vi. Therapeutic Mix
        vii. Cost per Script
        viii. Pipeline (new drugs)

2. Utilization Considerations:
    a. Intensity of medical services rendered
    b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
    c. Further migration from brand prescription drugs to generic prescription drugs
    d. Favorable impacts of value based benefits designs
    e. Medical utilization estimates reviewed by Capital's Chief Medical Officer

3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.

4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.

5. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. Capital strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in URRT come directly from Capital's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Morbidity Adjustment", and PA Rate Exhibits, Table 5. The morbidity factor is applied to remove a portion of the impact of COVID-19 from the claims projection. Capital estimates approximately 6% of Group and Individual claims in 2021 are attributable to COVID-19. We expect this will lessen going into 2023, but COVID-19 will continue to incur additional costs, and the inflationary pressures started by the pandemic may remain.

The above factor is found in Exhibit Q, Morbidity Factor Calculation.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2021 to 2023. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from Capital's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: A network adjustment is applied to show the value of implementing EPO and 2-tier PPO network plans in the projection period. The value is calculated as:

$$Network\ Factor = ([Projected\ MM\ by\ Plan] \times [Network\ Factor\ by\ Plan]) \div [Total\ Projected\ MM]$$

Other Adjustments: No other adjustment is applied to the BEP.

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

Index Rate

The experience period index rate is CAAC's allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits.* This number is reflected in Worksheet 1 of URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
    a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates

b. BEP Member Months

2. Develop BEP *Paid and Incurred Claims*:

$$BEP\ Paid\ and\ Incurred\ Claims = \frac{BEP\ Paid\ Claims}{Completion\ Factor}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP\ Paid\ and\ Incurred\ Claim\ PMPM = \frac{BEP\ Paid\ and\ Incurred\ Claims}{BEP\ Member\ Months}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

$$Trended\ Claim\ PMPM = [BEP\ Paid\ and\ Incurred\ Claim\ PMPM] \times (1 + [Trend\%])^{Trend\ Months/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$Projected\ Paid\ and\ Incurred\ Claims\ PMPM = [Trended\ Claim\ PMPM] \times [Benefit\ Adjustment] \times [Morbidity\ Adjustment] \times [Other\ Adjustment]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Other Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services

that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$Benefit\ Level\ Adjustment = \frac{Average\ Manual\ Cost\ in\ Projection\ Period}{Manual\ Cost\ of\ Base\ Plan}$$

c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$Base\ Plan\ Paid\ and\ Incurred\ Claims\ PMPM = \frac{Benefit\ Adjusted\ Paid\ and\ Incurred\ Claims\ PMPM}{Benefit\ Level\ Adjustment}$$

d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$Benefit\ Relativity\ A = \frac{Manual\ Cost\ of\ Benefit\ A}{Manual\ Cost\ of\ Base\ Plan}$$

e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:

   i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than $1000.

   ii. Adjustments for plan designs that fall outside of the actuarial cost model.

a. So the *Projected Claims PMPM by Benefit* is:

$$Projected\ Claims\ PMPM\ Benefit\ A = Projected\ Claims\ PMPM\ Base\ Plan \times Pricing\ Relativity\ A$$

b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in the projection period. The *Total Projected Claims PMPM* :

$$= Projected\ Claims\ PMPM\ Benefit\ A\ \times Expected\ Member\ Dist\ of\ Benefit\ A + Projected\ Claims\ PMPM\ Benefit\ B \times Expected\ Member\ Dis\ of\ Benefit\ B + \cdots$$

7. The Paid-To-Allowed Ratio is then:

$$Paid\ to\ Allowed\ Ratio = \frac{Total\ Projected\ Claims\ PMPM}{Projected\ Allowed\ Claims\ at\ Current\ Benefits}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$[Market\ Adjusted\ Index\ Rate] = ([Index\ Rate]\ x\ [Paid\ to\ Allowed\ Ratio] - [Projected\ Incurred\ Reinsurace\ Recoveries] - [Projected\ Incurred\ Risk\ Adjustment\ PMPM] + [Exchange\ Fees\ PMPM]) \div [Paid\ to\ Allowed\ Ratio]$$

Projected Incurred Risk Adjustments PMPM:

Relevant to 2023 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2023. The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2020-2021 risk adjustment results
5. Market improvement in coding risk: Capital's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that Capital is disadvantaged in the market. This will drive Capital's relative risk to the market down over time.

The 2023 projected risk adjustment PMPM is set equal to the 2021 amount sent by the Department on 6/30/22.

Projected Incurred Reinsurance Recoveries:

Reinsurance does not apply to the small group market.

Exchange Fee PMPM:

CAAC only offers off-exchange plans in the small group market, so the exchange fee is $0.

The exchange fee PMPM is calculated as:

$$Exchange\ Fee\ PMPM = [Avg\ 2023\ On - Exchange\ Premium\ PMPM] \times [\%\ Members\ On - Exchange]$$

Where

$$[Avg\ 2023\ On - Exchange\ Premium\ PMPM = [Avg\ 2022\ On - Exchange\ Premium\ PMPM\ \times (1 + [Avg\ Proposed\ Rate\ Change])$$

See Exhibit K for the development of the Market Adjusted Index Rate.

Retention Items

Administrative Expense Load:

1. Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of $0.22 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
2. Administrative Expense: Calculated using an allocation method from Capital's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to Capital small group products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.
    a. Value-Based Benefits (VBB): Standard with each plan, Capital Blue Cross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
        i. Complete biometric screening and receive a gift card.

ii. Meeting biometric measure or finish online coaching program and receive a gift card reward.
iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
iv. Fees are included in overall administrative expense fee discussed above.
v. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

3. Broker Expense: Calculated based on Capital's explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. Attached please find the proposed 2023 broker agreements – redacted versions. Files are as follows:
    a. Redacted Standard Producer Master Agreement: "SG_22-67_Initial_CAAC_PPO_SPMABrokerGroupRedacted_Supporting_20220518.pdf "
    b. Redacted Preferred Producer Master Agreement: "SG_22-67_Initial_CAAC_PPO_PPMABrokerGroupRedacted_Supporting_20220518.pdf "
4. Additional Quality Improvement: QI amounts applied in rating equal 0.0%. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 2, "Profit & Risk Load", and PA Rate Exhibits Table 6.

Taxes and Fees:

1. Exchange Fee: N/A
2. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, "Taxes and Fees", and PA Rate Exhibits, Table 6.

See Exhibit H as well as PA Rate Exhibits Table 6 for all retention values.

Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC's actuarial cost model. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of

service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

2. Induced Demand: Induced Demand: Please see Table 8. Induced Demand is calculated as:

$$[Pricing\ AV]^2 - [Pricing\ AV] + 1.24$$

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

3. Provider Network: CAAC is offering five networks: PPO, Valley Advantage EPO, Capital Advantage EPO, PPO Choice (2-tiered PPO), Performance PPO (2-tiered PPO), and PPO Choice Select (2-tiered PPO). The network factors are the same across each plan in the network.
    a. The Valley Advantage EPO plan is built around St. Luke's delivery system and is available in Lehigh and Northampton counties.
        i. St. Luke's offers savings over area hospitals in IP, OP and professional settings.
        ii. We assume that 75% of claims are attributable to a St. Luke's facility (EPO plans are offered as multi-options within the counties, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. The rating factor of 0.90 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        iv. See Exhibit O1 for the development of the EPO network factor.
        v. The network factor is unchanged from 2022.
    b. The Capital Advantage EPO plan is built around UPMC Pinnacle's delivery system and is available in Cumberland, Dauphin and Perry counties.
        i. Pinnacle offers savings over area hospitals in IP, OP and professional settings.
        ii. We assume that 75% of claims are attributable to a UPMC Pinnacle's facility (EPO plans are offered as multi-options within the counties, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. The rating factor of 0.90 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        iv. See Exhibit O2 for the development of the EPO network factor.
        v. The network factor is unchanged from 2022.

    c. The PPO Choice tiered design allows members to choose lower cost providers within their region. The product is offered in Adams (7), Berks (7) and Lancaster (7) counties.

Please see the following Excel workbook for the quantitative analysis performed to develop the PPO Choice network factor:

- SG_22-67_Initial_CAAC_PPO_PPOChoiceRegion7_Supporting_CONF_20220518.xlsx

The analysis was performed using all Capital Commercial Group PPO business.

The following steps describe the analysis:

1. Gather 2021 Capital Commercial PPO, region 7 allowed claims by provider and type of service (IP, OP, Professional). (Data tab)
2. Use Medicare benchmark pricing as of 6/30/2021 to compare contracted pricing by provider. (CommercialIP, CommercialOp tabs)
    a. Capital's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity.
3. Analysis tab:
    a. Gather region 7 claims by IP/OP provider. Professional claims are categorized as "Other" and are assumed to be priced the same across all providers.
    b. Identify providers as PPO Choice (tier 1) or Other (tier 2). PPO Choice tier 1 providers are listed in "Tier1Providers".
    c. Reprice claims:
        i. Assume 75% of claims from tier 2 providers will move to tier 1 providers at their contracted price. Claims are repriced at region-specific, claim-weighted average tier 1 provider pricing (calculation is found on tab Tier1Providers).
        ii. Assume 100% of claims already with tier 1 providers will remain with the same tier 1 provider, priced at the PPO Choice contracted price. The PPO Choice pricing is either the same as regular PPO pricing or discounted. The discount, if any, is found in columns S and T. Claims are repriced at the provider-specific pricing adjusted for the PPO Choice discount, if any.
    d. Compare the total repriced claims to the original claims. [Repriced Claims]/[Original Claims] -1 = Medical Discount. (Analysis tab, cell AG6).
    e. Medical Claims make up approximately 80% of total claims, so the final network factor is [Medical Discount] x 0.8 = Final Contracting Discount. (Analysis tab, cell AJ8).
4. The Final Contracting Discount is displayed in Rate Development, Exhibit O3 – PPO Choice Network Factor.

d. The Performance PPO tiered design allows members to choose lower cost providers within their region. The product is offered in Franklin (9), Lebanon (9), Lehigh (6), Northampton (6), Adams (7) and York (7) counties.

   Please see the following Excel workbooks for the quantitative analysis performed to develop the Performance PPO network factor:

   - SG_22-67_Initial_CAAC_PPO_PerfPPORegion6_Supporting_CONF_20220518.xlsx
   - SG_22-67_Initial_CAAC_PPO_PerfPPORegion7_Supporting_CONF_20220518.xlsx
   - SG_22-67_Initial_CAAC_PPO_PerfPPORegion9_Supporting_CONF_20220518.xlsx

The analysis was performed using all Capital Commercial Group PPO business. The network factor in the Small Group ACA market cannot vary by region, but because this product is offered in other market segments, and this analysis is to encompass all market segments, it is segmented by region. For Small Group ACA, the member-weighted average of the network discount is applied to every plan regardless of region.

The following steps describe the analysis. Region 6 is used as an example.

1. Gather 2021 Capital Commercial PPO, region 6 allowed claims by provider and type of service (IP, OP, Professional). (Data tab)
2. Use Medicare benchmark pricing as of 6/30/2021 to compare contracted pricing by provider. (CommercialIP, CommercialOp tabs)
   a. Capital's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity.
3. Analysis tab:
   a. Gather region 6 claims by IP/OP provider. Professional claims are categorized as "Other" and are assumed to be priced the same across all providers.
   b. Identify providers as Performance PPO (Performance PPO tier 1) or Other (Performance PPO tier 2). Performance PPO tier 1 providers are Wellspan, Lancaster General Hospital, Hershey, and St. Luke's.
   c. Reprice claims:
      i. Assume 50% of claims from tier 2 providers will move to tier 1 providers at their contracted price. Claims are repriced at

region-specific, claim-weighted average tier 1 provider pricing (calculation is found on tab PerfPPOProviders).

ii. Assume 100% of claims already with tier 1 providers will remain with the same tier 1 provider, priced at the Performance PPO contracted price. The Performance PPO pricing is either the same as regular PPO pricing or discounted. The discount, if any, is found in columns S and T. Claims are repriced at the provider-specific pricing adjusted for the Performance PPO discount, if any.

d. Compare the total repriced claims to the original claims. [Repriced Claims]/[Original Claims] -1 = Medical Discount. (Analysis tab, cell AG6).

e. Medical Claims make up approximately 80% of total claims, so the final network factor is [Medical Discount] x 0.8 = Final Contracting Discount. (Analysis tab, cell AJ8).

4. The Final Contracting Discount is displayed in Rate Development, Exhibit O4 – Performance PPO Network Factor for each region.

e. The PPO Choice Select tiered design allows members to choose lower cost providers within their region. The product is offered in Cumberland (9), Dauphin (9), Perry (9), and York (7) counties.

Please see the following Excel workbooks for the quantitative analysis performed to develop the PPO Choice Select network factor:

- SG_22-67_Initial_CAAC_PPO_PPOChoiceSelectRegion7_Supporting_CONF_20220518.xlsx
- SG_22-67_Initial_CAAC_PPO_PPOChoiceSelectRegion9_Supporting_CONF_20220518.xlsx

The analysis was performed using all Capital Commercial Group PPO business. The network factor in the Small Group ACA market cannot vary by region, but because this product is offered in other market segments, and this analysis is to encompass all market segments, it is segmented by region. For Small Group ACA, the member-weighted average of the network discount is applied to every plan regardless of region.

The following steps describe the analysis. Region 7 is used as an example.

1. Gather 2021 Capital Commercial PPO, region 7 allowed claims by provider and type of service (IP, OP, Professional). (Data tab)
2. Use Medicare benchmark pricing as of 6/30/2021 to compare contracted pricing by provider. (CommercialIP, CommercialOp tabs)
    a. Capital's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a

percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity.

3. Analysis tab:
    a. Gather region 7 claims by IP/OP provider. Professional claims are categorized as "Other" and are assumed to be priced the same across all providers.
    b. Identify providers as PPO Choice Select (tier 1) or Other (tier 2). PPO Choice Select tier 1 provider is UPMC.
    c. Reprice claims:
        i. Assume 50% of claims from tier 2 providers will move to tier 1 providers at their contracted price. Claims are repriced at region-specific, claim-weighted average tier 1 provider pricing (calculation is found on tab Tier1Providers).
        ii. Assume 100% of claims already with tier 1 providers will remain with the same tier 1 provider, priced at the PPO Choice Select contracted price. The PPO Choice Select pricing is either the same as regular PPO pricing or discounted. The discount, if any, is found in columns S and T. Claims are repriced at the provider-specific pricing adjusted for the PPO Choice Select discount, if any.
    d. Compare the total repriced claims to the original claims. [Repriced Claims]/[Original Claims] -1 = Medical Discount. (Analysis tab, cell AG6).
    e. Medical Claims make up approximately 80% of total claims, so the final network factor is [Medical Discount] x 0.8 = Final Contracting Discount. (Analysis tab, cell AJ8).
4. The Final Contracting Discount is displayed in Rate Development, Exhibit O5 – PPO Choice Select Network Factor for each region.

4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Retention Items section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibrated Plan Adjusted Index Rates

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in Capital. Age factors are applied in accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_22-67_Initial_CAAC_PPO_List-Billed_Supporting_20220518.xlsb for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the Capital member-weighted average by region.

Geographic factors are unchanged from 2022.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[Calibrated\ Plan\ Adjusted\ Index\ Rate] = [Plan\ Adjusted\ Index\ Rate] \div ([Age\ Curve\ Calibration] \times [Geographic\ Factor\ Calibration]\ x\ [Tobacco\ Factor])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$[Member - Level\ Consumer\ Adjusted\ Premium\ Rate] = [Calibrated\ Plan\ Adjusted\ Index\ Rate] \times [Age\ Factor] \times [Geographic\ Factor] \times [Tobacco\ Factor]$$

2. $[Family\ Consumer\ Adjusted\ Premium\ Rate] = \sum[Member - Level\ Consumer\ Adjusted\ Premium\ Rate]$
   With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

Plans: 45127PA0010161, 45127PA0010199, 45127PA0010054, 45127PA0010057, 45127PA0010084, 45127PA0010194 use alternative method 156.135(b)(2) to establish AV. SG_22-67_Initial_CAAC_PPO_UniquePlanDesign_Supporting_20220518 includes a detailed explanation of the approach.

All other AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

See find AV screenshots included with this submission:

AV Pricing Values

All AV Pricing values were developed using Capital's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of URRT were developed by assuming that moderate decline in enrollment and similar distribution to current.

Projected versus Actual MLR

Exhibit R shows a history of projected versus actual MLR and Member Months. Projected comes from the 2018-2020 filings. Actual comes from Table 4.

	MLR		Member Months	
Calendar Year	Actual	Pricing	Actual	Pricing
2018	80.22%	83.34%	776,880	914,304
2019	76.55%	85.00%	504,647	813,342
2020	75.83%	84.40%	367,958	480,000

Claim Cost Projection

Exhibit S shows a history of claim cost projection versus actual from 2018-2021 filings.

Actuarial Statement

I, [redacted], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [redacted], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
    a. Actuarial Standard of Practice No. 5, "Health and Disability Claims"
    b. Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans"
    c. Actuarial Standard of Practice No. 12, "Risk Classification"
    d. Actuarial Standard of Practice No. 23, "Data Quality"
    e. Actuarial Standard of Practice No. 25, "Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage"
    f. Actuarial Standard of Practice No. 26, "Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer

Health Benefit Plans"

g. Actuarial Standard of Practice No. 41, "Actuarial Communications".

2. The index rate is:
    a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
    b. Developed in compliance with the applicable Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
    e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in were calculated in accordance with actuarial standards of practice.

4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.

    a. The analysis was
        i. conducted by a member of the American Academy of Actuaries, and
        ii. performed in accordance with generally accepted actuarial principles and methods.

5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.

6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.

7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.

8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2023 Rate Filing Justification.
