Objection Letter

Objection Letter Status	Pending Industry Response
Objection Letter Date	07/25/2016
Submitted Date	07/25/2016
Respond By Date	07/29/2016

Dear Andrew Adams,

Introduction:

Please see the attached questions.

Conclusion:

Sincerely,
Donna Novak

1. Induced Utilization
    a. Please complete the table below for all plans, and confirm that the ratio in column (8) represents the induced utilization for each plan.

Plan ID (1)	Metal Level (2)	Projected Membership (3)	Projected Allowed Claims (4)	Projected Paid Claims (5)	Paid-To-Allowed Factor (6)	AV & Cost Sharing Factor (7)	Induced Demand (7)/(6) (8)
xxxxxx xxxxxx xxxxxx Total							

    b. Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the AV and cost sharing factors for each plan.
    c. Please provide any additional justification for induced utilization assumptions in the Company's pricing.
    d. Please confirm that each plan's induced utilization factor was normalized by an aggregate factor, and that the resulting sumproduct (against projected membership) produces a factor of 1.000. Please show the steps that demonstrate this.

Objection Letter

Objection Letter Status	Pending Industry Response
Objection Letter Date	07/18/2016
Submitted Date	07/18/2016
Respond By Date	07/25/2016

Dear Andrew Adams,

Introduction:

As you know, on 7/15/16, the Department advised insurers that they could revise the projected risk adjustment transfer amount in small group filings, and that this revision is due Thursday 7/21. If you are going to or have filed a revised risk adjustment transfer estimate, you may ignore the following objection.

Given the difference between the Company's estimated risk adjustment for 2015 and actual 2015 amount, please provide narrative and quantitatively show the development of the pmpm impact this will have on the projected 2017 risk adjustment pmpm amount and the rate impact. Do not revise your filing because of this request; just provide the information requested by Monday, July 25.

Conclusion:

Sincerely,
Michael Gurgiolo

Objection Letter Status	Pending Industry Response
Objection Letter Date	07/13/2016
Submitted Date	07/13/2016
Respond By Date	07/19/2016

Dear Andrew Adams,

Introduction:

Please see the attached and respond by Tuesday, July 19.

Conclusion:

Sincerely,
Michael Gurgiolo

1. Induced Utilization
    a. Please complete the table below for all plans, and confirm that the ratio in column (8) represents the AV and Cost Sharing for each plan in your filing.[1]

Plan ID (1)	Metal Level (2)	Projected Membership (3)	Projected Allowed Claims (4)	Projected Paid Claims (5)	Company Determined AV Factor (6)	Induced Utilization[2] (7)	AV & Cost Sharing (6)*(7) (8)
xxxxxx xxxxxx xxxxxx Total							

    b. Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of each, the AV and the cost sharing factors for each plan. Also, provide narrative that explains the derivation.
    c. Please provide justification for relative induced utilization assumptions in the Company's pricing that exceed the federal factors used in the risk adjustment model proving that morbidity is not reflected.[3]
    d. Please confirm that each plan's induced utilization factor was normalized by an aggregate factor, and that the resulting sumproduct (against projected membership) produces a factor of 1.000. Please show the steps that demonstrate this.
2. Please show quantitatively that plan premiums are in proportion to the plan AV Pricing Values.

[1] If a tobacco factor is used in the AV and Cost Sharing please add a column for that amount and modify the formula.
[2] The Induced Demand is the amount used by the company to reflect increased demand. This may be called by another name in the filing
[3] The federal factors relative to the Bronze factors are Silver 1.03, Gold 1.08 and Platinum 1.15.

Objection Letter

Objection Letter Status	Pending Industry Response
Objection Letter Date	06/17/2016
Submitted Date	06/17/2016
Respond By Date	06/24/2016

Dear Andrew Adams,

Introduction:

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter and be provided in pdf. If you have any questions or difficulties in providing the information within this time frame, please call me.

1.Please provide all tables, exhibits, etc. supporting actuarial memorandum in Excel format with formulas for each entry.

2.Please be advised that each time the URRT is changed in SERFF, the URRT in HIOS must also be updated. Please acknowledge your understanding and certify that you are in compliance.

3.Please provide the 2015 Statutory Annual Statement Five-Year Historical Data Exhibit.

4.Please provide a copy of the Supplemental Health Care Exhibit (SHCE), and describe the reason(s) for any differences between the SHCE and Worksheet 1, Section 1 of the Uniform Rate Review Template.

5.Please provide the January 1, 2016 through April 30, 2016 emerging experience in an Excel worksheet formatted similar to Table 2.

6.Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the Projected Risk Adjustments PMPM amount found in Section III, Worksheet 1 of the URRT. Please provide a detailed narrative that describers the development of the estimated risk adjustment transfer payment. In demonstrating the development of the transfer payment, please show all risk transfer formula components, the estimated market-wide average risk assumptions as well as support for those assumptions. When responding to this data call, you may redact this response as it will contain proprietary information. Since this response should include detailed insight into the risk adjustment transfer methodology, you may redact this response.

7.Regarding broker commissions:
•Under what circumstances and in what geographic locations will commissions be paid?
•Are commissions paid for SEP?
•Provide a copy of the broker agreement - current and 2017.
•Show the calculation of the average commission - current and 2017.
Since this response should include detailed insight into the broker commission, you may redact this response.

Please be advised that there may be additional questions based on the responses to the above. Data and exhibits in response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas. Should you have any questions regarding this correspondence, please contact me at (717) 783-2115.Sincerely,

Michael Gurgiolo
Actuarial Review Division
Bureau of Accident & Health Insurance

Objection Letter Date	05/31/2016
Submitted Date	05/31/2016
Respond By Date	06/15/2016

Dear Andrew Adams,

Introduction:

Please see the attached questions with regard to this filing. Thank you.

Conclusion:

Sincerely,
Donna Novak

NovaRest
ACTUARIAL CONSULTING

MEMORANDUM

May 31, 2016

Subject: Aetna Life Insurance Company Small Group Market
January 1, 2017 Rate Filing

Rate Filing: AETN-130533503

Objections:

1. Worksheet 1 of the URRT does not contain the experience period index rate in cell G17. Please correct this.

2. Please confirm that paid claims runout was through February 29, 2016 and not February 29, 2015, as indicated on page 2 of the 2017 Pennsylvania Actuarial Memorandum.

3. Please explain the combination of Coventry data with Aetna's to develop the manual rate. Was Coventry still active as a separate entity in 2015? Is Coventry membership moved to Aetna for 2017?

4. Please provide a complete quantitative development in an Excel sheet of the projected Manual allowed claims PMPM of $551.58 (included in WS 1 of the URRT), starting with the Aetna and Coventry base claims and showing the applied factor for each adjustment (do not combine adjustments).

5. Please explain why the utilization trends applied to the experience period data (as shown in WS 1 of the URRT) are different than those applied to the manual rate data (as shown in Table 3b: Trend Components.

6. Section 8 on page 4 of the Actuarial Memorandum states that the paid-to-allowed ratio was developed using 2014 experience. Please confirm if you meant to say that 2015 experience was used.

156 West Calle Guija, Suite 200, Sahuarita, AZ 85629 tel: 520-908-7246 - fax: 772-673-0318 NovaRest.com

7. Please explain why the index rate on Table 5 (C17 - $582.89) does not match the URRT ($584.87).

8. Please explain why the projected allowed claims of $551.58 from cell V32 of WS 1 of the URRT does not match $552.11 from cell C16 of Table 5?

9. Please explain why the projected index rate included in Exhibit E-1 uses the member weighted quarterly index rate of $584.87 from Exhibit 12 and not the member weighted quarterly index rate of $595.01 which includes the impact of the HIF?

10. Please explain why the Market Adjusted Index Rate of $609.77 developed in Exhibit E-1 does not agree with the Market Adjusted Index Rate of $610.64 developed in Table 5.

11. Please confirm that Network and UM adjustments are normalized.

12. Please provide the development of the Geography Calibration Factor.

Response Letter

Response Letter Status	Submitted to State
Response Letter Date	07/19/2016
Submitted Date	07/19/2016

Dear Donna Novak,

Introduction:

We will not be proposing changes to our filed 2017 rates at this time. The actual risk adjustment PMPM came in as a smaller payable than expected. This impact is estimated to be worth -2.7%.

Response 1

Comments:

A quantitative build up for the risk adjustment PMPM change as well as version with risk adjustment assumptions redacted are attached in the supporting documentation section

Form Filing Tracking Number:	AETN-130496669

Dear Ms. Fabian-Marks:

The purpose of this filing revision is to provide details of the premium rate development and resulting proposed monthly premium rates for Small Group policies which will be offered off-Exchange in the State of PA for effective dates of January 1, 2017 and later. This filing is being provided to comply with regulatory rate filing requirements, and is not intended to be used for other purposes.

The health benefit plans proposed in this filing are new benefit plans and are in compliance with all state-specific benefit requirements and rating regulations, as well as the benefit plan requirements of the Patient Protection and Affordability Act (P.L. 111-148). Additionally, these health benefit plans conform to each respective tier of coverage, defined as Bronze, Silver, Gold, and Platinum. All plans within a tier are expected to achieve an actuarial value consistent with the thresholds established for each

Phone: 215-775-0283
AdamsA@aetna.com

tier – 60%, 70%, 80%, and 90%, respectively – approximated within the allowable range of deviation defined as 2 percentage points.

This rate filing is intended for new business issued through the State of PA off-Exchange marketplace effective January 1, 2017.

All products and associated proposed monthly premium rates contained within this rate filing will be available to existing business upon their request. Existing business that is not considered grandfathered under PPACA regulation will be converted to the plans and rates in this filing upon renewal.

We have tried to present this information in a manner that will facilitate your Department's review. If there are changes we can make to improve the process or you would like us to present the information differently in the future, please let us know.

Please feel free to contact me at the above listed telephone number and/or e-mail address if you have any additional questions.

Sincerely,

Andrew Adams, F.S.A., M.A.A.A.

Company Contact Information:

Name: [redacted]
Telephone Number:
Email Address:

1. Purpose, Scope, and Effective Date

The purpose of this filing is to:

1) Provide support for the development of the Part I Unified Rate Review Template;
2) Provide support for the assumptions and premiums rate development for the products supported by the policy forms referenced above;
3) Request approval of the proposed monthly premium rates; and
4) Provide benefit plan designs summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation.

These rates are for plans issued in Pennsylvania beginning January 1, 2017. The rates comply with all rating guidelines under federal and state regulations. The filing covers plans that will be offered outside the public Marketplace in Pennsylvania.

2. Proposed Rate Increase

Monthly premium rates for Small Group Market products in Pennsylvania are being revised for effective dates January 1, 2017 through December 31, 2017.

A. Reason for Rate Increase(s):

Revised rates for these products reflect the following:

- Impact of medical claim trend (including changes in provider unit costs and increased utilization of medical cost services) and pharmacy trend;
- Revisions to our assumptions about market-wide population morbidity and the projected population distribution;
- Revisions to administrative expense projections;

- Modifications in cost sharing to ensure that plans comply with Actuarial Value requirements;
- Updates to our pricing models used to determine the impact of cost sharing designs; and
- Changes in provider networks and contracts.

B. Variation in Rate Changes by Plan/Product:
Rate changes differ by plan for the following reasons:

- Provider cost estimates have been updated, and the change differs by network.
- Modification to cost sharing differs by plan in order to maintain compliance with Actuarial Value and other regulatory requirements.
- Our internal pricing models have been updated to reflect more current information on levels of induced demand associated with different benefit designs. These changes impact our estimates of the relative costs of the plan designs that will be offered.

Exhibit 1 shows the average threshold increases for products covered by this filing.

3. Experience Period Premium and Claims

A. Paid Through Date:
The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2015 through December 31, 2015 and paid through February 29, 2016.

B. Premiums (Net of MLR Rebate and Risk Adjustment) in Experience Period:
Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered Small Group business in Pennsylvania, The premiums have been decreased for expected risk adjustments payables as discussed in section 9.B., below. Our internal projections indicate that no MLR rebate is expected to be paid in 2016 (for 2015 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

C. Allowed and Incurred Claims Incurred During the Experience Period:
Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

4. Benefit Categories
Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released February, 2016. Inpatient Hospital

consists of care delivered at an inpatient facility and associated expenses, included day-based mental health services. Outpatient Hospital includes outpatient surgical as well as emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including visit-based mental health services. Other includes home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

5. Projection Factors

A. Changes in the Morbidity of the Population Insured:
The experience period data includes experience for:

- Community-rated policies issued to small employers in 2015
- Medically underwritten policies renewed under the Transitional Policy.

We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2017. Exhibit 3 discusses the assumptions used to project the change in population morbidity, and illustrates the resulting projection factor.

B. Changes in Benefits:
The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2017 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

C. Changes in Demographics:
Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts.

D. Other Adjustments:
The ‘Other’ adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

E. Trend Factors (Cost/Utilization):
Medical trend factors are based on our Medical Economics Unit’s local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed

medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on local market commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Exhibit 8 shows the anticipated annual trend from the experience period to the rating period.

6. Credibility Manual Rate Development

A. Source and Appropriateness of Experience Data Used:

The source data for our manual rate is the experience incurred from January 1, 2015 to December 31, 2015 and paid through February, 2016 for Aetna and Coventry community-rated ACA policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

B. Adjustments Made to the Data:

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

C. Inclusion of Capitation Payments:

The manual experience includes capitation for the same services that are expected to be capitated for the products in this filing in 2017. We have adjusted the manual experience for known or anticipated changes in capitation contracts and projected changes in demographics where capitation rates vary based on demographics.

7. Credibility of Experience

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

8. Paid-to-Allowed Ratio

The projected paid to allowed ratio is 85%. Exhibit 9 illustrates the development of this number along with the projected membership distribution by metal tier. Paid to allowed ratios are based on 2014 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

9. Reinsurance and Risk Adjustment

A. Reinsurance – Experience Period

Transitional Reinsurance recoveries do not apply to Small Group business. The experience period data reflects the Reinsurance Contribution of $3.67 PMPM assessed during 2015.

B. Risk Adjustment – Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2014 CMS data. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2015 Risk Adjustment fees of $0.08 PMPM in Worksheet 2.

C. Risk Adjustment – Projection Period

We started with 2015 Risk Adjustment accruals to determine our current risk transfer relative to the market. We applied estimated changes in our risk relative to the market for 2017 that may be triggered by a shift in metal plan distribution/rating area or geographic cost/demographic distribution to determine our 2017 relativity to market. The difference between our projected relative risk and the market's is multiplied by the projected market average premium, which we trended at 8% annually. As a result, we project a risk adjustment payable, net of the 2017 user fee of $0.13 PMPM.

10. Non-Benefit Expenses and Profit & Risk

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are based on historical corporate Small Group market expense levels, current-year projections, and projected changes in expenses, inflation, and membership for 2017. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2017, as well as Federal income tax. The risk adjustment user fee, as previously mentioned in Section 9, is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in pricing our 2016 plans.

11. Projected Loss Ratio

The expected 2017 MLR for this filing, as defined by PPACA and before any credibility adjustment, is shown in Exhibit 11.

12. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in Pennsylvania through Aetna Life Insurance Company. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d). Rates for plans that may be renewed outside the Single Risk Pool (due to either being grandfathered or permissible transitional offerings) are not covered in this filing.

13. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively, less non-essential health benefits.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts of benefits in addition

to EHBs, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Small Group Market Trend Adjustments: Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2017.

14. Market-Adjusted Index Rate

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustments (Risk Adjustment and Exchange User Fees) were discussed, previously. The risk adjustment on Worksheet 1 of the URRT is displayed on a paid-basis. The exchange user fee is estimated as a PMPM based on the target premium rate. The values reflected in Exhibit E-1 have each been divided by the paid to allowed ratio to convert them to an allowed-basis.

15. Plan-Adjusted Index Rates

Exhibit E-2 illustrates the development of the Plan Adjusted Index Rates, and displays each plan-specific adjustment made to the Market Adjusted Index Rate. The Plan Adjusted Index Rates are displayed in Column 8. The following briefly describes how each set of adjustments was determined.

A. Actuarial Value, Cost Sharing, and Tobacco:

The factors in Column 2 are the product of three separate adjustments:

1. We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. We also reviewed the projected experience and the projected membership by plan to estimate an overall paid-to-allowed ratio. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage.
2. We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2017 membership.
3. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

B. Distribution and Administrative Costs:

Exhibit E-2, Column 4 reflects the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the 'Non-Benefit Expenses and Profit & Risk' section, and exclude the Risk Adjustment User Fee, and Exchange User Fee, which are reflected in the Market-Adjusted Index Rate.

C. Provider Network, Delivery System, and Utilization Management:

The factors in Column 5 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

D. Benefits in addition to EHBs:

The factors in Column 6 adjust for the impact of benefits in addition to EHBs.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). Hence, all factors in Column 6 are 1.00.

E. Catastrophic Plan Eligibility:
This filing does not include catastrophic plans.

F. Experience Period Plan Adjusted Index Rates
Worksheet 2 of the URRT displays the Plan Adjusted Index Rates filed in 2015 for the experience period.

16. Calibration
A. Age Curve Calibration:
The age factors are based on the HHS Default Standard Age curve.

We project a premium-weighted average age factor for the 2017 membership using the prescribed age curve and the projected age distribution based on issuer January 2016 membership and projected changes in the market. The age that most closely corresponding to the weighted average age factor and the age calibration factor is the reciprocal of the weighted average age factor shown in Exhibit 13.

B. Geographic Factor Calibration:
Exhibit 6 summarizes the rating area definitions and factors, and displays the projected membership by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor.

C. Small Group Premium Rates:
The development of the average projected trend factor is discussed in Section 13.

17. Consumer-Adjusted Premium Rate Development
Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as:
Calibrated Plan Adjusted Index Rate * Age Factor * Area Factor * Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation for a family of six, with more than three dependents under age 21, is shown in Exhibit 14.

18. Composite Premiums
Small employers will not be able to elect to have rates set using a composite approach as permitted by Pennsylvania.

19. AV Metal Values
The AV Metal Values on Worksheet 2 were based on the AV Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

20. AV Pricing Values

The AV Pricing Values are calculated as the ratio of the Plan Adjusted Index Rate to the Market Adjusted Index Rate. The adjustments reflected in the AV Pricing Values are discussed in Section 15. AV Pricing Values do not differ based on morbidity differences or benefit selection anticipated within the Single Risk Pool.

21. Membership Projections

Exhibit 15 summarizes the membership projections by plan. Membership projections are based on historical experience, enrollment in ACA-compliant plans through January 2016, and our expectations for future sales as additional members move to these plans from grandfathered and transitional plans. We assume that total enrollment will be similar to our current enrollment.

Terminated Plans and Products

Exhibit 16 provides a plan and product crosswalk from 2015 to 2017. The crosswalk includes the list of single risk pool plans and products that have terminated prior to January 1, 2017, products that have experience in the single risk pool experience period, and products that were made available in 2016 and 2017.

Consistent with the URRT instructions, experience for non-single risk pool terminated products is reported in aggregate under the terminated product with the largest membership in the experience period.

22. Plan Type

All plans are consistent with the plan type indicated on Worksheet 2.

23. Warning Alerts

The Experience Period Plan Adjusted Index Rate on Worksheet 2 differs from the Experience Period Premium PMPM on Worksheet 1 since 1) the Experience Period Premium reflects the actual enrollment mix for all non -grandfathered business in the market in 2015 while the average Plan Adjusted Index Rate reflects the projected (vs. actual) ACA mix for single risk pool experience and a zero rate for non-single risk pool experience , and 2) premiums reported on Worksheet 1 are net of estimated risk adjustment transfers and MLR rebates while the Plan Adjusted Index Rates on Worksheet 2 do not consider the impact of risk adjustment transfers or MLR rebates.

For the same reasons, the experience period Total Premium (TP) differs between Worksheets 1 and 2.

The Experience Period Incurred claims and Incurred Claims PMPM on Worksheet 2 adjust for the impacts of Reinsurance and Risk Adjustment. The Incurred Claims on Worksheet 1 are not adjusted for the impact of Reinsurance and Risk Adjustment. The warning alerts on rows 68 and 73 of Worksheet 2 result from the different treatment of Reinsurance and Risk Adjustment on the two worksheets.

The Projected Plan Adjusted Index Rate on Worksheet 2 differs from the Gross Premium Average Rate on Worksheet 1. This difference results from the value on Worksheet 1 being the rate that corresponds to claims incurred in the 12 months starting January 1, 2017, while the average on Worksheet 2 is the average rate for the market for coverage that begins between January 1, 2017 and December 31, 2017.

For the same reason, Total Premium (TP) differs between Worksheets 1 and 2.

24. Benefit Design

This filing includes the following standard plans: one Platinum, 8 Gold, 8 Silver, and 3 Bronze.

Please refer to the corresponding policy forms for detailed benefit language. Information on the cost-sharing parameters of the covered benefit plans, including deductibles, copays, and Actuarial Values, is summarized in the AV Snapshots and Benefit Summaries. All benefit and cost sharing parameters comply with Pennsylvania benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

25. Marketing

Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including directly to consumers through direct mail, telemarketing, and the internet and indirectly through brokers and general agents. Marketing and distribution approaches may change from time to time at management's discretion.

26. Underwriting

Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations.

27. Renewability

These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

28. Company Financial Condition

As of December 31, 2015, the capital and surplus held by Aetna Life Insurance Company was approximately $3.7 billion. This amount is disclosed in page 3, line 37 of the Company's statutory financial statement dated December 31, 2015. The Company issues insurance nationwide for multiple lines of business, including large group medical, small group medical, individual medical, and various non-medical products.

Reliance

While I have reviewed the reasonableness of the assumptions in support of both the preparation of the Part I Unified Rate Review Template and the assumptions in support of the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- URRT Methodology and Data Definitions
- Experience Period MLR Rebates
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Pediatric Dental Claim Cost
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [redacted] am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:

    a. ASOP No. 5, Incurred Health and Disability Claims
    b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
    c. ASOP No. 12, Risk Classification
    d. ASOP No. 23, Data Quality
    e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
    f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    g. ASOP No. 41, Actuarial Communications.

2. The Projected Index Rate is:
    a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),

b. Developed in compliance with the applicable Actuarial Standards of Practice,
c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
d. Neither excessive, deficient, nor unfairly discriminatory.

3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.

4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Aetna Life Insurance Company
Pennsylvania Small Group
PPO Products

Summary

Aetna is filing premium rates for Small Group plans in Pennsylvania.

The new rates will apply to plan years effective in 2017. The current membership and range of rate changes by product are:

Product Name	# Current Members	Range of Increases
Aetna PPO	6,123	15.7% - 41.8%; avg 27.8%
Aetna Fee for Service	0	39.9%

Why We Need to Increase Premiums

Medical costs are going up and we are changing our rates to reflect this increase. We expect medical costs to go up 10% excluding the effect of benefit or cost sharing changes. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Examples of increasing medical costs we have experienced over the last year include:

- The cost of Prescription Drug scripts has increased 9%
- The cost of Inpatient Facility visits has increased 6%

What Else Affects Our Request to Increase Premiums

Claims experience for this market has been worse than anticipated. Much of the rate increase is needed to ensure that we can continue to offer coverage in this market.

Our estimate of average population health and the expected risk adjustment transfers for Affordable Care Act (ACA) products have changed to reflect new data on market average premiums and population health. These changes are affected by the movement of business between the ACA market and other options, including grandfathered/transitional/state high risk pool/ Medicaid/alternative coverage.

Will Premiums for All Small Groups Increase 27.8% for PPO and 39.9% for Fee For Service?

No, increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

How does this request align to Minimum Loss Ratio Requirements (MLR)?

These rates are expected to produce an MLR equal to or above the 80% requirement for Small Group business. Under the ACA, at least 80% of the premiums collected by health plans are expected to pay for medical care and activities that improve health care quality for members. If the actual MLR turns out to be less than 80%, rebates will be issued to members in accordance with the law.

Aetna makes significant investments that benefit our members that the government does not allow us to use in this calculation. These investments include customer service, health quality activities like disease management programs, and the development of new information technologies.

What is Aetna doing to keep premiums affordable?

Aetna strives to keep our products as affordable as possible and to address the underlying cost of health care. We are:

- Developing new agreements, arrangements, and partnerships with health care providers that base provider compensation on the quality of care.
- Creating medical management programs that address potential health issues for members earlier, improving health outcomes and reducing the need for high-cost health care services.
- Working to reduce the ability of out-of-network providers to collect unreasonably excessive payments for services they provide.

We are dedicated to increasing transparency within the health care system and helping members best utilize the plans that they have. Members can access Aetna Navigator, a secure member website, which allows them to research their specific plan benefits, health care providers in a given area, and in some locations, the cost of certain health care services. The Aetna Navigator streamlined mobile app is also available to allow members to take their care on the go.

Additionally, Aetna's Plan for Your Health website aims to educate all consumers on how to take advantage of their health care benefits.

1) Justification for use of Issuer AV:

Per 156.135, the AV must be certified by member of the American Academy of Actuaries using generally accepted actuarial principles and methodologies. There are 3 types of certification:

(1) Option 1 - Certify that the plan was entered correctly and not vary materially from standard options entered
(2) Option 2 - Certify that modified entries into calculator to reflect plan appropriately [156.135.(b).(2)]
(3) Option 3 - Used calculator for provisions that fit and make adjustment for plan design features that deviate outside of calculator [156.135.(b).(3)]

Aetna benefit plans were analyzed vs the AVC to determined when Option 2 vs Option 1 certification was necessary. Four underlying calculators were built to support population of the OP facility, Specialist OV, ER, and Rx generic rows in the AVC. These all support Option 2 certifications. In addition, all Aetna plans were run with coinsurance entered on each row where applicable. This was done even if the unique coinsurance on the row was the same as the average coinsurance in row 11. This methodology prevents the OP facility/physician splitting methodology from being invoked which we do not believe is appropriate for our benefit plans. The output from this consistently applied process reflects our certified Actuarial Values.

2) Regulatory permitted alternate method used:

(2) Option 2 - Certify that modified entries into calculator to reflect plan appropriately [156.135.(b).(2)]
(3) Option 3 - Used calculator for provisions that fit and make adjustment for plan design features that deviate outside of calculator [156.135.(b).(3)]

3) Confirmation that only in-network cost sharing including multitier networks, was considered:

Confirmed. Only in-network cost sharing information was used.

4) Description of standardized plan population data used:

Detail of data used for each of the subcalculators is described below in items 5 & 6. All data was based on either the AVC continuance tables, or a national data set which is representative of the SG/IVL population

5) If the method described in 156.135.(b).(2) was used, description of how the benefits were modified to fit the parameters of the AV calculator:

OP Facility Benefit Plan Fit Process

OP facility has two subcategories of OP surg - hospital and OP surg- freestanding. The equivalent coinsurance for each was set as the plan copay divided by the unit cost. The adjusted equivalent coinsurance was then calculated for each copay/deduct combination. It was adjusted to account for the portion of cost less than the deduct that was at 0% coinsurance in the model as compared to the portion subject to coinsurance. It was validated that these adjusted equivalence factors did not vary materially based on the underlying continuance table used. The average coinsurance of the row was calculated based on the weightings of the internal subcategories.

Specialist Benefit Plan Fit Process

Using internal cost data, we developed a distribution of Specialist visits. That data was then converted to a consistent unit counting basis as the AVC based on the relativity of a PCP visit distribution. Specialist copay visit costs were then converted to equivalent coinsurance using the AVC continuance table average unit costs. The average coinsurance was determined as the weighted average of the copay equiv coins < visit limit band, 0% from visit limit to deduct level, and specialist equiv coins > deduct band. For ded/copay plans, copays were converted to eff coins and then reconverted back to copays for consistency with rest of plan.

ER Benefit Plan Fit Process

Using internal cost data, we developed a distribution of ER visits. ER copay visit costs were then converted to equivalent coinsurance using the AVC continuance table average unit costs. If copay and coins, the copay equiv coins was multiplied by the actual coinsurance as the aggregate equiv coins for the row . The average coinsurance was determined as the weighted average of the copay equiv coins < visit limit band, 0% from visit limit to deduct level, and ER equiv coins > deduct band. For ded/copay plans, copays were converted to eff coins and then reconverted back to copays for consistency with rest of plan.

Rx Generic Tier1a Fit Process

Using internal cost data, the distribution of Rx generic costs between Tier1a and Tier1 was determined. A weighted average adjusted copay/coins was then calculated based on this distribution and the cost share adjusted for the relative drug cost level between the tiers.

Tiered Rx Plan - Benefit Plan Fit Process

Tiered Rx plans were fit to the single tier within the AVC. The cost share for each row is an average of the preferred and nonpreferred cost share based on anticipated network use. For the generic row, the cost share was calculated using the Rx Generic Tier1a calculator as described above but based on a distribution of costs in preferred/nonpreferred as well as tier1a and tier1.

6) If the method described in 156.135.(b).(3) was used, description of the data and method used to develop the adjustments:

TIF (True individual family) Deductible

For plans with a TIF deductible, the average change in paid to allowed due to this feature was determined based on internal cost data and a SG/IVL appropriate distribution of single vs family members. That process produces an additive adjustment to the AV obtained via the methodology described above in support of 156.135.(b).(2) certifications.

Certification Language:

The development of the actuarial value is based on one of the acceptable alternative methods outlines in 156.135.(b).(2) or 156.135.(b).(3) for those benefits that deviate from the parameters of the AV calculator and have a material impact on the AV.

The analysis was
(i) conducted by a member of the American Academy of Actuaries
(ii) performed in accordance with generally accepted actuarial principles and methodologies

Aetna Life Insurance Company – Small Group Plans

Rate request filing ID # AETN-130533503 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Requested average rate change:	32%
Range of requested rate change:	17% to 71%
Effective date:	January 1, 2017
People impacted:	6,123
Available in:	All rating areas, statewide

Key information

Jan. 2015-Dec. 2015 financial experience

Premiums	$17.2M
Claims	$20.5M
Administrative expenses	$7.7M
Company made (before taxes)	**-$11.0M**

The company expects its annual medical costs to increase **10%**.

How it plans to spend your premium
This is how the insurance company plans to spend the premium it collects in 2017:

Claims:	82.9%
Administrative:	9.6%
Taxes & fees:	3.6%
Profit:	3.9%

Explanation of requested rate change

Medical costs are going up, and we are changing our rates to reflect this increase. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Rate increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

The components of this rate change are as follows:

- The change in normalized allowed claims is worth 20%
- The change in allowable plan adjusted level components is worth 5%
- The change in retention components is worth 7%

2017 Pennsylvania Actuarial Memorandum

1. Basic Information and Data

A. Company Information

Company Legal Name:	Aetna Life Insurance Company
NAIC #:	60054
Market:	Small Group Off-Exchange
Effective Date:	01/01/2017
Avg rate change requested:	31.7%
Range of rate change requested:	17.1% to 70.9%
Products:	PPO, Indemnity
Rating Areas:	Rating Areas 1-9
Metal Levels:	Platinum, Gold, Silver, Bronze
Current # covered lives:	6,123
Current # policyholders:	3,201
Number of plans offered:	20
HIOS Issuer ID / Binder #:	33906
Rate Filing Tracking Number:	AETN-130533503
Policy Form(s):	AL SG HCOC-2017-PPO 01; AL SG HCOC-2017-TC 01; AL SG COCAmend-ET 01
Form Filing Tracking Number:	AETN-130496669

B. Rate History and Proposed Variations in Rate Changes

- January 1, 2014
  - Introduction of ACA
  - AETN-129037905
- July 1, 2014
  - Lowered previously filed 3Q14-4Q14 rates by 17%
  - AETN-129418260
- January 1, 2015
  - Filed a 4% increase
  - AETN-129621162
- July 1, 2015
  - Lowered previously filed 3Q15-4Q15 rates by 4% by removing commissions and tobacco surcharge load
  - AETN-129920145
- January 1, 2016
  - Filed a 5% rate increase
  - AETN-130046894
- April 1, 2016
  - Increased previously filed 2Q16-4Q16 rates by 4% to add commissions
  - AETN-130242358

C. Average Rate Change
The average rate change, as noted in cell AC13 of Table 10 and the percent change rate requested on the SERFF Rate Review Detail screen, is 31.7%. The change in the 21 year old non-tobacco premium pmpm as stated in cell AZ13 on Table 11 is 39.4%.

D. Membership Count
Total current membership by age bucket is shown on Table 1.

E. Benefit Changes
The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2017 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

F. Experience Period Claims and Premium
The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2015 through December 31, 2015 and paid through February 29, 2015, for Aetna Life Insurance Company. Incurred claims for both community-rated ACA and transitional plans have been included.

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered Small Group business in Pennsylvania, The premiums have been decreased for expected risk adjustments payables. Our internal projections indicate that no MLR rebate is expected to be paid in 2016 (for 2015 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB).

The experience includes capitation for the same services that are expected to be capitated for the products in this filing in 2017. We have adjusted the manual experience for known or anticipated changes in capitation contracts and projected changes in demographics where capitation rates vary based on demographics.

Transitional Reinsurance recoveries do not apply to Small Group business. The experience period data reflects the Reinsurance Contribution of $3.67 PMPM assessed during 2015. Risk Adjustment transfer is accrued at the issuer and market level based on 2014 CMS data. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2015 Risk Adjustment fees of $0.08 PMPM in Worksheet 2.

G. Credibility of Data

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

The source data for our manual rate is the experience incurred from January 1, 2015 to December 31, 2015 and paid through February, 2016 for Aetna and Coventry community-rated ACA policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

H. Trend Identification

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on local market commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released February, 2016. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical as well as emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including visit-based mental health services. Other includes home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient

Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2017.

I. Historical Experience
As described above, medical trend factors are based on our Medical Economics Unit's local trend and network experience, and pharmacy trends are based on local market commercial group Rx trend analysis.

2. Rate Development & Change

Please refer to the file titled *2017 PA SG ALIC Exhibits.xlsx* for any Exhibits referenced in the sections below.

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims
The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively, less non-essential health benefits.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts of benefits in addition to EHBs, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2017.

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustments (Risk Adjustment and Exchange User Fees) were discussed, previously. The risk adjustment on Worksheet 1 of the URRT is displayed on a paid-basis. The exchange user fee is estimated as a PMPM based on the target premium rate. The values reflected in Exhibit E-1 have each been divided by the paid to allowed ratio to convert them to an allowed-basis.

<u>Single Risk Pool Adjustment Factors</u>:
"Change in Morbidity" => The experience period data includes experience for both community-rated policies issued to small employers in 2015 and medically underwritten policies renewed under the Transitional Policy, while the credibility manual includes only experience for community-rated policies. We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2017. Exhibit 3 illustrates the resulting projection factor.

"Change in Benefits" => Discussed in Section 1E above.

“Change in Other” => The ‘Other’ adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

B. Retention Items

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are based on historical corporate Small Group market expense levels, current-year projections, and projected changes in expenses, inflation, and membership for 2017. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to the Company’s internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2017, as well as Federal income tax. The risk adjustment user fee, as previously mentioned in Section 9, is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in pricing our 2016 plans.

C. Normalized Market-Adjusted Projected Allowed Total Claims

The age factors are based on the HHS Default Standard Age curve. We project a premium-weighted average age factor for the 2017 membership using the prescribed age curve and the projected age distribution based on issuer January 2016 membership and projected changes in the market. The age that most closely corresponding to the weighted average age factor and the age calibration factor is the reciprocal of the weighted average age factor shown in Exhibit 13.

Exhibit 6 summarizes the rating area definitions and factors, and displays the projected membership by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. We also reviewed the projected experience and the projected membership by plan to estimate an overall paid-to-allowed ratio. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage. In addition, we applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2017 membership.

The factors in Column 5 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

D. Components of Rate Change
The overall change in the weighted average Calibrated Plan Adjusted Index Rate is 31.7%, as indicated in Table 8 row A. The components of this rate change are as follows:

- The change in normalized allowed claims is worth 20%
- The change in allowable plan adjusted level components is worth 5%
- The change in retention components is worth 7%

3. Plan Rate Development

The following briefly describes how each set of adjustments was determined.

Pricing AV / Benefit Richness:
These adjustments are discussed in Section 2C above.

Benefits in addition to EHBs:
The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). The factor for the impact of benefits in addition to EHBs is a 1.00.

Provider Network:
This adjustment reflects the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

Catastrophic Eligibility:
This filing does not include Catastrophic plans.

Tobacco Surcharge Adjustment:
The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

Admin Costs / Taxes & Fees / Profit or Contingency:
These factors reflect the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the Retention section.

An AV Certification is included in this filing, titled *PA_SG_33906_AVCCert_Off_2017_v1.pdf*.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

The Calibrated Plan Adjusted Index Rates for 2016 and 2017 are shown in Columns Z and AA. The 2017 rates in Column AA differ from the Calibrated Plan Adjusted Index Rates on Exhibit E-2 because the trend factor proposed in our filing includes the additional impact of HIF, as described in Section 2A above.

5. Plan Factors

A. Age and Tobacco Factors
The age factors are based on the HHS Default Standard Age curve. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed for tobacco rating and factors of 1.0 have been entered.

B. Geographic Factors

The proposed geographic factors are different than the current approved factors. We compared the relative unit costs by rating area, and considered the convergence of Aetna and Coventry provider contracts, in order to develop the proposed geographic factors.

C. Network Factors

There are no narrow networks included in this filing.

D. Service Area Composition

The Service Area composition for the broad network is statewide, while the Service Area composition for the narrow networks is listed in Table 13.

E. Composite Rating

While PA allows composite rating, we are not offering this option at this time. However, the member level rates in this filing would not be impacted if we allow the composite rating option at a later time.

6. Actuarial Certifications

Reliance

While I have reviewed the reasonableness of the assumptions in support of both the preparation of the Part I Unified Rate Review Template and the assumptions in support of the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- URRT Methodology and Data Definitions
- Experience Period MLR Rebates
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Pediatric Dental Claim Cost
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [redacted] am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:

    a. ASOP No. 5, Incurred Health and Disability Claims
    b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
    c. ASOP No. 12, Risk Classification
    d. ASOP No. 23, Data Quality
    e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
    f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    g. ASOP No. 41, Actuarial Communications.

2. The Projected Index Rate is:

a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
b. Developed in compliance with the applicable Actuarial Standards of Practice,
c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
d. Neither excessive, deficient, nor unfairly discriminatory.

3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.

4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Aetna

Health Insurance Rate Filing
Completeness and Redaction Justification Checklist

Issuer Name: Aetna Life Insurance Company

Market: Small Group

SERFF ID#: AETN-130533503

Instructions for Completeness and Redaction Justification Checklist

This checklist is required for all issuers submitting ACA-compliant rates for 2017 comprehensive major medical rate filings and should be submitted, as supporting documentation, with each 2017 ACA-compliant comprehensive major medical rate filing. The checklist is organized by heading, section and subsection as outlined in the 2017 ACA-Compliant Health Insurance Rate Filing Guidance (Guidance) released on March 11, 2016.[1] Tables in the PA Actuarial Memorandum Rate Exhibits are included in their corresponding PA Actuarial Memorandum section and listed in red text for ease of identification.

The "Completed" section contains three columns. The first input column is labeled "✓". In order for the filing to be considered complete and ready for department review, a ✓ must appear in each field in the column, except where data tables are marked with an asterisk in the "Description" column, in which case the ✓ is only needed if the row is applicable. The ✓ indicates that the actuary has read the Guidance and has provided the requested information and data, as required in the PA Actuarial Memorandum and Rate Exhibits and further, that the data templates are completely and appropriately populated. The second and third input columns in the Completed section should reference the page or table, and, if text in the actuarial memorandum, the paragraph number, where the required information and data can be located in the issuer's submission as described in the Guidance.

The "Redacted" section contains two columns. If the issuer's filing contains redacted information or data in the named section, a ✓ must appear in the "✓"column under "Redacted." To reiterate the redaction criteria contained in the Guidance, if the issuer wishes to redact information from the rate filing, the issuer must submit a justification with the filing that details each element that has been redacted and separately justifies why the redacted element is confidential. All justifications for redacted information and data should be contained in one document. Correspondingly, the "Justification Location" column should identify the location of the applicable justification within the justification document, either by page number or by heading.

The Department encourages issuers to use the following nomenclature within the justification document, and for identifying the location in the "Justification" column: Justification + the TOC # located in the first column of this checklist. For example, if an issuer redacted information in the Network Factors section of the PA Actuarial Memorandum, a ✓ must appear in the "✓"column under "Redacted"; the "Justification Location" column would be completed with "Justification 5.C."; and the corresponding justification for redaction within the justification document would be under the heading "5.C. Network Factors."

Please remember that non-redacted information and data must be submitted for review.

You may contact Cherri Sanders-Jones at csandersjo@pa.gov if you have any questions regarding this checklist.

Table 5. Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

2015 Total Allowed EHB Claims PMPM + EHB Capitation PMPM (net of prescription drug rebates)	$ 427.82	<- Index Rate of Experience Period on URRT
2 Year Trend Projection Factor	1.191	
Unadjusted Projected Allowed EHB Claims PMPM	$ 509.41	
Single Risk Pool Adjustment Factors		<- Adj't. from Experience to Projection Period - Pop'l risk Morbidity on URRT
Change in Morbidity	1.014	<- Adj't. from Experience to Projection Period - Other on URRT
Change in Other	1.068	
Change in Demographics	1.044	
Change in Network	1.011	
Change in Benefits	1.001	
Change in Other	1.010	
Adjusted Projected Allowed EHB Claims PMPM	$ 551.58	<- Index Rate for Projection Period on URRT - Individual (Small Group 1rst Qtr)
Adjusted Projected Allowed EHB Claims PMPM [will only populate for small group filings]	$ 582.32	<- Index Rate for Projection Period on URRT - Small Group
Projected Paid to Allowed Ratio	0.846	<- Paid to Allowed Average Factor in Projection Period on URRT
Projected Paid EHB Claims PMPM	492.6416175	
Market-wide Adjustments		
Projected Paid Net Risk Adjustment PMPM	$23.48	
Projected Paid Exchange User Fees PMPM	$0.00	
Market-Adjusted Projected Paid EHB Claims PMPM	$ 516.12	
Market-Adjusted Projected Allowed EHB Claims PMPM	$ 610.07	<- Market-Adjusted Index Rate
Projected Allowed Non-EHB Claims PMPM	$ -	
Market-Adjusted Projected Paid Total Claims PMPM	$ 516.12	
Market-Adjusted Projected Allowed Total Claims PMPM	$ 610.07	

Table 5A. Small Group Projected Index Rate with Quarterly Trend

	January	April	July	October	Total Single Risk Pool
# of Member Months Renewing in Quarter	102,032	63,325	101,378	339,073	605,808.00
Percent of Members Months Renewing in Quarter	17%	10%	17%	56%	100%

Non-Preferred Brand Drugs	$100	50%
Specialty Drugs (i.e. high-cost) Preferred/Non-Preferred	50% up to $500 / 50% up to $1,000	Not Covered / Not Covered

Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

June 13, 2016

Ms. Donna Novak, FSA, MAAA
NovaRest Actuarial Consulting

Subject: Aetna Life Insurance Company
Small Group Rate Filing
SERFF # AETN-130533503

Dear Ms. Novak:

Enclosed is additional information related to the items contained in your objection letter dated 05/31/2016 for the above referenced rate filing.

1. *Worksheet 1 of the URRT does not contain the experience period index rate in cell G17. Please correct this.*

Please refer to the updated URRT file titled 'PA_SG_33906_URRT_OFF_1Q2017_v4.xlsm' for an updated exhibit.

2. *Please confirm that paid claims runout was through February 29, 2016 and not February 29, 2015, as indicated on page 2 of the 2017 Pennsylvania Actuarial Memorandum.*

Yes it should say February 29, 2016.

3. *Please explain the combination of Coventry data with Aetna's to develop the manual rate. Was Coventry still active as a separate entity in 2015? Is Coventry membership moved to Aetna for 2017?*

Coventry's HASPA legal entity was still active during the experience period in 2015. As part of our integration efforts, members under the HASPA legal entity will be migrated to Aetna legal entities beginning in 2016. Therefore, in order to capture the full 2015 experience base in our credibility manual, both Coventry and Aetna data was included.

4. *Please provide a complete quantitative development in an Excel sheet of the projected allowed claims PMPM of $551.58 (included in WS 1 of the URRT), starting with the Aetna and Coventry base claims and showing the applied factor for each adjustment (do not combine adjustments).*

980 Jolly Road
Mailstop U12N
Blue Bell, PA 19422

Please refer to the file titled 'Objection Exhibits ALIC 05-31-2016.xlsx' for this development

5. *Please explain why the utilization trends applied to the experience period data (as shown in WS 1 of the URRT) are different than those applied to the manual rate data (as shown in Table 3b: Trend Components).*

The utilization trends applied on WS 1 of the URRT are calculated using just the base ALIC experience whereas the Table 3b is calculated using the credibility manual HMO/PPO experience.

6. *Section 8 on page 4 of the Actuarial Memorandum states that the paid-to-allowed ratio was developed using 2014 experience. Please confirm if you meant to say that 2015 experience was used.*

Yes it should say 2015 experience.

7. *Please explain why the index rate on Table 5 (C17 - $582.89) does not match the URRT ($584.87).*

Table 5 (C17) differs because the department's calculation is using the trend from the data tab which uses different cost category weights than the trend on the manual data tab. In addition the trend used in Table 5 does not incorporate the impact of HIF.

8. *Please explain why the projected allowed claims of $551.58 from cell V32 of WS 1 of the URRT does not match $552.11 from cell C16 of Table 5?*

Please refer to the updated PA Actuarial Memo Rate Exhibits file titled 'FINAL 2017 PA ActMemo Rate Exhibits - SG ALIC_v2.xlsx'. There was a discrepancy in the cost category weights that has been updated in this new version.

9. *Please explain why the projected index rate included in Exhibit E-1 uses the member weighted quarterly index rate of $584.87 from Exhibit 12 and not the member weighted quarterly index rate of $595.01 which includes the impact of the HIF?*

Exhibit E-1 is ties to index rate on WS 1 of the URRT which does not include the impact of the HIF

10. *Please explain why the Market Adjusted Index Rate of $609.77 developed in Exhibit E-1 does not agree with the Market Adjusted Index Rate of $610.64 developed in Table 5.*

980 Jolly Road
Mailstop U12N
Blue Bell, PA 19422

Table 5 as stated above in Question 9 uses the small group adjusted projected allowed index rate which does not incorporated the HIF and uses different cost category weights than what is used to get the small group adjusted projected allowed index rate in Exhibit E-1

11. Please confirm that Network and UM adjustments are normalized.

Yes Network and UM adjustments are normalized.

12. Please provide the development of the Geography Calibration Factor

Please refer to the file titled 'Objection Exhibits ALIC 05-31-2016.xls'

Actuarial Memorandum and Certification

General Information

Company Identifying Information:

Company Legal Name:	**Aetna Life Insurance Company**
State:	**Pennsylvania**
HIOS Issuer ID:	**33906**
Market:	Small Group
Effective Date:	01/01/2017
Rate Filing Tracking Number:	**AETN-130533503**
Policy Form(s):	**AL SG HCOC-2017-PPO 01; AL SG HCOC-2017-TC 01; AL SG COCAmend-ET 01**
Form Filing Tracking Number:	**AETN-130496669**

Company Contact Information:

Name:	**Andrew Adams**
Telephone Number:	**(215) 775-0283**
Email Address:	**AdamsA@aetna.com**

1. Purpose, Scope, and Effective Date

The purpose of this filing is to:

1) Provide support for the development of the Part I Unified Rate Review Template;
2) Provide support for the assumptions and premiums rate development for the products supported by the policy forms referenced above;
3) Request approval of the proposed monthly premium rates; and
4) Provide benefit plan designs summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation.

These rates are for plans issued in Pennsylvania beginning January 1, 2017. The rates comply with all rating guidelines under federal and state regulations. The filing covers plans that will be offered outside the public Marketplace in Pennsylvania.

2. Proposed Rate Increase

Monthly premium rates for Small Group Market products in Pennsylvania are being revised for effective dates January 1, 2017 through December 31, 2017.

A. Reason for Rate Increase(s):

Revised rates for these products reflect the following:

- Impact of medical claim trend (including changes in provider unit costs and increased utilization of medical cost services) and pharmacy trend;
- Revisions to our assumptions about market-wide population morbidity and the projected population distribution;
- Revisions to administrative expense projections;

- Modifications in cost sharing to ensure that plans comply with Actuarial Value requirements;
- Updates to our pricing models used to determine the impact of cost sharing designs; and
- Changes in provider networks and contracts.

B. Variation in Rate Changes by Plan/Product:
Rate changes differ by plan for the following reasons:

- Provider cost estimates have been updated, and the change differs by network.
- Modification to cost sharing differs by plan in order to maintain compliance with Actuarial Value and other regulatory requirements.
- Our internal pricing models have been updated to reflect more current information on levels of induced demand associated with different benefit designs. These changes impact our estimates of the relative costs of the plan designs that will be offered.

Exhibit 1 shows the average threshold increases for products covered by this filing.

3. Experience Period Premium and Claims

A. Paid Through Date:
The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2015 through December 31, 2015 and paid through February 29, 2016.

B. Premiums (Net of MLR Rebate and Risk Adjustment) in Experience Period:
Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered Small Group business in Pennsylvania, The premiums have been decreased for expected risk adjustments payables as discussed in section 9.B., below. Our internal projections indicate that no MLR rebate is expected to be paid in 2016 (for 2015 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

C. Allowed and Incurred Claims Incurred During the Experience Period:
Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

4. Benefit Categories
Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released February, 2016. Inpatient Hospital

consists of care delivered at an inpatient facility and associated expenses, included day-based mental health services. Outpatient Hospital includes outpatient surgical as well as emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including visit-based mental health services. Other includes home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

5. Projection Factors

A. Changes in the Morbidity of the Population Insured:
The experience period data includes experience for:

- Community-rated policies issued to small employers in 2015
- Medically underwritten policies renewed under the Transitional Policy.

We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2017. Exhibit 3 discusses the assumptions used to project the change in population morbidity, and illustrates the resulting projection factor.

B. Changes in Benefits:
The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2017 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

C. Changes in Demographics:
Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts.

D. Other Adjustments:
The ‘Other’ adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

E. Trend Factors (Cost/Utilization):
Medical trend factors are based on our Medical Economics Unit’s local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed

medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on local market commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Exhibit 8 shows the anticipated annual trend from the experience period to the rating period.

6. Credibility Manual Rate Development

A. Source and Appropriateness of Experience Data Used:

The source data for our manual rate is the experience incurred from January 1, 2015 to December 31, 2015 and paid through February, 2016 for Aetna and Coventry community-rated ACA policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

B. Adjustments Made to the Data:

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

C. Inclusion of Capitation Payments:

The manual experience includes capitation for the same services that are expected to be capitated for the products in this filing in 2017. We have adjusted the manual experience for known or anticipated changes in capitation contracts and projected changes in demographics where capitation rates vary based on demographics.

7. Credibility of Experience

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

8. Paid-to-Allowed Ratio

The projected paid to allowed ratio is 85%. Exhibit 9 illustrates the development of this number along with the projected membership distribution by metal tier. Paid to allowed ratios are based on 2014 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

9. Reinsurance and Risk Adjustment

A. Reinsurance – Experience Period

Transitional Reinsurance recoveries do not apply to Small Group business. The experience period data reflects the Reinsurance Contribution of $3.67 PMPM assessed during 2015.

B. Risk Adjustment – Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2014 CMS data. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2015 Risk Adjustment fees of $0.08 PMPM in Worksheet 2.

C. Risk Adjustment – Projection Period

We started with 2015 Risk Adjustment accruals to determine our current risk transfer relative to the market. We applied estimated changes in our risk relative to the market for 2017 that may be triggered by a shift in metal plan distribution/rating area or geographic cost/demographic distribution to determine our 2017 relativity to market. The difference between our projected relative risk and the market's is multiplied by the projected market average premium, which we trended at 8% annually. As a result, we project a risk adjustment payable, net of the 2017 user fee of $0.13 PMPM.

10. Non-Benefit Expenses and Profit & Risk

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are based on historical corporate Small Group market expense levels, current-year projections, and projected changes in expenses, inflation, and membership for 2017. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2017, as well as Federal income tax. The risk adjustment user fee, as previously mentioned in Section 9, is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in pricing our 2016 plans.

11. Projected Loss Ratio

The expected 2017 MLR for this filing, as defined by PPACA and before any credibility adjustment, is shown in Exhibit 11.

12. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in Pennsylvania through Aetna Life Insurance Company. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d). Rates for plans that may be renewed outside the Single Risk Pool (due to either being grandfathered or permissible transitional offerings) are not covered in this filing.

13. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively, less non-essential health benefits.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts of benefits in addition

to EHBs, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Small Group Market Trend Adjustments: Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2017.

14. Market-Adjusted Index Rate

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustments (Risk Adjustment and Exchange User Fees) were discussed, previously. The risk adjustment on Worksheet 1 of the URRT is displayed on a paid-basis. The exchange user fee is estimated as a PMPM based on the target premium rate. The values reflected in Exhibit E-1 have each been divided by the paid to allowed ratio to convert them to an allowed-basis.

15. Plan-Adjusted Index Rates

Exhibit E-2 illustrates the development of the Plan Adjusted Index Rates, and displays each plan-specific adjustment made to the Market Adjusted Index Rate. The Plan Adjusted Index Rates are displayed in Column 8. The following briefly describes how each set of adjustments was determined.

A. Actuarial Value, Cost Sharing, and Tobacco:

The factors in Column 2 are the product of three separate adjustments:

1. We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. We also reviewed the projected experience and the projected membership by plan to estimate an overall paid-to-allowed ratio. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage.
2. We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2017 membership.
3. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

B. Distribution and Administrative Costs:

Exhibit E-2, Column 4 reflects the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the 'Non-Benefit Expenses and Profit & Risk' section, and exclude the Risk Adjustment User Fee, and Exchange User Fee, which are reflected in the Market-Adjusted Index Rate.

C. Provider Network, Delivery System, and Utilization Management:

The factors in Column 5 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

D. Benefits in addition to EHBs:

The factors in Column 6 adjust for the impact of benefits in addition to EHBs.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). Hence, all factors in Column 6 are 1.00.

E. Catastrophic Plan Eligibility:
This filing does not include catastrophic plans.

F. Experience Period Plan Adjusted Index Rates
Worksheet 2 of the URRT displays the Plan Adjusted Index Rates filed in 2015 for the experience period.

16. Calibration
A. Age Curve Calibration:
The age factors are based on the HHS Default Standard Age curve.

We project a premium-weighted average age factor for the 2017 membership using the prescribed age curve and the projected age distribution based on issuer January 2016 membership and projected changes in the market. The age that most closely corresponding to the weighted average age factor and the age calibration factor is the reciprocal of the weighted average age factor shown in Exhibit 13.

B. Geographic Factor Calibration:
Exhibit 6 summarizes the rating area definitions and factors, and displays the projected membership by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor.

C. Small Group Premium Rates:
The development of the average projected trend factor is discussed in Section 13.

17. Consumer-Adjusted Premium Rate Development
Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as:
Calibrated Plan Adjusted Index Rate * Age Factor * Area Factor * Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation for a family of six, with more than three dependents under age 21, is shown in Exhibit 14.

18. Composite Premiums
Small employers will not be able to elect to have rates set using a composite approach as permitted by Pennsylvania.

19. AV Metal Values
The AV Metal Values on Worksheet 2 were based on the AV Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

20. AV Pricing Values

The AV Pricing Values are calculated as the ratio of the Plan Adjusted Index Rate to the Market Adjusted Index Rate. The adjustments reflected in the AV Pricing Values are discussed in Section 15. AV Pricing Values do not differ based on morbidity differences or benefit selection anticipated within the Single Risk Pool.

21. Membership Projections

Exhibit 15 summarizes the membership projections by plan. Membership projections are based on historical experience, enrollment in ACA-compliant plans through January 2016, and our expectations for future sales as additional members move to these plans from grandfathered and transitional plans. We assume that total enrollment will be similar to our current enrollment.

Terminated Plans and Products

Exhibit 16 provides a plan and product crosswalk from 2015 to 2017. The crosswalk includes the list of single risk pool plans and products that have terminated prior to January 1, 2017, products that have experience in the single risk pool experience period, and products that were made available in 2016 and 2017.

Consistent with the URRT instructions, experience for non-single risk pool terminated products is reported in aggregate under the terminated product with the largest membership in the experience period.

22. Plan Type

All plans are consistent with the plan type indicated on Worksheet 2.

23. Warning Alerts

The Experience Period Plan Adjusted Index Rate on Worksheet 2 differs from the Experience Period Premium PMPM on Worksheet 1 since 1) the Experience Period Premium reflects the actual enrollment mix for all non -grandfathered business in the market in 2015 while the average Plan Adjusted Index Rate reflects the projected (vs. actual) ACA mix for single risk pool experience and a zero rate for non-single risk pool experience , and 2) premiums reported on Worksheet 1 are net of estimated risk adjustment transfers and MLR rebates while the Plan Adjusted Index Rates on Worksheet 2 do not consider the impact of risk adjustment transfers or MLR rebates.

For the same reasons, the experience period Total Premium (TP) differs between Worksheets 1 and 2.

The Experience Period Incurred claims and Incurred Claims PMPM on Worksheet 2 adjust for the impacts of Reinsurance and Risk Adjustment. The Incurred Claims on Worksheet 1 are not adjusted for the impact of Reinsurance and Risk Adjustment. The warning alerts on rows 68 and 73 of Worksheet 2 result from the different treatment of Reinsurance and Risk Adjustment on the two worksheets.

The Projected Plan Adjusted Index Rate on Worksheet 2 differs from the Gross Premium Average Rate on Worksheet 1. This difference results from the value on Worksheet 1 being the rate that corresponds to claims incurred in the 12 months starting January 1, 2017, while the average on Worksheet 2 is the average rate for the market for coverage that begins between January 1, 2017 and December 31, 2017.

For the same reason, Total Premium (TP) differs between Worksheets 1 and 2.

24. Benefit Design

This filing includes the following standard plans: one Platinum, 8 Gold, 8 Silver, and 3 Bronze.

Please refer to the corresponding policy forms for detailed benefit language. Information on the cost-sharing parameters of the covered benefit plans, including deductibles, copays, and Actuarial Values, is summarized in the AV Snapshots and Benefit Summaries. All benefit and cost sharing parameters comply with Pennsylvania benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

25. Marketing

Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including directly to consumers through direct mail, telemarketing, and the internet and indirectly through brokers and general agents. Marketing and distribution approaches may change from time to time at management's discretion.

26. Underwriting

Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations.

27. Renewability

These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

28. Company Financial Condition

As of December 31, 2015, the capital and surplus held by Aetna Life Insurance Company was approximately $3.7 billion. This amount is disclosed in page 3, line 37 of the Company's statutory financial statement dated December 31, 2015. The Company issues insurance nationwide for multiple lines of business, including large group medical, small group medical, individual medical, and various non-medical products.

Reliance

While I have reviewed the reasonableness of the assumptions in support of both the preparation of the Part I Unified Rate Review Template and the assumptions in support of the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- URRT Methodology and Data Definitions
- Experience Period MLR Rebates
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Pediatric Dental Claim Cost
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, Andrew Adams am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:

    a. ASOP No. 5, Incurred Health and Disability Claims
    b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
    c. ASOP No. 12, Risk Classification
    d. ASOP No. 23, Data Quality
    e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
    f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    g. ASOP No. 41, Actuarial Communications.

2. The Projected Index Rate is:
    a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),

b. Developed in compliance with the applicable Actuarial Standards of Practice,
c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
d. Neither excessive, deficient, nor unfairly discriminatory.

3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.

4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

May 10, 2016

Andrew Adams, FSA, MAAA
Aetna

Date

2017 Pennsylvania Actuarial Memorandum

1. Basic Information and Data

A. Company Information

Company Legal Name:	Aetna Life Insurance Company
NAIC #:	60054
Market:	Small Group Off-Exchange
Effective Date:	01/01/2017
Avg rate change requested:	31.7%
Range of rate change requested:	17.1% to 70.9%
Products:	PPO, Indemnity
Rating Areas:	Rating Areas 1-9
Metal Levels:	Platinum, Gold, Silver, Bronze
Current # covered lives:	6,123
Current # policyholders:	3,201
Number of plans offered:	20
HIOS Issuer ID / Binder #:	33906
Rate Filing Tracking Number:	AETN-130533503
Policy Form(s):	AL SG HCOC-2017-PPO 01; AL SG HCOC-2017-TC 01; AL SG COCAmend-ET 01
Form Filing Tracking Number:	AETN-130496669

B. Rate History and Proposed Variations in Rate Changes

- January 1, 2014
  - Introduction of ACA
  - AETN-129037905
- July 1, 2014
  - Lowered previously filed 3Q14-4Q14 rates by 17%
  - AETN-129418260
- January 1, 2015
  - Filed a 4% increase
  - AETN-129621162
- July 1, 2015
  - Lowered previously filed 3Q15-4Q15 rates by 4% by removing commissions and tobacco surcharge load
  - AETN-129920145
- January 1, 2016
  - Filed a 5% rate increase
  - AETN-130046894
- April 1, 2016
  - Increased previously filed 2Q16-4Q16 rates by 4% to add commissions
  - AETN-130242358

C. Average Rate Change
The average rate change, as noted in cell AC13 of Table 10 and the percent change rate requested on the SERFF Rate Review Detail screen, is 31.7%. The change in the 21 year old non-tobacco premium pmpm as stated in cell AZ13 on Table 11 is 39.4%.

D. Membership Count
Total current membership by age bucket is shown on Table 1.

E. Benefit Changes
The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2017 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

F. Experience Period Claims and Premium
The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2015 through December 31, 2015 and paid through February 29, 2015, for Aetna Life Insurance Company. Incurred claims for both community-rated ACA and transitional plans have been included.

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered Small Group business in Pennsylvania, The premiums have been decreased for expected risk adjustments payables. Our internal projections indicate that no MLR rebate is expected to be paid in 2016 (for 2015 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB).

The experience includes capitation for the same services that are expected to be capitated for the products in this filing in 2017. We have adjusted the manual experience for known or anticipated changes in capitation contracts and projected changes in demographics where capitation rates vary based on demographics.

Transitional Reinsurance recoveries do not apply to Small Group business. The experience period data reflects the Reinsurance Contribution of $3.67 PMPM assessed during 2015. Risk Adjustment transfer is accrued at the issuer and market level based on 2014 CMS data. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2015 Risk Adjustment fees of $0.08 PMPM in Worksheet 2.

G. Credibility of Data

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

The source data for our manual rate is the experience incurred from January 1, 2015 to December 31, 2015 and paid through February, 2016 for Aetna and Coventry community-rated ACA policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

H. Trend Identification

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on local market commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released February, 2016. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical as well as emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including visit-based mental health services. Other includes home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient

Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2017.

I. Historical Experience
As described above, medical trend factors are based on our Medical Economics Unit's local trend and network experience, and pharmacy trends are based on local market commercial group Rx trend analysis.

2. Rate Development & Change

Please refer to the file titled *2017 PA SG ALIC Exhibits.xlsx* for any Exhibits referenced in the sections below.

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims
The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively, less non-essential health benefits.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts of benefits in addition to EHBs, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2017.

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustments (Risk Adjustment and Exchange User Fees) were discussed, previously. The risk adjustment on Worksheet 1 of the URRT is displayed on a paid-basis. The exchange user fee is estimated as a PMPM based on the target premium rate. The values reflected in Exhibit E-1 have each been divided by the paid to allowed ratio to convert them to an allowed-basis.

<u>Single Risk Pool Adjustment Factors</u>:
"Change in Morbidity" => The experience period data includes experience for both community-rated policies issued to small employers in 2015 and medically underwritten policies renewed under the Transitional Policy, while the credibility manual includes only experience for community-rated policies. We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2017. Exhibit 3 illustrates the resulting projection factor.

"Change in Benefits" => Discussed in Section 1E above.

“Change in Other” => The ‘Other’ adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

B. Retention Items

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are based on historical corporate Small Group market expense levels, current-year projections, and projected changes in expenses, inflation, and membership for 2017. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to the Company’s internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2017, as well as Federal income tax. The risk adjustment user fee, as previously mentioned in Section 9, is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in pricing our 2016 plans.

C. Normalized Market-Adjusted Projected Allowed Total Claims

The age factors are based on the HHS Default Standard Age curve. We project a premium-weighted average age factor for the 2017 membership using the prescribed age curve and the projected age distribution based on issuer January 2016 membership and projected changes in the market. The age that most closely corresponding to the weighted average age factor and the age calibration factor is the reciprocal of the weighted average age factor shown in Exhibit 13.

Exhibit 6 summarizes the rating area definitions and factors, and displays the projected membership by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. We also reviewed the projected experience and the projected membership by plan to estimate an overall paid-to-allowed ratio. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage. In addition, we applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2017 membership.

The factors in Column 5 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

D. Components of Rate Change
The overall change in the weighted average Calibrated Plan Adjusted Index Rate is 31.7%, as indicated in Table 8 row A. The components of this rate change are as follows:

- The change in normalized allowed claims is worth 20%
- The change in allowable plan adjusted level components is worth 5%
- The change in retention components is worth 7%

3. Plan Rate Development

The following briefly describes how each set of adjustments was determined.

Pricing AV / Benefit Richness:
These adjustments are discussed in Section 2C above.

Benefits in addition to EHBs:
The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). The factor for the impact of benefits in addition to EHBs is a 1.00.

Provider Network:
This adjustment reflects the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

Catastrophic Eligibility:
This filing does not include Catastrophic plans.

Tobacco Surcharge Adjustment:
The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

Admin Costs / Taxes & Fees / Profit or Contingency:
These factors reflect the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the Retention section.

An AV Certification is included in this filing, titled *PA_SG_33906_AVCCert_Off_2017_v1.pdf*.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

The Calibrated Plan Adjusted Index Rates for 2016 and 2017 are shown in Columns Z and AA. The 2017 rates in Column AA differ from the Calibrated Plan Adjusted Index Rates on Exhibit E-2 because the trend factor proposed in our filing includes the additional impact of HIF, as described in Section 2A above.

5. Plan Factors

A. Age and Tobacco Factors
The age factors are based on the HHS Default Standard Age curve. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed for tobacco rating and factors of 1.0 have been entered.

B. Geographic Factors

The proposed geographic factors are different than the current approved factors. We compared the relative unit costs by rating area, and considered the convergence of Aetna and Coventry provider contracts, in order to develop the proposed geographic factors.

C. Network Factors

There are no narrow networks included in this filing.

D. Service Area Composition

The Service Area composition for the broad network is statewide, while the Service Area composition for the narrow networks is listed in Table 13.

E. Composite Rating

While PA allows composite rating, we are not offering this option at this time. However, the member level rates in this filing would not be impacted if we allow the composite rating option at a later time.

6. Actuarial Certifications

Reliance

While I have reviewed the reasonableness of the assumptions in support of both the preparation of the Part I Unified Rate Review Template and the assumptions in support of the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- URRT Methodology and Data Definitions
- Experience Period MLR Rebates
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Pediatric Dental Claim Cost
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, Andrew Adams am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:

    a. ASOP No. 5, Incurred Health and Disability Claims
    b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
    c. ASOP No. 12, Risk Classification
    d. ASOP No. 23, Data Quality
    e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
    f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    g. ASOP No. 41, Actuarial Communications.

2. The Projected Index Rate is:

a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
b. Developed in compliance with the applicable Actuarial Standards of Practice,
c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
d. Neither excessive, deficient, nor unfairly discriminatory.

3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.

4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Subject: Aetna Life Insurance Company
Small Group Rate Filing
SERFF # AETN-130533503

Dear Mr. Gurgiolo:

Enclosed is additional information related to the items contained in your objection letter dated 06/17/2016 for the above referenced rate filing.

1. *Please provide all tables, exhibits, etc. supporting actuarial memorandum in Excel format with formulas for each entry.*

Please refer to the file titled '2017 PA SG ALIC Exhibits formulas.xlsx' for this information.

2. *Please be advised that each time the URRT is changed in SERFF, the URRT in HIOS must also be updated. Please acknowledge your understanding and certify that you are in compliance.*

We do understand and we are now in compliance

3. *Please provide the 2015 Statutory Annual Statement Five-Year Historical Data Exhibit*

Please refer to the file titled 'ALIC 2015 5 Year Historical.pdf'

4. *Please provide a copy of the Supplemental Health Care Exhibit (SHCE), and describe the reason(s) for any differences between the SHCE and Worksheet 1, Section 1 of the Uniform Rate Review Template.*

Please refer to the file titled 'ALIC SHCE.pdf' for the SHCE. There are several reasons why the SHCE would differ from the Worksheet 1 of the URRT. The SHCE is on a financial statement basis whereas Worksheet 1 uses a pricing basis. These bases may vary due to changes in expectations, corporate guidance, and regulation in the Marketplace. There also could be discrepancies on the groups/members included. Depending on when the financial statement was developed some groups could have been classified as large group instead of small group.

5. *Please provide the January 1, 2016 through April 30, 2016 emerging experience in an Excel worksheet formatted similar to Table 2.*

Please refer to the file titled 'Objection Responses ALIC 06-17-2016.xlsx' for this development

980 Jolly Road
Mailstop U12N
Blue Bell, PA 19422

6. *Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the Projected Risk Adjustments PMPM amount found in Section III, Worksheet 1 of the URRT. Please provide a detailed narrative that describers the development of the estimated risk adjustment transfer payment. In demonstrating the development of the transfer payment, please show all risk transfer formula components, the estimated market-wide average risk assumptions as well as support for those assumptions. When responding to this data call, you may redact this response as it will contain proprietary information. Since this response should include detailed insight into the risk adjustment transfer methodology, you may redact this response.*

Please refer to the file titled 'Objection Responses ALIC 06-17-2016.xlsx' for this development. A 2015 Wakely Risk Adjustment accruals analysis was used to determine our current risk transfer relative to the market, with adjustments for carriers that did not participate. The estimated 2015 risk transfer PMPM was then adjusted for the anticipated impact of updates to the risk adjustment model coefficients and trend.

7. *Regarding broker commissions:*
   • Under what circumstances and in what geographic locations will commissions be paid?

Commissions are paid in all geographic locations in all circumstances except for cases sold through Sam's Club which are denoted as AP in the plan name.

• Are commissions paid for SEP?

ALIC is only offered off-exchange.

• Provide a copy of the broker agreement - current and 2017.

Please refer to the file titled "aetna_producer_agreement.pdf".

• Show the calculation of the average commission - current and 2017.
Since this response should include detailed insight into the broker commission, you may redact this response

Please refer to the file titled 'Objection Responses ALIC 06-17-2016.xlsx'

FIVE-YEAR HISTORICAL DATA

Show amounts in whole dollars only, no cents; show percentages to one decimal place, i.e., 17.6.

Show amounts of life insurance in this exhibit in thousands (omit $000)

SUPPLEMENTAL HEALTH CARE EXHIBIT'S EXPENSE ALLOCATION REPORT

(To Be Filed by April 1)

NAIC Group Code.....0001 NAIC Company Code.....60054

Description of allocation methodology:

Aetna Life Insurance Company's (the "Company") Supplemental Health Care Exhibit for the year ended December 31, 2015 (the "Exhibit") has been prepared in accordance with the instructions to this Exhibit. Certain information required in the Exhibit was not maintained by the Company in the normal course of business and is not required or consistent with other required and existing financial reporting for 2015. As a result, in certain situations the Company is not able to categorize membership and other information for 2015 directly by column definition ("MLR pool") and/or jurisdiction in accordance with the Exhibit instructions. Therefore, the preparation of the Exhibit required the use of estimates and allocation methodologies based on the best information available at the time this Exhibit was prepared. The process used to prepare the Exhibit was applied consistently for each of the forms included in the Exhibit for the Company and the Company's affiliates that are required to file the Exhibit.

Only a fraction of Aetna related community benefit expenditures are reported. In fact, in 2015 Aetna, its affiliates, and the independent Aetna Foundation spent over $14 million on activities to enhance public health and to improve the public's access to health services.

The following:

- Describes the process for identifying the Company's Quality Improvement Activities ("QIA") and expenses;
- Describes the methodology utilized to allocate such expenses; and
- Provides a detailed description of QIA expenses.

The Company and its affiliates use a shared-services model to support multiple subsets of its customer base, including services that qualify as QIA. Data regarding QIA expenses are not maintained in a manner permitting direct attribution to an individual customer or plan sponsor. The Company and its affiliates identified the activities that meet the definition of QIA, and then developed an allocation methodology to allocate QIA expenses to each legal entity and MLR pool.

Identification of QIA expenses reported in the Exhibit:

The Company utilized the definitions as set forth in the Exhibit and as established in 45 CFR Part 158 to analyze activities performed by the Company and its affiliates that serve the customers of the Company.

In this analysis, cost centers within which activities are performed that may constitute QIA were identified. We analyzed those activities to determine whether they qualified as QIA. A review was then performed to estimate the percentage of costs within each cost center that related to the QIA.

Activities were then mapped to the categories of QIA expenses as disclosed in the table below.

Note that the functional areas often include multiple programs or activities that will for any period of time fall into one or several of the following three categories:

- Programs that are evidence-based and measured internally in a variety of ways
- Programs that are changed/updated as new research or internal results indicate opportunities for improvement in outcomes
- Programs based on external, evidence-based analyses that measured results, but are not yet measured internally.
- New Initiatives that have not met the "objective verifiable results requirement" prescribed in the federal regulation are identified by an 'X' in the 'New' column in the table below for the relevant expense type.

For new programs, the timeframe for sufficient data to be available to confirm objective and verifiable results will vary with the program. Generally, credible data should be available within 24 to 30 months from when there is a population of sufficient size subject to the program.

Methodology used to allocate QIA Expenses:
After QIA activities and associated expenses were identified, the expenses were allocated among the Company and each of its affiliated legal entities required to file the exhibit. QIA expenses were allocated to each legal entity by applying a membership-based allocation methodology. This is the same methodology used to allocate expenses among legal entities generally. Annually, each cost center is assigned a legal entity allocation ratio that is determined by the activities performed in that cost center.

MLR pool assignments for QIA qualified expenses for each cost center that contained QIA qualified expenses were determined using a a direct written premium-based allocation, consistent with the allocation of other SG&A expenses; including Cost Containment, Other Claim Adjustment Expenses and Other SG&A.

QIA qualified expenses were allocated among jurisdictions by allocating the QIA qualified expenses based upon the amount of direct written premium recorded in each jurisdiction for each MLR pool.

Detailed Description of Quality Improvement Expenses:

Expense Type from Part 3		New	Detailed Description of Expense
Improve Health Outcomes:			
01.001.	Case management		Case Management programs, Disease Management, outpatient assessments, including amounts paid to third party vendors to provide these services to Aetna members.
01.002.	Quality of care		Quality Management, Quality Reviews, Healthcare disparities management, as well as drug interaction reviews, including initiatives targeting a reduction in adverse events (e.g., post heart attack). Also includes work in setting standards and directing members to Institutes of Excellence.
01.003.	Review of service appropriateness		Review of service appropriateness within clinically acceptable guidelines
01.004.	Precertification focused on safety		Portion of the precertification activities that assesses patient safety of various treatments sought by members or prescribed by providers or pharmacies, based on evidence-based medical protocols.

Detailed Description of Quality Improvement Expenses:

	Expense Type from Part 3	New	Detailed Description of Expense
01.005.	HEDIS Compliance and accreditation	.....	Expenses related to ensuring tracking, reporting, and compliance with HEDIS quality measures and costs of being an accredited plan.
01.006.	Program support	.....	Expenses related to supporting new and existing Case, Disease and Wellness management programs, focused on tracking results and identifying areas for improvement and further development.
01.007.	Policy development and training	.....	Expenses related to development of and training around policies that reflect evidence-based medical research and protocols, in order to support Disease, Case and Wellness management programs, provider communications, and member support activities.
Activities to Prevent Hospital Readmission:			
02.001.	Discharge planning	.....	Planning supporting discharges of patients from inpatient settings, including transition plans, family education, medication reviews and follow-up outreach protocols intended to prevent hospital readmissions or further illnesses. This includes acting as the liaison/advocate between the member and provider as well as family members when necessary.
Improve Patient Safety and Reduce Medical Errors:			
03.001.	Improve patient safety and reduce medical errors	.....	Identifying and using clinical practices to avoid harm and lowering the risk of infections acquired at medical facilities. Use technology to identify gaps in care, methods of best practice treatment as well as provider outreach.
Wellness & Health Care Quality Improvements:			
04.001.	Wellness program delivery	.....	Includes expenses related to wellness program development and management, clinical integration, communications, coaching, incentive and rewards management, tracking results, etc. related to specific wellness programs such as adult and childhood obesity, and post heart attack management. This includes amounts paid to third party vendors to provide these services to the Company's members.
04.002.	Women's health	.....	Programs including education and management of members and providers on general and 'high risk' pregnancies, fertility and genetic counseling, and racial/ethnic disparity trends.
04.003.	Informed Health Line	.....	Portion of the 24-hour nurse line expenses dedicated to supporting members' ability to access and navigate appropriate health care services, or to provide member counseling and education on various disease states in order to appropriately guide members to needed services.
04.004.	Other member health education programs	.....	Costs related to preventive care, coaching and monitoring reminders to members on such activities as cholesterol screening, controlling hypertension and flu vaccination. This category also includes member wellness promotion, awareness, and engagement activities.
HIT Expenses for Health Care Quality Improvements:			
05.001.	Reporting and analytics	.....	Data, extraction, analysis, and reporting related to end to end condition analysis and other activities in Improving Health Outcomes, preventing hospital readmissions, improving patient safety, supporting wellness and health promotion activities, and new quality program development.
05.002.	Technology and applications	.....	Technical architecture, collection and data distribution costs supporting reporting and analytics and HIT expenses, as well as other specific programs and functions qualifying as QIA.

Subject: Aetna Life Insurance Company
Small Group Rate Filing
SERFF # AETN-130533503

Dear Mr. Gurgiolo:

Enclosed is additional information related to the items contained in your objection letter dated 07/13/2016 for the above referenced rate filing.

1. *Induced Utilization*
    a. *Please complete the table below for all plans, and confirm that the ratio in column (8) represents the AV and Cost Sharing for each plan in your filing.*

Please refer to the file titled 'Objection Responses ALIC 07-13-16.xlsx'.

    b. *Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of each, the AV and the cost sharing factors for each plan. Also, provide narrative that explains the derivation.*

Please refer to the file titled 'Objection Responses ALIC 07-13-16.xlsx'. For narrative on the derivation please refer to the Part III Memo, Section 15A, items 1 and 2.

    c. *Please provide justification for relative induced utilization assumptions in the Company's pricing that exceed the federal factors used in the risk adjustment model proving that morbidity is not reflected.*

Our induced utilization assumptions due not exceed the federal factors because they are based on induced utilization factors used in the Risk Adjustment program. These adjustments are then normalized to result in an aggregate factor of 1.0 when applied to the projected 2017 membership.

    d. *Please confirm that each plan's induced utilization factor was normalized by an aggregate factor, and that the resulting sumproduct (against projected membership) produces a factor of 1.000. Please show the steps that demonstrate this.*

Please refer to the file titled 'Objection Responses ALIC 07-13-16.xlsx'.

2. *Please show quantitatively that plan premiums are in proportion to the plan AV Pricing Values.*

July 28, 2016

Ms. Donna Novak, FSA, MAAA
NovaRest Actuarial Consulting

Subject: Aetna Life Insurance Company
Small Group Rate Filing
SERFF # AETN-130533503

Dear Ms. Donna Novak:

Enclosed is additional information related to the items contained in your objection letter dated 07/25/2016 for the above referenced rate filing.

1. *Induced Utilization*
    a. *Please complete the table below for all plans, and confirm that the ratio in column (8) represents the induced utilization for each plan.*

Please refer to the file titled 'Objection Responses ALIC 07-25-16.xlsx'.

    b. *Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the AV and the cost sharing factors for each plan.*

Please refer to the file titled 'Objection Responses ALIC 07-25-16.xlsx'.

    c. *Please provide any additional justification for induced utilization assumptions in the Company's pricing.*

We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2017 membership.

    d. *Please confirm that each plan's induced utilization factor was normalized by an aggregate factor, and that the resulting sumproduct (against projected membership) produces a factor of 1.000. Please show the steps that demonstrate this.*

Please refer to the file titled 'Objection Responses ALIC 07-25-16.xlsx'.
