2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

Questions and Responses submitted 6/23/17

Question	Comment/Request	Response
1	The number of policyholders on the Rate/Rule Tab in SERFF should be the number of lives as per Department Guidelines on Page 5 – Section A. 2D. SERFF Rate/Rule Schedule Tab.	This change has been made in the post-submission update.
2	Please explain the discrepancy noted in the following: a) Ultimate Incurred Claims shown in Table 2 ($451,226,697) versus Table 4 ($452,299,637 – adding the 2016 ultimate incurred claims) b) Estimated Cost Sharing shown in Table 2 ($127,047,195) versus Table 4 ($125,615,924)	In Table 4, the completion factors are applied to incurred claims to generate the ultimate incurred claims. The incurred claims consist of both medical and pharmacy claims. For our internal calculations, we do not apply completion factors to pharmacy claims, but it is not possible to do this given the way Table 4 is set up. Table 2 reflects the claims data from our internal calculations, which leads to the disparity between the observed values.
3	You have stated in the Actuarial Memorandum that the Ultimate Incurred Claims in Table 2 do not match Section 1 of the URRT since URRT includes the prescription drug rebates. The calculated amount after including the prescription drug rebates in the Table 2 is $432,463,164 whereas the ultimate Incurred Claims in URRT is $402,450,219. Please explain.	This disparity arises from the fact that HHS cost sharing is accounted for in the incurred claims field listed in the URRT per federal instructions.
4	Please provide a worksheet with supporting data and calculations of the Paid to Allowed Ratio of 0.724.	This value has been changed to match the weighted-average of the plan actuarial values calculated in Table 10.
5	Please explain why the trends do not include an induced utilization component.	The minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend.
6	In Wksh 2 of the URRT, the AV Pricing Values should be equal to the total adjustment from the Market Adjusted Index Rate (MAIR) to the Plan Adjusted Index Rate (PAIR) for each plan (e.g. MAIR x AV Pricing Value = PAIR). However, this does not appear to be the case. Please explain why this is not the case or correct the issue to follow the Part III URRT Instructions Section 4.7.2.	The AV Pricing Values listed in the URRT are equal to the total adjustment used to generate the PAIR from the MAIR for each plan. The identical proportions between the AV Pricing Values and the PAIRs are demonstrated in exhibit 8 of the Supporting Exhibits.
7	Please show a numerical development of the assumed annual trend used in projecting the experience period claims to the projected 2018 coverage year. Please include the trends based on historical experience for each benefit category for years 2014, 2015, 2016, and 2017 (year to date). We realize 2017 trends will be partially based on estimated claim costs.	Please see "HO IND Work for Responses to Objection Letter 06-23-17" for the requested data.
8	Please provide the numerical development of the Exchange User Fee of $9.32 PMPM as entered in Table 5. Be sure to show how this connects to the 2.2% member weighted average user fee as stated in the Actuarial Memorandum.	Please see "HO IND Work for Responses to Objection Letter 06-23-17" for the calculation of the member-weighted average of the Exchange User Fee.
9	Please provide the numerical development of the projected 2018 MLR that shows compliance with the 80% minimum MLR.	Please see "HO IND Work for Responses to Objection Letter 06-23-17" for the calculation of the projected MLR using the prescribed methodology in PPACA.
10	The sum of the rate increase components shown in Table 8 line H does not approximate line A as indicated by the label. Please explain why this value is so different from the change in Calibrated Plan Adjusted Index Rate.	This disparity arises from various inconsistencies in Table 8. Network adjustments are accounted for twice and change in age calibration factors from year to year are not accounted for in row H of Table 8, which is being compared to the change in the Calibrated Plan Adjusted Index Rate.
11	The following questions are related to the demographic adjustment equal to 1.000 and age calibration factor equal to 1.771: a) Per the Actuarial Memorandum, it appears that the age calibration factor equal to 1.771 is based on 2017 experience so far, which reflects a slightly higher average age than in the manual rate base experience, where the average premium factor was 1.73. Please confirm that this is correct. b) It is stated in the Actuarial Memorandum that no demographic adjustment was made in developing the Index Rate due to the stability of the population. Please provide additional clarification regarding why a demographic adjustment was not made to the Index Rate to reflect a demographic mix similar to that of the 2017 membership even though the age calibration factor appears to have been updated to reflect the age mix of that membership.	a. We can confirm that this is correct. b. The change in age calibration factor from the experience period to the projection period was small enough that the insured population is considered to be stable, and no additional adjustment for demographics was deemed necessary. Also, the calibration performed using the age calibration factor already account for changes in the age of the underlying population from year to year, meaning that an adjustment for demographics is not necessary simply due to a change in the age calibration factor.
12	Please explain the methodology used and show numerical support for the network factors assumed in Exhibit 4.	As mentioned in the "Network Factors" section of the PA Actuarial Memorandum, network factors were selected to maintain the same spreads between networks as those implemented in 2017 while also ensuring normalization of the weighted average using projected enrollment.

13	Please explain the methodology used and show numerical support for the area factors assumed in Exhibit 6.	Please see "HO IND Work for Responses to Objection Letter 06-23-17" for the development of each geographical factor.
14	Please provide the numerical development of the tobacco surcharge adjustment of 0.998 shown in column P of Table 10.	Please see "HO IND Work for Responses to Objection Letter 06-23-17" for the calculation of the tobacco surcharge adjustment.
15	We have the following questions regarding the risk adjustment PMPM value: a) Please demonstrate quantitatively how the 0.86 factor which is to be applied to the statewide average premium in the 2018 risk adjustment calculation was taken into account in developing the projected risk adjustment transfer of $3.57 PMPM.	In early May, PID released 2016 risk adjustment transfer payment estimates for each carrier in each market. These estimates were used as the basis for calculating the risk adjustment PMPM for the projection period. It was assumed that this estimate was already calculated on a claims basis, which would eliminate the need to include the 0.86 factor in the calculations.
16	Please show the development of the average commission and circumstances in which broker commissions will be paid and if they will vary based on geographic location, metal level, plan, open enrollment vs SEP enrollment, etc. Additionally, the current and 2018 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.	Commissions are paid under all circumstances and in all geographic locations. They will not vary by metal level or plan. Commissions are not paid for Special Enrollment Periods. Please see the "Administrative Expenses" section of the unredacted PA Actuarial Memorandum for a discussion on commissions and the calculation of the average commission. The current and 2018 broker agreement is located in the Supporting Documentation section in SERFF.
17	The average age in Table 1 should be the true age based on single year bands distribution. If not, please revise Table 1.	The average ages have been revised in Table 1 and the memoranda.
18	Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.	This has been confirmed.
19	The cover letter shows an NAIC # of 22312. The NAIC # for the captioned company is 15345. Please revise.	This has been revised in the cover letter, bulletin information, and memoranda.
20	Confirm HIOS submission and provide tracking number.	The submission has been confirmed. The tracking number is 16322-963015710651495426.
21	Table 6 cell C63 indicates the Single Risk Pool pmpm is $423.97, while the Single risk pool in the URRT in cell V43 indicates $424.13. Please reconcile.	This disparity arises from differences in the way trend is implemented in Table 3 versus the URRT. Table 3 uses weights for each benefit category when calculating the total applied trend projection factor. These weights were determined using the proportion of allowed claims that corresponded to each benefit category during the experience period. Since the trend adjustment for each benefit category is lumped into one factor that is applied to the total allowed EHB claims in Table 5 to account for the entire two-year period between the experience and projection periods, the weights implicitly remain static on an annual basis within this factor. However, the URRT applies the trend adjustment to the allowed claims and utilization for each benefit category separately. Handling the calculation in this manner allows the implicit weights to remain dynamic for each year and change as the allowed claims and utilization values are adjusted. The marginal error that arises from these two different styles of trend implementation propagates all the way to the values mentioned in this question.
22	Worksheet II cells G29 and Y29 projected product increases indicate rate increases of 10.14% and 10.24%, respectively, while Department exhibits Tables 10 and Table 11 show 7.9%. Please reconcile.	The rate change % in the worksheet II cell G29 uses the consumer adjusted premium rate to account for the current distribution of enrollment by age, geographic area, and tobacco status per the federal instruction. The PID Table 10 and 11 shows the rate increase between the plan adjusted index rates which don't account for these adjustments. Therefore, these values should be different especially with the change in the age factors from 2017 to 2018.
23	Please show the development of the Health Insurance Industry Fee of 3.38% as shown in Table 6 cell C57.	Our actual insurer's tax for 2016 was 1.7% of our total revenue. According to the IRS website, the 2018 overall applicable amount ($14,300,000,000) is set to be about 126.5 % of the 2016 overall applicable amount ($11,300,000,000). We adjusted our 2016 rate of 1.7% by the same 126.5%. We then divided that value by 65% to account for the 35% corporate tax which ended up 3.38%.
24	Please indicate if the Company included an adjustment to account for the regulation that prohibits charging for more than three children per family, and, if applicable, demonstrate how the adjustment was derived and where it is included in the filing.	No adjustment was made to account for this regulation.
25	Does UPMC HO have individual transitional business? If so, provide the experience period claims, premium and number of member months.	UPMC Health Options does not offer transitional products in the Individual market, as is mentioned in the "Experience Period Claims and Premium" section of the PA Actuarial Memorandum.

User	13,899	8.7%	1.025	

Questions and Responses submitted 7/5/17

Question	Comment/Request	Response
1	You have stated in the Actuarial Memorandum that the Ultimate Incurred Claims in Table 2 do not match Section 1 of the URRT since URRT includes the prescription drug rebates. The calculated amount after including the prescription drug rebates in the Table 2 is $432,463,164 whereas the ultimate Incurred Claims in URRT is $402,450,219. Please explain.	We were double counting the CSR amounts in our previous version. This has now been fixed and the ultimated incurred claims match the $432,463,164 amount including the rx rebates.
2	Please explain the discrepancy noted in the following: a) Ultimate Incurred Claims shown in Table 2 ($451,226,697) versus Table 4 ($452,299,637 – adding the 2016 ultimate incurred claims) b) Estimated Cost Sharing shown in Table 2 ($127,047,195) versus Table 4 ($125,615,924)	a) As mentioned before, in table 4 the completion factors are applied to incurred claims to generate the ultimate incurred claims. The incurred claims consist of both medical and pharmacy claims. For our internal calculations, we do not apply completion factors to pharmacy claims, but it is not possible to do this given the way Table 4 is set up. b) The estimated cost sharing in table 4 has been updated to match the amount in table 2.
3	Please show the development of the broker comission fee	The projected broker fee is $3.63 pmpm.

Questions and Responses submitted 7/14/17

Question	Comment/Request	Response
1	The following questions are related to your response to Question 11: a) Please confirm whether the average premium factor equal to 1.73 based on the 2016 manual rate experience was developed using the 2018 federal age factors or the 2017 federal age factors.; If it is based on the 2017 federal age factors, please provide what the average premium factor would have been if using the 2018 federal age factors. If it is based on the 2018 federal age factors, please clarify what is meant in your response by the statement that "the calibration performed using the age calibration factor already accounts for the changes in the age of the underlying population from year to year." It is our expectation that if the projected Index Rate reflects cost levels associated with an average age factor of 1.73 (due to using the manual experience as a basis with no demographic adjustment), but the Plan Adjusted Index Rates are divided by an age calibration factor equal to 1.77 (based on the 2017 membership) the resulting rates will be approximately 2.3% too low (i.e. 1.73/1.77 – 1), all else equal.	a. The 1.73 age factor was developed using the 2017 federal age factors. i. When using 2018 federal age factors, this factor is 1.75. ii. The 1.77 factor used in rate development was calculated using the 2018 federal age factors along with projected membership for each age band, for which current enrollment was the basis. Furthermore, the HHS age curve does not necessarily reflect the difference in costs for different age groups. We mainly used the average age factor as a general comparison measure to see if there was a drastic change from one year to another that would require additional adjustments.
2	The following questions are related to your response to Question 15 regarding the risk adjustment PMPM value: a) It is noted that the 2016 risk transfer payment estimates released by PID in early May were assumed to be on a claims basis and so the 0.86 factor was not accounted for. Please describe why this was assumed to be the case. b) Based on your response, it is our understanding that anticipated changes to the statewide average premium between 2016 and 2018 were not considered in developing the projected risk adjustment transfer payment equal to $3.57 PMPM. Please confirm that this understanding is correct. If it is not correct, please clarify. c) Please provide the actual risk adjustment transfer payment PMPM per the CMS risk adjustment transfer report for the 2016 benefit year, which was released on 6/30/2017.	a. The PID estimate that was released didn't specify that the 0.86 was unaccounted for. We assumed that was the complete estimated Risk Adjustment Transfer Amount for our company. b. Yes, we confirm that is correct. c. The actual risk adjustment tranfer amount is -$3.94 pmpm.
3	Per your response to Question 24, no adjustment was made to account for the regulation that prohibits charging for more than three dependents under the age of 21 per family. Is the reason for not applying an adjustment based on analysis by the company showing that the impact would be minimal? Or is there another reason for not applying the adjustment?	No adjustment was made because the impact of this regulation on projected costs would be minimal.
4	The Actuarial Memorandum indicates that average commission is $15.01. Please provide the numerical development of the Agent/Broker Fees and Commission of 0.87% shown in Table 6 of the AM exhibits.	$15.01 is the average commission for off-exchange members only. The broker fee that was actually used in pricing is $3.63 pmpm which is 0.86% of the projected required revenue pmpm of $422.71. The value is slightly different from 0.87% due to a rounding error.
5	Regarding your response to Question 25 on Health Insurance Industry Fee of 3.38%. Please provide the numerical calculation. As per my calculation the fee is 3.31% (=0.017*1.265/0.65).	The 0.017 was the rounded actual of our insurer's tax for 2016. The unrounded value is 0.01738, and 0.01738*1.265/0.65 is 3.38%
6	In response to question 17, you indicate that Table 1 has been revised. Please confirm that the average age in Table 1 is the true average age and not the average age based on the default age curve.	In question 21 of our initial correspondence with PID for our Health Coverage Small Group rate filing, we were instructed, "per CMS instructions, once the average factor is determined, the nearest age on HHS Age Curve should be selected as the average age." This revision has been made in Table 1 to ensure consistency across all filings.
7	If you wish to make adjustments to the projected RA amount included in this rate filing and the URRT, based on the June 30, 2017 Summary Report on Transitional Reinsurance Payments and Permanent Risk Adjustment Transfers, please do so in this submission. Provide narrative and an Excel spreadsheet demonstrating the development and assumptions.	No revision will be made since the estimate used for projected 2016 risk adjustment was nearly identical to the actual value.
8	Please note that all revisions must be reflected in this resubmission. The Department shall not allow any changes to the rates after this submission.	All revisions are reflected in this submission.

9	Please provide a PDF file for public review (Public Rate Filing PDF) in SERFF to show the updated rate request. The following updated supporting items must be included: • Cover Letter • Rate Change Request Summary (Attachment 1) • Part 1 - Unified Rate Review Template (URRT) • Part II – Consumer Friendly Justification • Part III – Federal Actuarial Memorandum (redacted) • PA Actuarial Memorandum (redacted) • PA Actuarial Memorandum Rate Exhibits • PA Plan Design Summary and Rate Tables • Federal Rates Templates • Service Area Maps • Correspondence – Q&A's Please remain cognizant of the limited redactions as outlined on pages 3 and 4 of the 2018 Guidance. Only those specific items may be redacted. Since AV screenshots and commission schedules are proprietary, they should not be included in this public PDF. Additionally, please ensure that documents and spreadsheets are internally consistent and that the Excel exhibit with formula corrections emailed to you on June 6, 2017 is used. The deadline for the revised PDF is COB July 18, 2017.	We will upload the final public rate filing pdf by 07/18/2017 as instructed.

Ms. Johanna Fabian-Marks
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Dear Ms. Fabian-Marks,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Individual On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2018 through through 12/31/2018. Per suggestion from the PID, the revised filing contains a 6% increase in projected morbidity for 2018 in addition to an increase in the rates of all silver plans offered both on and off the Federal Marketplace by a factor of 0.94/0.7. The revised filing also includes a correction to an error with the metallic tier actuarial values with a few plans included in this filing and a correction in the commissions PMPM value used in rate development. This update resulted in changes in the following items:

Projected Paid-to-allowed Ratio: changed from **0.722** to **0.726**

This changed because this value is calculated using the 2018 metallic tier actuarial values.

2018 Administrative Expenses: changed from **8.68%** to **8.21%**

This changed because we use a fixed dollar amount for the projection of administrative costs. With a slight change in the 2018 premium for this filing when correcting the errors mentioned above, this leads to a decrease in this percentage.

Projected Paid Exchange User Fees PMPM: changed from **$9.85** to **$9.79**

The Projected Paid Marketplace User Fee PMPM displayed in Table 5 is calculated as a percentage of our projected required revenue for 2018. When correcting the error in our projected broker commissions PMPM value for 2018 mentioned above, this caused the projected required revenue to decrease by a small amount. Taking the decreased projected required revenue multiplied by the percentage used in our prior version of this rate filing caused the Projected Paid Marketplace User Fee PMPM to decrease by a small amount.

Changes to the Metallic Tier Actuarial Values and Pricing Actuarial Values in Table 10 for the following SCIDs

16322PA0040007, 16322PA0040025, 16322PA0040026, 16322PA0040030, 16322PA0040034, 16322PA0040036, 16322PA0050030, 16322PA0050103, 16322PA00500105, 16322PA00500108, 16322PA00500111,16322PA00500112

Modification of the plan name for the following SCIDs:

16322PA0040025: "UPMC Advantage Silver HSA $2,700/20% - Premium Network"
16322PA0040030: "UPMC Advantage Inside Advantage for Individuals Silver $1,750/$50 - Premium Network"
16322PA0050105: "UPMC Advantage Silver HSA $2,700/20% - Partner Network"
16322PA0050108: "UPMC Advantage Silver HSA $2,700/20% - Select Network"
16322PA0050122: "Tower UPMC Advantage Silver $3,550/$25 – Tower Network"

Five off-exchange only silver plans have also been added to the revised filing. The following crosswalk displays which on-exchange SCIDs these new plans will mirror:

Original On & Off Exchange Plan		New Off-exchange Only Plan	
SCID	Plan Name	SCID	Plan Name
16322PA0040007	UPMC Advantage Silver $1,750/$50 - Premium Network	16322PA0040037	UPMC Advantage Silver $1,800/$50 - Premium Network
16322PA0040031	UPMC Advantage Inside Advantage for Individuals Silver $1,750/$50 - Premium	16322PA0040038	UPMC Advantage Inside Advantage for Individuals Silver $1,800/$50 - Premium
16322PA0050030	UPMC Advantage Silver $1,750/$50 - Select Network	16322PA0050120	UPMC Advantage Silver $1,800/$50 - Select Network
16322PA0050103	UPMC Advantage Silver $1,750/$50 - Partner Network	16322PA0050121	UPMC Advantage Silver $1,800/$50 - Partner Network
16322PA0050117	Tower UPMC Advantage Silver $3,500/$25 - Tower Network	16322PA0050122	Tower UPMC Advantage Silver $3,550/$25 – Tower Network

Additional Information related to this filing:

Company Name/NAIC #: UPMC Health Options, Inc./15345
Market: Individual
On or Off Exchange: On and Off
Effective Date of Coverage: 1/1/2018
Average Rate Change Requested w/o CSR and Ind Mandate repeal: 8.26% ($17.68)
Range of Rate Change Requested w/o CSR and Ind Mandate repeal: 6.56% to 12.48% ($11.91 to $61.20)

**Please note that the rate changes listed above reflect the updates to actuarial values, admin expenses, and the paid-to-allowed ratio described above*

Average Rate Change Requested w/ CSR and Ind Mandate repeal: 41.15% ($88.06)
Range of Rate Change Requested w/ CSR and Ind Mandate repeal: 15.07% to 57.79% ($22.36 to $134.80)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 6, 7 (regions 3 and 7 added for 2018)
Metal Levels Offered: Catastrophic, Bronze, Silver, Gold, Platinum
Currently Enrolled Lives: 142,651
Currently Enrolled Policyholders: 99,290
Number of Plans Offered in 2018: 46
Corresponding Contract Form #: 663, 664, 667, 671, 672, 673, 674
Binder ID#: UPMC-PA18-125071602

INSURANCE DEPARTMENT

Rate Change Request Summary - 2018

Pennsylvania Insurance Department | www.insurance.pa.gov

UPMC Health Options, Inc. – Individual Plans

Rate request filing ID # UPMC-131034732 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Initial requested average rate change:	7.96%
Revised requested average rate change:	41.15%
Range of requested rate change:	15.07% to 57.79%
Effective date:	1/1/2018
People impacted:	142,651
Available in:	1, 2, 3, 4, 5, 6, 7

Key information

Jan. 2016-Dec. 2016 financial experience		
Premiums	$	409,611,582
Claims	$	451,266,697
Administrative expenses	$	50,664,370
Taxes & fees	$	14,055,530
Company made (after taxes)	**$**	**(106,375,015)**

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2018:

Claims:	88.36%
Administrative:	8.21%
Taxes & fees:	3.43%
Profit:	0.00%

The company expects its annual medical costs to increase by approximately 7.01% for 2018.

Explanation of requested rate change

Additional premium is needed to account for that in addition to the higher cost and utilization of medical services each year. Additional revenue is also required to account for the return of the Health Insurance Tax in 2018. The revised requested average rate change listed above also accounts for uncertainty in the market in 2018 due to the potential repeal of the Individual Mandate and CSR subsidies. The revised rate change also accounts for an error that was fixed with some of the metallic tier actuarial values included in the original submission. An error in the calculation of the broker commissions PMPM value used in 2018 rate development has also been corrected in the revised filing.

RFJ Part II – Consumer Friendly Justification

Individual Exchange EPO/PPO Rate Filing

The rate change for UPMC Health Options Individual plans is 41.15% for 2018. The revised rate change can be attributed to a load that was applied to the rates of several plans included within this filing due to current uncertainty in the market surrounding the potential repeal of the Individual Mandate in 2018. Additional loads were also applied to silver plans offered on the Federal Marketplace due to the potential repeal of CSR subsidies in 2018. The revised rate change also accounts for an error that was fixed with some of the metallic tier actuarial values included in the original submission. An error in the calculation of the broker commissions PMPM value used in 2018 rate development has also been corrected in the revised filing.

Scope and Range of the Rate Increase

The number of individuals affected by this rate increase is 142,651. There will be no variation in the increase among affected members.

Financial Experience of the Product

Premiums	$	409,611,582
Claims	$	451,266,697
Administrative expenses	$	50,664,370
Taxes & fees	$	14,055,530
Company made (after taxes)	**$**	**(106,375,015)**

Changes in Medical Service Costs

Cost and utilization increases are expected to increase by approximately 7.01% for 2018.

Changes in Benefits

No changes in benefits contributed significantly to the increase.

Administrative Costs and Anticipated Profits

No major changes in administrative costs or profits are anticipated and thus did not affect the increase.

RFJ Part III: Actuarial Memorandum - Redacted

General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Identifying Information:
Company Legal Name: UPMC Health Options, Inc.
NAIC #: 15345
State: PA
HIOS Issuer ID: 16322
Market: Individual
Exchange: On and Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2018

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131034732
Form Filing SERFF Tracking #: UPMC-131022983, UPMC-131022963, UPMC-131022974, UPMC-131023011, UPMC-131022900, UPMC-131022412, UPMC-131022308
Binder SERFF Tracking #: UPMC-PA18-125071602

Rate History:
Historical and proposed rate changes vary by plan based on differences in network-level adjustment factors and differences in pricing AV factors between plans. The values listed below and overall proposed rate change for 2018 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change
UPMC-129389350	2014	0.0%
UPMC-129640677	2015	0.0%
UPMC-130071357	2016	9.7%
UPMC-130536844	2017	26.5%

Proposed Rate Increase(s)

Reasons for Rate Increase(s):
The proposed rate increase for 2018 is 41.15%. The major reasons for the increase include the following:

- Increasing cost and utilization trends
- Return of the Insurer Tax
- Uncertainty in the market in 2018 due to the potential repeal of the Individual Mandate and CSR subsidies

Market Experience

Experience Period Premium and Claims

Paid Through Date:
The reported claims during the experience period have a paid through date of March 2017.

Premiums (net of MLR Rebate) in Experience Period:
Section I, worksheet 1 of the URRT contains calendar year 2016 premium for the captioned company and market. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium is also listed in Table 2 of the PA Actuarial Memorandum Exhibits.

Allowed and Incurred Claims Incurred During the Experience Period:
Section I, worksheet 1 of the URRT contains calendar year 2016 claims experience for the captioned company and market, paid through March 2017. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire block of ACA-related Individual business. Because three months run-out is available the impact of IBNR is minimal.

Month	Completion Factor
1/1/2016	0.9999
2/1/2016	0.9997
3/1/2016	0.9996
4/1/2016	0.9994
5/1/2016	0.9992
6/1/2016	0.9978
7/1/2016	0.9961
8/1/2016	0.9931
9/1/2016	0.9849
10/1/2016	0.9790
11/1/2016	0.9721
12/1/2016	0.9580

Benefit Categories

Medical claims are split into nine categories in our data warehouse. They are mapped into the categories in the URRT as follows:

UPMC Benefit Category	URRT Benefit Category
Inpatient	Inpatient Hospital
Catastrophic	Inpatient Hospital
Outpatient	Outpatient Hospital
Behavioral	Outpatient Hospital
PCP	Professional
Specialist	Professional
Diagnostic	Other Medical
ER	Other Medical
Other	Other Medical
Pediatric Dental	Other Medical
Pediatric Vision	Other Medical

Drug claims are on separate tables and directly mapped into the Prescription Drugs category. The Other Medical category uses visits as units for utilization calculations.

Projection Factors

Changes in the Morbidity of the Population Insured:
Due to current uncertainty surrounding the market in 2018 due to the potential repeal of the Individual Mandate, it has been required by the Pennsylvania Insurance Department that an assumption for increased morbidity of the single risk pool be implemented for the projection period. A 6% increase in the original morbidity assumption has been included in the most recent version of the filing to account for this.

Changes in Benefits:
No changes were made to the PA EHB Benchmark plan for 2018, so no adjustments were necessary.

Changes in Demographics:
The average age for our 2016 experience period Individual risk pool was 49 with an average premium factor of 1.73. This is comparable to our 2017 experience so far with age 50 and premium factor 1.77. Due to the stability of the population, no demographic adjustment has been made to the rates.

Other Adjustments:
An adjustment to account for change in network has been applied as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. The provider networks included in this filing have undergone signficiant expansion since the experience period. UPMC's Premium Network provided coverage in rating areas 1, 2, 4, 5, and 6 during the experience period, but has since expanded to include rating area 7 as well as additional counties. The Partner Network originally offered coverage in rating areas 1, 4, and 5, but has also expanded to include some counties in rating area 3. Projected costs are expected to increase due to this expansion. A factor to account for this projected increase has been applied to the medical benefit categories in the "Other" adjustment column in worksheet 1 of the URRT. This load was not applied to prescription drugs since they were not affected by the network expansion.

Trend Factors (cost/utilization):
The overall annual trend used in rate development is 7.01%. Historical allowed claims for our entire ACA-related Individual block of business were used to develop year over year trend factors for use in the projected rates. The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. The historical data suggests that costs will increase by 8.33%. While this block of business has credible membership for trend calculations, we have observed lower trends in other commerical lines of business, so we have decided to lower the value used in rate development to 7.01% so that rates are not over inflated by an extreme value of trend. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations.

Credibility Manual Rate Development

Source and Appropriateness of Manual Rate Used:
The manual rate was not used as the experience period provided 1,322,330 member months of data, which was deemed fully credible.

Adjustments Made to the Data:
No adjustments were necessary since the rate manual was not used for this filing.

Inclusion of Capitation Payments:
No benefits are projected to be paid for via capitation.

Credibility of Experience

Based on the large member month count of the experience period data, we believed the experience period data to be credible enough to use 100%.

Paid to Allowed Ratio

The Paid to Allowed Average Factor was calculated by taking the weighted average of the HHS AV Metals Values for all plans using projected membership.

Risk Adjustment and Reinsurance

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:
Experience period Risk Adjustment was estimated to be a payment of $5,211,297 per suggestion from the Pennsylvania Insurance Department, which translates to a PMPM of $3.94. An exact amount is not yet known so estimates from two different consultants were used to develop estimates alongside our own internal estimate and the aforementioned estimate provided by PID based on data accrued through April 2017. Based on these estimates and past experience, we believe this value is a reasonable estimate until the actual values are released later this year. Experience period PMPM for the Transitional Reinsurance Program under PPACA was $10.52. This is based on what has been accrued with three months of run-out.

Projected Risk Adjustments PMPM:
Projection period risk adjustment PMPM has been estimated to be a payment of $3.42. Please see Exhibit 1 of the Supporting Exhibits for the derivation of the risk adjustment PMPM amounts for both the experience and projection period. The projected risk adjustment assumes any membership changes involve members of average risk. Thus the total dollar impact of these membership fluctuations was estimated to remain unchanged. $1.68 PMPY has been subtracted as a projected amount for the Risk Adjustment Administration Fee. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium:
The Transitional Reinsurance Program under PPACA expired at the end of 2016 so no projections were included for 2018.

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:
Administrative expenses are taken from our 2016 Supplemental Health Care Exhibit (SHCE). They are broken out by lines of business and market segments matching this filing and thus are appropriate for use. Differences between the SHCE and section I, worksheet 1 of the URRT stem from the fact that the SHCE include restatements of estimates from the prior year, while the URRT only contains actual experience from 2016 (experience period). The data for Individual Health Options in Part 1 of the SHCE is all ACA-related. Please see Exhibit 2 of the Supporting Exhibits for a historical breakdown of the actual and projected administrative expenses by year.

Profit & Risk Margin:
The projected profit margin for this company will remain at 0% for 2018.

Taxes and Fees:
Taxes and Fees increased from 2017 to 2018 to account for the return of the Health Insurance Tax for 2018. A PCORI amount of $0.20 PMPM has been added based on projections for 2018 by the IRS. Please note that the Risk Adjustment Administration Fee was not included in the Taxes and Fees field. As noted below in the "Market Adjusted Index Rate" section, Marketplace user fees are applied as an adjustment to the Index Rate at the market level. However, they were included in the Taxes and Fees field in the URRT per federal instructions. The member-weighted average of 3.5% for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.2%. Please note that the URRT value will differ from the Taxes and Fees value listed in Table 6 of the PA Actuarial Memorandum Exhibits since Marketplace user fees are not included in the value listed in Table 6.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology, is 71.9%.

Application of Market Reform Rating Rules

Single Risk Pool

The single risk pool consists of members enrolled in ACA-compliant policies offered under the captioned market. Transitional policies are not currently offered in the Individual market under this company.

Index Rate

For this filing, the Index Rate of the Experience Period is calculated from the captioned company's fully-credible experience period EHB claims data for the single risk pool, which is demonstrated in Table 2 of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 7.01% annual trend to the Index Rate of Experience Period. An adjustment to account for changes in network (discussed above in the "Other Adjustments" section) is then applied to get from the single risk pool experience period population with coverage in rating areas 1, 2, 4, 5, and 6 to the broader plan offerings of the projection period, where coverage in rating areas 3 and 7 has been introduced. Claims for routine foot care and acupuncture were not included in the calculation of the index rates despite being covered during the experience period since they are classified as non-EHBs.

Market Adjusted Index Rate

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment and Marketplace Fees adjustments are described above in the Projected Risk Adjustments PMPM and Taxes and Fees sections, respectively. Since the Market Adjusted Index Rate is calculated on an allowed claims basis, the projected paid Risk Adjustment and Marketplace Fees were divided by the projected paid-to-allowed ratio when performing market-level adjustments.

Plan Adjusted Index Rates

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2018 Plan Adjusted Index Rates. The allowable modifiers applied in rate development are described below.

<u>Plan Actuarial Value:</u>
The AV for each plan was determined using the final 2018 HHS AV Calculator.

<u>Benefit Richness (induced demand)</u>
Please see Exhibit 3 in the Supporting Exhibits for the induced utilization exhibit and a calculation demonstrating the normalization of benefit richness factors using projected membership. This adjustment was used to keep relativities between plans similar to what they were in the previous year while accounting for plan design changes. This will minimize rate increase variations by plan and consumer confusion that could result. In

addition, current loss ratios exhibit significant variation between metal levels, which suggests a wider variation is necessary than what is indicated in the company-determined Pricing AV.

Benefits in addition to EHBs

Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.27 PMPM.

Provider Network

Network factors for 2018 were calculated to maintain similar spreads as those implemented in the prior rate filing under the captioned company and market. They were also calculated to ensure normalization using projected membership, as demonstrated in Exhibit 4 of the Supporting Exhibits.

Catastrophic Eligibility

No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible. Due to current uncertainty in the market regarding the potential repeal of cost-share reduction subsidies in 2018, the Pennsylvania Insurance Department has requested that the rates for all silver plans offered both on and off the Federal Marketplace be increased by a factor of 0.94/0.7 to account for this possibility using the catastrophic eligibility column of Table 10 of the Actuarial Memorandum Rate Exhibits. Additional off-exchange only silver plans have been included in the revised filing to minimize disruption to non-subsidized members enrolled in silver plans.

Tobacco Surcharge Adjustment

Please see the "Tobacco Use Rating Factor Calibration" section below for a discussion of the development of the tobacco surcharge adjustment.

Calibration

Age Curve Calibration:

The average age factor was calculated using our projected Individual market population with the prescribed HHS Age Factors for 2018. We pulled them in summary alongside network and area data in order to back out age factor differences when determining network/area factors. It was assumed this represents the age distribution of the entire single risk pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. The average age factor is 1.77 and corresponding age band is 50. Please see Exhibit 4 in the Supporting Exhibits for the calculation of this factor.

Geographic Factor Calibration:

We believe the differences in cost between network factors are the driving force behind current cost differentials at the plan level. Therefore, we decided to vary our network factors and keep all rating area factors for rating areas 1, 2, 4, 5, and 6 identical in 2017 and they will remain this way for 2018. To account for the expansion of coverage into rating areas 3 and 7, geographical factors were developed for these areas using provider fee schedules from each region. The calibration factor of 1.02 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool. This calculation is demonstrated in Exhibit 6 of the Supporting Exhibits.

Tobacco Use Rating Factor Calibration:
The average tobacco factor and tobacco surcharge adjustment were calculated using projected membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002, which is displayed in Table 7 of the PA Actuarial Memorandum Exhibits. The tobacco surcharge adjustment of 0.998 displayed in Table 10 is the reciprocal of the average tobacco factor.

Consumer Adjusted Premium Rate Development

The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates. Please see Exhibit 7 of the Supporting Exhibits for historical Consumer Adjusted Premium Rate changes for this company and market for a 21-year-old non-tobacco user.

Plan Product Info

AV Metal Values

Metal values were determined using the final 2018 HHS AV Calculator.

AV Pricing Values

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2018 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described in the "Plan Adjusted Index Rates" section above. The AV Pricing Values displayed in the URRT are the ratio of the Plan Adjusted Index Rates to the Market Adjusted Index Rate Please see Exhibit 8 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values.

Membership Projections

Membership projections were developed based on our anticipated competitive positioning in the market combined with our current enrollment distribution by plan. The portion of membership enrolled in cost-share reduction variants was assumed to remain the same for 2018. Please see Exhibit 9 of the Supporting Exhibits for various enrollment projections by plan.

Terminated Plans and Products

No plans were terminated for 2018.

Warning Alerts

Cell A57 on worksheet 2 of the URRT displays a warning alert. This alert arises from the fact the age distribution for 2016 turned out to be different than expected when age calibration was performed during 2016 ACA pricing. This leads to a disparity when using filed Plan Adjusted Index Rates to project 2016 premium against actual experience for 2016.

Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conductive effective rate review for all submitted rates.

Note on Possible Legislation Changes

Please note that any changes to the ACA involving the elimination of CSR subsidies, removal of the individual mandate for health insurance, or modifications to any other provisions may dramatically affect the makeup of the single risk pool and require us to re-evaluate rate development for this filing.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 2: Projected and Actual Administrative Expenses
- Exhibit 3a: Induced Utilization Derivation
- Exhibit 3b: Induced Utilization Normalization
- Exhibit 4: Development of Network Factors
- Exhibit 5: Derivation of Age Calibration Factor
- Exhibit 6: Derivation of Geographical Calibration Factor
- Exhibit 7: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User
- Exhibit 8: Proportion of Plan Adjusted Index Rates and AV Pricing Values
- Exhibit 9a: Development of Projected Enrollment by Network and Metal Level
- Exhibit 9b: Development of Projected Enrollment by Plan and Subsidy Level
- Exhibit 9c: Projected Enrollment by Rating Area

Actuarial Certification

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

PA Actuarial Memorandum - Redacted

Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

Company Information

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Options, Inc.
NAIC #: 15345
HIOS Issuer ID: 16322
Market: Individual
Exchange: On and Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2018

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131034732
Form Filing SERFF Tracking #: UPMC-131022983, UPMC-131022963, UPMC-131022974, UPMC-131023011, UPMC-131022900, UPMC-131022412, UPMC-131022308
Binder SERFF Tracking #: UPMC-PA18-125071602

Rate History and Proposed Variations in Rate Changes

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2018 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change
UPMC-129640677	2015	0.0%
UPMC-130071357	2016	9.7%
UPMC-130536844	2017	26.5%

Average Rate Change

The average rate change displayed in Table 10, column AC, of the PA Actuarial Memorandum Exhibits is 41.15%. The change in 21-year-old non-tobacco premium PMPM calculated in table 11, cell AN13, of the PA Actuarial Memorandum Exhibits is 42.3%. The percent increase over Experience Period calculated in cell V45 on worksheet 1 of the URRT is 43.82%. The annualized percent increase calculated in cell V46 on worksheet 1 of the URRT is 19.92%.

Membership Count

Various breakdowns of the membership count for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits. Please see Exhibit 9 of the Supporting Exhibits for the calculation of the member months in the projection period shown in Table 1 as well as our projected enrollment by subsidy level for silver plans. Projected 2018 enrollment for each subsidy level for a given SCID is calculated by using the portions of current membership (as of February 2017) in each subsidy level multiplied by the total projected enrollment for the given SCID. For new plans, projected enrollment in each subsidy level was calculated using the portions of current enrollment for the entire metal level. Exhibit 9 also displays enrollment projections by rating area for each plan.

Benefit Changes

A table with these changes has been included in Appendix I. No plans have actuarial values that fall in the expanded de minimis range.

Experience Period Claims and Premium

Claims and premium data from the experience period (January 2016 - December 2016) with three months of run-out are displayed in Table 2 of the PA Actuarial Memorandum Exhibits. This section provides a discussion of each field in the table and its relation to the corresponding fields on the URRT. Please note that no data for transitional policies is included in this table since transitional policies were not offered by the captioned company and market in 2016.

<u>Earned Premium:</u>
This represents the revenue accumulated by the captioned company and market during the experience period. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium listed in Table 2 does match the total premium listed in section I, worksheet 1 of the URRT because the value in the URRT does not include estimated Risk Adjustment receivables/payments per federal instructions.

<u>Paid Claims:</u>
This field includes uncompleted paid medical, pharmacy, pediatric dental, and pediatric vision experience period claims for the captioned company and market.

Ultimate Incurred Claims:
This field includes completed paid medical and pharmacy experience period claims for the captioned company and market. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire ACA-related Individual block of business. Because three months run-out is available the impact of IBNR is minimal. The completion factors used are displayed in the table below. Please note that the ultimate incurred claims shown in Table 2 do not match the total incurred claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the ultimate incurred claims less total prescription drug rebates listed in Table 2 and HHS cost-sharing.

Month	Completion Factor
1/1/2016	0.9999
2/1/2016	0.9997
3/1/2016	0.9996
4/1/2016	0.9994
5/1/2016	0.9992
6/1/2016	0.9978
7/1/2016	0.9961
8/1/2016	0.9931
9/1/2016	0.9849
10/1/2016	0.9790
11/1/2016	0.9721
12/1/2016	0.9580

Member Months:
The sum of the experience period member months shown in Table 1 is also displayed in Table 2.

Estimated Cost Sharing:
This field represents the difference between allowed claims and ultimate incurred claims in Table 2.

Allowed Claims:
This field includes allowed medical and pharmacy experience period claims as well as pediatric dental and vision claims from the experience period for the captioned company and market. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail. Please note that the allowed claims shown in Table 2 do not match the total allowed claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the allowed claims less total prescription drug rebates listed in Table 2.

Non-EHB portion of Allowed Claims:
This field displayed the amount of allowed experience period claims that can be attributed to non-EHBs for the captioned market and company.

Total Prescription Drug Rebates:
This field shows the amount of prescription drug rebates received for the captioned company and market during the experience period. Pharmacy rebates have been removed from the total incurred and allowed claims displayed in section I, worksheet 1 of the URRT.

Total EHB Capitation:
No benefits were paid for via capitation during the experience period.

Total Non-EHB Capitation:
No benefits were paid for via capitation during the experience period.

Estimated Risk Adjustment:
Experience period Risk Adjustment was estimated to be a payment of $5,211,297 per suggestion from the Pennsylvania Insurance Department, which translates to a PMPM of $3.94. An exact amount is not yet known so estimates from two different consultants were used to develop estimates alongside our own internal estimate and the aforementioned estimate provided by PID based on data accrued through April 2017. Based on these estimates and past experience, we believe this value is a reasonable estimate until the actual values are released later this year.

Estimated Reinsurance Recoveries:
Experience period recoveries for the Transitional Reinsurance Program under PPACA were $10.52 PMPM. This is based on what has been accrued with three months of run-out.

Credibility of Data

Based on a large member month count of 1,322,330 during the experience period, we believe this data is credible enough to use 100%. Because of this, the manual data displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits match the data displayed in tables 2, 3, and 4.

Trend Identification

The overall annual trend used in rate development is 7.01%. Historical allowed claims for our entire ACA-related Individual block of business were used to develop year over year trend factors for use in the projected rates. The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. The historical data suggests that costs will increase by 8.33%. While this block of business has credible membership for trend calculations, we have observed lower trends in other commerical lines of business, so we have decided to lower the value used in rate development to 7.01% so that rates are not over inflated by an extreme value of trend. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations.

Historical Experience

Historical data from the three most recent calendar years for the captioned company and market with three months of run-out are provided in Table 4. Allowed claims were developed using the same manner described above for Table 2. The historical data listed in Table 4b belongs to our entire block of ACA-related Individual business and was used to develop trend as described above. Data for transitional policies was not included in Table 4.

Rate Development & Change

Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below.

Index Rate:
For this filing, the Index Rate of the Experience Period is calculated from the captioned company's fully-credible experience period EHB claims data for the single risk pool in the state market, which is demonstrated in Table 2 of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 7.01% annual trend to the Index Rate of Experience Period. An adjustment to account for change in network has also been applied as can be seen in Table 5. The provider networks included in this filing have undergone signficiant expansion since the experience period. UPMC's Premium Network provided coverage in rating areas 1, 2, 4, 5, and 6 during the experience period, but has since expanded to include rating area 7. The Partner Network originally offered coverage in rating areas 1, 4, and 5, but has also expanded to include some counties in rating area 3. Projected costs are expected to increase due to this expansion. A factor to account for this projected increase has been applied to the medical benefit categories in the "Other" adjustment column in worksheet 1 of the URRT. This load was not applied to prescription drugs since they were not affected by the network expansion. Due to current uncertainty surrounding the market in 2018 due to the potential repeal of the Individual Mandate, it has been required by the Pennsylvania Insurance Department that an assumption for increased morbidity of the single risk pool be implemented for the projection period. A 6% increase in the original morbidity assumption has been included in the most recent version of the filing to account for this. No other adjustments have been applied to the index rate.

Market-Adjusted Index Rate:
The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a payment of $3.42. Please see Exhibit 1 of the Supporting Exhibits for the derivation of the risk adjustment PMPM amounts for both the experience and projection period. The projected risk adjustment assumes any membership changes involve members of average risk. Thus the total dollar impact of these membership fluctuations was estimated to remain unchanged. $1.68 PMPY has been subtracted as a projected amount for the Risk Adjustment Administration Fee. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The member-weighted average of a 3.5% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.2%. This translates to a PMPM of $9.80, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for both adjustments is an increase in premium as additional revenue will be required to cover the anticipated payments.

Total Allowed Claims:
The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine

foot care and acupuncture. The projected allowed claims for these benefits is $1.27 PMPM.

Retention Items

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

Administrative Expenses:
Administrative expenses are taken from our 2016 Supplemental Health Care Exhibit (SHCE). They are broken out by lines of business and market segments matching this filing and thus are appropriate for use. Differences between the SHCE and section I, worksheet 1 of the URRT stem from the fact that the SHCE include restatements of estimates from the prior year, while the URRT only contains actual experience from 2016 (experience period). The data for Individual Health Options in Part 1 of the SHCE is all ACA-related. Please see Exhibit 2 of the Supporting Exhibits for a historical breakdown of the actual and projected administrative expenses by year.

The calculation of the average commission is displayed in the table below. Commissions are paid under all circumstances and in all geographic locations. Commissions are not paid for Special Enrollment Periods. Broker agreements have been uploaded in the Supporting Documentation section in SERFF.

Monthly Payout for Market	Members	Average Commission
$762,634	50,818	$15.01

Taxes and Fees:
Taxes and Fees increased/decreased from 2017 to 2018 to account for the return of the Health Insurance Tax for 2018. A PCORI amount of $0.20 PMPM has been added. Please note that the Risk Adjustment Administration Fee was not included in the Taxes and Fees field. As noted above in the "Market-Adjusted Index Rate" section, Marketplace user fees are applied as an adjustment to the Index Rate at the market level. Because of this, the Taxes and Fees value listed in Table 6 will not match the corresponding field in the URRT since the federal instructions specify that Marketplace user fees should be included in this field in the URRT.

Profit/Contingency:
The projected profit margin for this company will remain at 0% for 2018.

Normalized Market-Adjusted Projected Allowed Total Claims

Normalization factors for 2017 and 2018 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2017 factors have been taken from the prior rate filing of the captioned company and market. Detailed discussion on each of the 2018 factors are provided below.

Average Age Factor:
The average age factor was calculated using our projected Individual market population with the prescribed HHS Age Factors for 2018. We pulled them in summary alongside network and area data in order to back out age factor differences when determining network/area factors. It was assumed this represents the age distribution of the entire single risk pool. The number of members under each age bracket was multiplied by the

corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. The average age factor is 1.77 and corresponding age band is 50. Please see Exhibit 5 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:
The calibration factor of 1.02 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 6 of the Supporting Exhibits. Please see the "Geographic Factors" section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:
The average tobacco factor was calculated using projected membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002.

Average Benefit Richness:
Benefit richness factors were calculated so that the average value is 1.0 when weighted with projected membership. This normalization is demonstrated in Exhibit 3b of the Supporting Exhibits. These factors do not normalize to 1.0 in Table 10 of the PA Actuarial Memorandum Exhibits because this table uses current enrollment for normalization. Projected enrollment is more appropriate for this purpose due to recent changes in network and plan offerings under this company.

Average Network Factor:
Network factors were selected so that the average value is 1.0 when weighted with projected membership. This normalization is demonstrated in Exhibit 4 of the Supporting Exhibits.

Components of Rate Change

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented in the 2017 columns have been taken from this company's 2017 rate filing.

Plan Rate Development

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2018 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described below. Please see Exhibit 8 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values.

Plan Actuarial Value:
The AV for each plan was determined using the final 2018 HHS AV Calculator.

Benefit Richness (induced demand)
Please see Exhibit 3a in the Supporting Exhibits for the induced utilization exhibit. This adjustment was used to keep relativities between plans similar to what they were in the previous year. This will minimize rate increase variations by plan and consumer confusion that could result. In addition, current loss ratios exhibit significant variation between metal levels, which suggests a wider variation is necessary than what is indicated in the company-determined Pricing AV.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.27 PMPM.

Provider Network
Please see the Network Factors section below for a discussion on the development of the provider network factor applied in Table 10.

Catastrophic Eligibility
No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible. Due to current uncertainty in the market regarding the potential repeal of cost-share reduction subsidies in 2018, the Pennsylvania Insurance Department has requested that the rates for all silver plans offered both on and off the Federal Marketplace be increased by a factor of 0.94/0.7 to account for this possibility using the catastrophic eligibility column of Table 10 of the Actuarial Memorandum Rate Exhibits. Additional off-exchange only silver plans have been included in the revised filing to minimize disruption to non-subsidized members enrolled in silver plans.

Tobacco Surcharge Adjustment
The tobacco surcharge adjustment of 0.998 is the reciprocal of the average tobacco factor discussed in the "Average Tobacco Factor" section above.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. Please see Exhibit 7 of the Supporting Exhibits for historical rate changes for this company and market for a 21-year-old non-tobacco user.

Plan Factors

Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2018 is used in the development of the Consumer Adjusted Premium Rates. A tobacco load of 2.5% will be used for the Individual market in 2018.

Geographic Factors

We believe the differences in cost between network factors are the driving force behind current cost differentials at the plan level. Therefore, we decided to vary our network factors and keep all rating area factors for rating areas 1, 2, 4, 5, and 6 identical in 2017 and they will remain this way for 2018. To account for the expansion of coverage into rating areas 3 and 7, geographical factors were developed for these areas using provider fee schedules from each region.

Network Factors

Network factors for 2018 were calculated to maintain similar spreads as those implemented in the prior rate filing under the captioned company and market. They were also calculated to ensure normalization using projected membership, as demonstrated in Exhibit 4 of the Supporting Exhibits.

Service Area Composition

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2018. Due to this company's recent expansion in this market, coverage will be offered in rating areas 3 and 7 in 2018. Service area maps for 2017 and 2018 have been uploaded in the Supporting Documentation section in SERFF.

Composite Rating

No composite rating is used with these plans.

Note on Possible Legislation Changes

Please note that any changes to the ACA involving the elimination of CSR subsidies, removal of the individual mandate for health insurance, or modifications to any other provisions may dramatically affect the makeup of the single risk pool and require us to re-evaluate rate development for this filing.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 2: Projected and Actual Administrative Expenses
- Exhibit 3a: Induced Utilization Derivation
- Exhibit 3b: Induced Utilization Normalization
- Exhibit 4: Development of Network Factors
- Exhibit 5: Derivation of Age Calibration Factor

- Exhibit 6: Derivation of Geographical Calibration Factor
- Exhibit 7: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User
- Exhibit 8: Proportion of Plan Adjusted Index Rates and AV Pricing Values
- Exhibit 9a: Development of Projected Enrollment by Network and Metal Level
- Exhibit 9b: Development of Projected Enrollment by Plan and Subsidy Level
- Exhibit 9c: Projected Enrollment by Rating Area

Actuarial Certification

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

[redacted]

UPMC Health Plan

5/22/2017
Date

Appendix I

SCID	Company	Market Size	Metal	Summary of Changes from 2017
16322PA0050035	UPMC Health Options	IND	Platinum	No changes made
16322PA0050107	UPMC Health Options	IND	Platinum	No changes made
16322PA0040012	UPMC Health Options	IND	Platinum	No changes made
16322PA0050033	UPMC Health Options	IND	Gold	Increased deductible from $750 to $800; Increased MOOP from $3,500 to $5,000; Increased PCP copay from $10 to $20; Increased specialist copay from $45 to $50; Increased Mental/Behavioral Health from $30 to $50; Increased Rehab Speech Therapy, PT/OT, Laboratory all from $30 to $40
16322PA0050106	UPMC Health Options	IND	Gold	Increased deductible from $750 to $800; Increased MOOP from $3,500 to $5,000; Increased PCP copay from $10 to $20; Increased specialist copay from $45 to $50; Increased Mental/Behavioral Health from $30 to $50; Increased Rehab Speech Therapy, PT/OT, Laboratory all from $30 to $40
16322PA0040010	UPMC Health Options	IND	Gold	Increased deductible from $750 to $800; Increased MOOP from $3,500 to $5,000; Increased PCP copay from $10 to $20; Increased specialist copay from $45 to $50; Increased Mental/Behavioral Health from $30 to $50; Increased Rehab Speech Therapy, PT/OT, Laboratory all from $30 to $40
16322PA0050031	UPMC Health Options	IND	Silver $3,500 CSR 94	Increased deductible from $100 to $150
16322PA0050031	UPMC Health Options	IND	Silver $3,500 CSR 87	Increased deductible from $1,000 to $1,250; Increased MOOP from $2,350 to $2,450

16322PA0050031	UPMC Health Options	IND	Silver $3,500 CSR 73	Decreased deductible from $3,250 to $2,650; Added Rx-subdeductible of $150; Increased MOOP from $4,800 to $5,850; ER Copay increased from $750 to $800; Increased PCP visit from $10 to $25; Increased specialist from $70 to $75; Increased Mental/Behavioral Health copay from $30 to $75; Increased Rehab Speech Therapy, PT/OT, Laboratory all from $30 to $40
16322PA0050031	UPMC Health Options	IND	Silver $3,500	Increased deductible from $3,250 to $3,500; Added Rx-subdeductible of $150; Increased MOOP from $7,150 to $7,350; ER Copay increased from $750 to $800; Increased PCP visit from $10 to $25; Increased specialist from $70 to $75; Increased Mental/Behavioral Health copay from $30 to $75; Increased Rehab Speech Therapy, PT/OT, Laboratory all from $30 to $40
16322PA0050104	UPMC Health Options	IND	Silver $3,500 94 CSR	Increased deductible from $100 to $150
16322PA0050104	UPMC Health Options	IND	Silver $3,500 CSR 87	Increased deductible from $1,000 to $1,250; Increased MOOP from $2,350 to $2,450
