Filing Description:
RE:Genworth Life Insurance Company (GLIC)
Company NAIC No: 70025
Non-AARP Policy Forms: 7042 et al, 7044 et al, 7042 Rev et al, 7044 Rev et al

The referenced filing is a Long Term Care (LTC) rate schedule change request submitted for your review and applies to the referenced policy forms.

AARP policies sold in Pennsylvania are subject to contractual agreements with AARP governing rate increases. As a result, AARP policies are being filed separately from Non-AARP policies. However, since like policies (both Non-AARP and AARP) under Choice 2 & 2.1 policy forms sold in Pennsylvania do not have identical rate schedules, AARP policies are being filed separately from the Non-AARP policies.

In this filing, GLIC requests a premium rate increase of 57.8% on the above-mentioned policy forms. In the submitted actuarial memorandum, we include detailed rate increase justification and we demonstrate that this premium rate increase satisfies Long Term Care regulatory requirements of Pennsylvania.

GLIC will offer insureds affected by the premium increase several alternative options to change their benefits in order to maintain a premium rate level reasonably similar to what they were paying prior to the rate increase. The benefit and rate combinations are consistent with the rate tables approved by the Department. Details on the available alternative options are presented in section 6 of the Actuarial Memorandum.

Thank you for your assistance in reviewing this filing.

July 2, 2020

Pennsylvania Department of Insurance

RE: Genworth Life Insurance Company (GLIC)
Company NAIC No: 70025
SERFF Tracking No: GEFA-132390438
Non-AARP Policy Forms: 7042 et al, 7044 et al, 7042 Rev et al, 7044 Rev et al

The referenced filing is a Long Term Care (LTC) rate schedule change request submitted for your review and applies to the referenced policy forms.

AARP policies sold in Pennsylvania are subject to contractual agreements with AARP governing rate increases. As a result, AARP policies are being filed separately from Non-AARP policies. However, since like policies (both Non-AARP and AARP) under Choice 2 & 2.1 policy forms sold in Pennsylvania do not have identical rate schedules, AARP policies are being filed separately from the Non-AARP policies.

In this filing, GLIC requests a premium rate increase of 57.8% on the above-mentioned policy forms. In the submitted actuarial memorandum, we include detailed rate increase justification and we demonstrate that this premium rate increase satisfies Long Term Care regulatory requirements of Pennsylvania.

GLIC will offer insureds affected by the premium increase several alternative options to change their benefits in order to maintain a premium rate level reasonably similar to what they were paying prior to the rate increase. The benefit and rate combinations are consistent with the rate tables approved by the Department. Details on the available alternative options are presented in section 6 of the Actuarial Memorandum.

The following electronic items are included in this submission:

- This Cover Letter;
- Confidential Actuarial Memorandum;
- Public Actuarial Memorandum;
- Excel Version of Loss Ratio Exhibits;
- Status of Filings Additional Exhibit;
- Alternative Options Supplemental Documents; and
- Current and Proposed Rate Schedules.

Any applicable fees will be submitted as an EFT payment via SERFF.

The contact person for this filing is:

Matthew Haladay, FSA, MAAA
Assistant Vice President & Actuary
Genworth Life Insurance Company
6620 W Broad Street
Richmond, VA 23230

Actuarial Memorandum
July 2020

CONFIDENTIAL

Policy Forms 7042 et al, 7044 et al, 7042 Rev et al, 7044 Rev et al
Non-AARP

1. Scope of this Filing

This filing applies to the referenced Non-AARP policy forms issued in Pennsylvania between November 2004 and June 2012. Forms 7042 and 7044 are also referred to by Genworth Life Insurance Company ("GLIC") as "Choice 2"; forms 7042 Rev and 7044 Rev are also referred to by GLIC as "Choice 2.1". Forms 7042 and 7042 Rev were marketed by the name "Classic Select" and the 7044 and 7044 Rev forms were marketed under the name "Privileged Choice". Privileged Choice policies have many features built into the base policy that were only available as riders for Classic Select policies. These forms are no longer being sold.

AARP policies sold in Pennsylvania were subject to contractual agreements with AARP governing rate increases. These limitations of the AARP contractual agreements no longer apply. However, since like policies (both Non-AARP and AARP) under Choice 2 & 2.1 policy forms sold in Pennsylvania do not have identical rate schedules, AARP policies are being filed separately from the Non-AARP policies.

For all the policies issued in Pennsylvania to which the current filing applies, the following table shows the number of exposed lives by policies issued and policies inforce as of December 31, 2019.

	Total Lives
Issued Lives	19,152
Inforce Lives	16,287

2. Purpose of this Filing

This actuarial memorandum has been prepared to request and support the approval of a premium rate increase in your state.

In this filing, GLIC requests a premium rate increase of 57.8%, applicable to the base rates and associated riders of all inforce policies referenced in Section 1 of this actuarial memorandum.
We demonstrate that the proposed premium rate increase satisfies the minimum requirements of Pennsylvania and the Rate Stability regulation. This actuarial memorandum may not be suitable for other purposes.

3. Justification of the Premium Rate Increase

From the time these policy forms were originally priced, GLIC has monitored and analyzed the impact of its experience on the projections and lifetime loss ratios. As new experience has emerged, GLIC has observed that it continued to unfold unfavorably and assumptions and methodologies have been adjusted to that effect. These updates have resulted in increases in the Disabled Life Reserves (DLR) and the continued need for premium rate adjustments.

A key driver for these increases has been lower than expected active life terminations. As voluntary lapse and active life mortality remained lower than anticipated, policyholders stayed inforce longer to ages at which claims were more likely to occur.

In addition to policyholders persisting to longer policy durations and lower mortality rates, claim costs, driven by the combination of claim incidence, claim continuance and benefit utilization rates, have emerged higher than originally expected. Updated claim severity assumptions have led to the significant strengthening of GLIC's DLR in 2014, 2016 and 2018.

For the current filing, the key driver is higher than expected incidence rates, particularly at attained ages 75 and up.

The table below summarizes the assumption updates made since 2014 that have had the biggest impact in the premium rate increases:

Year	Update in Assumptions Due To
2014	Lower Claim Termination Rates (CTR) in later durations Higher Benefit Utilization Rate (BUR) in later durations
2015	Lower Voluntary Lapse Lower Active Life Mortality
2016	Lower CTR BUR methodology change
2017	Incidence differential for Lifetime and Non-Lifetime benefit periods
2018	Lower CTR
2019	New Choice 2 & 2.1 incidence assumption with improved fit by age and duration

If experience emerges as currently expected, timely implementation of the requested premium rate increase should prevent the need for future premium rate increases. However, if rate increases are delayed due to late approvals, less future premium capacity remains in these blocks to absorb the rate increase. As a result, a higher percentage future premium rate increase must be applied to fewer policyholders in order to obtain the target Lifetime Loss Ratio consistent with applicable regulation. It is our intent to act in a timely manner, work diligently with regulators to obtain approval for the proposed rate increase, and seek to avoid more significant premium rate increases when the average policyholder's attained age is higher.

The calculations below assume delays in obtaining approval of premium rate increases but no other change. Note that, if implementation of the requested premium rate increase is delayed six years, the increase necessary to achieve the same Lifetime Loss Ratio roughly doubles.

Impact of Rate Increase Delay	
Years Delayed	**Required Increase**
None	57.8%
1	64.0%
2	71.0%
3	79.2%
4	88.5%
5	99.5%
6	112.2%

The Moderately Adverse Experience ("MAE") included in the prior filing has been exceeded. The Lifetime Loss Ratio in Exhibit II of the actuarial memorandum submitted in the prior filing, which included a 36.4% proposed rate increase and a provision for 10% MAE, was 65.7%. The Lifetime Loss Ratio reflecting new best estimate assumptions (as described in Section 8 of this actuarial memorandum), and the cumulative rate increase approved in your state with no MAE, is 72.3%. Since 72.3% is higher than 65.7%, MAE has been exceeded and additional rate increases are justified.

4. Marketing Method and Underwriting Description

Policies were sold by captive independent agents, independent agents working through broker general agencies, financial advisors, and agents working through financial institutions.

The underwriting process included an assessment of functional and cognitive abilities at issue ages considered by GLIC to be appropriate. Various underwriting tools were used in accordance with our underwriting requirements, including an application, medical records, an attending physician's statement, telephone interview and/or face-to-face assessment.

5. Description of Benefits

These are federally tax-qualified, individually underwritten policies that provide comprehensive long-term care coverage. They cover the reimbursement of expenses incurred by the insured(s) subject to the amount of coverage purchased. Premium payments are waived after the elimination period has been satisfied.

The Privileged Choice (7044 and 7044 Rev) policy forms pay benefits on a monthly basis and include a 10-year survivorship benefit. The 10-year survivorship benefit waives future premium payments upon the death of one spouse if both spouses are insured and have met certain requirements. It also includes a waiver of elimination period for home health care benefits, and home health care service days are applied to the facility elimination period. The optional nonforfeiture benefit, restoration of benefit, 7-year survivorship benefit and return of premium riders were available for purchase for an additional premium.

The Classic Select (7042 and 7042 Rev) policy forms are comprehensive products with benefits payable on a daily basis. Riders include 7-year and 10-year survivorship, waiver of elimination period for home health care benefits, monthly maximum benefit (as opposed to daily), restoration of benefits and nonforfeiture benefits.

These policy forms can cover an individual or a couple (joint policy). The joint policy operates as two individual policies, except that the two insureds draw from one shared policy benefit pool.

These forms require an insured to meet benefit eligibility requirements that are triggered by Activities of Daily Living (“ADL”) deficiencies or cognitive impairment. The daily or monthly benefit, benefit period and elimination period are selected at issue.

In addition, a Benefit Increase Option (BIO) can be selected at issue. The simple BIO increases the original daily maximum by 5% each year starting with the second policy year and continuing for the life of the policy, unless terminated earlier by the insured. The compound BIO increases the prior year’s daily maximum by 3% or 5% each year starting with the second policy year and continuing for the life of the policy, unless terminated earlier by the insured. The 3% compound BIO was only made available on the Choice 2.1 (7042 Rev and 7044 Rev) versions of these policy forms.

6. Alternatives to the Proposed Rate Increase

GLIC will offer insureds impacted by rate filings several options for mitigating the impact of the rate increase. These options will be provided in the policyholder notification letter. In addition, policyholders will have the ability to call a dedicated team of customer service representatives that can assist with providing customized quotes for any number of other benefit adjustments

Reduced Benefit Options. As with prior rate increases, insureds can change any number of benefit features or coverage limits in order to maintain reasonably equivalent pre- and post-rate increase premium levels, and the optimal balance of coverage and cost based on their specific needs. The available benefit and rate combinations are consistent with the combinations presented in the rate tables approved by the Department as part of the original filing. To balance coverage and cost considerations, GLIC will offer policyholders, subject to rate increases on their long term care policies, customized options to adjust their benefits, which may include any of the following options (where available):

1. Reduction in Daily/Monthly/Lifetime Maximum amount;
2. Reduction in Benefit Period;
3. Reduction or elimination of the BIO;
4. Increases in Elimination Period; and
5. Elimination of policy riders.

If a policyholder elects to reduce or eliminate the BIO, they would retain any prior increases to their daily or monthly payment maximums. In addition, the company plans to offer, and has included as part of this filing, a new BIO of 1% compound, which will be available for policyholders who wish to reduce their BIO from a higher level.

Flexible Benefit Option (FBO). GLIC has developed a new alternative to mitigate the proposed premium increase while still providing meaningful protection. The option features the following:

1. A premium rate guarantee until at least January 1, 2025;
2. $250,000 benefit pool for non-shared, $400,000 benefit pool for shared;
3. Monthly indemnity payments that vary by type of benefit. For each full month of qualification, the benefit amounts for each type of benefit are as follows:
   - Nursing Home Benefit - monthly payments are 100% of the monthly maximum. Payments are designed to last three years if the policyholder is in a nursing home for the entire time and would be calculated by dividing the claimant's benefit pool by 36 months;
   - Assisted Care Facility Benefit - monthly payments are 75% of the monthly maximum and are for care in an assisted care facility; and
   - Flexible Care Benefit – monthly payments are 50% of the monthly maximum and are for other types of care, such as home care.
4. GLIC will adjust monthly payment amounts when the insured qualifies for benefits for only part of a month;
5. GLIC will pay only one benefit in a calendar month. If more than one benefit could apply in a calendar month, then GLIC will pay the benefit (Nursing Home Benefit, Assisted Care Facility Benefit, or the Flexible Care Benefit) with the most days of qualification in that month;
6. A 180 day elimination period applies for the Nursing Home and Assisted Care Facility Benefits, and a 90 day elimination period applies to the Flexible Care Benefit; and
7. The benefit pool and monthly maximum will remain fixed, unless the 1% compound BIO is elected. If 1% compound BIO is elected, the benefit pool and monthly maximum will inflate by 1% compounded annually.

The FBO is not available for policies that currently have a benefit pool (net of past claims) less than $250,000 for non-shared, $400,000 for shared.

The combination of the benefits presented with this option is supported by a 2016 PwC study of industry data which found that the average duration for an LTC event is about three years, and that approximately 75%-80% of all LTC events cost less than $250,000[1]. Under this new option, policyholders with non-shared policies will have a benefit pool of $250,000, with monthly payments designed to last three years in a nursing home situs (longer in other situses), and the option of 1% benefit inflation on the benefit pool and monthly maximum. The monthly payment also provides the policyholder more flexibility in managing their long term care event, and a simpler process for receiving benefit payments.

Other options. GLIC will continue to offer the applicable nonforfeiture option to each policyholder. Policyholders that are eligible for the Contingent Nonforfeiture Option will be presented with that as an option in their notification letter. Policyholders that have a nonforfeiture (NFO) rider with their policy may elect that option. For those policyholders that do not have either the Contingent Nonforfeiture or NFO rider available, GLIC will continue to offer its Optional Limited Benefit, which provides a paid-up benefit equal to the total of premium paid, less any claims paid.

7. Premiums

7.1 Renewability

These policies are guaranteed renewable for life, subject to policy terms and conditions.

7.2 Area Factors

Geographic area factors are not used in rating these policies.

7.3 Premium Classes

Premium rates are unisex, level (with the exception of approved rate increases) and payable for life (except for 314 inforce policies with limited pay premium on these forms in your state). Premiums generally vary by issue age, daily benefit, benefit period, elimination period, BIO, and any applicable riders selected.

[1] *The formal cost of long-term care services: How can society meet a growing need?* The referenced study, initially made available in October 2016 and then formally published on their website in 2018, is based on data for the time period 2000-2015 and reports figures in 2016 dollars

Certain underwriting discounts may have been applied to the premium rates. A preferred risk discount of 10% or 20% may have been provided to applicants in response to specified health underwriting criteria specified on the application. Where the criteria for a couple's discount were met, a discount of 40% was provided to both individuals when both submitted valid applications and both were issued coverage. If only one member of a couple was approved, the discount was reduced to 25%. Where a shared policy was issued, a couple's discount was factored into the shared policy form rates. If only one member of a couple applying for shared coverage was approved, an individual policy was issued and the couple's discount was reduced to 25%.

7.4 Modalization Rules

The following table shows the modal factors that are applied to the annual premium for policies, and the percentage of insureds selecting each premium mode.

Premium Mode	Modal Factor	State Distribution	Nationwide Distribution
Annual	1	66.7%	64.0%
Semi-Annual	0.51	7.7%	6.6%
Quarterly	0.26	16.3%	15.3%
Monthly	0.09	9.2%	14.0%

7.5 History of Previous Rate Revisions

A 12.8% rate increase was accepted in Pennsylvania on 3/7/2014.
A 20.0% rate increase was accepted in Pennsylvania on 9/15/2016.
A 36.4% rate increase was accepted in Pennsylvania on 9/22/2017.

A cumulative rate increase of 84.6% has been approved in your state.

7.6 Rate Schedule

Current rate tables reflecting any prior approved rate increase have been included in Appendix A. Corresponding rate tables reflecting any prior approved and the proposed rate increase have been included in Appendix B, attached separately. Please note that actual rates implemented may vary slightly from those set forth in Appendices A and B due to implementation rounding algorithms.

Rate tables for the FBO presented in Section 6 are included in Appendix C.

Rate tables for the 1% compound BIO are included in Appendix D.

7.7 Proposed Effective Date

This rate increase will apply to policies on their billing anniversary date, following a 60-day policyholder notification period.

GLIC will not implement any of the rate increases sought in this filing until we fully implement all previously dispositioned filings.

8. Actuarial Assumptions

This filing's assumptions, with the exception of claim situs mix, are based on actual Genworth nationwide experience with adjustments as considered appropriate for future projections, based on expected differences in experience due to either policy characteristics, policyholder characteristics or underwriting criteria. The claim situs mix assumption is based on GLIC nationwide data. Best Estimate assumptions, described below, for voluntary lapse, mortality, and morbidity do not include any provision for contingency or risk margin. Beginning with 2016 Cash Flow Testing (CFT), GLIC converted from a total lives model to a first principles healthy lives model in which the experience is split between healthy lives and disabled lives.

The actuarial assumptions used to support actuarially justified rate increase filings in Pennsylvania are consistent with those used for GLIC's 2019 CFT, prior to additional Provisions for Adverse Deviation. While base voluntary lapse, mortality and morbidity assumptions are consistent, some modeling features, such as estimates of policyholder behavior (nonforfeiture elections and benefit reductions), are not identical.

The best estimate assumptions were developed by Genworth's Long Term Care Experience Studies team in collaboration with other Genworth actuaries. Genworth's Assumption Review Committee approved these assumptions. Genworth reviews experience and all assumptions every year in connection with CFT and may obtain third-party reviews when, for example, management considers changes to be material. The 2019 changes to the incidence assumption were reviewed by a national actuarial consulting firm.

Note: GLIC nationwide data includes all the states' data except New York. Genworth nationwide data refers to GLIC nationwide data plus New York data.

A. Voluntary Lapse Rates:

Original Filing: The products included in this filing were originally priced in 2002 and 2007 using termination assumptions developed from experience prior to those dates. Originally filed Choice 2 lapse rates varied by duration. Originally filed Choice 2.1 lapse rates varied by marital status, issue age and duration. The original ultimate lapse rate for Choice 2 was 1.5% and the original ultimate lapse rate for Choice 2.1 was 1.0%.

Prior Filings: Assumptions for expected lapse rates were regularly updated with actual Genworth nationwide long-term care lapse experience, using the most recent data available. By 2012, there was sufficient data so that the Choice 2 and Choice 2.1 lapse assumption was based on its own experience, supplemented with experience from the other products at the longer durations.

Base rates were adjusted to reflect the effect of marital status, underwriting class, BIO and benefit period. Beginning in 2015, modifiers were used to improve the overall actual to expected lapse results, landing them closer to 100%.

The 2016 transition to a first principles healthy lives model from a total lives model changed the lapse assumption by limiting the exposure base to periods when insureds are not on claim. The 2016 assumption was developed in three segments: 1) durations 1-10, 2) durations 11+ with attained ages up to 79, and 3) durations 11+ with attained ages 80+. The second segment has ultimate rates of approximately 0.5% to 1.0%. The third segment has increasing lapse rates by attained age consistent with Genworth experience.

Starting in 2016, for duration 1-10, Choice 2 and Choice 2.1 lapse rates for healthy lives were based solely on the experience of Choice 2 and later products. For durations 11+, Choice 2 and Choice 2.1 lapse rates were based on total Genworth nationwide experience, with a product adjustment factor.
In 2017, we refined the analysis to exclude exposures and actual lapses that occur over the implementation period of a rate increase. Lapsing policies are automatically put into nonforfeiture status so that instead of experiencing shock lapses, we are experiencing shock persistency. We also split the experience for durations 1-10 into two issue year bands to reflect different experience for policies issued prior to 2010 relative to newer issues.

In 2018, a minor refinement was introduced to recognize polices in paid-up status due to limited pay plans and survivorship.

Current Filing: The current best estimate healthy life lapse assumptions include the recent updates as described above. The assumptions are derived from actual Genworth nationwide Long Term Care lapse experience through fourth quarter of 2018, with a 6-month lag and excluding the experience of recent partial policy years. In the 2019 development, we refined our approach to the issue year segmentation in order to more closely match the experience by duration.

For durations 1-10, Choice 2 & 2.1 lapse rates are based solely on the Choice 2 and later products experience. For durations 11+, Choice 2 & 2.1 lapse rates are based on total Genworth nationwide experience, with a product adjustment factor. Lapse rates vary by product, issue age, duration, BIO, marital status, risk class and benefit period. The assumptions setting process involves credibility weighting actual historical experience for the product with a long-term baseline assumption. This methodology reduces volatility in the assumption from year-to-year, especially in policy durations with limited experience. In 2019, the credibility weighting procedure was changed to put somewhat higher weight on emerging experience. The Actual/Expected ratio of 98.6% for Choice 2 and later products shows a very good fit of the assumption to the inception-to-date historical experience. Experience is still emerging at the later durations and later ages, which may cause the assumption to change over time.

The following table is a sample of the current lapse rate assumptions for cells with a lifetime benefit period, married status, compound BIO, and for issue years 2009 and earlier.

Sample Voluntary Lapse Rate Assumption						
UW Discount	**No**	**No**	**No**	**Yes**	**Yes**	**Yes**
Issue Age	**45**	**55**	**62**	**45**	**55**	**62**

B. Mortality:

Original Filing: Original Total Life mortality assumptions were based on the Annuity 2000 Mortality Table, without mortality improvement. Selection factors in the original filing were based on data prior to 2002 and 2007 for Choice 2 and Choice 2.1, respectively.

Prior Filings: Assumptions for expected mortality rates were regularly updated with actual Genworth nationwide Long Term Care mortality experience, using the most recent data available. The updated actual experience incorporated the use of selection factors. A one-year lag was used in all studies to allow for a more complete reporting of deaths.

Starting in 2013, mortality improvement was added to the assumption. It was initially set to cover the first 5 projection years. The improvement rate compounded at 1% per year. Remaining projection years used the accumulated improvement of 5 years.

Mortality assumptions at the oldest ages and longest durations continued to be based on the Annuity 2000 Mortality Table. However, in 2015, changes were made to the grading of the table by duration and also the mortality improvement increased to 10 years.

The 2016 transition to a first principles healthy lives model from a total lives model changed the mortality assumption by excluding exposures and deaths while on claim. The 1% mortality improvement assumption remained for healthy lives for 10 projection years.

Beginning in 2016, we used a Generalized Linear Model (GLM) to more accurately capture the interaction of the explanatory variables. Mortality assumptions vary by product, issue age, duration, gender, marital status, underwriting class, BIO and benefit period.

Current Filing: The current best estimate assumption for expected mortality rates includes the updates as described above. The assumption is derived from actual Genworth nationwide Long Term Care mortality experience through fourth quarter of 2018, with a 1-year reporting lag. The assumptions setting process involves credibility weighting actual historical experience for the product with a long-term baseline assumption. This methodology reduces volatility in the assumption from year-to-year, especially in policy durations with limited experience. In 2019, the credibility weighting procedure was changed to put somewhat higher weight on emerging experience. The Actual/Expected ratio of 98.0% for Choice 2 and later products shows a very good fit of the assumption to the inception-to-date historical experience. Experience is still emerging at the later durations and later ages, which may cause the assumption to change over time.

The mortality improvement assumption for healthy lives continues to apply to the first 10 projection years at a compound rate of 1% per year. Remaining projection years use the accumulated improvement of 10 years. This assumption is based on Genworth experience data and is supported by statistical testing.

The following table is a sample of the current mortality rate assumptions before improvements for policies with a limited benefit period, married status, standard risk class, no BIO and issue age 65.

Gender	**M**	**F**
Duration		
1	0.21%	0.11%
2	0.35%	0.18%
3	0.43%	0.23%
4	0.51%	0.28%
5	0.58%	0.32%

27	7.99%	7.81%
28	8.53%	8.53%
29	9.03%	9.03%
30	9.38%	9.38%

C. Morbidity:

The morbidity assumption is composed of three main parts - incidence, benefit utilization and claim termination rates (sometimes described as claim continuation). The latter two assumptions constitute claim severity. Claim incidence rates measure the likelihood of a policyholder going on claim. Benefit utilization rates measure the proportion of contractually available benefits that a policyholder uses while on claim, once eligibility requirements have been met. Claim termination rates refer to the length of time until a claimant leaves their claim status, once benefit eligibility requirements have been met, and are applied from the loss date of the claim. Because the benefit utilization and claim termination assumptions vary by original care situs, the morbidity assumption also includes a claim situs mix assumption to split newly incurred claims between Nursing Home (NH), Assisted Living Facility (ALF) and Home Care (HC) settings.

Prior to 2016, these assumptions were combined into total claim costs for use in the total life modeling approach. With the total life approach, an explicit assumption was needed to reflect policy terminations related to benefit exhaustions. Beginning in 2016, all projections were performed from first principles (i.e., incidence, benefit utilization and claim termination rates are individually reflected in the projection model) and benefit exhaustions were implicitly recognized.

Original Filing: Originally filed expected claim cost assumptions for Choice 2 were based on 2002 and prior claim cost data and did not include morbidity improvement. Originally filed expected claim cost assumptions for Choice 2.1 were based on 2006 and prior claim cost data and included morbidity improvement.

Prior Filings: Assumptions for expected claim costs were regularly updated with actual Genworth nationwide Long Term Care claim experience, using the most recent data available. In 2013, morbidity improvement of 1.6% was also adopted for the first 5 projection years.

Genworth regularly monitors all aspects of morbidity results and makes changes as necessary to morbidity assumptions in order to reflect company experience. This specifically includes reviewing results split by current and potential explanatory variables and making assumption fit changes as necessary in order to mitigate the risk that the future mix of claim characteristics will differ from the historical mix. These reviews and claim severity assumption updates led to material financial charges to increase claim reserves in 2014, 2016 and 2018.

In 2014, in addition to incidence updates and material claim severity updates, benefit utilization rate trending was also introduced. This was accomplished by inflating each of the assumed starting benefit utilization rates by the applicable inflation assumption (ranging from 1.0% to 2.3%) and deflating it by the contractual BIO. Trending was applied 20 years into the future. The morbidity improvement remained at 5 years and changed to 10 years in the 2015 filings.

The 2016 transition to a first principles healthy lives model from a total lives model transformed the morbidity assumptions by limiting the exposure to periods when insureds are not on claim for incidence rates. The 1.6% morbidity improvement assumption for 10 projection years remained in place, applied to healthy lives. Statistical hypothesis testing was performed to confirm that this assumption was not unreasonable based on company healthy life incidence experience.

In 2016, the claim termination rates were updated to reflect emerging experience, especially at later claim durations. Rates were differentiated by product type (reimbursement vs. indemnity) at that time. Refinements were also made to improve the fit of the benefit utilization rates.

In 2017, incidence rates added benefit period (lifetime vs limited) as a new explanatory variable.

In 2018, we refined the way we define original care situs for each claim, choosing the situs as of the first payment rather than the situs as of the disability date. This change reduced the volatility of care transitions in our experience. The 2018 situs mix assumption was developed consistent with the new definition. In 2018, the observation period was shortened from inception-to-date to the most recent 10.5 years of experience. We have observed a changing pattern of situs mix over time, specifically an increasing percentage of ALF claims and a reduction of NH claims. A shorter study period better reflects more recent situs mix trends. A true-up step in the assumption development process produces a 100% actual-to-expected result for the study period.

Claim termination rates were updated in 2018 consistent with the new situs definition and to reflect emerging experience. This assumption development for 2018 had several areas of improvement:

- An iterative process of actual to expected adjustments was used to produce a better fit for each of the explanatory variables;
- This iterative process specifically included improvement to the fit for the claim recovery assumption separately from the disabled life mortality assumption because that split is important for purposes of the projection model;
- The CTR assumption was set using all the core reimbursement experience in aggregate, with duration one product adjustments to improve the fit by product within the reimbursement block; and
- A modifier was introduced to reflect claim administration practice refinements intended to accurately reflect contractual terms.

In 2018, we introduced a GLM approach to derive the benefit utilization rates, in order to better reflect the interactions among the explanatory variables. This change resulted in a significant increase in expected utilization for unlimited (lifetime) benefit plans after early claim durations. The benefit period groupings for the utilization assumption were expanded from two values of lifetime and non-lifetime to three values of lifetime, 0-3 years and 4+ years. This refinement also improved the actual-to-expected fit. A final true-up was introduced after the GLM to ensure a 100% A/E fit by situs and duration within the reimbursement block.

Current Filing: The four components of morbidity - incidence, benefit utilization, claim termination and claim situs mix - are described below. Incidence rates vary by product, issue age, policy duration, gender, marital status and underwriting class. Severity assumptions vary by age at disability, claim duration, benefit period and initial care situs. The benefit utilization assumption also varies by BIO, and the claim termination assumption also varies by gender.

1. Incidence Rates

The current best estimate assumption for expected incidence rates include all the prior updates as described above. Significant changes were made in the development of the 2019 incidence assumption for Choice 2 & 2.1.

The incidence assumption setting process involves credibility weighting actual historical experience for the product with a long-term baseline assumption. This methodology reduces volatility in the assumption from year-to-year, especially in policy durations with limited experience. In 2019, we conducted a deep review of the baseline curves for the Choice 2 product. The development of the previous baseline had started with the curves for older products and adjusted them to reflect the fact that actual Choice 2 & 2.1 experience was more favorable than the older products and to reflect the assumption that the favorable difference would continue, primarily due to improvements in underwriting. The previous baseline had been developed when limited Choice 2 & 2.1 experience data was available (fewer than 2,000 claims). Based on an analysis of emerging experience (now more than 11,000 claims), the baseline assumption has been reshaped to reflect the fact that Choice 2 & 2.1 experience continues to be more favorable than the older products, but not to the same extent anticipated by the previous baseline assumption. Most importantly, the baseline assumption required strengthening beyond early policy durations and young ages at disability, in order to better fit emerging Choice 2 & 2.1 experience. The incidence assumption setting process now also includes use of a GLM in order to produce a better fit among the explanatory variables when evaluating actual historical experience each year. The 2019 incidence assumption development was peer reviewed by a national actuarial consulting firm.

The assumptions are derived from actual Genworth nationwide Long Term Care claim incidence experience, updated through fourth quarter of 2018, with a 1-year reporting lag. The Actual/Expected ratio of 100.4% for Choice 2 and later products shows a very good fit of the assumption to the inception-to-date historical experience. Experience is still emerging at the later durations and later ages, which may cause the assumption to change over time.

The morbidity improvement assumption for healthy lives continues to apply to the first 10 projection years at a compound rate of 1.6% per year. Remaining projection years use the accumulated improvement of 10 years. This assumption is based on Genworth experience data and supported by statistical testing.

The following table is a sample of claim incidence rate assumptions for a married insured, issue ages 55 and 65 for lifetime benefit periods:

Claim Incidence Rates								
Gender	**M**	**M**	**M**	**M**	**F**	**F**	**F**	**F**

28	4.81%	14.55%	3.91%	13.65%	5.70%	14.67%	4.44%	15.48%
29	5.56%	15.50%	4.62%	14.54%	6.54%	15.47%	5.31%	16.47%
30	6.34%	16.40%	5.36%	15.43%	7.44%	16.57%	6.24%	17.78%

2. Benefit Utilization Rates (BUR)

The BUR is based on a rolling 12 months of paid claim data. The 2019 CFT assumption is consistent with our Disabled Life Reserving assumption used in 3Q2019, except it collapses the variables of diagnosis and daily maximum benefit amount due to modeling constraints.

The assumption is derived from actual Genworth nationwide Long Term Care paid claim experience. The assumption used in GLIC's 2019 CFT is based on claim payment data from 4/1/2018 through 3/31/2019. The utilization rates are segmented by product type (indemnity or reimbursement), care situs, BIO, benefit period, age at disability and claim duration. Genworth considers experience combined from all core reimbursement products when setting the BUR assumption for Choice 2.

The BUR assumption development for 2019 introduced true-up factors to ensure a 100% A/E by benefit period. Product-level adjustments were also introduced within the core reimbursement block to improve the fit among the products.

A utilization trend assumption is used for reimbursement products. Long term trending is accomplished by inflating each of the assumed starting BURs by the applicable inflation assumption (ranging from 1.0% to 2.3%) and deflating it by the contractual BIO for the next 20 years into the future. Remaining projection years use the accumulated trending after 20 years. The trend assumption generally increases the future projected claim costs for No BIO policies and decreases the future projected claim costs for Simple and Compound BIO policies relative to recent actual experience.

The following table is a sample of base benefit utilization rate assumptions (i.e. before the application of the utilization trend assumption) for a reimbursement policy, limited benefit period (4+ years), and with compound BIO:

Benefit Utilization Factors						
Age at Disability	**81**	**81**	**81**	**86**	**86**	**86**
Care Situs	**ALF**	**HC**	**NH**	**ALF**	**HC**	**NH**
Claim Duration						
1	64.23%	38.70%	70.84%	64.37%	40.20%	72.13%
2	68.79%	50.76%	76.84%	68.27%	52.20%	77.46%
3	71.73%	57.17%	77.24%	70.72%	58.41%	77.38%
4	70.51%	60.75%	74.24%	69.30%	61.86%	74.14%
5	66.99%	60.34%	69.25%	65.88%	61.49%	69.19%
6	62.87%	57.28%	64.11%	62.05%	58.59%	64.29%
7+	59.60%	53.16%	60.20%	59.25%	54.76%	60.82%

3. Claim Termination Rates (CTR)

The assumption is derived from actual Genworth nationwide Long Term Care experience for the period from inception through fourth quarter 2018, with a 6-month lag.

High terminations in early claim durations are generally followed by a flattening of the curve as acute disabilities terminate due to death or recovery. The remaining lives are permanent, long-term disabilities where recovery is unlikely. Claim terminations at these longer durations are driven by disabled life mortality rates.

The 2018 CTR assumption was reviewed with the additional year of data, found to produce a good fit and was unchanged for purposes of 2019 CFT. The Actual/Expected ratio of 99.7% for the combined reimbursement business has a very good fit to the inception-to-date historical experience. Experience is still emerging at the later claim durations and is changing at the earliest durations, which may cause the assumption to change over time.

The following table is a sample of claim termination rate assumptions for ALF, female, limited benefit period, disability age 82, for the first 240 claim durations:

Monthly Claim Termination Rates							
Duration	**Rate**	**Duration**	**Rate**	**Duration**	**Rate**	**Duration**	**Rate**
1	0.85%	**37-48**	1.76%	**86**	2.33%	**103**	2.53%
2	0.61%	**49-60**	2.25%	**87**	2.34%	**104**	2.54%
3	0.53%	**61-67**	2.34%	**88**	2.35%	**105**	2.55%
4	1.11%	**68-72**	2.33%	**89**	2.36%	**106**	2.57%
5	1.52%	**73**	2.24%	**90**	2.37%	**107**	2.58%
6	1.41%	**74**	2.25%	**91**	2.38%	**108**	2.59%
7	1.35%	**75**	2.26%	**92**	2.40%	**109-120**	2.71%
8	1.32%	**76**	2.27%	**93**	2.41%	**121-132**	2.79%
9	1.27%	**77**	2.28%	**94**	2.42%	**133-144**	2.96%
10	1.25%	**78**	2.29%	**95**	2.43%	**145-156**	3.10%
11	1.22%	**79**	2.30%	**96**	2.44%	**157-168**	3.23%
12	1.13%	**80**	2.31%	**97**	2.45%	**169-180**	3.33%
13	1.48%	**81**	2.32%	**98**	2.47%	**181-192**	3.41%
14-24	1.47%	**82**	2.33%	**99**	2.48%	**193-204**	3.63%
25-30	1.62%	**83**	2.34%	**100**	2.49%	**205-216**	3.77%
31	1.61%	**84**	2.35%	**101**	2.50%	**217-228**	3.82%
32-36	1.62%	**85**	2.32%	**102**	2.52%	**229-240**	4.00%

4. Claim Care Situs Mix

A claim situs mix assumption is used to split the incidence rates among the care situses: NH, ALF and HC.

The assumption is derived from actual GLIC nationwide Long Term Care experience, using data from 2008 through 2018, with a 6-month lag. The study shows a significant difference between New York and nationwide experience, so the New York experience is excluded.

The situs assumption varies by product, age at disability and marital status. At the lower attained ages, first situs claims are more likely to be for home health care. At the higher attained ages, first situs claims are more evenly distributed between home care and facility.

The situs mix assumption development for 2019 was not a significant change. The update reflected some movement toward higher use of ALF and lower use of NH within facility care.

The Actual/Expected ratio is 100.1% for HC, 100.0% for NH and 99.9% for ALF for Choice 2 and later products. This is a very good fit to the experience used to set the assumption.

The following table is the situs mix assumption for GLIC for selected ages:

Final GLIC Situs Mix Assumptions for Selected Attained Ages				
Block	**Age at Disability**	**HC**	**ALF**	**NH**
Choice 2 & 2.1 Married	60	94.2%	2.9%	2.8%
	65	90.5%	5.3%	4.2%
	70	86.1%	8.3%	5.6%
	75	80.9%	12.2%	6.9%
	80	75.0%	16.9%	8.2%
	85	68.3%	22.3%	9.4%
	90	60.8%	28.5%	10.7%
Choice 2 & 2.1 Singles	60	86.8%	8.4%	4.8%
	65	79.4%	14.2%	6.4%
	70	72.8%	19.7%	7.4%
	75	67.0%	24.8%	8.2%
	80	62.0%	29.1%	9.0%
	85	57.7%	32.4%	9.9%
	90	54.2%	35.1%	10.7%

D. Expenses:

Expenses do not affect the Lifetime Loss Ratio projections shown in this memorandum, nor have they affected the amount of the actuarially justified rate increase. Expenses have not been explicitly projected.

E. Interest:

A 4.12% interest rate assumption is used to calculate historical, future and lifetime loss ratios. This is the average statutory valuation interest rate for all GLIC policies issued on these forms nationwide.

9. Development of the Proposed Rate Increase

In developing the proposed premium rate increase, the following has been considered:

a) Policy design, underwriting, and claims adjudication practices have been considered;
b) In order to ensure maximum credibility, exhibits are based on GLIC nationwide experience through December 31, 2019, for all the forms affected by this filing. Projected earned premiums and incurred claims are based on the assumptions described in Section 8 of this actuarial memorandum;
c) Although some of the policies may have been issued before Pennsylvania adopted the Rate Stability regulation, this rate action is considered to be subject to this regulation;
d) The nationwide premium has been restated at Pennsylvania level, only reflecting your state's approved rate increases, in order to avoid subsidization among states;
e) One of the main purposes of MAE is to stabilize Long-Term Care premiums. The experience has deteriorated year after year such that it has been necessary for GLIC to request rate increases of higher amounts and more frequently than desired. To help avoid such frequent rate increases, GLIC is increasing the current 10% MAE to 15%;
f) The proposed rate increase has been assumed to be implemented on August 1, 2021. Our objective is to get closer to the acceptable maximum lifetime loss ratio of 64.3%. The justified rate increase was calculated to bring the lifetime loss ratio with the current assumption and new provision for MAE (15%) closer to the acceptable maximum lifetime loss ratio, in compliance with the 58%/85% premium test defined in the Rate Stability regulation;
g) Lifetime projections of earned premiums and incurred claims reflecting all the prior approved rate increases in Pennsylvania are set forth in Exhibit I. Lifetime projections of earned premiums and incurred claims reflecting all the prior approved rate increases in Pennsylvania and the proposed rate increase are set forth in Exhibit II;
h) Compliance of the 58%/85% premium test defined in the Rate Stability regulation has been verified, as demonstrated in Exhibit III;
i) Historical and projected earned premiums and incurred claims include provisions for waiver of premium.

Historical experience is shown by claim incurral year with the loss ratio for each loss year calculated by the following formula:

$$LR_j = \frac{\sum_{t=j}^{2019} Pmt_t^j \, v^{t-j} + {}_jCR_{2019} \, v^{2019-j+1/2} + {}_jIBNR_{2019} \, v^{2019-j+1/2} - DBNR_{2019}}{EP_j}.$$

LR_j = Loss Ratio for year j
Pmt_t^j = claim payments in year t on claims incurred in year j, assumed to occur mid-year
${}_jCR_{2019}$ = open Claim Reserve held on December 31, 2019 for claims incurred in year j
${}_jIBNR_{2019}$ = Incurred But Not Reported reserve as of December 31, 2019 attributable to claims incurred in year j
$DBNR_{2019}$ = Dead But Not Reported reserve as of December 31, 2019
EP_j = earned premium in year j, assumed mid-year
j = year of incurral
v = 1/1.0412 for historical and projected cash flows

Annual Loss Ratios are calculated as anticipated incurred claims divided by earned premiums. Lifetime Loss Ratios as of December 31, 2019 are calculated as the sum of accumulated past experience and discounted future experience where accumulation and discounting occur at interest rates described above consistent with fund accounting.

9.1 New Business Premium Rate Comparison

GLIC has compared premium rates on the referenced policy forms to the new business rates where the policy characteristics are similar. There are significant differences in benefits, underwriting and other product features between the Choice 2 and 2.1 products and the product form series GLIC currently offers for sale, Policy Form Number 8000R1. Where possible, adjustments have been made so that new business comparisons are meaningful. These differences affect the rate comparison in the following ways:

Benefit Differences: Several benefits, available in prior product generations, including Choice 2 and 2.1, are not offered in Policy Form Number 8000R1, including benefit periods of eight (8) years or longer, elimination period of zero (0) days, and limited premium payment options (none of these benefits are currently marketed). Policies with these benefit differences are not considered to exceed new business rates.

Survivorship Benefit: All 7044 and 7044Rev policies have a survivorship benefit. The current product does not have this feature, but GLIC did have a product that had this feature available as a rider. These rider rates were added to the currently marketed product rates, which enabled these policies to be part of the new business rate comparison.

Underwriting: Product Form Number 8000R1 is subject to several underwriting enhancements that did not apply to Choice 2 and 2.1. While these underwriting enhancements are not directly reflected in benefits, they impact both original and new business pricing. In addition, Product Form Number 8000R1 has four underwriting categories (Standard, Select, Preferred, and Best), while Choice 2 and 2.1 had only two such categories (Standard and Preferred). GLIC recently made the decision to discontinue sales of Preferred and Best. Ignoring Preferred policies would limit the comparison significantly. GLIC has made a good faith effort to compare these policies and map the two underwriting categories of Choice 2 and 2.1 to the four underwriting categories of Policy Form Number 8000R1 despite the differences.

Issue Ages: Current marketing limits issue ages to between 40 and 75. Policyholders with issue ages outside of this range are not considered to exceed new business rates.

Policies with 50% Home Health Care: Due to the small number of inforce policies with this benefit, these policies have not been included in the comparison and are not considered to exceed new business rates.

Gender Based Pricing: Product Form Number 8000R1 was priced on a gender-specific basis, as opposed to the unisex basis applicable to Choice 2 and 2.1. A blend of female/male rates based on pricing assumptions was used to develop approximate unisex rates.

Informal Home Care: Product Form Number 8000R1 covers services provided by informal caregivers to policyholders receiving care at home, but requires caregivers to be registered, and reimburses that care only up to 50% of the available nursing home benefit. Choice 2 and 2.1 covers services provided by informal caregivers to policyholders receiving care at home, but does not require caregivers to be registered, and reimburses that care up to 100% of the available nursing home benefit. An adjustment to rates for this difference could not be approximated.

Claims Offset: Product Form Number 8000R1 reduces available benefit by claims paid before benefit increases are calculated. Choice 2 and 2.1 products reduce available benefits by claims paid after benefit increases are calculated. An adjustment to rates for this difference could not be approximated.

Marketing and Distribution: Choice 2 and 2.1 were sold during the peak years of LTC production when sales and distribution channels were in a growing stage; the current environment is the exact opposite, with decreasing sales and distribution outlets. In 2004-2009 sales were conducted 66% by Independent Agents and Financial Advisors and 33% by Career Agents. Choice 2.1 was sold also through AARP. GLIC's lower ratings today also impact the current distribution and the amount of production of the currently marketed product is an insignificant fraction of the Choice 2 and 2.1 business sold.

Delay in Approvals and Unapproved Amounts: The rate comparison is sensitive to the approval timing and amounts of prior rate increase request. Delays in approval of the full proposed rate increase result in higher percentage future premium rate increases and increases the likelihood of proposed rate levels exceeding the new business rates.

In accordance with the Rate Stability regulation and the Long-Term Care Rate Stability Practice Note issued by the American Academy of Actuaries in 2012, we believe the differences noted above sufficiently justify a rate level greater than the new business rates for some of the Choice 2 and 2.1 inforce policies in your State. Since GLIC prioritizes rate sufficiency and company solvency, the greater rate level is required in order to certify that, if experience emerges as expected, no further rate increases are anticipated.

10. Active Life Reserves and Claim Liability Reserves

Active life reserves have not been used in this rate increase analysis. Claim reserves as of December 31, 2019, have been discounted to the date of incurral of each respective claim and included in historical incurred claims. Incurred but not reported reserve balances as of December 31, 2019, have been allocated to a calendar year of incurral and included in historic incurred claims. Discounting occurs at 4.12%.

11. Trend Assumptions

As this is not medical insurance, we have not included any explicit medical cost trends in the projections.

12. Future Rate Increases

Policies to which this premium rate increase filing applies may also be subject to future additional rate increases if the full amount of the rate increase requested in this filing is not approved or if underlying assumptions are not realized and the future experience exceeds a 15% MAE. We defined “exceeds a 15% margin” as any change that results in a lifetime loss ratio greater than projected in Exhibit II of this memorandum.

13. State Average Annual Premium Based on Exposed Lives

	Average Premium
Before Proposed Rate Increase	$3,016
After Proposed Rate Increase	$4,760

14. State and GLIC Nationwide Distribution of Business as of December 31, 2019 (Based on Exposed Lives)

By issue age:

Issue Age	State	Nationwide
<55	27.2%	28.7%
55-59	33.2%	31.2%
60-64	26.3%	25.8%
65-69	10.7%	11.0%
70-74	2.3%	2.8%
75-79	0.4%	0.5%
80+	0.0%	0.0%

By elimination period:

Elimination Period in Days	State	Nationwide

Average Issue Age	58	58
Average Attained Age	69	70

*Paid-up Policies are included in the number of Exposed Lives

16. Confidentiality

Pursuant to 65 P.S. § 67.101 *et seq*. (the "Right-to-Know Law"), Genworth Life Insurance Company ("GLIC") respectfully requests that the following sections to be treated as confidential and not subject to disclosure.

Sections 3, 8, 14, Exhibit I, Exhibit II and Exhibit III of the Actuarial Memorandum, and the Additional Exhibit.

The materials sought to be maintained as confidential are referred to as the "GLIC Confidential Materials" herein.

The GLIC Confidential Materials are being filed in connection with GLIC's request for a rate increase on certain long term care insurance products. However, these materials contain GLIC's confidential trade secrets, and/or other confidential proprietary information, including but not limited to actuarial formulas, statistics and/or assumptions, which are not generally known to, or ascertainable by proper means by, persons or entities other than GLIC who could obtain economic value from their disclosure or use.

65 P.S. § 67.101(a) sets forth Pennsylvania's general rule that a public record should generally be available for inspection by members of the public. However, under 65 P.S. § 67.708(b)(11), "trade secrets" and "confidential proprietary information" are explicitly excluded from the list of records that are subject to public disclosure under the Right-to-Know Law. Specifically, § 67.708(b)(11) states as follows:

> (b) Exceptions: Except as provided in subsections (c) and (d) [neither of which apply here], the following are exempt from access by a requester under this act:
>
> (11) A record that constitutes or reveals a trade secret or confidential proprietary information.

In turn, 65 P.S. § 67.102 (the "Definitions" section of the Right-to-Know Law) defines the term "trade secret," in pertinent part, as follows:

> Information, including a formula, drawing, pattern, compilation, including a customer list, program, device, method, technique or process that:
>
> (1) derives independent economic value, actual or potential, from not being generally known to and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use; and
>
> (2) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

Section 67.102 defines the term "confidential proprietary information" as follows:

> Commercial or financial information received by an agency: (1) which is privileged or confidential; and (2) the disclosure of which would cause substantial harm to the competitive position of the person that submitted the information.

Pennsylvania's insurance laws recognize the confidential nature of actuarial reports, work papers, and other materials supporting an actuarial opinion, and provide that they are not subject to disclosure under the Right-to-Know Law. *See* 40 P.S. § 443(d)(1)(i).

The GLIC Confidential Materials fall squarely within the disclosure exemptions for "trade secrets" and "confidential proprietary information" embodied within § 67.708(b)(11). In *Christopher M's Hand Poured Fudge, Inc. v. Hennon*, 699 A.2d 1272 (Pa. Super. Ct. 1997), Pennsylvania's Superior Court set forth six factors that courts can consider in determining whether information qualifies as a trade secret, including:

> (1) the extent to which the information is known outside the owner's business; (2) the extent to which it is known by employees and others involved in the owner's business; (3) the extent of measures taken by the owner to guard the secrecy of the information; (4) the value of the information to the owner and to his competitors; (5) the amount of effort or money expended by the owner in developing the information; and (6) the ease or difficulty with which the information could be properly acquired or duplicated by others.

Id. at 1275. Each of these factors, along with the "substantial harm" element of the "confidential proprietary information" definition weighs heavily in favor of maintaining the confidentiality of the GLIC Confidential Materials.

GLIC and its predecessors have been providing long-term care insurance coverage to policyholders for more than 35 years. GLIC's lengthy experience in the long-term care insurance business has placed it in a unique position in the long-term care insurance marketplace, in that no other long-term care insurance carrier has as much experience in that line of business as GLIC and its predecessors. Because GLIC has been marketing long-term care insurance products longer than its competitors, it has been able to accumulate experience-related data that its competitors have not been able to gather. GLIC takes active measures to maintain the secrecy of the information in the GLIC Confidential Materials. Among other measures, GLIC obtains non-disclosure agreements with potential reinsurers before providing those potential reinsurers with any experience-related data. Furthermore, access to the data is limited and available only to employees of GLIC who are deemed likely to need the information in the course of their duties; those employees are subject to non-disclosure agreements under which they agree not to share the information except in furtherance of the business of GLIC.

The GLIC Confidential Materials discuss, among other things, GLIC's assumptions in pricing certain long term care insurance products, GLIC's proprietary persistency and incurred claims data, and GLIC's policy demographics. In addition to pricing long-term care insurance products, GLIC's extensive data also allows it to effectively manage its policies, by enabling it to accurately set reserves and conduct reliable asset tests. None of this information is available to GLIC's competitors or to the public generally, and it is plainly protectable under the statutes discussed above. *See Giurintano v. Dep't of Gen. Servs.*, 20 A.3d 613, 615-17 & n.5 (Pa. Commw. Ct. 2011) (holding that the identities of

interpreters hired by state contractor were excluded from public disclosure under 65 P.S. §67.708(b)(11) because the contractor (a) kept their identities confidential "to protect its investment," (b) the interpreters were "business assets," and (c) disclosing the identities "would cause substantial harm to the [contractor's] competitive position in the industry").
GLIC's accumulation of data over its long duration in the long-term care insurance business has come at a substantial cost. For numerous years, GLIC had to price and manage policies without having the benefit of the extensive data and experience that it now possesses. GLIC endured substantial losses on many of those policies that did not perform as expected, and GLIC has incurred and will continue to incur billions of dollars of claims on these policies.

If the GLIC Confidential Materials are released to the public, GLIC would be deprived of its hard-earned competitive advantage, which would cause substantial harm to the company. GLIC's competitors could use GLIC's data and assumptions to price long-term care insurance policies as well as GLIC, without the work, time, expense, and (most significantly) the previous losses that GLIC incurred. If the GLIC Confidential Materials were disclosed, GLIC's competitors would be permitted to exploit GLIC's hard earned, proprietary information for their own benefit, and to GLIC's competitive and economic disadvantage. *See Smith Butz, LLC v. Pa. Dep't of Envtl. Prot.*, ___ A.3d ___, 2017 WL 1833472, at *9 (Pa. Commw. Ct. 2017) (finding that records that would enable the company's competitors to copy valuable and proprietary business methods constituted confidential proprietary information and/or trade secrets). For these reasons, GLIC respectfully submits that the GLIC Confidential Materials are exempt from disclosure pursuant to 65 P.S. §67.708(b)(11), and requests that they be treated as confidential by the Pennsylvania Insurance Department.

This submission contains the complete, unredacted version of GLIC's Actuarial Memorandum. GLIC has also filed a publicly-available version, which redacts the GLIC Confidential Materials.

17. Actuarial Certification

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries, and I meet the American Academy of Actuaries' qualification standards for rendering this opinion and am familiar with the requirements for filing for increases in long-term care insurance premiums.

This memorandum has been prepared in conformity with all applicable Actuarial Standards of Practice, including ASOP No. 8, 18, 23, 25 and 41.

I have relied on historical cash flows and projections completed by GLIC's Inforce Actuarial Infrastructure team. All future projections included in this memorandum, while based on GLIC's best estimates, are uncertain and may not emerge as expected.

I have relied on the IFA Analytics team for the pricing, methodology and design of the FBO and the 1% compound BIO.

I have relied on statutory valuations as of December 31, 2019, for Claim Reserves (i.e., Disabled Life Reserves, Pending Claims reserves, Incurred But Not Reported reserves, and Dead But Not Reported reserves) provided by GLIC's Long Term Care Valuation team.

I have also relied on assumptions developed by GLIC's Long Term Care Experience Studies team in collaboration with other GLIC actuaries, which assumptions were approved by Genworth's Assumption Review Committee. The assumptions present the actuary's best judgement and are consistent with the issuer's business plan at the time of the filing.

I hereby certify that, to the best of my knowledge and judgment, this rate submission is in compliance with the applicable laws and regulations of Pennsylvania and the Long-Term Care Insurance regulation. If the requested premium rate schedule increase is implemented and the underlying assumptions, which reflect moderately adverse conditions, are realized, no further premium rate schedule increases are anticipated. In my opinion, the rates are not excessive or unfairly discriminatory.

Exhibit III: Choice 2 & 2.1 Policy Forms - Nationwide Experience
With Requested 57.8% Rate Increase* with MAE
58/85 Test

This exhibit demonstrates compliance with the Rate Stability Regulation which requires that on a lifetime present value basis, incurred claims are at least equal to 58% of original premiums and 85% of increased premiums. This test is satisfied if Line 11 is "True". Note that a provision for Moderately Adverse Experience has been added.

Row	Description	Value
(1)	Accumulated Past Total Premiums Including Rate Increases (Exhibit II):	13,671,975,007
(2)	Accumulated Past Premiums on Original Rate Basis:	12,280,025,859
(3)	Accumulated Past Premiums Attributable to Rate Increases: (1) minus (2)	1,391,949,148
(4)	PV Future Total Premiums Including Approved and Proposed Rate Increases (Exhibit II):	18,203,639,853
(5)	PV Future Premiums on Original Rate Basis:	6,619,742,809
(6)	PV Future Premiums Attributable to Rate Increases: (4) minus (5)	11,583,897,044
(7)	Accumulated Past Incurred Claims (Exhibit II)	1,895,860,186
(8)	PV Future Incurred Claims (Exhibit II)	20,103,182,882
(9)	Total Incurred Claims: (7) + (8)	21,999,043,068
(10)	0.58 x [(2) + (5)] + 0.85 x [(3) + (6)] =	21,991,335,091
(11)	Test: Is (9) > (10)?	TRUE

Policy Forms 7042 et al, 7044 et al, 7042 Rev et al, 7044 Rev et al
Non-AARP

1. Scope of this Filing

This filing applies to the referenced Non-AARP policy forms issued in Pennsylvania between November 2004 and June 2012. Forms 7042 and 7044 are also referred to by Genworth Life Insurance Company ("GLIC") as "Choice 2"; forms 7042 Rev and 7044 Rev are also referred to by GLIC as "Choice 2.1". Forms 7042 and 7042 Rev were marketed by the name "Classic Select" and the 7044 and 7044 Rev forms were marketed under the name "Privileged Choice". Privileged Choice policies have many features built into the base policy that were only available as riders for Classic Select policies. These forms are no longer being sold.

AARP policies sold in Pennsylvania were subject to contractual agreements with AARP governing rate increases. These limitations of the AARP contractual agreements no longer apply. However, since like policies (both Non-AARP and AARP) under Choice 2 & 2.1 policy forms sold in Pennsylvania do not have identical rate schedules, AARP policies are being filed separately from the Non-AARP policies.

For all the policies issued in Pennsylvania to which the current filing applies, the following table shows the number of exposed lives by policies issued and policies inforce as of December 31, 2019.

	Total Lives
Issued Lives	19,152
Inforce Lives	16,287

2. Purpose of this Filing

This actuarial memorandum has been prepared to request and support the approval of a premium rate increase in your state.

In this filing, GLIC requests a premium rate increase of 57.8%, applicable to the base rates and associated riders of all inforce policies referenced in Section 1 of this actuarial memorandum.
We demonstrate that the proposed premium rate increase satisfies the minimum requirements of Pennsylvania and the Rate Stability regulation. This actuarial memorandum may not be suitable for other purposes.

3. Justification of the Premium Rate Increase

Redacted pursuant to section 16, below.

4. Marketing Method and Underwriting Description

Policies were sold by captive independent agents, independent agents working through broker general agencies, financial advisors, and agents working through financial institutions.

The underwriting process included an assessment of functional and cognitive abilities at issue ages considered by GLIC to be appropriate. Various underwriting tools were used in accordance with our underwriting requirements, including an application, medical records, an attending physician's statement, telephone interview and/or face-to-face assessment.

5. Description of Benefits

These are federally tax-qualified, individually underwritten policies that provide comprehensive long-term care coverage. They cover the reimbursement of expenses incurred by the insured(s) subject to the amount of coverage purchased. Premium payments are waived after the elimination period has been satisfied.

The Privileged Choice (7044 and 7044 Rev) policy forms pay benefits on a monthly basis and include a 10-year survivorship benefit. The 10-year survivorship benefit waives future premium payments upon the death of one spouse if both spouses are insured and have met certain requirements. It also includes a waiver of elimination period for home health care benefits, and home health care service days are applied to the facility elimination period. The optional nonforfeiture benefit, restoration of benefit, 7-year survivorship benefit and return of premium riders were available for purchase for an additional premium.

The Classic Select (7042 and 7042 Rev) policy forms are comprehensive products with benefits payable on a daily basis. Riders include 7-year and 10-year survivorship, waiver of elimination period for home health care benefits, monthly maximum benefit (as opposed to daily), restoration of benefits and nonforfeiture benefits.

These policy forms can cover an individual or a couple (joint policy). The joint policy operates as two individual policies, except that the two insureds draw from one shared policy benefit pool.

These forms require an insured to meet benefit eligibility requirements that are triggered by Activities of Daily Living ("ADL") deficiencies or cognitive impairment. The daily or monthly benefit, benefit period and elimination period are selected at issue.

In addition, a Benefit Increase Option (BIO) can be selected at issue. The simple BIO increases the original daily maximum by 5% each year starting with the second policy year and continuing for the life of the policy, unless terminated earlier by the insured. The compound BIO increases the prior year's daily maximum by 3% or 5% each year starting with the second policy year and continuing for the life of the policy, unless terminated earlier by the insured. The 3% compound BIO was only made available on the Choice 2.1 (7042 Rev and 7044 Rev) versions of these policy forms.

6. Alternatives to the Proposed Rate Increase

GLIC will offer insureds impacted by rate filings several options for mitigating the impact of the rate increase. These options will be provided in the policyholder notification letter. In addition, policyholders will have the ability to call a dedicated team of customer service representatives that can assist with providing customized quotes for any number of other benefit adjustments

Reduced Benefit Options. As with prior rate increases, insureds can change any number of benefit features or coverage limits in order to maintain reasonably equivalent pre- and post-rate increase premium levels, and the optimal balance of coverage and cost based on their specific needs. The available benefit and rate combinations are consistent with the combinations presented in the rate tables approved by the Department as part of the original filing. To balance coverage and cost considerations, GLIC will offer policyholders, subject to rate increases on their long term care policies, customized options to adjust their benefits, which may include any of the following options (where available):

1. Reduction in Daily/Monthly/Lifetime Maximum amount;
2. Reduction in Benefit Period;
3. Reduction or elimination of the BIO;
4. Increases in Elimination Period; and
5. Elimination of policy riders.

If a policyholder elects to reduce or eliminate the BIO, they would retain any prior increases to their daily or monthly payment maximums. In addition, the company plans to offer, and has included as part of this filing, a new BIO of 1% compound, which will be available for policyholders who wish to reduce their BIO from a higher level.

Flexible Benefit Option (FBO). GLIC has developed a new alternative to mitigate the proposed premium increase while still providing meaningful protection. The option features the following:

1. A premium rate guarantee until at least January 1, 2025;
2. $250,000 benefit pool for non-shared, $400,000 benefit pool for shared;
3. Monthly indemnity payments that vary by type of benefit. For each full month of qualification, the benefit amounts for each type of benefit are as follows:
   - Nursing Home Benefit - monthly payments are 100% of the monthly maximum. Payments are designed to last three years if the policyholder is in a nursing home for the entire time and would be calculated by dividing the claimant's benefit pool by 36 months;
   - Assisted Care Facility Benefit - monthly payments are 75% of the monthly maximum and are for care in an assisted care facility; and
   - Flexible Care Benefit – monthly payments are 50% of the monthly maximum and are for other types of care, such as home care.
4. GLIC will adjust monthly payment amounts when the insured qualifies for benefits for only part of a month;

5. GLIC will pay only one benefit in a calendar month. If more than one benefit could apply in a calendar month, then GLIC will pay the benefit (Nursing Home Benefit, Assisted Care Facility Benefit, or the Flexible Care Benefit) with the most days of qualification in that month;
6. A 180 day elimination period applies for the Nursing Home and Assisted Care Facility Benefits, and a 90 day elimination period applies to the Flexible Care Benefit; and
7. The benefit pool and monthly maximum will remain fixed, unless the 1% compound BIO is elected. If 1% compound BIO is elected, the benefit pool and monthly maximum will inflate by 1% compounded annually.

The FBO is not available for policies that currently have a benefit pool (net of past claims) less than $250,000 for non-shared, $400,000 for shared.

The combination of the benefits presented with this option is supported by a 2016 PwC study of industry data which found that the average duration for an LTC event is about three years, and that approximately 75%-80% of all LTC events cost less than $250,000[1]. Under this new option, policyholders with non-shared policies will have a benefit pool of $250,000, with monthly payments designed to last three years in a nursing home situs (longer in other situses), and the option of 1% benefit inflation on the benefit pool and monthly maximum. The monthly payment also provides the policyholder more flexibility in managing their long term care event, and a simpler process for receiving benefit payments.

Other options. GLIC will continue to offer the applicable nonforfeiture option to each policyholder. Policyholders that are eligible for the Contingent Nonforfeiture Option will be presented with that as an option in their notification letter. Policyholders that have a nonforfeiture (NFO) rider with their policy may elect that option. For those policyholders that do not have either the Contingent Nonforfeiture or NFO rider available, GLIC will continue to offer its Optional Limited Benefit, which provides a paid-up benefit equal to the total of premium paid, less any claims paid.

7. Premiums

7.1 Renewability

These policies are guaranteed renewable for life, subject to policy terms and conditions.

7.2 Area Factors

Geographic area factors are not used in rating these policies.

[1] *The formal cost of long-term care services: How can society meet a growing need?* The referenced study, initially made available in October 2016 and then formally published on their website in 2018, is based on data for the time period 2000-2015 and reports figures in 2016 dollars

7.3 Premium Classes

Premium rates are unisex, level (with the exception of approved rate increases) and payable for life (except for 314 inforce policies with limited pay premium on these forms in your state). Premiums generally vary by issue age, daily benefit, benefit period, elimination period, BIO, and any applicable riders selected.

Certain underwriting discounts may have been applied to the premium rates. A preferred risk discount of 10% or 20% may have been provided to applicants in response to specified health underwriting criteria specified on the application. Where the criteria for a couple's discount were met, a discount of 40% was provided to both individuals when both submitted valid applications and both were issued coverage. If only one member of a couple was approved, the discount was reduced to 25%. Where a shared policy was issued, a couple's discount was factored into the shared policy form rates. If only one member of a couple applying for shared coverage was approved, an individual policy was issued and the couple's discount was reduced to 25%.

7.4 Modalization Rules

The following table shows the modal factors that are applied to the annual premium for policies, and the percentage of insureds selecting each premium mode.

Premium Mode	Modal Factor	State Distribution	Nationwide Distribution
Annual	1	66.7%	64.0%
Semi-Annual	0.51	7.7%	6.6%
Quarterly	0.26	16.3%	15.3%
Monthly	0.09	9.2%	14.0%

7.5 History of Previous Rate Revisions

A 12.8% rate increase was accepted in Pennsylvania on 3/7/2014.
A 20.0% rate increase was accepted in Pennsylvania on 9/15/2016.
A 36.4% rate increase was accepted in Pennsylvania on 9/22/2017.

A cumulative rate increase of 84.6% has been approved in your state.

7.6 Rate Schedule

Current rate tables reflecting any prior approved rate increase have been included in Appendix A. Corresponding rate tables reflecting any prior approved and the proposed rate increase have been included in Appendix B, attached separately. Please note that actual rates implemented may vary slightly from those set forth in Appendices A and B due to implementation rounding algorithms.

Rate tables for the FBO presented in Section 6 are included in Appendix C.

Rate tables for the 1% compound BIO are included in Appendix D.

7.7 Proposed Effective Date

This rate increase will apply to policies on their billing anniversary date, following a 60-day policyholder notification period.

GLIC will not implement any of the rate increases sought in this filing until we fully implement all previously dispositioned filings.

8. Actuarial Assumptions

Redacted pursuant to section 16, below.

9. Development of the Proposed Rate Increase

In developing the proposed premium rate increase, the following has been considered:

a) Policy design, underwriting, and claims adjudication practices have been considered;
b) In order to ensure maximum credibility, exhibits are based on GLIC nationwide experience through December 31, 2019, for all the forms affected by this filing. Projected earned premiums and incurred claims are based on the assumptions described in Section 8 of this actuarial memorandum;
c) Although some of the policies may have been issued before Pennsylvania adopted the Rate Stability regulation, this rate action is considered to be subject to this regulation;
d) The nationwide premium has been restated at Pennsylvania level, only reflecting your state's approved rate increases, in order to avoid subsidization among states;
e) One of the main purposes of MAE is to stabilize Long-Term Care premiums. The experience has deteriorated year after year such that it has been necessary for GLIC to request rate increases of higher amounts and more frequently than desired. To help avoid such frequent rate increases, GLIC is increasing the current 10% MAE to 15%;

f) The proposed rate increase has been assumed to be implemented on August 1, 2021. Our objective is to get closer to the acceptable maximum lifetime loss ratio of 64.3%. The justified rate increase was calculated to bring the lifetime loss ratio with the current assumption and new provision for MAE (15%) closer to the acceptable maximum lifetime loss ratio, in compliance with the 58%/85% premium test defined in the Rate Stability regulation;
g) Lifetime projections of earned premiums and incurred claims reflecting all the prior approved rate increases in Pennsylvania are set forth in Exhibit I. Lifetime projections of earned premiums and incurred claims reflecting all the prior approved rate increases in Pennsylvania and the proposed rate increase are set forth in Exhibit II;
h) Compliance of the 58%/85% premium test defined in the Rate Stability regulation has been verified, as demonstrated in Exhibit III;
i) Historical and projected earned premiums and incurred claims include provisions for waiver of premium.

Historical experience is shown by claim incurral year with the loss ratio for each loss year calculated by the following formula:

$$LR_j = \frac{\sum_{t=j}^{2019} Pmt_t^j \, v^{t-j} + {}_jCR_{2019} \, v^{2019-j+1/2} + {}_jIBNR_{2019} \, v^{2019-j+1/2} - DBNR_{2019}}{EP_j}.$$

LR_j = Loss Ratio for year j
Pmt_t^j = claim payments in year t on claims incurred in year j, assumed to occur mid-year
${}_jCR_{2019}$ = open Claim Reserve held on December 31, 2019 for claims incurred in year j
${}_jIBNR_{2019}$ = Incurred But Not Reported reserve as of December 31, 2019 attributable to claims incurred in year j
$DBNR_{2019}$ = Dead But Not Reported reserve as of December 31, 2019
EP_j = earned premium in year j, assumed mid-year
j = year of incurral
v = 1/1.0412 for historical and projected cash flows

Annual Loss Ratios are calculated as anticipated incurred claims divided by earned premiums. Lifetime Loss Ratios as of December 31, 2019 are calculated as the sum of accumulated past experience and discounted future experience where accumulation and discounting occur at interest rates described above consistent with fund accounting.

9.1 New Business Premium Rate Comparison

GLIC has compared premium rates on the referenced policy forms to the new business rates where the policy characteristics are similar. There are significant differences in benefits, underwriting and other product features between the Choice 2 and 2.1 products and the product form series GLIC currently offers for sale, Policy Form Number 8000R1. Where possible, adjustments have been made so that new business comparisons are meaningful. These differences affect the rate comparison in the following ways:

Benefit Differences: Several benefits, available in prior product generations, including Choice 2 and 2.1, are not offered in Policy Form Number 8000R1, including benefit periods of eight (8) years or longer, elimination period of zero (0) days, and limited premium payment options (none of these benefits are currently marketed). Policies with these benefit differences are not considered to exceed new business rates.

Survivorship Benefit: All 7044 and 7044Rev policies have a survivorship benefit. The current product does not have this feature, but GLIC did have a product that had this feature available as a rider. These rider rates were added to the currently marketed product rates, which enabled these policies to be part of the new business rate comparison.

Underwriting: Product Form Number 8000R1 is subject to several underwriting enhancements that did not apply to Choice 2 and 2.1. While these underwriting enhancements are not directly reflected in benefits, they impact both original and new business pricing. In addition, Product Form Number 8000R1 has four underwriting categories (Standard, Select, Preferred, and Best), while Choice 2 and 2.1 had only two such categories (Standard and Preferred). GLIC recently made the decision to discontinue sales of Preferred and Best. Ignoring Preferred policies would limit the comparison significantly. GLIC has made a good faith effort to compare these policies and map the two underwriting categories of Choice 2 and 2.1 to the four underwriting categories of Policy Form Number 8000R1 despite the differences.

Issue Ages: Current marketing limits issue ages to between 40 and 75. Policyholders with issue ages outside of this range are not considered to exceed new business rates.

Policies with 50% Home Health Care: Due to the small number of inforce policies with this benefit, these policies have not been included in the comparison and are not considered to exceed new business rates.

Gender Based Pricing: Product Form Number 8000R1 was priced on a gender-specific basis, as opposed to the unisex basis applicable to Choice 2 and 2.1. A blend of female/male rates based on pricing assumptions was used to develop approximate unisex rates.

Informal Home Care: Product Form Number 8000R1 covers services provided by informal caregivers to policyholders receiving care at home, but requires caregivers to be registered, and reimburses that care only up to 50% of the available nursing home benefit. Choice 2 and 2.1 covers services provided by informal caregivers to policyholders receiving care at home, but does not require caregivers to be registered, and reimburses that care up to 100% of the available nursing home benefit. An adjustment to rates for this difference could not be approximated.

Claims Offset: Product Form Number 8000R1 reduces available benefit by claims paid before benefit increases are calculated. Choice 2 and 2.1 products reduce available benefits by claims paid after benefit increases are calculated. An adjustment to rates for this difference could not be approximated.

Marketing and Distribution: Choice 2 and 2.1 were sold during the peak years of LTC production when sales and distribution channels were in a growing stage; the current environment is the exact opposite, with decreasing sales and distribution outlets. In 2004-2009 sales were conducted 66% by Independent Agents and Financial Advisors and 33% by Career Agents. Choice 2.1 was sold also through AARP. GLIC's lower ratings today also impact the current distribution and the amount of production of the currently marketed product is an insignificant fraction of the Choice 2 and 2.1 business sold.

Delay in Approvals and Unapproved Amounts: The rate comparison is sensitive to the approval timing and amounts of prior rate increase request. Delays in approval of the full proposed rate increase result in higher percentage future premium rate increases and increases the likelihood of proposed rate levels exceeding the new business rates.

In accordance with the Rate Stability regulation and the Long-Term Care Rate Stability Practice Note issued by the American Academy of Actuaries in 2012, we believe the differences noted above sufficiently justify a rate level greater than the new business rates for some of the Choice 2 and 2.1 inforce policies in your State. Since GLIC prioritizes rate sufficiency and company solvency, the greater rate level is required in order to certify that, if experience emerges as expected, no further rate increases are anticipated.

10. Active Life Reserves and Claim Liability Reserves

Active life reserves have not been used in this rate increase analysis. Claim reserves as of December 31, 2019, have been discounted to the date of incurral of each respective claim and included in historical incurred claims. Incurred but not reported reserve balances as of December 31, 2019, have been allocated to a calendar year of incurral and included in historic incurred claims. Discounting occurs at 4.12%.

11. Trend Assumptions

As this is not medical insurance, we have not included any explicit medical cost trends in the projections.

12. Future Rate Increases

Policies to which this premium rate increase filing applies may also be subject to future additional rate increases if the full amount of the rate increase requested in this filing is not approved or if underlying assumptions are not realized and the future experience exceeds a 15% MAE. We defined "exceeds a 15% margin" as any change that results in a lifetime loss ratio greater than projected in Exhibit II of this memorandum.

13. State Average Annual Premium Based on Exposed Lives

	Average Premium
Before Proposed Rate Increase	$3,016
After Proposed Rate Increase	$4,760

14. State and GLIC Nationwide Distribution of Business as of December 31, 2019 (Based on Exposed Lives)

Redacted pursuant to section 16, below.

15. State and GLIC Nationwide Lives, Premiums and Average Age

	State	Nationwide
Number of Exposed Lives*	16,287	364,057
Inforce Annualized Premium	$49,124,393	$882,617,906
Average Issue Age	58	58
Average Attained Age	69	70

*Paid-up Policies are included in the number of Exposed Lives

16. Confidentiality

Pursuant to 65 P.S. § 67.101 *et seq*. (the "Right-to-Know Law"), Genworth Life Insurance Company ("GLIC") respectfully requests that the following sections to be treated as confidential and not subject to disclosure.

Sections 3, 8, 14, Exhibit I, Exhibit II and Exhibit III of the Actuarial Memorandum, and the Additional Exhibit.

The materials sought to be maintained as confidential are referred to as the "GLIC Confidential Materials" herein.

The GLIC Confidential Materials are being filed in connection with GLIC's request for a rate increase on certain long term care insurance products. However, these materials contain GLIC's confidential trade secrets, and/or other confidential proprietary information, including but not limited to actuarial formulas, statistics and/or assumptions, which are not generally known to, or ascertainable by proper means by, persons or entities other than GLIC who could obtain economic value from their disclosure or use.

65 P.S. § 67.101(a) sets forth Pennsylvania's general rule that a public record should generally be available for inspection by members of the public. However, under 65 P.S. § 67.708(b)(11), "trade secrets" and "confidential proprietary information" are explicitly excluded from the list of records that are subject to public disclosure under the Right-to-Know Law. Specifically, § 67.708(b)(11) states as follows:

> (b) Exceptions: Except as provided in subsections (c) and (d) [neither of which apply here], the following are exempt from access by a requester under this act:
>
> (11) A record that constitutes or reveals a trade secret or confidential proprietary information.

In turn, 65 P.S. § 67.102 (the "Definitions" section of the Right-to-Know Law) defines the term "trade secret," in pertinent part, as follows:

> Information, including a formula, drawing, pattern, compilation, including a customer list, program, device, method, technique or process that:
>
> (1) derives independent economic value, actual or potential, from not being generally known to and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use; and
>
> (2) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

Section 67.102 defines the term "confidential proprietary information" as follows:

> Commercial or financial information received by an agency: (1) which is privileged or confidential; and (2) the disclosure of which would cause substantial harm to the competitive position of the person that submitted the information.

Pennsylvania's insurance laws recognize the confidential nature of actuarial reports, work papers, and other materials supporting an actuarial opinion, and provide that they are not subject to disclosure under the Right-to-Know Law. *See* 40 P.S. § 443(d)(1)(i).

The GLIC Confidential Materials fall squarely within the disclosure exemptions for "trade secrets" and "confidential proprietary information" embodied within § 67.708(b)(11). In *Christopher M's Hand Poured Fudge, Inc. v. Hennon*, 699 A.2d 1272 (Pa. Super. Ct. 1997), Pennsylvania's Superior Court set forth six factors that courts can consider in determining whether information qualifies as a trade secret, including:

> (1) the extent to which the information is known outside the owner's business; (2) the extent to which it is known by employees and others involved in the owner's business; (3) the extent of measures taken by the owner to guard the secrecy of the information; (4) the value of the information to the owner and to his competitors; (5) the amount of effort or money expended by the owner in developing the information; and (6) the ease or difficulty with which the information could be properly acquired or duplicated by others.

Id. at 1275. Each of these factors, along with the "substantial harm" element of the "confidential proprietary information" definition weighs heavily in favor of maintaining the confidentiality of the GLIC Confidential Materials.

GLIC and its predecessors have been providing long-term care insurance coverage to policyholders for more than 35 years. GLIC's lengthy experience in the long-term care insurance business has placed it in a unique position in the long-term care insurance marketplace, in that no other long-term care insurance carrier has as much experience in that line of business as GLIC and its predecessors. Because GLIC has been marketing long-term care insurance products longer than its competitors, it has been able to accumulate experience-related data that its competitors have not been able to gather. GLIC takes active measures to maintain the secrecy of the information in the GLIC Confidential Materials. Among other measures, GLIC obtains non-disclosure agreements with potential reinsurers before providing those potential reinsurers with any experience-related data. Furthermore, access to the data is limited and available only to employees of GLIC who are deemed likely to need the information in the course of their duties; those employees are subject to non-disclosure agreements under which they agree not to share the information except in furtherance of the business of GLIC.

The GLIC Confidential Materials discuss, among other things, GLIC's assumptions in pricing certain long term care insurance products, GLIC's proprietary persistency and incurred claims data, and GLIC's policy demographics. In addition to pricing long-term care insurance products, GLIC's extensive data also allows it to effectively manage its policies, by enabling it to accurately set reserves and conduct reliable asset tests. None of this information is available to GLIC's competitors or to the public generally, and it is plainly protectable under the statutes discussed above. *See Giurintano v. Dep't of Gen. Servs.*, 20 A.3d 613, 615-17 & n.5 (Pa. Commw. Ct. 2011) (holding that the identities of

interpreters hired by state contractor were excluded from public disclosure under 65 P.S. §67.708(b)(11) because the contractor (a) kept their identities confidential "to protect its investment," (b) the interpreters were "business assets," and (c) disclosing the identities "would cause substantial harm to the [contractor's] competitive position in the industry").
GLIC's accumulation of data over its long duration in the long-term care insurance business has come at a substantial cost. For numerous years, GLIC had to price and manage policies without having the benefit of the extensive data and experience that it now possesses. GLIC endured substantial losses on many of those policies that did not perform as expected, and GLIC has incurred and will continue to incur billions of dollars of claims on these policies.

If the GLIC Confidential Materials are released to the public, GLIC would be deprived of its hard-earned competitive advantage, which would cause substantial harm to the company. GLIC's competitors could use GLIC's data and assumptions to price long-term care insurance policies as well as GLIC, without the work, time, expense, and (most significantly) the previous losses that GLIC incurred. If the GLIC Confidential Materials were disclosed, GLIC's competitors would be permitted to exploit GLIC's hard earned, proprietary information for their own benefit, and to GLIC's competitive and economic disadvantage. *See Smith Butz, LLC v. Pa. Dep't of Envtl. Prot.*, ___ A.3d ___, 2017 WL 1833472, at *9 (Pa. Commw. Ct. 2017) (finding that records that would enable the company's competitors to copy valuable and proprietary business methods constituted confidential proprietary information and/or trade secrets). For these reasons, GLIC respectfully submits that the GLIC Confidential Materials are exempt from disclosure pursuant to 65 P.S. §67.708(b)(11), and requests that they be treated as confidential by the Pennsylvania Insurance Department.

This submission contains the complete, unredacted version of GLIC's Actuarial Memorandum. GLIC has also filed a publicly-available version, which redacts the GLIC Confidential Materials.

17. Actuarial Certification

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries, and I meet the American Academy of Actuaries' qualification standards for rendering this opinion and am familiar with the requirements for filing for increases in long-term care insurance premiums.

This memorandum has been prepared in conformity with all applicable Actuarial Standards of Practice, including ASOP No. 8, 18, 23, 25 and 41.

I have relied on historical cash flows and projections completed by GLIC's Inforce Actuarial Infrastructure team. All future projections included in this memorandum, while based on GLIC's best estimates, are uncertain and may not emerge as expected.

I have relied on the IFA Analytics team for the pricing, methodology and design of the FBO and the 1% compound BIO.

I have relied on statutory valuations as of December 31, 2019, for Claim Reserves (i.e., Disabled Life Reserves, Pending Claims reserves, Incurred But Not Reported reserves, and Dead But Not Reported reserves) provided by GLIC's Long Term Care Valuation team.

I have also relied on assumptions developed by GLIC's Long Term Care Experience Studies team in collaboration with other GLIC actuaries, which assumptions were approved by Genworth's Assumption Review Committee. The assumptions present the actuary's best judgement and are consistent with the issuer's business plan at the time of the filing.

I hereby certify that, to the best of my knowledge and judgment, this rate submission is in compliance with the applicable laws and regulations of Pennsylvania and the Long-Term Care Insurance regulation. If the requested premium rate schedule increase is implemented and the underlying assumptions, which reflect moderately adverse conditions, are realized, no further premium rate schedule increases are anticipated. In my opinion, the rates are not excessive or unfairly discriminatory.
