# FREEDOM LIFE INSURANCE COMPANY OF AMERICA

**300 Burnett Street, Suite 200 • Fort Worth, Texas 76102 • (800) 387-9027**

May 11, 2016

Commissioner Teresa Miller
Pennsylvania Department of Insurance
1326 Strawberry Square
Harrisburg, PA 17120

**RE: INDIVIDUAL MARKET – OFF EXCHANGE ONLY**
**Freedom Life Insurance Company of America, NAIC # 62324**
**RATE Filing for Plan Year 2017 ACA Compliant forms:**
EHB-2017-IP-PA-FLIC with Policy Schedule EHB-2017-SCH-PA-FLIC (PPO Product)
EHBC-2017-IP-PA-FLIC with Policy Schedule EHBC-2017-SCH-PA-FLIC (PPO Product)
HIOS Issuer ID # 89958, SERFF# USHG-130529943, Binder ID# USHG-PA17-125059653

Dear Commissioner Miller:

The enclosed rates are hereby submitted for your review. These rates are intended to be effective 1/1/2017 for the above referenced forms. These forms will be offered in the Individual market and will be offered OFF EXCHANGE only. These are Individual Major Medical products which cover the Essential Health Benefits (EHB) as required under the Patient Protection and Affordable Care Act (PPACA).

We believe the product changes for Plan Year 2017 are in compliance with the federal Uniform Modification of Coverage rules. We are currently offering only the Bronze metal level. The Bronze Plan Deductible will change from $6,850 to $7,150 for Plan Year 2017.

The existing HIOS Product IDs will be mapped to new form numbers for Plan Year 2017.

| Product ID: | CURRENT 2016 FORM# | NEW 2017 FORM# | Description |
|---|---|---|---|
| 89958PA018 | EHB-2016-IP-PA-FLIC | EHB-2017-IP-PA-FLIC | Adult/Family plan |
| 89958PA019 | EHBC-2016-IP-PA-FLIC | EHBC-2017-IP-PA-FLIC | Child-only plan |

The proposed rates for 2017 are 9.95% higher than the current rates. This increase does not vary by plan. Any policyholders inforce on the current form will be given the appropriate advanced notification and offered the new form for 2017. **We currently have 0 policies inforce in your state.** Please see Actuarial Memorandum in support of these modifications.

The new forms have been submitted as well as the required HIOS rate filing for Plan Year 2017.

We appreciate your consideration of this filing. If you should have any questions or need additional information, please feel free to contact me.

Sincerely,

Diana Ivie
Actuarial Assistant

**Freedom Life Insurance Company of America Part II Consumer Justification Narrative**

The rate increase will affect 0 inforce members. The rate increase applied to all plans is equal to 9.95% and is due to an increase in medical cost and utilization of 4.4%, the elimination of the Federal Transitional Reinsurance Program in 2017 resulting in a 6.27% increase and a .9% decrease to account for the tobacco normalization factor. This rate increase is not based on financial experience but reflects the rate we feel that will adequately meet projected profit and financial goals of the company while maintaining the reasonableness of benefits provided to customers in relation to the premiums charged. There are no changes in administrative costs that affect the rates.

**Unified Rate Review v3.3**

# Freedom Life Insurance Company of America – Individual Plans

Rate request filing ID # USHG-130529943 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

## Overview

| | |
|---|---|
| Requested average rate change: | 9.95% |
| Range of requested rate change: | 9.95% |
| Effective date: | 1/1/2017 |
| People impacted: | 0 lives |
| Available in: | Rating Areas 1, 3, 4, 5, 6, 7, 8 and 9 |

## Key information

**Jan. 2015-Dec. 2015 financial experience**

| | |
|---|---|
| Premiums | $0 |
| Claims | $0 |
| Administrative expenses | $0 |
| Company made (before taxes) | **$0** |

The company expects its annual medical costs to increase **2.9%**.

**How it plans to spend your premium**
This is how the insurance company plans to spend the premium it collects in 2017:

| | |
|---|---|
| Claims: | 83.3**%** |
| Administrative: | 18.4**%** |
| Taxes & fees: | 2.04% |
| Profit: | -3.74**%** |

## Explanation of requested rate change

The rate increase applied to all plans is equal to 9.95% and is due to an increase in medical cost and utilization of 4.4% and the elimination of the Federal Transitional Reinsurance Program in 2017 resulting in a 6.27% increase. This rate increase is not based on financial experience but reflects the rate we feel that will adequately meet projected profit and financial goals of the company while maintaining the reasonableness of benefits provided to customers in relation to the premiums charged. There are no changes in administrative costs that affect the rates.

## I. GENERAL INFORMATION

| | |
|---|---|
| Insurance Company Name | Freedom Life Insurance Company of America |
| State | Pennsylvania |
| HIOS Issuer ID | 89958 |
| Market | Individual Major Medical |
| Effective Date | January 1, 2017 |
| Primary Contact Name | [redacted] |
| Primary Contact Phone # | [redacted] |
| Primary Contact E-mail Address | [redacted] |

The rates included in this filing are for non-grandfathered individual major medical plans and child only non-grandfathered individual major medical plans which cover the Essential Health Benefits (EHB) as required under the Affordable Care Act (ACA). These plans are guaranteed issue and guaranteed renewable as defined under the ACA and HIPAA. These plans are marketed through licensed agents operating through a variety of distribution channels. In 2017, our insurance company will only sell plans outside of the public health exchanges in this state. Coverage beyond age 65 will be secondary to Medicare. Premiums are on an attained age basis and will increase with age. Premiums also vary by plan design, tobacco status and geographic area. Only the oldest three dependents under age 21 will be charged a premium rate for a given policy. This actuarial memorandum has been prepared for the purpose of demonstrating compliance with the applicable requirements in your state, assuring that premium rates are reasonable in relation to benefits provided. This rate filing is not intended to be used for other purposes.

Freedom Life Insurance Company of America has previous products approved for plan year 2016 under the form names EHB-2016-IP-PA-FLIC and EHBC-2016-IP-PA-FLIC. Changes to the products necessitated the filing of new forms EHB-2017-IP-PA-FLIC and EHBC-2017-IP-PA-FLIC. This filing proposes renewal rates for the new forms EHB-2017-IP-PA-FLIC and EHBC-2017-IP-PA-FLIC. We believe we are in compliance with the Uniform Modification of Coverage exceptions under sections 2702 and 2703 of the Public Health Service Act as defined by 45 CFR 146.152, 147.106 and 148.122.

## II. PROPOSED RATE INCREASE

There are currently no inforce policies under these forms. The net total premium increase proposed for these policy forms is 9.95%. This increase reflects a trend increase of 4.4% an increase of 6.27% to account for the new 2017 Federal Transitional Reinsurance and Program and a .9% decrease to account for the tobacco normalization factor.
The development of these factors is detailed in later Sections. The proposed increase does not vary for ACA compliant products.

In 2017 we are changing the deductible(s) due to the new HHS AV Calculator and due to our desire to provide a cost sharing level that is approximately equivalent to the originally approved plan design. The new HHS AV Calculator has been updated to include medical cost and utilization trend as well as an updated out of pocket maximum. We have increased the deductibles so that the calculated 2017 Actuarial Value based on the 2017 Actuarial Value Calculator is approximately equal to the 2016 Actuarial Value as calculated using the 2016 Actuarial Value Calculator. There will be no change in rates because of this change. The annual trend of 4.4% does not include deductible leveraging. The deductible leveraging increase that would normally be included in the annual trend is offset by the increase in deductibles. This change is covered under the uniform modification of coverage exception under sections 2702 and 2703 of the Public Health Service Act as defined by 45 CFR 146.152, 147.106 and 148.122.

## III. EXPERIENCE PERIOD PREMIUM AND CLAIMS

The Unified Rate Review Template was completed using state and legal entity specific non-grandfathered experience in order to comply with the Department of Health and Human Services (HHS) requirements. For the purpose of estimating the average risk of the 2017 market, experience of our non-grandfathered major medical plans for all of our affiliate companies Freedom Life Insurance Company of America, National Foundation Life Insurance Company, and Enterprise Life Insurance Company was reviewed together. This combined experience was used in order to develop an actuarially appropriate prediction of the market wide per member per month risk and standardized claim cost in 2017.

**Experience Period:** The experience period is from January 1, 2015 through December 31, 2015.

**Paid Through Date:** The paid through date for which payments have been made on claims incurred during the experience period is February 29, 2016.

**Premiums (Net of MLR Rebate) in Experience Period:** In the Unified Rate Review Template, the Earned Premium net of Medical Loss Ratio (MLR) rebates for the Calendar Year 2015 experience period was $433,806 for your state. Earned Premium was not adjusted for any reductions prescribed when calculating the MLR, such as taxes and assessments. There were no estimated MLR rebates for the experience period in your State. Our accounting department estimates accrued premium refunds required under Federal Minimum Loss Ratio regulations for our Individual Medical insurance business by projecting Incurred Claims, Earned Premiums, and other elements and applying adjustments as outlined in Federal laws and regulations. These projections are performed on a state and market level basis and recent claims experience is adjusted for estimated claims reserves on a state level basis.

**Allowed and Incurred Claims During the Experience Period:** For the Unified Rate Review Template (URRT), the amount of Incurred Claims processed through our claim system for the experience period 2015 was $160,563 for your state. The best estimate of experience period claims incurred but not reported was $28,253 for your state. The amount of allowed claims processed through our claim system for the experience period 2015 was $307,211 for your state. The best estimate of experience period allowed claims incurred but not paid as of the paid through date shown above was $55,024 for your state. Allowed claims are developed by subtracting ineligible charges and discounts from the total provider billed amount. We have no capitation agreements. All state experience provided in the URRT is based on our entity specific non-grandfathered block of business. See the Credibility Manual Rate Development section below for details on how the Credibility Manual section of Worksheet 1 of the URRT was determined.

Our accounting department develops lag triangles for our nationwide individual medical experience. Historical averages are used in order to calculate our monthly completion factors. Specific large claims are also analyzed and additional reserves may be set up based on anticipated PPO savings and run-out for those claims.

## IV. BENEFIT CATEGORIES

Inpatient services are those received during a patient's hospital stay and are included in the Inpatient Hospital Category. Outpatient services (e.g. lab tests, X-rays, and some surgical services) are those rendered by a facility within an outpatient setting. Professional services include primary care, specialist, therapy and other professional charges that are not included in facility fees. Other Medical services include charges for items that do not fall into the categories above, such as ambulance and durable medical equipment. The Other category is measured based upon distinct services or items provided. Retail and mail order pharmacy claims are included in the Prescription Drug category.

## V. PROJECTION FACTORS

**Changes in the Morbidity of the Insured Population:** There are no changes in the morbidity assumption used in the approved 2016 rates. However, the application of the assumption has changed as the 2015 experience includes a different proportion of ACA compliant products to transitional non-grandfathered products. The morbidity assumption is applied to the transitional non-grandfathered portion of the 2015 experience and the factor shown in the URRT reflects this change. The ACA has caused significant changes in the average risk of the population insured between ACA compliant products and transitional non-grandfathered products. Some drivers of the population change are guaranteed issue, the individual mandate, underwriting and rating changes and the availability of premium subsidies for lower income consumers. In addition, average morbidity will increase because issuers are no longer allowed to exclude coverage for pre-existing conditions. The insured population will also be changing due to uninsured individuals moving into the market because of subsidies,

currently insured individuals in the group market whose employers are directing them to the individual exchange and individuals moving over from high risk pools and conversion markets. We estimated the impact of these changes on the morbidity of the insured population in your state to be 80.60%. We utilized the data within the "Cost of the Future Newly Insured under the Affordable Care Act (ACA)" study prepared by Optum Health and commissioned by the Society of Actuaries and internal risk studies in order to assess possible scenarios and develop our assumption. In addition, we compared our estimates against various industry studies in order to validate the reasonableness of our results. Credible data is still unavailable to analyze this assumption, this morbidity load reflects our best estimate at this time.

**Changes in Benefits:** There are no changes in the benefits factor assumption used in the approved 2016 rates. However, the application of the assumption has changed as the 2015 experience includes a different proportion of ACA compliant products to transitional non-grandfathered products. The change in benefits factor assumption is applied to the transitional non-grandfathered portion of the 2015 experience and the factor shown in the URRT reflects this change. The adjustment in the URRT of 25.90% within our pricing and claim projection is used to include new and expanded benefits in accordance with the EHB requirements of the ACA. These are differences in benefits between the new EHB plan and our non-grandfathered major medical plans that were utilized for our allowed claims estimates. The table below lists the estimated additional cost associated with each new benefit. These estimates are based upon purchased data and experience of a standard population. The estimated additional benefit costs below represent the percentage increase applied to the transitional non-grandfathered policies only:

**Benefit Estimated Additional Cost**

| Benefit | Percentage |
|---|---|
| Maternity | 3.3% |
| Prescription Drug | 11.4% |
| Mental Health & Substance Abuse | 2.7% |
| Dental | 1.3% |
| Doctor’s Office Visits | 4.4% |
| Vision | 1.0% |
| All Other | 1.8% |
| Total | 25.9% |

**Changes in Demographics:** No changes in demographics were made from the assumption used in the approved 2016 rates. Differences in expected average area of the population are also applied to the base period claims experience to project 2017 experience. An average area factor was originally derived by applying 2012 annualized premium to the existing area factors. The experience period allowed claims were adjusted by the relativity of the state average area factor to the nationwide average area factor to reflect differences in overall average expected claim costs for your state.

**Trend Factors (cost/utilization):** Our trend assumption utilized in our projections and proposed increase is 4.4% and was estimated based on current trend analysis studies. The estimated portion of this assumption due to increases in medical cost is 2.9%, and the estimated portion due to increased utilization is 1.4% (These portions are multiplicative).

## VI. CREDIBILITY MANUAL RATE DEVELOPMENT

The Credibility Manual Rate reflects the nationwide experience of our non-grandfathered major medical plans for our affiliate companies. Allowed claims per member per month (PMPM) were calculated from this experience and adjusted to reflect the 2017 projected allowed claims. The Changes in Demographics factor described in Section V is applied to the Credibility Manual in order to reflect your states expected morbidity. All pricing components, including the base experience period data, are applied consistently across the single risk pool in the state and market for 2017.

## VII. CREDIBILITY OF EXPERIENCE

Our standard for fully credible data is 2,000 life years, with less than 500 life years having no credibility. For life years between 500 and 2,000 life years, credibility is linearly interpolated from 0% at 500 life years to 100% at 2,000 life years. Credibility in your state is equal to 0%.

## VIII. PAID TO ALLOWED RATIO

Our paid to allowed ratio was estimated using our internal continuance tables for the plan benefits. The estimated paid to allowed ratio was 0.658 for Bronze. We projected 2017 enrollment given only one plan option, and assumed a 20% annual lapse on existing business for 2017.

## IX. RISK ADJUSTMENT AND REINSURANCE

**Risk Adjustment:** We have developed manual rates for a 1.0 average statewide risk and assumed that our company would enroll average risk individuals. Therefore, no risk adjustment PMPM payment is assumed in 2017. The Risk Adjustment Admin fee is $1.80 per member per year and we assumed this amount to be negligible and therefore did not account for it in our pricing but still included a -$.15 PMPM charge in the URRT.

**Reinsurance Recoveries:** In 2017, the Transitional Reinsurance Program will no longer exist.

**Total Reinsurance Factor Increase:** The total Reinsurance factor change from 2016 rates to 2017 rates is 6.27%. The 2016 rates were priced for the parameters of the Federal Transitional Reinsurance Program for 2015 which reimburses carriers 50% of claim costs between $70,000 and $250,000 per member. The Reinsurance Program for 2015 was funded by a fee of $3.67 per member per month. Together our 2016 Reinsurance factor was .941.

The increase is therefore equal to 1.000 / .941 = 1.0627.

**Tobacco Normalization Factor:** In order to use a tobacco load for smokers we have adjusted the projected index by .991. Based on our Non-Grandfathered Major Medical experience, we estimated only 4.5% of projected members would be smokers. The calibration would be 1.2 x .045 + 1.0 x .955 = 1.009. The normalization factor is equal to 1 / 1.009 = .991.

## X. NON-BENEFIT EXPENSES AND PROFIT & RISK

Expenses are estimated based off of current costs, adjusted for any anticipated changes in 2017. The pricing load to cover these expenses is applied consistently across all plans.

| Category | Percent of Premium |
|---|---|
| Customer Service, Claims Administration, & Information Systems | 5.0% |
| Marketing Expenses | 3.0% |
| General Overhead | 2.0% |
| Cost Containment | 3.0% |
| Commissions and Sales Bonus | 5.0% |
| Quality Improvement | 0.4% |
| Taxes, Fees, and State Assessments | 2.04% |
| Profit and Contingency Margin | -3.74% |
| Total | 16.7% |

## XI. PROJECTED LOSS RATIO

The projected loss ratio on a traditional Incurred Claims to Earned Premium basis is 83.3%. We project the loss ratio for these products based on the new MLR formula will meet or exceed 80%, after the allowed adjustments for quality improvement expenses, premium taxes & fees, credibility, and average deductible in your state.

## XII. SINGLE RISK POOL

The Single Risk Pool for this filing as displayed in Section I of Worksheet 1 of the Unified Rate Review Template consists of data specific to this state and for Freedom Life Insurance Company of America. For pricing purposes, we utilized experience for all covered lives for every non-grandfathered product/plan combination for all of our affiliate companies Freedom Life Insurance Company of America, National Foundation Life Insurance Company, and Enterprise Life Insurance Company.

## XIII. INDEX RATE

The Index Rate of $606.06 is shown in cell V44 of worksheet 1 of the Unified Rate Review Template (URRT) and in the attachment "Index Rate Example". This index rate reflects our expected allowed claims from our pricing assumptions.

## XIV. MARKET ADJUSTED INDEX RATE

Our Market Adjusted Index Rate used in pricing is shown in the attachment "Index Rate Example". Using the Risk Adjustment and Reinsurance Factor described in Section IX, the pricing Market Adjusted Index Rate as shown in "Index Rate Example" is calculated as follows:

$606.06 = $606.06 (Index Rate) x 1.0 (Risk Adjustment) x 1.0 (Reinsurance)

## XV. PLAN ADJUSTED INDEX RATE

The Plan Adjusted Index Rates are developed by adjusting the Market Adjusted Index Rate to account for the Actuarial Value and Cost Sharing adjustments for each plan and adjustments for distribution and administrative costs. Using the Actuarial Value and Cost Sharing Factors and the expenses described in Section X, the Plan Adjusted Index Rates are the following:

Bronze = $474.43 = $606.06 (Market Adjusted Index Rate) x 0.658 (AV and Cost Sharing Bronze) / 0.833 (Pricing Loss Ratio) x .991 (Tobacco Adjustment)

## XVI. CALIBRATION

An age curve calibration factor of 1.5 is used to adjust the Plan Adjusted Index Rates in order to calculate the Consumer Adjusted Premium Rates. There is no calibration needed to adjust for geography.

## XVII. CONSUMER ADJUSTED PREMIUM RATE DEVELOPMENT

The Consumer Adjusted Premium Rate is the final premium rate for each plan that is charged to an individual after applying the calibration factors and the rating adjustments of age, area, and tobacco status. Please see the attached document "Index Rate Example".

## XVIII. AV METAL VALUES

The HHS Actuarial Value Calculator (AVC) was used to generate the AV metal values for the plans in our portfolio. These plans represent the standardized plans promulgated by your state. We have attached the HHS AV calculator page(s).

## XIX. AV PRICING VALUES

The AV pricing values were determined by studying our own internal continuance tables, in addition to an adjustment for utilization differences we expect due to plan cost sharing design. In the Actuarial Value Calculator Methodology document released by HHS, HHS states that spending is affected by plan design through induced demand, and they in turn have explicitly differentiated and estimated the impact of induced utilization by metal level. The HHS defined induced utilization factor for the Bronze metal level is 1.00. Since we don't have enough credible experience to determine separate induced utilization factors for each metal level, we are applying the prescribed HHS induced utilization factors used in the HHS risk score to our plans. These values are then divided by the projected loss ratio in order to account for the administrative expenses.

## XX. MEMBERSHIP PROJECTIONS

We projected 2017 enrollment from the existing business by assuming a 20% annual lapse rate. For new business, we analyzed current sales levels and projected anticipated sales of the new metal tier plan(s) in 2017.

## XXI. TERMINATED PRODUCTS

We have not made a final decision as to whether Non-Compliant Non-Grandfathered forms will be allowed to renew for 2017. For filing purposes we have grouped the transitional policies in the URRT and labeled them "Terminated Products". Non-grandfathered products HDHP-2009-C-PA-FLIC, USHG-2009-C-PA-FLIC, USHG-2007-C-PA-FLIC, GMS-06-C-PA-FLIC-H, HDHP-06-C-PA-FLIC-H and HDHP-06-C-PA-FLIC-L may be discontinued as of 12/31/2016. These products are included in the experience period data.

## XXII. PLAN TYPE

All 2017 individual medical plans will be PPO plans.

## XXIII. WARNING ALERTS

Warning alerts from the unified rate review template are explained below:

1. Worksheet 2 Cell A96 has a warning because there is no projected reinsurance as the Federal Reinsurance Program is going away in 2017.
2. Worksheet 2 Cells A55 and A57 have warnings because the premiums on Worksheet 1 include terminated plans while the premiums in Worksheet 2 do not. The URRT instructions for Worksheet 2 Plan Adjusted Index Rates say the following, "For terminated non-single risk pool compliant plans, enter zero in the template."
3. Worksheet 1 Cell H30 has a warning because of rounding of values.

## XXIV. EFFECTIVE RATE REVIEW INFORMATION

See the attachments for additional rating information.

## XXV. RELIANCE

In developing this rate filing I relied upon information provided by others within my department, as well as on information provided by other departments within the organization, and public information available including but not limited to the "Cost of the Future Newly Insured under the Affordable Care Act (ACA)" study prepared by Optum Health, external trend studies, various HHS publications, and other sources. I have reviewed this information for reasonableness, and I consider it to be reliable.

## XXVI. ACTUARIAL CERTIFICATION

I am a member of the American Academy of Actuaries. To the best of my knowledge and judgment,

1. This rate filing is in compliance with the applicable laws and regulations concerning premium rate development in this state and the benefits are reasonable in relation to premiums.
2. The projected index rate is:
    a. In compliance with all applicable State and Federal Statutes and Regulations.
    b. Developed in compliance with Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
3. The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections 3 and 4 were calculated in accordance with actuarial standards of practice.
5. The HHS AV Calculator was used to determine the AV Metal Values for all plans shown in Worksheet 2 of the Part I Unified Rate Review Template.
6. The geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

This opinion is qualified, in that the Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

## I. BASIC INFORMATION AND DATA

A. Company Information:
   1. Insurance Company Name - Freedom Life Insurance Company of America
   2. Market – Individual
   3. Off Exchange Only
   4. Effective date of coverage – 1/1/2017
   5. Average Rate Change Requested – 9.95%
   6. Range of Rate Change Requested – 9.95%
   7. PPO Products
   8. Rating Areas Covered – 1and 3-9
   9. Metal Levels – Bronze
   10. 0 current covered lives
   11. 2 plans offered in 2017
   12. Contract Forms - EHB-2017-IP-PA-FLIC and EHBC-2017-IP-PA-FLIC, SERFF# USHG-130529943, Binder ID# USHG-PA17-125059653
   13. HIOS Issuer ID # 89958, SERFF# USHG-130529943

B. Rate History and Proposed Variations in Rate Changes:

   There have been no previous increases on these forms. The current proposed increase will be applied uniformly.

C. Average Rate Change

   The average rate change is 9.95% and does not vary by plan. Cell AZ13 in Table 11 of the Rate Exhibits Template is an error because we do not have any inforce policyholders.

D. Membership Count

   Please see Table 1 of the Rate Exhibits Template.

E. Benefit Changes

   The changes to the 2017 EHB Benchmark Plan were considered negligible and therefore had no impact on the proposed rates. In 2017 we are changing the deductible(s) due to the new HHS AV Calculator and due to our desire to provide a cost sharing level that is approximately equivalent to the originally approved plan design. The new HHS AV Calculator has been updated to include medical cost and utilization trend as well as an updated out of pocket maximum. We have increased the deductibles so that the calculated 2017 Actuarial Value based on the 2017 Actuarial Value Calculator is approximately equal to the 2016 Actuarial Value as calculated using the 2016 Actuarial Value Calculator.

There will be no change in rates because of this change. The annual trend of 4.4% does not include deductible leveraging. The deductible leveraging increase that would normally be included in the annual trend is offset by the increase in deductibles.

F. Experience Period Claims and Premiums

Please see Table 2 of the Rate Exhibits Template. The data is consistent with the data provided on the URRT. The Unified Rate Review Template was completed using state and legal entity specific non-grandfathered experience in order to comply with the Department of Health and Human Services (HHS) requirements. The data provided in Table 2 is prior to any adjustments to reflect the Essential Health Benefit plan. Allowed claims are developed by subtracting ineligible charges and discounts from the total provider billed amount. We have no capitation agreements. All state experience provided in the URRT is based on our entity specific non-grandfathered block of business. Our accounting department develops lag triangles for our nationwide individual medical experience. Historical averages are used in order to calculate our monthly completion factors. Specific large claims are also analyzed and additional reserves may be set up based on anticipated PPO savings and run-out for those claims. Incurred Claims includes RX Rebates. There was no experience and so there is no estimate for Reinsurance and risk Adjustment.

G. Credibility of Data

Our standard for fully credible data is 2,000 life years, with less than 500 life years having no credibility. For life years between 500 and 2,000 life years, credibility is linearly interpolated from 0% at 500 life years to 100% at 2,000 life years. Credibility in your state is equal to 0%. The Credibility Manual Rate reflects the nationwide experience of our non-grandfathered major medical plans for our affiliate companies. The data shown in Tables 2-4b reflect the Credibility Manual. The data shown in these tables is prior to adjustments made to reflect the Essential Health Benefit plans. For the URRT, the Allowed claims per member per month (PMPM) were calculated from this experience and adjusted to reflect the 2017 projected allowed claims. The Changes in Demographics factor of .878 is applied to the Credibility Manual in order to reflect your states expected morbidity. All pricing components, including the base experience period data, are applied consistently across the single risk pool in the state and market for 2017.

H. Trend Identification

Please see Table 3 of the Rate Exhibits Template. Our trend assumption utilized in our projections and proposed increase is 4.4% and was estimated based on current internal trend analysis studies and the 2016 Segal Health Plan Cost Trend Survey. For compliance purposes we have split the data by service category but for pricing purposes we do not split the data. The estimated portion of this assumption due to increases in medical cost is

2.9%, and the estimated portion due to increased utilization is 1.4% (These portions are multiplicative).

I. Historical Experience

Please see Table 4 of the Rate Exhibits Template. Please see section F and H above for further explanation on the development of Allowed Claims and the Trend assumption.

## II. RATE DEVELOPMENT AND CHANGE

A. Development of Projected Index Rate, Market Adjusted Index Rate and Total Allowed Claims

Please see Table 5 of the Rate Exhibits Template. The following details the assumptions used in the URRT to adjust the Credibility Manual. The assumptions are further adjusted by the percentage of Non ACA Compliant Transitional claims in the experience which for our Credibility Manual equals 73.7%. The Morbidity and Changes in Benefits factors applied to the Credibility Manual are based on a weighted average of ACA Compliant experience and Non ACA Compliant Transitional. The weighted average equals .737 x Adjustment Factor + (1-.737).

**Changes in the Morbidity of the Insured Population:** There are no changes in the morbidity assumption used in the approved 2016 rates. However, the application of the assumption has changed as the 2015 experience includes a different proportion of ACA compliant products to transitional non-grandfathered products. The morbidity assumption is applied to the transitional non-grandfathered portion of the 2015 experience and the factor shown in the URRT reflects this change. The ACA has caused significant changes in the average risk of the population insured between ACA compliant products and transitional non-grandfathered products. Some drivers of the population change are guaranteed issue, the individual mandate, underwriting and rating changes and the availability of premium subsidies for lower income consumers. In addition, average morbidity will increase because issuers are no longer allowed to exclude coverage for pre-existing conditions. The insured population will also be changing due to uninsured individuals moving into the market because of subsidies, currently insured individuals in the group market whose employers are directing them to the individual exchange and individuals moving over from high risk pools and conversion markets. We estimated the impact of these changes on the morbidity of the insured population in your state to be 80.60%. We utilized the data within the "Cost of the Future Newly Insured under the Affordable Care Act (ACA)" study prepared by Optum Health and commissioned by the Society of Actuaries and internal risk studies in order to assess possible scenarios and develop our assumption. In addition, we compared our estimates against various industry studies in order to validate the reasonableness of our results. Credible data is still unavailable to analyze this assumption, this morbidity load reflects our best estimate at this time.

**Changes in Benefits:** There are no changes in the benefits factor assumption used in the approved 2016 rates. However, the application of the assumption has changed as the 2015 experience includes a different proportion of ACA compliant products to transitional non-grandfathered products. The change in benefits factor assumption is applied to the transitional non-grandfathered portion of the 2015 experience and the factor shown in the URRT reflects this change. The adjustment in the URRT of 25.90% within our pricing and claim projection is used to include new and expanded benefits in accordance with the EHB requirements of the ACA. These are differences in benefits between the new EHB plan and our non-grandfathered major medical plans that were utilized for our allowed claims estimates. The table below lists the estimated additional cost associated with each new benefit. These estimates are based upon purchased data and experience of a standard population. The estimated additional benefit costs below represent the percentage increase applied to the transitional non-grandfathered policies only:

**Benefit Estimated Additional Cost**

| Benefit | Percentage |
|---|---|
| Maternity | 3.3% |
| Prescription Drug | 11.4% |
| Mental Health & Substance Abuse | 2.7% |
| Dental | 1.3% |
| Doctor's Office Visits | 4.4% |
| Vision | 1.0% |
| All Other | 1.8% |
| Total | 25.9% |

**Changes in Demographics:** No changes in demographics were made from the assumption used in the approved 2016 rates. Differences in expected average area of the population are also applied to the base period claims experience to project 2017 experience. An average area factor was originally derived by applying 2012 annualized premium to the existing area factors. The experience period allowed claims were adjusted by the relativity of the state average area factor to the nationwide average area factor to reflect differences in overall average expected claim costs for your state.

**Trend Factors (cost/utilization):** Our trend assumption utilized in our projections and proposed increase is 4.4% and was estimated based on current trend analysis studies. The estimated portion of this assumption due to increases in medical cost is 2.9%, and the estimated portion due to increased utilization is 1.4% (These portions are multiplicative).

**Tobacco Normalization Factor:** In order to use a tobacco load for smokers we have adjusted the projected index by .991. Based on our Non-Grandfathered Major Medical experience, we estimated only 4.5% of projected members would be smokers. The calibration would be 1.2 x .045 + 1.0 x .955 = 1.009. The normalization factor is equal to 1 / 1.009 = .991.

B. Retention Items

Please see Table 6 of the Rate Exhibits Template. Expenses are estimated based off of current costs, adjusted for any anticipated changes in 2017. The pricing load to cover these expenses is applied consistently across all plans.

| Category | Percent of Premium |
|---|---|
| Customer Service, Claims Administration, & Information Systems | 5.0% |
| Marketing Expenses | 3.0% |
| General Overhead | 2.0% |
| Cost Containment | 3.0% |
| Commissions and Sales Bonus | 5.0% |
| Quality Improvement | 0.4% |
| Taxes, Fees, and State Assessments | 2.04% |
| Profit and Contingency Margin | -3.74% |
| Total | 16.7% |

C. Normalized Market Adjusted Projected Allowed Claims

Please see Table 7 and 8 of the Rate Exhibits Template. An age curve calibration factor of 1.5 is used to adjust the Plan Adjusted Index Rates in order to calculate the Consumer Adjusted Premium Rates. There is no calibration needed to adjust for geography. The Tobacco Normalization factor is detailed in Section A. The differences in the 2016 and 2017 factors in Table 7 are due to different experience periods having different average ages.

D. Components of Rate Change

Table 8 and 9 contain errors because we do not have any covered lives inforce. The net total premium increase proposed for these policy forms is 9.95%. This increase reflects a trend increase of 4.4%, an increase of 6.27% to account for the new 2017 Federal Transitional Reinsurance Program and a .9% decrease for the tobacco normalization factor.

## III. PLAN RATE DEVELOPMENT

Please see Table 10 of the Rate Exhibits Template. Table 10 contains errors because we do not have any covered lives inforce.

## IV. PLAN PREMIUM DEVELOPMENT FOR 21 YEAR OLD NON TOBACCO USER

Please see Table 11 of the Rate Exhibits Template. Table 11 contains errors because we do not have any covered lives inforce.

## V. PLAN FACTORS

Please see Tables 12, 13 and 14. The only change in the calibration factors from 2016 to 2017 is the average age factor which was 1.444 in 2016 and is now 1.500.

## VI. ACTUARIAL CERTIFICATION

I am a member of the American Academy of Actuaries. To the best of my knowledge and judgment,

1. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum
2. New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106
3. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.
