Ms. Tracie Gray
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Life, Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

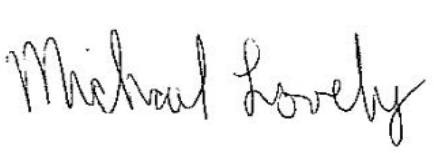
Dear Ms. Gray,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Individual On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2020 through 12/31/2020.

Company Name/NAIC #: UPMC Health Options, Inc./15345
Market: Individual
On or Off Exchange: On and Off
Effective Date of Coverage: 1/1/2020
Average Rate Change Requested: 4.94% ($13.80)
Range of Rate Change Requested: -40.50% to 8.21% (-$113.06 to $22.92)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 6, 7, 9 (no change from 2019)
Metal Levels Offered: Catastrophic, Bronze, Silver, Gold
Currently Enrolled Lives: 137,526
Currently Enrolled Policyholders: 98,659
Number of Plans Offered in 2020: 36 (3 fewer than 2019)
Total additional annual revenue generated from the proposed rate change: $7,154,698
Corresponding Contract Form #: 663, 664, 667, 671, 672, 673, 674, 675
Binder ID#: UPMC-PA20-125092217
HIOS Issuer ID #: 16322
Submission Tracking #: UPMC-131924266

If you have any questions or require additional information, please call me at 412-454-7849 or email me at lovelymt@upmc.edu.

Sincerely,



Michael Lovely, FSA, CERA, MAAA

# Attachment I

# Rate Change Summary

## UPMC Health Options, Inc. – Individual Plans

Rate request filing ID # UPMC-131924266 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

### Overview

| | |
|---|---|
| Initial requested average rate change: | 5.22% |
| Revised requested average rate change: | 3.20% |
| Range of requested rate change: | -41.48% to 6.41% |
| Effective date: | 1/1/2020 |
| Mapped Members: | 137,557 |
| Available in: | Rating Areas 1, 2, 3, 4, 5, 6, 7, 9 |

### Key information

**Jan. 2018-Dec. 2018 financial experience**

| | |
|---|---|
| Premiums | $842,415,260 |
| Claims | $670,631,775 |
| Administrative expenses | $85,525,274 |
| Taxes & fees | $21,579,781 |
| Company made (after taxes) | **$64,678,430** |

**How it plans to spend your premium**

This is how the insurance company plans to spend the premium it collects in 2020:

| | |
|---|---|
| Claims: | 83.54**%** |
| Administrative: | 9.78**%** |
| Taxes & fees: | 4.68% |
| Profit: | 2.00**%** |

The company expects its annual medical costs to increase **6.01%**.

### Explanation of requested rate change

Additional premium is needed to account for the higher cost and utilization of medical services each year. The proposed rate change also accounts for an increase in anticipated Risk Adjustment payable relative to the prior year and projected increases in taxes and fees for 2020.

August 8, 2019

Ms. Tracie Gray
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Life, Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Dear Ms. Gray,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Individual On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2020 through 12/31/2020. The revised filing includes the following changes:

*1.) In response to Department question 5, round 1, the applied annual trends for each benefit category included in Tables 3 and 3b of the PA Actuarial Memorandum Exhibits have been corrected.*

*2.) In response to Department question 13, round 1, the actuarial memoranda have been corrected to include the proper exchange user fee of 3.0%.*

*3.) In response to Department question 16, round 1, the completion factors listed in the actuarial memoranda have been corrected.*

*4.) In response to Department question 25, round 1, the actuarial memoranda have been updated to exclude the outdated language addressing projected enrollment assumptions across cost-share reduction variants.*

*5.) In response to Department questions 27 and 28, round 1, the risk adjustment user fee has been removed from table 5 of the PA Actuarial Memorandum Exhibits and has instead been accounted for in tables 6 and 10.*

*6.) In response to Department question 29, round 1, the actuarial certifications included at the end of the actuarial memoranda have been updated.*

*7.) In response to Department question 33, round 1, the language in the actuarial memroanda has been revised to better identify the data included in the manual pool for the Individual market.*

*8.) An additional update to table 10 of the PA Actuarial Memorandum Exhibits was made to correct the plan names and company-determined pricing actuarial values for the following SCIDs:*

***16322PA0040025***
***16322PA0050105***
***16322PA0050108***

*9.) An additional correction was made in table 5 of the PA Actuarial Memorandum Exhibits to show that the experience period data was deemed 100% credible.*

*10.) Additional language was added to the actuarial memoranda to discuss rounding error included in the projected index rate shown in the URRT relative to table 5 of the PA Actuarial Memorandum Exhibits.*

*11.) In response to Department question 2, round 2, tables 2, 2b, 3, and 3b of the PA Actuarial Memoranum Exhibits as well as the actuarial memoranda have been updated to account for the capitation of pediatric dental claims.*

*12.) In response to Department question 11, round 2, an adjustment factor accounting for the 3-child maximum has been incorporated in the age calibration factor, which has been updated in table 10 of the PA Actuarial Memorandum Exhibits.*

*13.) The change in morbidity factor applied in Table 5 of the PA Actuarial Memorandum Exhibits has been lowered to better account for the anticipated morbidity of the underlying population during the projection period.*

Company Name/NAIC #: UPMC Health Options, Inc./15345
Market: Individual
On or Off Exchange: On and Off
Effective Date of Coverage: 1/1/2020
Average Rate Change Requested: 3.20% ($8.93)
Range of Rate Change Requested: -41.48% to 6.41% (-$115.82 to $17.91)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 6, 7, 9 (no change from 2019)
Metal Levels Offered: Catastrophic, Bronze, Silver, Gold
Currently Enrolled Lives: 137,526
Currently Enrolled Policyholders: 98,659

# PA Actuarial Memorandum

## Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

**Company Information**

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Options, Inc.
NAIC #: 15345
HIOS Issuer ID: 16322
Market: Individual
Exchange: On and Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2020

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131924266
Form Filing SERFF Tracking #: UPMC-131919534, UPMC-131919539, UPMC-131919595, UPMC-131919597, UPMC-131923154, UPMC-131919990, UPMC-131919615, UPMC-131919931
Binder SERFF Tracking #: UPMC-PA20-125092217

**Rate History and Proposed Variations in Rate Changes**

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2020 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

| SERFF Tracking # | Year | Rate Change |
|---|---|---|
| UPMC-130536844 | 2017 | 26.5% |
| UPMC-131034732 | 2018 | 41.2% |
| UPMC-131495924 | 2019 | 2.0% |

**Average Rate Change**

- Average rate change in Table 10, column AC of the PA Actuarial Memorandum Exhibits: 3.2%

- Change in 21-year-old non-tobacco premium PMPM in Table 11, cell AN13 of the PA Actuarial Memorandum Exhibits: -0.3%

**Membership Count**

Various breakdowns of the membership count for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits.

**Benefit Changes**

A table with these changes has been included in Appendix I. No plans have actuarial values that fall in the expanded de minimis range.

**Single Risk Pool**

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

**Experience Period Claims and Premium**

Claims and premium data for all non-grandfathered policies in the single risk pool for the captioned company and market from the experience period (January 2018 - December 2018) with three months of run-out are displayed in Table 2 of the PA Actuarial Memorandum Exhibits. This section provides a discussion of each field in the table and its relation to the corresponding fields on the URRT. Please note that no data for transitional policies is included in this table.

<u>Earned Premium:</u>
This represents the revenue accumulated by the captioned company and market during the experience period. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium listed in Table 2 does match the total premium listed in section I, worksheet 1 of the URRT.

<u>Paid Claims:</u>
This field includes uncompleted paid medical, pharmacy, and pediatric vision experience period claims for the captioned company and market.

Ultimate Incurred Claims:
This field includes completed paid medical and pharmacy experience period claims for the captioned company and market. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire ACA-related Individual block of business and no unexpected factors were observed. Because three months run-out is available the impact of IBNR is minimal. The completion factors used are displayed in the table below. Please note that the ultimate incurred claims shown in Table 2 do not match the total incurred claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the ultimate incurred claims less total prescription drug rebates listed in Table 2 and HHS cost-sharing.

| Month | Completion Factor |
|---|---|
| 1/1/2018 | 1.0000 |
| 2/1/2018 | 1.0000 |
| 3/1/2018 | 0.9999 |
| 4/1/2018 | 0.9997 |
| 5/1/2018 | 0.9994 |
| 6/1/2018 | 0.9987 |
| 7/1/2018 | 0.9970 |
| 8/1/2018 | 0.9933 |
| 9/1/2018 | 0.9887 |
| 10/1/2018 | 0.9866 |
| 11/1/2018 | 0.9786 |
| 12/1/2018 | 0.9715 |

Member Months:
The sum of the experience period member months shown in Table 1 is also displayed in Table 2 and matches the value shown in section I, worksheet 1 of the URRT.

Estimated Cost Sharing:
This field represents the difference between allowed claims and ultimate incurred claims in Table 2.

Allowed Claims:
This field includes allowed medical and pharmacy experience period claims as well as pediatric vision claims from the experience period for the captioned company and market. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Please note that the allowed claims shown in Table 2 do not match the total allowed claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the allowed claims less total prescription drug rebates listed in Table 2.

Non-EHB portion of Allowed Claims:
This field displayed the amount of allowed experience period claims that can be attributed to non-EHBs for the captioned market and company.

Total Prescription Drug Rebates:
This field shows the amount of prescription drug rebates received for the captioned company and market during the experience period. Pharmacy rebates have been removed from the total incurred and allowed claims displayed in section I, worksheet 1 of the URRT.

Total EHB Capitation:

Pediatric dental benefits were paid for via capitation during the experience period. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail.

Total Non-EHB Capitation:
No non-EHB benefits were paid for via capitation during the experience period.

Estimated Risk Adjustment:
Experience period Risk Adjustment was estimated to be a payment of $42,491,928 per suggestion from the Pennsylvania Insurance Department based on data accrued through April 2019, which translates to a PMPM of $26.10. Based on this estimate and past experience, we believe this value is a reasonable estimate until the actual values are released later this year.

Loss Ratio:
The loss ratio calculated in Table 2 is 78.61%.

**Credibility of Data**

Based on a large member month count of 1,627,833 during the experience period, we believe this data is credible enough to use 100%, just as was concluded in prior filings for this company and market. Because of this, the manual data displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits match the data displayed in tables 2, 3, and 4.

**Trend Identification**

The overall annual trend used in rate development is 6.01%. Historical allowed claims for our Individual block of ACA-compliant business were used to develop year over year trend factors for use in the projected rates. The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. Service categories were defined to be consistent with the URRT instructions. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and 3b. Please see Exhibit 2 of the Supporting Exhibits for trend development. We believe that trends will be lower than what is implied by the historical data, which is why a value of 6.01% was used in rate development.

**Historical Experience**

Historical data from the four most recent calendar years for the captioned company and market with three months of run-out are provided in Table 4. Allowed claims were developed using the same manner described above for Table 2. The historical data listed in Table 4b belongs to ACA-related Individual business under the captioned company and is identical to the data in Table 4.

## Rate Development & Change

**Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims**

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below.

Index Rate:
For this filing, the Index Rate of the Experience Period is calculated from the captioned company's fully-credible experience period EHB claims data for the single risk pool in the state market, which is demonstrated in Table 2 of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 6.01% annual trend to the Index Rate of Experience Period. Due to current uncertainty surrounding the market in 2020 due to the repeal of the Individual Mandate, it has been required by the Pennsylvania Insurance Department that an assumption for increased morbidity of the single risk pool be implemented for the projection period. A 6% increase in morbidity has been applied in the filing to account for this. An additional adjustment factor of 0.977 has been applied to lower the overall morbidity factor to 1.035. As the premier academic medical center and preeminent provider of high-acuity care in Western Pennsylvania, we previously assumed that the majority of consumers with significant health needs would choose UPMC Health Plan products in order to maintain access to UPMC facilities and providers. Given that access to UPMC is now available through competitors, it is reasonable to assume that some number of consumers who would have purchased UPMC Health Plan products will instead purchase coverage from a competing carrier, particularly those with access to multiple provider systems. We believe that individuals with significant health needs are the most likely, all else being equal, to prioritize decisions on this basis. As such, we believe it is possible that any shift in consumer coverage purchasing decisions may be skewed toward those with significant health needs, thereby lowering our expected average morbidity for 2020, which is accounted for in the additional adjustment factor.

No other adjustments have been applied to the index rate. The average age for our 2018 experience period Individual risk pool was 44.4 with an average premium factor of 1.85. This is comparable to our 2019 experience so far with age 44.9 and premium factor 1.87. This change in factors is small enough that the insured population is considered to be stable, and no additional adjustment for demographics was deemed necessary. Please note that the Index Rate of Projection Period of $549.05 shown in Table 5 does not exactly match the corresponding value shown in section II, worksheet 1 of the URRT. This is due to rounding error that is introduced because of the rounding requirements in the newly re-formatted URRT. The value shown in Table 5 is representative of the actual index rate.

Market-Adjusted Index Rate:
The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a payment of $26.11, which is displayed in Table 5. Please see Exhibit 1 of the Supporting Exhibits for the derivation of this value. The value entered in section II, worksheet 1 of the URRT was $33.97 since the calculation of the Marketed Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index

Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

The member-weighted average of a 3.0% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.2%. This load is developed based on fees from on-exchange policies, but is spread over all policies uniformly. This translates to a PMPM of $11.89, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for this adjustment is an increase in premium as additional revenue will be required to cover the anticipated payment.

Total Allowed Claims:
The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.16 PMPM.

**Retention Items**

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

Administrative Expenses:
Administrative costs of 9.78% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

[This information redacted for publication.]

Taxes and Fees:
Taxes and Fees increased from 0% in 2019 to 2.45% in 2020 to account for the return of the Health Insurance Providers Fee in 2020. This load also accounts for the projected Federal Income Tax in 2020. Please note that the Risk Adjustment Administration Fee was included in the Taxes and Fees field in Table 6 and the URRT.

Profit/Contingency:
The projected profit margin for this company will remain at 2% for 2020. This value is listed in both Table 6 and the URRT. The same level of profit margin is expected for each plan included in this filing.

Projected Loss Ratio
The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 82.0%, as shown in Exhibit 4 of the Supporting Exhibits.

**Normalized Market-Adjusted Projected Allowed Total Claims**

Normalization factors for 2019 and 2020 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2019 factors have been taken from the prior annual rate filing of the captioned company and market. Detailed discussion on each of the 2020 factors are provided below.

Average Age Factor:
The average age factor was calculated using our projected ACA-related Individual population with the prescribed HHS Age Factors for 2020. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant Individual business, the average age factor is 1.87 and average age was 44.4 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.998, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.86. Please see Exhibit 5 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:
The calibration factor of 0.999 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 6 of the Supporting Exhibits. Please see the Geographic Factors section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:
The average tobacco factor was calculated using projected membership, which is assumed to have the same split for tobacco status as current membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002. The derivation of this factor is shown below.

| Tobacco Status | Feb 2019 Members | Split | Tobacco Factor | Calibration Factor |
|---|---|---|---|---|
| Non-User | 126,079 | 91.3% | 1.000 | 0.913 |
| User | 11,995 | 8.7% | 1.025 | 0.089 |
| **Total** | 138,074 | 100.0% | | **1.002** |

Average Benefit Richness:
Benefit richness factors were calculated so that the average value is 1.0 when weighted with current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Average Network Factor:
Network factors were calculated so that the average value is 1.0 when weighted with current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

**Components of Rate Change**

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented in the 2019 columns have been taken from this company's

2019 annual rate filing.

## Plan Rate Development

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2020 Plan Adjusted Index Rates. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:
The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims.

Benefit Richness (induced demand)
Please see Exhibit 3 in the Supporting Exhibits for the induced utilization exhibit. Please note that the average tobacco factor was set to 1.0 in Exhibit 3 since the tobacco surcharge adjustment was removed from Table 10, which means that this factor should not be included in the induced utilization development. The benefit richness adjustment was used to keep relativities between plans similar to what they were in the previous year and account for differences in induced demand between plans with different metal levels. This will minimize rate increase variations by plan and consumer confusion that could result. However, factors for bronze plans were lowered to match those of corresponding silver plans.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.16 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2020 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans. This load has not changed from the prior filing.

Provider Network
Please see the Network Factors section below for a discussion on the development of the provider network factor applied in Table 10.

Catastrophic Eligibility
No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible.

Non-Funding of CSR Adjustment
To account for the elimination of funding for cost-share reduction subsidies, the Pennsylvania Insurance Department has mandated the rates for all silver plans offered both on and off the Federal Marketplace be increased by a factor of 1.20 in Table 10 of the Actuarial Memorandum Rate Exhibits. Several off-exchange only silver plans have been included for 2020 to minimize disruption to non-subsidized members enrolled in silver plans.

## Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. Please see Exhibit 7 of the Supporting Exhibits for historical rate changes for this company and market for a 21-year-old non-tobacco user.

## Plan Factors

### Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2020 is used in the development of the Consumer Adjusted Premium Rates. A tobacco load of 2.5% will be used for all age bands in the Individual market in 2020. This load has not changed from 2019.

### Geographic Factors

The geographic rating areas used within this filing are the same as those defined by the state. To better reflect the varying costs of delivery between each geographical region in which coverage is offered, rating area factors have been updated for 2020. The table below summarizes changes in these factors:

| Region | 2019 | 2020 |
|---|---|---|
| 1 | 1.00 | 0.96 |
| 2 | 1.00 | 1.06 |
| 3 | 1.26 | 1.22 |
| 4 | 1.00 | 0.96 |
| 5 | 1.00 | 0.96 |
| 6 | 1.35 | 1.30 |
| 7 | 1.37 | 1.32 |
| 9 | 1.20 | 1.15 |

### Network Factors

Network factors for 2020 were calculated to reflect cost differentials between networks and to ensure normalization using current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. The current and proposed network factors are also shown in Table 14 of the PA Actuarial Memorandum Exhibits.

### Service Area Composition

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2020. Service area maps for 2019 and 2020 have been uploaded in the Supporting Documentation section in SERFF.

**Composite Rating**

No composite rating is used with these plans.

**Warning Alerts**

No validation errors appear in the URRT.

**List of Supporting Exhibits**

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 2: Derivation of Annual Trend
- Exhibit 3: Induced Utilization Derivation
- Exhibit 4: Derivation of Projection Period MLR
- Exhibit 5: Derivation of Age Calibration Factor
- Exhibit 6: Derivation of Geographical Calibration Factor
- Exhibit 7: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User

**Actuarial Certification**

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

| Rating Area 7 | 1.3164 |
| Rating Area 9 | 1.1526 |

# RFJ Part II – Consumer Friendly Justification

Individual Exchange EPO/PPO Rate Filing

The rate change for UPMC Health Options Individual plans is 3.20% for 2020. Additional premium is needed to account for the higher cost and utilization of medical services each year. The proposed rate change also accounts for an increase in anticipated Risk Adjustment payable relative to the prior year and projected increases in taxes and fees for 2020.

**Scope and Range of the Rate Increase**

The number of individuals affected by this rate increase is 137,526. The proposed rate increase varies by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The range of the proposed rate change is -41.48% to 6.41%.

**Financial Experience of the Product**

| | | |
|---|---|---|
| Premiums | $ | 842,415,260 |
| Claims | $ | 670,631,775 |
| Administrative expenses | $ | 85,525,274 |
| Taxes & fees | $ | 21,579,781 |
| **Company made (after taxes)** | **$** | **64,678,430** |

**Changes in Medical Service Costs**

Cost and utilization increases are expected to increase by approximately 6.01% for 2020.

**Changes in Benefits**

No changes in benefits contributed significantly to the increase.

**Administrative Costs and Anticipated Profits**

No major changes in administrative costs are anticipated. A profit margin of 2% is anticipated for 2020.

# RFJ Part III: Actuarial Memorandum

## General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Identifying Information:
Company Legal Name: UPMC Health Options, Inc.
NAIC #: 15345
State: PA
HIOS Issuer ID: 16322
Market: Individual
Exchange: On and Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2020

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131924266
Form Filing SERFF Tracking #: UPMC-131919534, UPMC-131919539, UPMC-131919595, UPMC-131919597, UPMC-131923154, UPMC-131919990, UPMC-131919615, UPMC-131919931
Binder SERFF Tracking #: UPMC-PA20-125092217

Rate History:
Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2020 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

| SERFF Tracking # | Year | Rate Change |
|---|---|---|
| UPMC-129389350 | 2014 | 0.0% |
| UPMC-129640677 | 2015 | 0.0% |
| UPMC-130071357 | 2016 | 9.7% |
| UPMC-130536844 | 2017 | 26.5% |

| | | |
|---|---|---|
| UPMC-131034732 | 2018 | 41.2% |
| UPMC-131495924 | 2019 | 2.0% |

## Proposed Rate Increase(s)

Reasons for Rate Increase(s):
The proposed rate increase for PPO products in 2020 is 0.0%
The proposed rate increase for EPO products in 2020 is 0.0%

The major reasons for the increase include the following:

• No increase is proposed for 2020

## Market Experience

**Single Risk Pool**

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

**Experience Period Premium and Claims**

Paid Through Date:
The reported claims during the experience period have a paid through date of March 2019.

Current Date:
Current enrollment and premium data is reported as of February 2019.

Premiums (net of MLR Rebate) in Experience Period:
Section I, worksheet 1 of the URRT contains calendar year 2018 premium for all non-grandfathered policies in the single risk pool for the captioned company and market. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium is also listed in Table 2 of the PA Actuarial Memorandum Exhibits.

Allowed and Incurred Claims Incurred During the Experience Period:
Section I, worksheet 1 of the URRT contains calendar year 2018 claims experience for all non-grandfathered policies in the single risk pool for the captioned company and market, paid through March 2019. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire block of ACA-related Individual business and no unexpected factors were observed. Because three months run-out is available the impact of IBNR is minimal.

| Month | Completion Factor |
|---|---|
| 1/1/2018 | 1.0000 |
| 2/1/2018 | 1.0000 |
| 3/1/2018 | 0.9999 |
| 4/1/2018 | 0.9997 |
| 5/1/2018 | 0.9994 |
| 6/1/2018 | 0.9987 |
| 7/1/2018 | 0.9970 |
| 8/1/2018 | 0.9933 |
| 9/1/2018 | 0.9887 |
| 10/1/2018 | 0.9866 |
| 11/1/2018 | 0.9786 |
| 12/1/2018 | 0.9715 |

**Benefit Categories**

Medical claims are split into nine categories in our data warehouse. They are mapped into the categories in the URRT as follows:

| UPMC Benefit Category | URRT Benefit Category |
|---|---|
| Inpatient | Inpatient Hospital |
| Catastrophic | Inpatient Hospital |
| Outpatient | Outpatient Hospital |
| Behavioral | Outpatient Hospital |
| PCP | Professional |
| Specialist | Professional |
| Diagnostic | Other Medical |
| ER | Other Medical |
| Other | Other Medical |
| Pediatric Dental | Other Medical |
| Pediatric Vision | Other Medical |

Drug claims are in separate tables and directly mapped into the Prescription Drugs category.

**Projection Factors**

Trend Factors (cost/utilization):
The overall annual trend used in rate development is 6.01%. Historical allowed claims for our Individual block of ACA-compliant business were used to develop year over year trend factors for use in the projected rates. The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. Service categories were defined to be consistent with the URRT instructions. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced

demand column has been populated with zeroes in Tables 3 and 3b. Please see Exhibit 2 of the Supporting Exhibits for trend development. We believe that trends will be lower than what is implied by the historical data, which is why a value of 6.01% was used in rate development.

**Adjustments to Trended EHB Allowed Claims PMPM**

Changes in the Morbidity of the Population Insured:
Due to current uncertainty surrounding the market in 2020 due to the repeal of the Individual Mandate, it has been required by the Pennsylvania Insurance Department that an assumption for increased morbidity of the single risk pool be implemented for the projection period. A 6% increase in morbidity has been applied in the filing to account for this. An additional adjustment factor of 0.977 has been applied to lower the overall morbidity factor to 1.035. As the premier academic medical center and preeminent provider of high-acuity care in Western Pennsylvania, we previously assumed that the majority of consumers with significant health needs would choose UPMC Health Plan products in order to maintain access to UPMC facilities and providers. Given that access to UPMC is now available through competitors, it is reasonable to assume that some number of consumers who would have purchased UPMC Health Plan products will instead purchase coverage from a competing carrier, particularly those with access to multiple provider systems. We believe that individuals with significant health needs are the most likely, all else being equal, to prioritize decisions on this basis. As such, we believe it is possible that any shift in consumer coverage purchasing decisions may be skewed toward those with significant health needs, thereby lowering our expected average morbidity for 2020, which is accounted for in the additional adjustment factor.

Changes in Benefits:
No changes were made to the PA EHB Benchmark plan for 2020, so no adjustments were necessary.

Changes in Demographics:
The average age for our 2018 experience period Individual risk pool was 44.4 with an average premium factor of 1.85. This is comparable to our 2019 experience so far with age 44.9 and premium factor 1.87. This change in factors is small enough that the insured population is considered to be stable, and no additional adjustment for demographics was deemed necessary.

Other Adjustments:
No other adjustments have been applied to the index rate.

**Credibility Manual Rate Development**

Source and Appropriateness of Manual Rate Used:
The manual rate was not used as the experience period provided 1,627,833 member months of data, which was deemed fully credible.

Adjustments Made to the Data:
No adjustments were necessary since the rate manual was not used for this filing.

Inclusion of Capitation Payments:
Pediatric dental benefits are projected to be paid for via capitation.

**Credibility of Experience**

Based on the large member month count of the experience period data, we believe the experience period data is credible enough to use 100%.

**Establishing the Index Rate**

For this filing, the Index Rate of the Experience Period is calculated from the captioned company's fully-credible experience period EHB claims data for the single risk pool, which is demonstrated in Table 2 of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 6.01% annual trend to the Index Rate of Experience Period. The adjustments described in the Projection Factors section above were then applied to the trended manual rate to generate the Index Rate of the Projection Period. Please note that the Index Rate of Projection Period of $549.05 shown in Table 5 does not exactly match the corresponding value shown in section II, worksheet 1 of the URRT. This is due to rounding error that is introduced because of the rounding requirements in the newly re-formatted URRT. The value shown in Table 5 is representative of the actual index rate. Claims for routine foot care and acupuncture were not included in the calculation of the index rates despite being covered during the experience period since they are classified as non-EHBs.

**Paid to Allowed Ratio**

The Paid to Allowed Average Factor was calculated by taking the weighted average of the company-determined Actuarial Values for all plans using current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

**Development of the Market Adjusted Index Rate**

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment and Marketplace Fees adjustments are described above in the Projected Risk Adjustments PMPM and Taxes and Fees sections, respectively.

<u>Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:</u>
Experience period Risk Adjustment was estimated to be a payment of $42,491,928 per suggestion from the Pennsylvania Insurance Department based on data accrued through April 2019, which translates to a PMPM of $26.10. Based on this estimate and past experience, we believe this value is a reasonable estimate until the actual values are released later this year. No data for the Transitional Reinsurance Program under PPACA has been included as this program expired at the end of 2016.

<u>Projected Risk Adjustments PMPM:</u>
The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a payment of $26.11, which is displayed in Table 5. Please see Exhibit 1 of the Supporting Exhibits for the derivation of this value. The value entered in section II, worksheet 1 of the URRT was $33.97 since the calculation of the Marketed Adjusted Index Rate is done on an

allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

Exchange User Fees:
The member-weighted average of a 3.0% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.2%. This load is developed based on fees from on-exchange policies, but is spread over all policies uniformly. This translates to a PMPM of $11.89, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for this adjustment is an increase in premium as additional revenue will be required to cover the anticipated payment.

**Non-Benefit Expenses and Profit & Risk**

Administrative Expense Load:
Administrative costs of 9.78% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

[This information redacted for publication.]

Profit & Risk Margin:
The projected profit margin for this company will remain at 2% for 2020. This value is listed in both Table 6 and the URRT. The same level of profit margin is expected for each plan included in this filing.

Taxes and Fees:
Taxes and Fees increased from 0% in 2019 to 2.45% in 2020 to account for the return of the Health Insurance Providers Fee in 2020. This load also accounts for the projected Federal Income Tax in 2020. Please note that the Risk Adjustment Administration Fee was included in the Taxes and Fees field in Table 6 and the URRT.

## Plan Adjusted Index Rates

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2020 Plan Adjusted Index Rates. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:
The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected

paid claims to projected allowed claims.

Benefit Richness (induced demand)

Please see Exhibit 3 in the Supporting Exhibits for the induced utilization exhibit. Please note that the average tobacco factor was set to 1.0 in Exhibit 3 since the tobacco surcharge adjustment was removed from Table 10, which means that this factor should not be included in the induced utilization development. The benefit richness adjustment was used to keep relativities between plans similar to what they were in the previous year and account for differences in induced demand between plans with different metal levels. This will minimize rate increase variations by plan and consumer confusion that could result. However, factors for bronze plans were lowered to match those of corresponding silver plans.

Benefits in addition to EHBs

Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.16 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2020 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans. This load has not changed from the prior filing.

Provider Network

Network factors for 2020 were calculated to reflect cost differentials between networks and to ensure normalization using current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. The current and proposed network factors are also shown in Table 14 of the PA Actuarial Memorandum Exhibits.

Catastrophic Eligibility

No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible.

Non-Funding of CSR Adjustment

To account for the elimination of funding for cost-share reduction subsidies, the Pennsylvania Insurance Department has mandated the rates for all silver plans offered both on and off the Federal Marketplace be increased by a factor of 1.20 in Table 10 of the Actuarial Memorandum Rate Exhibits. Several off-exchange only silver plans have been included for 2020 to minimize disruption to non-subsidized members enrolled in silver plans.

**Calibration**

Age Curve Calibration:

The average age factor was calculated using our projected ACA-related Individual population with the prescribed HHS Age Factors for 2020. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant Individual business, the average age factor is 1.87 and average age was 44.4 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.998, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.86. Please see Exhibit 5 in the Supporting Exhibits for the calculation of this factor.

Geographic Factor Calibration:

The geographic rating areas used within this filing are the same as those defined by the state. To better reflect the varying costs of delivery between each geographical region in which coverage is offered, rating area factors have been updated for 2020. The table below summarizes changes in these factors:

| Region | 2019 | 2020 |
|---|---|---|
| 1 | 1.00 | 0.96 |
| 2 | 1.00 | 1.06 |
| 3 | 1.26 | 1.22 |
| 4 | 1.00 | 0.96 |
| 5 | 1.00 | 0.96 |
| 6 | 1.35 | 1.30 |
| 7 | 1.37 | 1.32 |
| 9 | 1.20 | 1.15 |

The calibration factor of 0.999 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 6 of the Supporting Exhibits.

Tobacco Use Rating Factor Calibration:
The average tobacco factor was calculated using projected membership, which is assumed to have the same split for tobacco status as current membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002. The derivation of this factor is shown below.

| Tobacco Status | Feb 2019 Members | Split | Tobacco Factor | Calibration Factor |
|---|---|---|---|---|
| Non-User | 126,079 | 91.3% | 1.000 | 0.913 |
| User | 11,995 | 8.7% | 1.025 | 0.089 |
| **Total** | 138,074 | 100.0% | | **1.002** |

**Consumer Adjusted Premium Rate Development**

The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates. Please see Exhibit 7 of the Supporting Exhibits for historical Consumer Adjusted Premium Rate changes for this company and market for a 21-year-old non-tobacco user.

## Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 82.0%, as shown in Exhibit 4 of the Supporting Exhibits.

## Plan Product Info

### AV Metal Values

Metal values were determined using the final 2020 HHS AV Calculator.

### Membership Projections

Membership projections were developed based on our anticipated competitive positioning in the market combined with our current enrollment distribution by plan.

### Terminated Plans and Products

Please see Table 10 of the PA Actuarial Memorandum Exhibits for a mapping of all terminated SCIDs to a 2020 plan.

### Warning Alerts

No validation errors appear in the URRT.

### Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conductive effective rate review for all submitted rates.

**List of Supporting Exhibits**

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 2: Derivation of Annual Trend
- Exhibit 3: Induced Utilization Derivation
- Exhibit 4: Derivation of Projection Period MLR
- Exhibit 5: Derivation of Age Calibration Factor
- Exhibit 6: Derivation of Geographical Calibration Factor
- Exhibit 7: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User

**Actuarial Certification**

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

Dear Mr. Lovely:

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. The updated URR instructions require the quantitative impacts of the rate increase drivers. Please provide an estimate of the amount of the average rate increase contributed by the rate increase factors, considering the rate increase drivers included in the Part III memo do not match Table 8.

**The quantitative impacts of the rate increase drivers listed in the Part III memo are:**

**● Increase in anticipated Risk Adjustment payment relative to prior year: -0.9% (average across products)**

**● Return of the Health Insurer Provider's Fee in 2020: 2.2% (average across products)**

**These aren't the only factors that exist, which is why they don't exactly line up with the total.**

2. Please explain how morbidity was removed from impacting rate increases per the URR instructions.

**All pricing AVs were determined using the same pricing tool, which uses claims data and a base population from UPMC's fully insured commercial block of business. Since the same tool was used for all plans, this eliminates any impact from morbidity at the plan level, and differing rate increases by product type are purely based on differences in benefit design for all plans within a given product.**

3. Table 1 and Table 2 of the PAAM indicate 1,627,833 member months in the experience, but the URRT WS1 indicates 1,627,678. Additionally, the projected member months are also slightly different. Please explain these discrepancies.

**These exhibits require different levels of data detail. Not all of this detail is available within our underlying data. We deemed this discrepancy immaterial.**

4. What are the measurement units used for the "Other Medical" category?

**Services are the measurement unit for the Other Medical category.**

5. Since the trends were not developed from Exhibit 2, please provide support for the trends used in the PA Exhibits and the URRT. We also note that the URRT trends do not match exactly the ones in the PA Exhibits please explain.

a. Please explain why the trends provided in Exhibit 2 of the Supporting Exhibits file do not match the PAAM.

b. Please explain why a trend of 6% was chosen.

c. Please explain the high cost trends for the inpatient hospital and other medical benefit categories.

d. Please explain the low trends for prescription drug.

**The slight difference in trends shown in the PA Exhibits relative to those in the URRT stems from rounding error that arises from the requirements of the re-formatted URRT.**

**a. There was an error with the calculations in exhibit 2, which has been corrected as part of this correspondence. Please note that the trends displayed in exhibit 2 now match those shown in the PA Exhibits and the URRT. Also, this correction has not affected the magnitude of the applied annual trend.**

**b. The raw historical data implies an annual trend of 12.3% as shown in exhibit 2. We do not believe that this value accurately represents future trends that will be observed in this market, leading to the decision to lower the trend applied in rate development. This was done by introducing an adjustment factor that uniformly decreases the historical trends for each benefit category so that an overall annual trend of 6.0% is applied in rate development.**

**c. The raw data used in trend calculations suggest very large increases in unit cost for the inpatient hospital and other medical benefit categories as indicated in column L of exhibit 2 of the Supporting Exhibits. We believe actual trends for these categories will be lower than what is implied by the historical data, which is why an adjustment factor was introduced to lower the trend as shown in exhibit 2.**

**d. The low trend observed for prescription drug can be attributed to utilization of brand drugs shifting over to generic drugs, leading to lower unit costs for pharmacy and ultimately a lower than expected unit cost trend. It can also be attributed to an increase in pharmacy rebates in recent years.**

6. Please explain why the adjustment method for trend was changed from Plan Year 2019 to Plan Year 2020. Please recalculate and provide the adjustment factors needed to produce the original requested trends using a consistent method for both Plan Years so that a comparison may be made.

**We feel that the adjustment method used in the current filing makes more sense than the approach used in the prior filing. The old approach adjusts the trends for each benefit category by applying a scalar multiplier. The new approach adjusts the trends in a more additive manner. Despite the fact that this change in adjustment methods results in different annual trends for each benefit category and noticeably different adjustment factors, the overall annual trend factor applied in rate development remains the same. The goal of this adjustment process is bring the trend implied by historical data to a level more reflective of anticipated future trends in the market, regardless of the adjustment method implemented. Please see exhibit 6 of the response exhibits Excel file for the derivation of the prior filing's applied trend using the approach employed in the current filing.**

7. Did trend assumptions consider changes in provider contracting? If not, why? If so, what impact did they have on trend assumptions?

**Observed rate increases in experience data are higher than those observed in the projected data. This is a contributing factor to our decision to decrease the annual trend from 12.3% as implied by the raw data to the applied annual trend of 6.0% as discussed in the responses to questions 5 and 34.**

8. Were trends adjustment for unexpected large claims? If so, what was the impact?

**No unexpectedly large claims were observed in terms of frequency and severity. Therefore, no adjustment was made.**

9. If adjustments are made for large claim pooling, was the federal risk adjustment program considered?

**We considered the impact of UPMC's expected large claims versus the nation's large claims and assumed a neutral impact.**

10. Regarding Risk Adjustment Data Validation process (RADV):
a. Please describe any adjustments or considerations made due to the Risk Adjustment Data Validation process (RADV).
b. As you know CMS is performing a risk adjustment validation starting with 2017 risk adjustment data. We are considering allowing an estimate of the impact of risk adjustment modifications in rate filings as an adjustment to the projected risk adjustment. Before implementation, we are soliciting feedback from our issuers on the pros and cons of the inclusion of this adjustment. If allowed, all issuers would be required to submit an estimate. The estimate may be $0. Please provide any feedback that you would like us to consider.

**a. We considered our position to be in line with other issuers and thus a neutral final impact.**

**b. Our internal estimates indicate that we will not receive a material adjustment as a result of RADV, and would not want to make adjustments to risk adjustment to account for this.**

11. Is private reinsurance being used for this business? Please discuss its impact on trend adjustment for large claims.

**Reinsurance covers excess non-UPMC hospital claims. In our analysis, this was deemed immaterial.**

12. The term "ACA-related Individual" is used multiple times in both the Federal and Pennsylvania actuarial memoranda. For each instance, please explain if this means Fully-Compliant ACA, Non-Grandfathered, and Non-Transitional. Please elaborate if this means something else.

**The term ACA-related Individual does refer to Fully-Compliant ACA, Non-Grandfathered, and Non-Transitional business.**

13. Please explain why the actuarial memoranda state that an exchange user fee of 3.5% is being used for plan year 2020, instead of the fee of 3% published in the Payment Parameters Final Rule for Plan Year 2020.

**This was an error in the actuarial memoranda and has been corrected as part of our response.**

14. Please provide the development of the exchange user fee based on exchange enrollment.

**Please see exhibit 14 of the response exhibits Excel file for this calculation. Please note that the projected and current member distribution are assumed to be identical.**

15. Please provide the list and title of all applicable of ASOPs the actuary is certifying work conformity.

**Many ASOPs apply to our work. Per URRT instructions, we place particular emphasis on the following ASOPS:**

- **ASOP No. 5, Incurred Health and Disability Claims**
- **ASOP No. 8, Regulatory Filings for Health Plan Entities**
- **ASOP No. 12, Risk Classification**
- **ASOP No. 23, Data Quality**
- **ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages**
- **ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans**

- **ASOP No. 41, Actuarial Communications**
- **ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act**

16. Please explain why the Pennsylvania Rate Template Table 4 Completion Factors do not match the actuarial memoranda completion factors by month. Show quantified support.

**This was an error, and the completion factors in the memoranda were not correct. This error has been corrected in the memoranda so that the factors match those in Table 4.**

17. Please explain why the Pennsylvania Rate Template Table 8 Change in Miscellaneous Items is shown as -8.7%. Please explain and quantify what items are included in this.

**Per collaboration with the Department, last year we included some large quality improvement changes in this item. This year, we did not.**

18. Pediatric Dental is administered and paid by Dominion Dental. Please identify the fees paid to Dominion Dental on a PMPM basis. Is this fee paid on a capitation basis or on a fee for service basis? By how much PMPM is this fee projected to increase from 2019 to 2020?

**The fees paid to Dominion Dental are $14.01 PMPM for catastrophic pediatric PPO plans and $15.93 PMPM for all other deductible levels of pediatric PPO plans. These fees are paid on a capitation basis and are not projected to change from 2019 to 2020.**

19. Please explain why the silver plans have a lower induced demand factor than the bronze plans. Please explain why this is expected to continue in 2020.

**The induced demand factors were kept in relative proportion from last year's approved filing. We strived to maintain stability in the market as much as possible by trying to minimize fluctuations for the overall rate increase as well as the consumer-adjusted premiums for individual members.**

20. Please explain why the bronze plans have the same induced demand as the catastrophic plans. Please explain why this is expected to continue in 2020.

**Benefit designs for catastrophic plans are most similar to those of bronze plans. We have not historically implemented any catastrophic eligibility adjustments as part of rate development and do not propose such an adjustment for 2020. Because of this, we believe it is most appropriate to use the same induced demand for bronze and catastrophic plans.**

Regarding Table 14 - Network Factors - you have revised all of the network factors contained in this table but have not provided any supporting documentation or data.

21. Please provide your quantitative analysis and narrative of the development of the network factors. For each network, provide data including network level claims for calendar years 2016, 2017 and 2018, based on the enrollees utilizing that network. For each period, this data should show the following network level data: total ultimate incurred claims, estimated cost sharing, allowed claims, total number of days/visits/procedures, as appropriate, the number of member months, average age, average tobacco factor, average benefit factor and capitations. Separate tabs should be provided to show the development of the average age factor, average tobacco factor and average benefit factor by network. Within each network, show the estimated impact of favorable provider contracting. Ensure that all data and your in-depth analysis is submitted to support the current and proposed factors.

**No major changes were expected from last year's factors so we kept the relativities between them the same and just re-normalized since there is no calibration factor for network.**

22. Please fully demonstrate how recent provider contracting has developed the proposed factors. Please provide the full details of the providers that were renegotiated and their total percent of claims in each network.

**The year over year adjustments by provider were assumed to be consistent (similar fee changes across all providers).**

23. For calendar years 2016, 2017 and 2018, please provide the actual unit cost experience data by network by benefit category (inpatient, outpatient, physician surgery, physician radiology, etc.) to support the proposed changes. UPMC must provide data and discussion at the level of detail necessary for the department or its consultant, to independently calculate and verify all proposed adjustments.

**No major changes were expected between networks as a whole or at a particular category level. So we kept the relativities between them the same and just re-normalized since there is no calibration factor for network.**

24. Did the certifying actuary rely on any information or assumptions provided by another individual? If so, please specify and provide reliance statements.

**We did not rely on any external consultants. Data and other information was sourced internally, and there were no circumstances which warranted specific mention of reliance.**

25. The Federal actuarial memorandum states, "The portion of membership enrolled in cost-share reduction variants was assumed to remain the same for 2020." Do you mean the percent of membership in each specific variant? Be more specific and include an example.

**The line referenced above was carryover from actuarial memoranda used in prior filings. This line was used to address our assumptions for deriving projected enrollment for different CSR variants for each plan in prior years. This line has been removed from the actuarial memoranda since the CSR Defunding Adjustment is prescribed by the Department, making this assumption no longer relevant.**

26. Please explain why no catastrophic eligibility adjustment was applied to the catastrophic plans.

**As mentioned in the URR instructions, an adjustment accounting for the impact catastrophic eligibility is permitted but not required. The instructions also state that such an adjustment must be derived from catastrophic plan experience. Since our catastrophic experience is minimal and not credible, an adjustment factor was not derived or applied.**

27. The updated URR instructions indicate that the risk adjustment on the URRT should no longer be net of the risk adjustment user fee and should instead be included with taxes and fee. Please update materials so the risk adjustment fee is not included with risk adjustment transfers as a market-wide adjustment.

**This update has been made as part of this correspondence.**

28. Regarding Table 6:
a. Using the submitted commission schedules, quantitatively show the development of the percent and PMPM amounts in cells C51 and D51.
b. Using the 2018 SHCE in the Annual Statement, please quantitatively show the development of the Quality Improvement Initiatives percent and pmpm amount.
c. We have repurposed row 54 to capture RA User Fees. Please provide the RA User Fee percentage and pmpm amount in cells C54 and D54.
d. Using financial data based on market share, please show the development of the HIT percentage and PMPM. Also, how much of the HIT was paid, both as a percentage of premium and PMPM, in 2016 and 2018?

**a. The commission amounts from the financial statements were adjusted in correspondence with Finance department to more accurately reflect the projection period operational environment.**

**b. The QI amounts from the financial statements were adjusted in correspondence with Finance department to more accurately reflect the projection period operational environment.**

**c. This change has been made as part of this correspondence.**

**d. From our internal financial records, 2018 HIT Tax / Revenue eligible = 40.6M/2.06B = 2% (and so 2% was used for 2020 pricing).**

**2016 Tax Paid = $23.9M on $1.37B eligible = 1.68%**

**From table 6: 2% * required revenue ($547.83 PMPM) = $10.96**

29. The Actuarial certification in the Federal Actuarial Memorandum appears to be based on last year's URRT and instructions. For example, it refers to "The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV," which is not part of the current URRT. Please revise the certification consistent with this year's URR instructions.

**The line referenced above was carryover from actuarial memoranda used in prior filings. This line has been removed from the memoranda as part of this update.**

30. Please identify any rating factors for medical management along with any change in factors from Plan Year 2019.

**No rating factors for medical management have been implemented.**

31. Were changes in health policy reserve taken into consideration in the rate development?

**We have historically and continue to anticipate that we can change rates to match revenue with costs annually, so no reserves are necessary.**

32. In the PA Actuarial Memo Rate Exhibits, Tables 2 and 4 should contain data from the entity specific to the filing, i.e. UPMC Heath Options, Inc., whereas Tables 2b and 4b should contain the manual data from all UPMC companies. However, the data shown in Tables 2 and 4 is identical to that shown in Tables 2b and 4b. Please review and revise.

**For the individual market, the manual data consists of experience period data under the UPMC Health Options, Inc. legal entity, which is why the data in the tables identified above are identical.**

33. The PA Actuarial Memo indicates that data representing UPMC's entire block of ACA- compliant individual business was the basis for the manual rate. Please identify each entity contributing to this aggregate data. Also, discuss what, if any, adjustments were made to the data to reflect product and regional differences for this entity and the manual data pool.
a. Further the PA Actuarial Memo indicates that Tables 4 and 4b contain the same data. Please remain cognizant that the data in Table 4 should contain only the data from the filing entity.

**Data belonging to ACA-related individual business under the UPMC Health Options legal entity was used as the basis for the manual rate. The language in the actuarial memoranda has been updated to better reflect this. No adjustments were made to this data since there are not significant differences between this entity and the manual data pool. For this particular filing, the manual data pool is the experience period data under this legal entity, which is why the data in Table 4 and 4b are the same.**

34. Regarding Trend:
a. Is the data in Table 4b raw unadjusted data or has it been normalized of otherwise adjusted? If the data has been adjusted, please provide the unadjusted allowed monthly data for the 48 months. Also include the following monthly data:
i. The average age factor;
ii. The average geographic factor;
iii. The average tobacco factor;
iv. The average benefit factor; and
v. The normalized average pmpm (which should match the allowed PMPMs in column L of table 4b.).
b. Exhibit 2 of the supporting exhibit applies a "Trend Adjustment Factor" of .94 to adjust the developed cost and utilization assumptions.
vi. Please explain what this factor is adjusting for and how it was developed.
vii. Please provide a numerical development of the factor .94.
viii. Please include the trends based on historical experience for each benefit category for years 2016, 2017, 2018, and 2019 (year to date). We realize 2019 trends will be partially based on estimated claim costs.

**a. The data in Table 4b is raw unadjusted data.**

**b. vi. This factor is used to adjust the annual trend factor implied by the raw historical data (1.123) to the applied annual trend factor (1.06). As shown in exhibit 2, this factor is simply the ratio of the latter factor relative to the former factor.**

**vii. As mentioned above and shown in exhibit 2, this factor is the ratio of the applied annual trend factor relative to the trend factor implied by the raw historical data.**

**viii. Please see exhibit 34bviii of the response exhibits Excel file for this data.**

35. Regarding Exhibit 3 in the supporting Excel file:
a. The average Tobacco Factor was set to 1.00. Please explain.
b. The AV & Cost Sharing values in Exhibit 3 do not match the AV & Cost Sharing values in Worksheet II of the URRT. Please reconcile.

**a. As mentioned in the Benefit Richness (induced demand) section of the PA actuarial memorandum, the average tobacco factor was set to 1.0 since the tobacco surcharge adjustment was removed from Table 10, which means that this factor should no longer be included in the induced utilization development.**

**b. The only plans for which the AV & Cost Sharing values do not match between exhibit 3 and the URRT are the on-exchange silver plans. This is so because the CSR Defunding Adjustment was not included in the values shown in exhibit 3 while the values in the URRT do account for this adjustment. Given the way the induced utilization exhibit is set up, it is not possible to use the AV & Cost Sharing values from the URRT for on-exchange silver plans in this exhibit and arrive at the proper induced utilization factors since the CSR Defunding Adjustment is not accounted for in the induced utilization exhibit. Therefore, the AV & Cost Sharing values from the URRT for all on-exchange silver plans were divided by 1.2 before being inserted into exhibit 3.**

36. Regarding Table 10:
a. The supporting Exhibit 4 shows the projected age band distribution. Please revise this exhibit to show the current member distribution as of 2/1/19 and show the resulting average factor.

b. In the URRT Memorandum, you indicate that no adjustment was made to the demographics for the 3-child max. Please explain why. Also, provide the current billable member distribution in Exhibit 4 and show the resulting average factor with the 3-child max.

c. Please provide a supporting exhibit, in Excel, showing the development of the average tobacco factor. Please show the projected and the current 2/1/19 member distribution.

**a. The current and projected age band distributions are assumed to be identical. The heading in column C of this exhibit was revised to better reflect this.**

**b. Per the guidance, an adjustment accounting for the 3-child max is permitted but not required. Such an adjustment was considered but ultimately determined to have negligible impact on the age calibration factor and enrollment distribution and was not included in rate development. This approach is consistent with our approach in prior rate filings. Approximately 0.73% of the population in this market consists of non-billable members.**

**c. Please see exhibit 36c of the response exhibits Excel file for this calculation. Please note that the projected and current member distribution are assumed to be identical.**

37. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.

**We can confirm that we have tested to ensure that the rates match.**

38. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost PMPMs for calendar years 2015 – 2018, as applicable.

**Please see exhibit 38 of the response exhibits Excel file for this data.**

39. Please provide an exhibit showing the financial gains and losses for calendar years 2014 – 2018 for the following categories: Member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy. Regarding Table 13 - Geographic Rating Area Factor Support you have revised all of the geographic factors contained in this table but have not provided any supporting documentation or data.

**Please see exhibit 39 of the response exhibits Excel file for this data. Due to our financial partners finalizing restatement in these numbers, the total administrative expense and taxes and fees section are not completed. We would like to apologize and provide an updated exhibit and notify the Department by EOD Thursday.**

40. Please explain how updated geographic rating factors were determined and how morbidity was removed.

**Geographic factors were updated to better reflect cost differences by area. Points of consideration included differences in fee schedules, anticipated shifts in utilization between providers, and less favorable contracting terms in areas with few facilities (including those without UPMC facilities).**

41. Please provide your quantitative analysis of the development of the geographic area rating factors. This data must minimally include county level claims data for calendar years 2016, 2017 and 2018, based on the residence of the enrollee. For each period, this data should show the following county level data: total ultimate incurred claims, estimated cost sharing, allowed claims, total number of days/visits/procedures, as appropriate, the number of member months, average age, average tobacco factor, average benefit factor and capitations. Separate tabs should be provided to show the development of the average age factor, average tobacco factor and average benefit factor by county. Within each county, show the estimated impact of favorable provider contracting. Ensure that all data and your in-depth analysis is submitted to support the current and proposed factors.

**Proposed geographic pricing was developed consistent with prior pricing. We looked at each rating area as a whole rather than specific county-level data in determining the factors.**

42. For calendar years 2016, 2017 and 2018, please provide the actual unit cost experience data by county by benefit category (inpatient, outpatient, physician surgery, physician radiology, etc.) to support the proposed changes. UPMC must provide data and discussion at the level of detail necessary for the department or its consultant, to independently calculate and verify all proposed adjustments.

**Proposed geographic pricing was developed consistent with prior pricing. We looked at each rating area as a whole rather than specific category-level data in determining the factors.**

43. Please fully demonstrate how new data and recent provider contracting has developed the proposed factors, whether changes are proposed for the geographic factors or not. Please provide the full details of the providers that were renegotiated and their total percent of claims in each county.

**Provider contract negotiations happen at all different timeframes and not all are finalized for 2020 at this point. The factors we used represent our best estimate for when they are finalized.**

44. Please describe and quantitatively demonstrate how the actual experience utilized in the Area Factor Analysis was normalized for differences in morbidity between the counties shown.

**Differences in contracted rates were the main basis for geographic factors rather than experience period claims. This method inherently excludes morbidity.**

45. Based on a review of Table 10 compared to the 2019 Table 10, there were 55 plans offered in 2019 and there are now 39 offered in 2020. Please review and explain, excluding plans 37, 38 and 39, where the plans were discontinued and the enrollees mapped.

**In the 2019 version of Table 10, plans 40-55 are 2018 plans that were discontinued and mapped to a 2019 plan. The mapped SCIDs are identified in column F of Table 10. Please note that each of these plans also have DM listed in column E of Table 10. Since these plans were discontinued prior to 2019, there is no reason for them to be included in the 2020 version of Table 10.**

46. Appendix 1 indicates that a number of plans had benefit changes; however, the Pricing AVs did not change. A few are listed below. For other plans, the Pricing AV changed but the plan design did not. Please review and explain, changing as necessary.
16322PA0040008 16322PA0050100 16322PA0050104 16322PA0050111
16322PA0040040 16322PA0050101 16322PA0050105 16322PA0050112
16322PA0040044 16322PA0050102 16322PA0050108 16322PA0050119
16322PA0050030 16322PA0050103 16322PA0050111 16322PA0050120

**In the templates we submitted, the Pricing AVs for all of these plans changed, before rounding. We refreshed the base data for UPMC's pricing tool, and all AVs were recalculated.**

Please be advised that there may be additional questions based on the responses to the above.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Should you have any questions regarding this correspondence, please contact Cherri Sanders-Jones at (717) 787-5172 or me at (717) 783-0646.
.

Sincerely,

Mike Anstead
Actuarial Review Division
Bureau of Accident & Health Insurance

## Exhibit 6: Derivation of Trend from Prior Filing using New Method

**Entire Fully Insured Block**

### Base Data

Inpatient Hospital

| YEAR | ALLOWED AMT | ADMIT CNT | ENROLLMENT | Unit Cost | UTILIZATION PTPM |
|---|---|---|---|---|---|
| 2016 | $211,225,400 | 15,964 | 3,135,102 | $13,231.36 | 61.1 |
| 2017 | $247,133,090 | 17,384 | 3,407,249 | $14,216.12 | 61.2 |

Outpatient Hospital

| YEAR | ALLOWED AMT | SERVICE CNT | ENROLLMENT | Unit Cost | UTILIZATION PTPM |

Dear Mr. Lovely:

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. From the June 25 Responses to Questions 15, 24, 28, and 39: "Did the certifying actuary rely on any information or assumptions provided by another individual? If so, please specify and provide reliance statements." Your responses to these questions demonstrate that you may be relying upon material information from the Finance department and that you are aware of the ASOP 41 requirements regarding Reliance. Please provide the required disclosures for this rate filing per ASOP 41.

The reliance statement has been uploaded in the Supporting Documentation section in SERFF.

2. From the June 25 Responses to Question 18: "Pediatric Dental is administered and paid by Dominion Dental. Please identify the fees paid to Dominion Dental on a PMPM basis. Is this fee paid on a capitation basis or on a fee for service basis?" Your response indicates that Pediatric Dental is provided via a capitation. Please correct rate filing materials and templates to reflect the capitation.

Rate filing materials and templates have been updated to reflect the capitation.

3. From the June 25 Responses to Question 19: "Please explain why the silver plans have a lower induced demand factor than the bronze plans. Please explain why this is expected to continue in 2020." Your response indicates that this was allowed for Plan Year 2019. Please justify this relationship for Plan Year 2020.

The induced demand factors for Silver and Bronze as submitted have remained static through our prior year filings. In the absence of any basis by which to anticipate different market behavior in induced demand for 2020, we have elected to maintain these values as originally adopted a number of years ago.

4. From the June 25 Responses to Questions 21, 22, 23, 40, and 41: Please provide a comprehensive explanation of how changes in provider contracting impacted (or why it did not impact) trend, network factors, and geographic factors.

While early estimates from our Reimbursement team have included a guarded estimate of stability, we note that a number of our 2020 provider contracts are not final. As such, while we do not currently anticipate a material deviation from the trend in prior year contract rates, we cannot yet rule this out. In the absence of evidence to the contrary, we have initially incorporated provider contracting as a stable element of factor development.

5. From the June 25 Responses to Question 23: "For calendar years 2016, 2017 and 2018, please provide the actual unit cost experience data by network by benefit category (inpatient, outpatient, physician surgery, physician radiology, etc.) to support the proposed changes. UPMC must provide data and discussion at the level of detail necessary for the department or its consultant, to independently calculate and verify all proposed adjustments." We apologize if this question was unclear, but we are actually asking for 3-years of actual experience of unit cost trends. Please provide quantitative support for your factors at a level of detail necessary for independent verification of all proposed adjustments.

Please see exhibit 5 of the response exhibits for this information. Please let us know if anything additional is needed.

6. From the June 25 Responses to Question 28: "Regarding Table 6: a) Using the submitted commission schedules, quantitatively show the development of the percent and PMPM amounts in cells C51 and D51. b) Using the 2018 SHCE in the Annual Statement, please quantitatively show the development of the Quality Improvement Initiatives percent and pmpm amount." Provide quantitative justification for these amounts and fully explain the adjustments decided upon based upon Finance department correspondence.

The values for both the Quality Improvement Initiatives and Commissions are directly based on Finance Department estimates. A reliance statement to this effect has been submitted.

7. From the June 25 Responses to Question 31: "Were changes in health policy reserve taken into consideration in the rate development." Please discuss why the increase in health policy reserves of $27.0 million reported in your 2018 Annual Statement would not be considered in rate development.

Due to an accounting change, the estimate for ACA risk adjustment was placed in that field for the first time in 2018. Since risk adjustment is already accounted for separately, no additional consideration is needed. That number also includes a PDR for an unrelated product which is also not a point of consideration for the rate development of this filing.

8. From the June 25 response to questions 41 and 42, you indicated that UPMC reviewed each rating area as a whole rather than specific county-level data in determining the geographic factors. Please provide the requested data by rating area. Please be aware that the proposed factors cannot be approved without detailed quantitative support.

The 2016-2018 data by rating area available in our data warehouse has been uploaded.

9. As requested, you have added the RA User Fees in Table 6. Please confirm that there was no offsetting adjustments made elsewhere, as this fee was not included in the initial submission.

The RA User Fee was included in the original submission, in the Risk Adjustment row, Table 5, "Projected Risk Adjustment PMPM" (so the PMPM was a net value, consistent with our interpretation at the time). Now: the $0.18 user fee PMPM is reflected in Table 6 as requested, and the table 5 PMPM is $0.18 higher because it no longer subtracts that fee. So, the revised submission includes the fee, accounted for as requested; but the original submission also included the fee, so there is no rate impact.

10. In response to the Department's RADV survey, issuers indicated that they did not include an adjustment in the initial submission, as there was no supportable reason for a RADV adjustment in the 2020 rate submission. Therefore, the Department has determined that there should be no RADV adjustments in the 2020 rate filings; please modify the filing accordingly, if necessary.

No adjustments were made for RADV as part of this filing.

11. In that the Department's review authority requires rates to be adequate, not excessive or unfairly discriminatory, please explain why you believe the rates to be adequate without an adjustment for the 3-child maximum.

As part of this update, an adjustment accounting for the 3-child maximum has been incorporated into the derivation of the age calibration factor as shown in exhibit 5 of the supporting exhibits.

12. If the risk adjustment results released on June 28, 2019 are inconsistent with your projected assumptions, you may modify the risk adjustment transfer amount in Table 5. Supporting documentation must be provided for all modification. If such a modification is made, revise all the documents and exhibits impacted and the PA Actuarial Memorandum to discuss this change. This change must be made with your responses due by July 12, 2019.

No modifications were made to risk adjustment due to the projections being different than final results.

13. Concerning your network and geographic factors, please provide in Excel your base period member months, current membership, and projected member months for each network and geographic area. Also please provide your non-normalized network and geographic factors for 2018, 2019 and 2020.

Please see exhibit 13 of the response exhibits for the requested data.

**<Redacted>**

Please be advised that there may be additional questions based on the responses to the above.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at (717) 787-5172.
Sincerely,

Cherri Sanders-Jones
Actuarial Review Division
Bureau of Accident & Health Insurance

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided by July 18, 2019. If you have any questions, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. From the June 25 Responses to Question 19 regarding the silver plans having a lower induced demand factor than the bronze plans, your response indicates that this was allowed for Plan Year 2019. Please justify this relationship for Plan Year 2020. The prior year approval doesn't justify this.
Market behavior is only allowed to the extent that it is economically based not based on morbidity. We consider the risk adjustment induced demand factors a "safe harbor". Any factor larger than the risk adjustment factors, will need significant support. It is irrelevant what was used in the past for your 2020 filings, which must stand on their own.

**The factor for the bronze plans has been updated to match corresponding silver plans.**
