2017 Rates Table Template v6.0

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are a community rating state, select Family Option under Age and fill in all columns.

If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2017 Rates Table Template v6.0

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are a community rating state, select Family Option under Age and fill in all columns.

If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2017 Rates Table Template v6.0

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are a community rating state, select Family Option under Age and fill in all columns.

If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

Small Group PPO Rate Filing- Effective January 1, 2017

Dear Ms. Fabian-Marks:

Enclosed for your review and approval is a copy of Geisinger Quality Options' proposed employer group PPO rate filing for groups with fewer than 51 average employees. The proposed effective date is **January 1, 2017.**

The main purpose of this filing is to establish the required revenue for our small group PPO non-grandfathered single risk pool based on all applicable market reforms of the Affordable Care Act (ACA).

This filing applies to PPO products, sold off exchange in rating areas 2, 3, 5, 6, 7 and 9. Geisinger Quality Options will offer a total of 33 plans in 2017. This includes 8 Platinum plans, 14 Gold plans, 10 Silver plans, and 1 bronze plan. As of February 2016, 3,974 covered lives and 2,302 policyholders will be impacted by this filing. The proposed overall rate increase is **5.2%** but is not uniform by plan. The increases range from a 0.6% decrease to a 7.1% increase. In addition, GQO will introduce a limited provider network in 2017. The new plans using the limited network have a lower premium.

Please refer to the "Actuarial Memorandum & Attestation" uploaded in SERFF under the "Supporting Documentation" tab for a detailed explanation of our rate development.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

Kurt J. Wrobel, FSA, MAAA
Chief Financial Officer & Chief Actuary

HIOS Part 2 Consumer Justification Narrative
Small Group PPO

Geisinger Quality Options has proposed an overall base rate decrease of -0.3% for Small Group PPO members renewing in the Marketplace effective January 1, 2017 through December 1, 2017. The actual range of proposed rate increases vary from a minimum of -5.9% to a maximum of 1.4%. The overall increase is largely due to the claims experience in ACA compliant Small Group market plans being higher than what was assumed in the current rates. Other contributing factors include annual claims trend and federally-prescribed ACA fees. The total projected 2017 administrative costs are also higher than those used for the current 2016 rates. As required by federal regulations, the projected loss ratio exceeds 80%. There were minimal benefit changes proposed for 2017.

Actuarial Memorandum – Small Group PPO

Rate History and Proposed Variations in Rate Changes

Rate History

The recent historical rate increases are summarized in the table below. Only the last 2 years are included since the plans offered on the Exchange are not comparable to plans offered before 2014.

Year	Average Increase	SERFF ID#
2015	24.3%	GSHP-129625169
2016	9.9%	GSHP-130072619

For 2015, the increase was not uniform, but varied by plan. These increases varied from 21.2% to 26.9%. For 2016, the increases also varied by plan and ranged from -7.9% to 11.6% for an overall increase of 9.9%.

Proposed Rate Increase

This filing applies to PPO products, sold off exchange in rating areas 2, 3, 5, 6, 7 and 9. There will be 8 platinum plans, 14 gold plans, 10 silver plans, as well as 1 bronze plan for a total of 33 plans offered in 2017. As of February 2016, 3,974 covered lives and 2,302 policyholders will be impacted by this filing. The proposed overall rate decrease is -0.3% but is not uniform by plan. The rate changes range from a 5.9% decrease to 1.4% increase. For 2017, we are introducing a new, lower cost network. The new plans on the lower cost network are priced at a lower premium to the member. Table 11 shows the increases at the plan level. These increases vary by plan due to benefit changes necessary to maintain the desired metal level and cost sharing changes mandated by ACA as well changes in pricing factors.

Average Rate Change

The average rate change entered as the "percent rate change requested" in the SERFF Rate Review Detail Screen is the same as listed in Table 10, cell AC13. It is the change in the Calibrated Plan-adjusted Index rate (as instructed by the Department).

Membership Count

Table 1 shows the member months in the experience period of calendar year 2015, as well as the current members as of February 1, 2016 by age range. The projected member months for the rating period are also included.

Benefit Changes

There are many benefit and cost sharing changes to the plans covered by this filing. Benefits for adult eye exam were removed as a result of the change in the benchmark plan for Pennsylvania. These services are estimated to account for .08% of the claims cost. As a result of changes to the AV calculator, several plan's cost sharing elements were slightly adjusted to maintain the same metal level. To meet the metallic level, plans were adjusted by first changing the out-of-pocket maximum, then the deductible and finally the coinsurance and copays while only adjusting as necessary to meet the metallic level and still offer a competitive product.

Reason for Rate Increase

The components of this rate decrease are:

- Single Risk Pool experience which is more adverse than assumed in current rates;
- Medical Inflation;
- Utilization trend;
- Changes in administrative expenses;
- Changes in ACA fees;
- Changes in covered benefits
- Changes in Transitional Reinsurance coverage;
- Changes in Risk Adjustment;
- Changes in Network.

Each of these components is discussed in detail under the "Projection Factors" section of this document and are displayed in Table 8 of the exhibits.

Experience Period Premium and Claims

Paid Through Date

The Experience Period data provided in the URRT Worksheet 1, Section I and in Table 2 is incurred in calendar year 2015 and paid through February 2016. Except for premium, the data in Table 2 of the exhibits is consistent with the data provided in the URRT in Worksheet 1, Section 1.

Premiums (net of MLR Rebate) in Experience Period

Premiums include earned premiums for calendar year 2015 for the Single Risk Pool. Premiums are not reduced by taxes and/or assessments. Expected risk adjustment receivables are included in the experience period premium on Worksheet 1 of the URRT as instructed, but excluded from the Earned Premium in Table 2. The risk adjustment is excluded from the beginning value in Table 2 since the

calculations at the end of the table add it to premium. MLR rebates are not expected to be paid for this block of business. Initial estimates of rebates have been completed utilizing the methodology required for the CY 2015 rebate filing. Estimates suggest that the small group market MLR will be above the minimum MLR target of 80%.

Allowed and Incurred Claims Incurred During the Experience Period

The Experience Period Claims are based on small group non-grandfathered business incurred and paid claims with IBNR added for the tail of claims incurred but not paid. Allowed claims are directly from claim records. For both paid and allowed claims the same IBNR factors were used. The IBNR factors were based on legal-entity level claims completion tables which include individual and group commercial experience. This method is appropriate in order to assure proper credibility and because timing of claims payment to providers does not vary by market or product.

Geisinger has private reinsurance to mitigate the risk of shock claims. The experience period expenses for reinsurance are included in capitated benefits for CY2015. The reinsurance recoveries are removed from the ultimate incurred claims in Table 2. They are not included in column M Estimated Reinsurance Recoveries, only the estimated reinsurance recoveries from the Transitional Reinsurance program are included in column M.

There were no non-EHB benefits in the experience period.

Geisinger outsources several benefits and therefore has capitation expenses. The capitated expenses cover chiropractic services, nurse line, and mental health services including autism as well as the reinsurance expenses for private reinsurance. There are also some additional quality expense in the capitation category. The capitation amount for the experience period is displayed on Table 2. The capitation charges are uniform and do not vary by age.

Pharmacy rebates are listed on Table 2. These rebate dollars would be removed from the Ultimate Incurred Claim liability to the insurer.

The estimated risk adjustment for the experience period are based on an external analysis performed by an outside consulting firm. They estimated the Risk Adjustment transfer payment based on the population risk scores relative to an assumed market average risk score and market average premium.

Benefit Categories

Benefit Category	Description
Inpatient Hospital	Determined by place of service (Hospital—IP)
Outpatient Hospital	Determined by place of service (Hospital—OP)
Professional	Determined by place of service (Physician's office)
Other Medical	N/A
Capitation	Claims per Financial Department
Prescription Drug	Claims per contracted PBM

Credibility of Data

The Credibility Manual Rate is a combination of our HMO and PPO experience, giving us an even more credible manual rate. Combining the HMO and PPO Single Risk Pools also aids in consistency between the products. In order to avoid double counting the Experience Period and avoid complicated adjustments, the credibility of the Experience Period is set to 0.0%. This approach is consistent with the Actuarial Standard of Practice #25.

Adjustments Made to the Data

Morbidity Adjustments

The morbidity of the base period is expected to continue into the projection period.

Changes in Benefits

Additional benefits due to Essential Health Benefits requirements are included in both of the non-ACA Compliant Experience segments listed above:

+ Pediatric Dental: $2.16 PMPM

Changes in Demographics

The Projection Period is expected to have a similar demographic distribution as represented in the 2015 Base Period. There is no adjustment for demographic changes to any population segments.

Trend Factors

Experience data was trended using an annual trend of 7.5%. Table 3 shows the breakdown between service category and cost vs. utilization. Table 3 uses the PMPM by service category to weight to develop the total composite trend. Trend factors are projected for unit cost and utilization components:

- Unit cost trend factors are based on recorded anticipated increases in facility and professional fees from the Experience to Projection Period. These increases are composited across all facilities and provider groups.
- Utilization trend projections are based on least-square regression modeling, taking into account historical claims patterns, anticipated economic activity and changes in care patterns.
- Seasonality adjustments are made to the claims to account for changes in work days.
- Further adjustments have been made to the trends to reflect expected changes due to new medical management initiatives that are expected to yield savings in the projection period.

Our trends are analyzed at a higher level and are the same for the experience data and the credibility manual data. Due to the lack of stability in the ACA experience, we based our trends on data from our commercial large group experience. Table 4b is provided for this large group experience.

Inclusion of Capitation Payments

If a capitated benefit is not in the experience period, an adjustment was added to account for those services (ex. Pediatric dental).

Historical Experience

Table 4 includes the most recent 36 months of data with run out through February 2016. Allowed claims are directly from claim records. As mentioned above, Table 4b displays the large group data that was used to determine the trends used.

Paid to Allowed Ratio

The Projected Paid to Allowed Average Ratio is displayed on Table 5. It is determined for the Projection Period based on the member weighted average Pricing AV for each plan and the projected member months in each plan. There are variations between the AV Pricing Values and the AV Calculator values because of different cost structures and management approaches than what is reflected in the national average data used in the AV Calculator.

Risk Adjustment and Reinsurance

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM

As stated above, the estimated risk adjustment transfer payment for the experience period was based on an external analysis performed by an outside consulting firm.

Projected Risk Adjustments PMPM

Our small group Exchange population had a lower healthier risk profile than the state average in 2014 resulting in significant payment transfers into the Risk Adjustment program. Since transitional relief has been extended through 2017, it is expected that his population will not change significantly. Premium levels for 2017 need to incorporate the expected payment into the Risk Adjustment program. An outside consulting firm provided an estimate for 2015. We weighted this estimate with the actual payments from 2014 to estimate the payment for 2017. The adjustment is shown on Table 5.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

ACA Reinsurance does not apply to small group

Non-Benefit Expenses and Profit & Risk

Administration Expense Load

Administration expenses are based on activity-based allocation by product for calendar year 2017. This methodology applies for all variable costs and all fixed costs.

Profit & Risk Margin

The risk margin is set at 2% of premium.

Taxes, Fees, and Subsidies

Table 6 displays the retention items. It provides a breakdown of the administrative expenses and taxes and fees. For 2017, the federal government will not collect the Health Insurer Provider Fee however we do expect them to collect it again in 2018. For small group, the amount of this fee varies by quarter. The administrative expenses are a consistent percentage of premium and do not vary by plan. This is a change from our rate developments from prior years.

Projected Loss Ratio

The anticipated loss ratio is **90.7%** in aggregate as shown below using the Federally-prescribed MLR methodology:

MLR Numerator = URRT Projected Claims + Quality Initiatives = 460.65 + .0159*555.79 = 469.49

MLR Denominator = URRT Projected Premiums – Taxes and Fees + Risk Adjustment = 555.79 – 14.19 + -24.16 = 517.44
Federal MLR = 469.49 / 517.44 = 90.7%
The Quality Initiatives amount is based on the latest estimate for this product.

Development of Projected Index Rate, Market-Adjusted Index Rate & Total Allowed Claims

Single Risk Pool

The Single Risk Pool has been established in accordance with the requirements in 45 CFR 156.80(d) as was discussed previously in the Experience Period Premium and Claims section. The Experience Period includes transitional policies while the Projection Period does not include transitional policies since members are not expected to transition into the ACA Compliant products.

Index Rate

The Experience Period Index Rate is the based on the manual Allowed Claims PMPM and is the starting value on Table 5. The Credibility Manual Rate is a combination of our HMO and PPO experience, giving us an even more credible manual rate. There are no benefits covered in addition to Essential Health benefits in the policies being offered.

The Projected Index Rate for this Single Risk Pool is the Adjusted Projected Allowed EHB Claims PMPM and is the manual rate. The projected claims reflect the trend and benefits described earlier in this memorandum. There are no benefits covered in addition to Essential Health benefits in the policies being offered.

Market Adjusted Index Rate

The Market Adjusted Index Rate is developed by adjusting the Index Rate for allowable market-wide modifiers. This includes the Risk Adjustment Program and the Exchange User Fees. The Risk Adjustment payments are determined on a PMPM basis and, as described above under the Risk Adjustment and Reinsurance section, these amounts are converted to an allowed basis. The values are displayed on Table 5. These PMPMs are represented on a paid basis.

The Market Adjusted Total Allowed Claims are calculated in Table 5. The Projected Index Rate is converted to paid basis by multiplying by the Projected Paid to Allowed ratio (described above). The allowable market-wide modifier (Risk Adjustment Program) is added to this paid basis PMPM. This PMPM is then converted back to an allowed basis, again using the projected paid to allowed ratio. Any non-EHB claims would then be added to this value. We have none, so this PMPM is the Market-Adjusted Projected Total Allowed Claims PMPM.

Normalized Market-Adjusted Projected Allowed Total Claims

The Market-Adjusted Projected Allowed Total Claims is normalized using the projected average factors for age, geography, tobacco, benefit richness (induced demand) and network. These average factors for 2016 and 2017 are displayed on Table 7.

Projected Membership

Members were projected for each plan to be sold in 2017. Sales and marketing were consulted in developing these projections. Overall for the small group Exchange, membership is expected to remain

at current levels, so February 2016 membership is expected to best represent calendar year 2017. We do expect some movement between the HMO and PPO products. Members from discontinued plans are assumed to move to the plan where they are mapped, in general. Since all new plans also need projected members, some members are assumed to migrate to new plans. This movement was modeled based on internally developed expectations. Projected membership is used to calculate the normalization factors discussed below.

Plan Factors

Age Factor

The federal age curve, as shown in Table 12, is used to determine a normalization factor to account for the age mix of business used in generating the Index Rate. The average age factor includes a factor of 0 for non-billable members. There is very little change in this average factor between 2016 and 2017, as shown on Table 7.

Geographic Factor The geographic rating area factors used to determine premium rates are shown on Table 13. These factors are consistent with the current approved factors. The normalization factor is determined using these factors weighted using projected membership by area.

Tobacco Factor

A standard **10%** load is applied for applicants who indicate tobacco usage by affirmatively answering the question—"Have you used tobacco at least four times a week for the past six months?" This load assumption was validated using the study "*Impact of height, weight, and smoking on medical claims costs*", a research report done by Milliman to update their Medical Underwriting Guidelines in April 2009. We utilized the 2015 ACA compliant population to determine the percentage of members that admit to the use of tobacco and pay the increased premium for their entire contract in 2015. The average tobacco factor is shown on Table 7. Table 12 shows the age bands, age factors and tobacco factors where it demonstrates that the tobacco factors are uniform across all age bands.

Benefit Richness (Induced Demand)

Induced Demand factors are applied to each metallic to reflect the expected utilization, not the expected health status. To ensure revenue neutrality, a normalization factor is applied. The average benefit richness factor is shown on Table 7.

Network Factor

Only one network rating factor per market is used for each network. For 2017, we are introducing a Select Network which features efficient cost providers. There are separate HIOS ID's for these plans. A network factor of .95 is applied to these plans to represent the cost savings of the providers in this network. The average network factor is calculated using the projected enrollment in this Select network and the .95 network factor.

Service Area Composition

All the counties and services areas are defined in the QHP Service Area Template.

Components of Rate Change
Table 8 shows the components of the Rate Change developed in this filing.

Plan Rate Development
The projected market-adjusted index rate is used to develop the calibrated plan adjusted index rates in columns Z and AA of Table 10. Each plan's rate is developed as the product of the market-adjusted index rate, the allowable factor and calibration for age and geography.

Each plan is identified as either discontinued, new or modified. Discontinued plans are mapped to plans which are in existence in 2017. Column G lists the metallic tier. This is the value we calculated using the HHS Actuarial Value Calculator. Screen shots of this calculation are provided in the file "GQO SG Screen Shots 20160426.pdf." The Actuarial Certification, at the end of this document, includes attestation that the Federal AV calculator was used to determine the metallic values. Please also refer to the "Unique AV Plan Justification" documents for further details.

Plan Premium Development for 21-Year-Old Non-Tobacco User
The projected calibrated plan-adjusted index rate is used to develop the 21-year-old non-tobacco premium in the small group market. These rates are displayed on Table 10.

Consumer Adjusted Premium Rate Development
The Consumer Adjusted Premium Rates are developed by applying the following allowable rating factors to the ***calibrated*** Plan Adjusted Index Rates:

1. Age – reflecting the HHS defined age curve
2. Geographic – as displayed on the previous page
3. Tobacco status – as discussed below.

The final Premium rates for ***all*** filed benefit plans are displayed in the QHP Rating Template.

The Index Rate, the Market Adjusted Index Rate, and the Plan Adjusted Index Rate reflect the member weighted average premium over the calendar year. As such, in the development of the Consumer Adjusted Premium Rates for small group plans, the Plan Adjusted Index Rate must be adjusted to reflect the appropriate quarter when the consumer level modifiers are applied. The Consumer Adjusted Premium Rates in the small group market increase each quarter with trend, and the factors used to determine the quarterly rates are shown below.

	1st Quarter	**2nd Quarter**	**3rd Quarter**	**4th Quarter**
Trend Adjustment Factor	-2.6880%	-0.9176%	0.8851%	2.7205%

Composite Rating
Composite rating is not used.

Terminated Plans and Products
Terminated plans are noted on Table 10.

Reliance
An outside consulting firm was relied on for their risk adjustment payment estimate for 2015.

Plan Type

All plan offerings meet the plan type definitions available in the URRT Worksheet 2, Section I.

Warning Alerts

The following Warning Alerts are noted in Worksheet 2 as described below.

- **Plan Adjusted Index Rate row 55**: There is no Plan Adjusted Index Rate for non-ACA plans in the experience period, however there is significant enrollment in the non-ACA plans, bringing down the overall average Plan Adjusted Index Rate displayed on Worksheet 2.
- **Total Premium row 57**: The total premium calculated on Worksheet 2 does not represent the Experience data since non-ACA compliant experience does not have a Plan Adjusted Index Rate in row 55.

Actuarial Certification

I certify that:

1. I am a member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform this work.
2. The projected Index Rate is:
    a. In compliance with all applicable state and Federal regulations including 45 CFR 156.80(d)(1)
    b. Developed in compliance with the applicable Actuarial Standards of Practice,
    c. Is reasonable in relation to the benefits provided and the population anticipated to be covered,
    d. Is neither excessive nor deficient based on available information.
3. The Index Rate is used to develop the plan level rates using only the allowable modifiers in accordance with 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2).
4. The essential health benefits are determined in accordance with 45 CFR Part 156 and that the percentage of total premium (in Worksheet 2, Sections III and IV of the URRT) that represents the essential health benefits is calculated in accordance with actuarial standards of practice.
5. The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
6. The Federal AV Calculator was utilized, with an acceptable alternative methodology when appropriate, to determine the AV Metal Values shown above and in Worksheet 2, Section I of the URRT, following ASOP 50. Please refer to the "Unique AV Plan Justification" document for further details.

I confirm that the rates submitted comply with the ACA rating requirements and with the Single Risk Pool per market requirement. The URRT does not demonstrate the process used to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review

of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I certify that rating factors are limited to:

(i) Age (ratio of highest age rate to lowest age rate does not exceed 3:1, and federally approved age rating curve).

(ii) Tobacco (ratio does not exceed 1.5:1).

(iii) Family size (will limit charge to first three dependent children under 19 and cost-sharing requirements for families will be equal to two-times the individual cost-sharing requirements, per federal law).

(iv) Geography (with federally approved regions).
