Form Filing Tracking Number:	AETN-130908211 & AETN-130908220

Dear Ms. Fabian-Marks:

The purpose of this filing revision is to provide details of the premium rate development and resulting proposed monthly premium rates for Small Group policies which will be offered off-Exchange in the State of PA for effective dates of January 1, 2018 and later. This filing is being provided to comply with regulatory rate filing requirements, and is not intended to be used for other purposes.

The health benefit plans proposed in this filing are in compliance with all state-specific benefit requirements and rating regulations, as well as the benefit plan requirements of the Patient Protection and Affordability Act (P.L. 111-148). This rate filing is intended for new business issued through the State of PA off-Exchange marketplace effective January 1, 2018.

All products and associated proposed monthly premium rates contained within this rate filing will be available to existing business upon their request. Existing business that is

not considered grandfathered under PPACA regulation will be converted to the plans and rates in this filing upon renewal.

We have tried to present this information in a manner that will facilitate your Department's review. If there are changes we can make to improve the process or you would like us to present the information differently in the future, please let us know.

Please feel free to contact me at the above listed telephone number and/or e-mail address if you have any additional questions.

Sincerely,

[redacted], FSA, MAAA
Aetna

2018 Pennsylvania Actuarial Memorandum

1. Basic Information and Data

A. Company Information

Company Legal Name:	Aetna Health, Inc. / Aetna Health Ins. Co.
NAIC #:	95109 / 72052
Market:	Small Group Off-Exchange
Effective Date:	01/01/2018
Avg rate change requested:	11%
Range of rate change requested:	-18.6% to 70.3%
Products:	HMO, POS
Rating Areas:	Rating Areas 1-9, certain counties excluded
Metal Levels:	Silver
Current # covered lives:	4,733
Current # policyholders:	2,701
Number of plans offered:	2
HIOS Issuer ID / Binder #:	64844
Rate Filing Tracking Number:	AETN-131033648 & AETN-131033632
Policy Form(s):	HI SG HCOC-2018 02 & HO SG HCOC-2018 02
Form Filing Tracking Number:	AETN-130908211 & AETN-130908220

B. Rate History and Proposed Variations in Rate Changes

- January 1, 2014
  - Introduction of ACA
  - AETN-129037950 & AETN-129037955
- July 1, 2014
  - Lowered previously filed 3Q14-4Q14 rates by 17%
  - AETN-129418257 & AETN-129418258
- January 1, 2015
  - Filed a 4% increase
  - AETN-129621063 & AETN-129621158
- July 1, 2015
  - Lowered previously filed 3Q15-4Q15 rates by 4% by removing commissions and tobacco surcharge load
  - AETN-129920222 & AETN-129920216
- January 1, 2016
  - Filed a 5% rate increase
  - AETN-130046864 & AETN-130046890
- April 1, 2016
  - Increased previously filed 2Q16-4Q16 rates by 4% to add commissions
  - AETN-130242320 & AETN-130242341
- October 1, 2016
  - Increased previously filed 4Q16 rates by 10.8%
  - AETN-130565130 & AETN-130565135

- January 1, 2017
    - Filed a 26.5% rate increase
    - AETN-130533489 & AETN-130533478

C. Average Rate Change
The average rate change, as noted in cell AC15 of Table 10 and the percent change rate requested on the SERFF Rate Review Detail screen, is 11.0%. The change in the 21 year old non-tobacco premium pmpm as stated in cell AN13 on Table 11 is 17%.

D. Membership Count
Total current membership by age bucket is shown on Table 1.

E. Benefit Changes
The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2017 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

F. Experience Period Claims and Premium
The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2016 through December 31, 2016 and paid through February, 2016, for Aetna Health, Inc. (and AHIC) which now includes Health America PA (HAPA). Incurred claims for both community-rated ACA and transitional plans have been included.

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

Experience period premiums are date-of-service premiums from our actuarial experience databases for Small Group business in Pennsylvania. Our internal projections indicate that no MLR rebate is expected to be paid in 2017 (for 2016 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB).

No adjustments to the experience period data have been made for capitation arrangements because we expect little to no capitation services to be provided in 2018.

Transitional Reinsurance recoveries do not apply to Small Group business. Risk Adjustment transfer is accrued at the issuer and market level based on 2016 Wakely data and our internal projections of how our risk relative to market has changed since that report was issued. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2016 Risk Adjustment fees of $0.15 PMPM in Worksheet 2.

G. Credibility of Data

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

The source data for our manual rate is the experience incurred from January 1, 2016 to December 31, 2016 and paid through February, 2017 for Aetna and Coventry community-rated policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

H. Trend Identification

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in March, 2017. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical

pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2018.

I. Historical Experience
As described above, medical trend factors are based on our Medical Economics Unit's local trend and network experience, and pharmacy trends are based on national commercial group Rx trend analysis.

2. Rate Development & Change

Please refer to the file titled *2018 PA SG AHI-AHIC Exhibits.xlsx* for any exhibits referenced in the sections below.

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims
The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs and catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2018.

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment was discussed, previously. The risk adjustment on is displayed on a paid-basis and the exchange user fee is estimated as a PMPM based on the target premium rate on Worksheet 1 of the URRT. These values have been have each been converted to percent of allowed claims in this Exhibit.

<u>Single Risk Pool Adjustment Factors</u>:
Change in Morbidity => The experience period data includes experience for community-rated policies issued to small employers in 2016 and medically underwritten policies renewed under the Transitional Policy. We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2018.

Change in Demographics => Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts.

Change in Network => Included in ‘Change in Other’ below.

Change in Benefits => Discussed in Section 1E above.

Change in Other => The ‘Other’ adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

Paid-to-Allowed Ratio => The projected paid to allowed ratio is 84.5%. Paid to allowed ratios are based on 2016 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

Risk Adjustment – Projection Period => We used the projected Risk Adjustment Transfer amounts provided by the Pennsylvania Insurance Department on May 12, 2017, which incorporated carrier data as of May 1, 2017, to develop our initial projected risk adjustment transfer assumption.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2018 Notice of Benefit and Payment Parameters. The 2018 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost. We subtracted from that Risk Adjustment transfer .5% of premiums for National High Risk pool funding, and added our anticipated High Risk Pool recoveries. High Risk Pool recoveries were estimated based on the average of member-level recoveries that we would have received under this program for 2014-2016 claims as a percent of premium, for Silver Off-Exchange plans.

As a result, we project a risk adjustment payable, net of the 2018 user fee of $0.14 PBMPM.

Reinsurance – Projection Period => There will be no reinsurance recoveries in 2018.

Exchange User Fee => The EUF is not applicable for this filing.

Projected Allowed non-EHB Claims PMPM => The products discussed in this filing provides coverage for only those benefits defined as Essential Health Benefits (EHB).

B. Retention Items

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2017 projections, and projected changes in expenses, inflation, and membership for 2018 for our National book of Small Group business. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company’s internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2018, as well as Federal income tax and State Premium taxes. The risk adjustment user fee is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under

non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in the initial pricing of our 2017 plans.

C. Normalized Market-Adjusted Projected Allowed Total Claims
The age factors are based on the HHS Default Standard Age curve. The factors are shown in Exhibit C-2. Exhibit C-2 demonstrates the determination of the Plan-Level Average Age Factor. Plan membership is based on issuer's similar January 2017 plan membership and projected changes in the market.

To Age-Calibrate the Plan-Adjusted Index Rates, We project a premium-weighted average age factor for the 2018 membership using the prescribed age curve and the projected age for each plan, as illustrated on exhibit C-2, The overall Age Calibration factor is developed in Column B of Exhibit C-1. This factor is based on the weighting of plan-adjusted index rate and membership weighted by each plan's average age factor membership. The Age-Calibrated Plan Adjusted Index Rate is determined multiplying each Plan Adjusted Index Rate by the Plan-Level Average Age Factor and then dividing by the weighted over-all average age factor.

The age that most closely corresponds to the premium weighted overall average age factor is the average age for the single risk pool.

Exhibit C-2 summarizes the rating area definitions and factors, and displays the projected premium by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor, and is applied in column F of Exhibit C-1. Projected area factors are shown in Exhibits 6 and C-2. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

D. Components of Rate Change
The overall change in the weighted average Calibrated Plan Adjusted Index Rate is 11.5%, as indicated in Table 8 row A. The components of this rate change are as follows:

- The change in normalized allowed claims is worth -2%
- The change in allowable plan adjusted level components is worth 4%
- The change in retention components is worth 10%

3. Plan Rate Development
The following briefly describes how each set of adjustments was determined.

Pricing AV / Benefit Richness:
These adjustments are discussed in Section 2C above.

Benefits in addition to EHBs:
The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). The factor for the impact of benefits in addition to EHBs is a 1.00.

Provider Network:
This adjustment reflects the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

Catastrophic Eligibility:
This filing does not include catastrophic plans.

Tobacco Surcharge Adjustment:
The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

Admin Costs / Taxes & Fees / Profit or Contingency:
These factors reflect the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the Retention section.

An AV Certification is included in this filing, titled *PA_SG_64844_AVCert_Off_2018_v1.pdf*.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

The Calibrated Plan Adjusted Index Rates for 2017 and 2018 are shown in Columns Z and AA. The 2018 rates in Column AA differ from the Calibrated Plan Adjusted Index Rates on Exhibit E-2 for two reasons: (1) The CPAIR on Exhibit E-2 are 1/1/2018 rates while the rates in Column AA are average 2018 rates, and (2) our internal modeling incorporates the average trend to develop a Net Risk Adjustment factor as indicated on Exhibit E-1 to go from the Projected Index Rate to the Market Adjusted Index Rate. This is not accounted for in Table 5.

5. Plan Factors

A. Age and Tobacco Factors

The age factors are based on the HHS Default Standard Age curve. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed for tobacco rating and factors of 1.0 have been entered.

B. Geographic Factors

The proposed geographic factors are the same as the current approved 2017 factors.

C. Network Factors

Only one network is included in this filing.

D. Service Area Composition

The Service Area composition for this rate filing is the same as the current approved 2017 rate filing.

E. Composite Rating

While PA allows composite rating, we are not offering this option at this time. However, the member level rates in this filing would not be impacted if we allow the composite rating option at a later time.

6. Actuarial Certifications

Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [redacted] am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:

    a. ASOP No. 5, Incurred Health and Disability Claims
    b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
    c. ASOP No. 12, Risk Classification
    d. ASOP No. 23, Data Quality
    e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
    f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    g. ASOP No. 41, Actuarial Communications
    h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

2. The Projected Index Rate is:

a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
b. Developed in compliance with the applicable Actuarial Standards of Practice,
c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
d. Neither excessive, deficient, nor unfairly discriminatory.

3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.

4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

May 19, 2017

_____ _____

[redacted], FSA, MAAA Date

Aetna

Aetna Health, Inc.
Pennsylvania Small Group
HMO and POS Products

Summary

Aetna is filing premium rates for Small Group plans in PA.

The new rates will apply to plan years effective in 2018. The current membership and range of rate changes by product are:

Product Name	# Members as of February 2017	Range of Increases
Aetna POS	2,329	-18.6% to +70.3%; avg.-8.32%
Aetna HMO	2,404	+9.4% to +68.3%; avg. +39%

Why We Need to Increase Premiums

Medical costs are going up and we are changing our rates to reflect this increase. We expect medical costs to go up 12.1% excluding the effect of benefit or cost sharing changes. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Examples of increasing medical costs we have experienced over the last year include:

- The cost of Prescription Drugs has increased 8.3%
- The cost of Inpatient Services has increased 7.8%

What Else Affects Our Request to Increase Premiums

Our estimate of average population health and the expected risk adjustment transfers for Affordable Care Act (ACA) products have changed to reflect new data on market average premiums and population health. These changes are affected by the movement of business between the ACA market and other options, including grandfathered/transitional/state high risk pool/ Medicaid/alternative coverage.

Claims experience for this market has been worse than anticipated. Part of the rate increase is needed to ensure that we can continue to offer coverage in this market.

Will Premiums for All Small Groups Decrease 8.32% for POS and Increase 39% for HMO?

No, increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

How does this request align to Minimum Loss Ratio Requirements (MLR)?

These rates are expected to produce an MLR equal to or above the 80% requirement for Small Group business. Under the ACA, at least 80% of the premiums collected by health plans are expected to pay for medical care and activities that improve health care quality for members. If the actual MLR turns out to be less than 80%, rebates will be issued to members in accordance with the law.

Aetna makes significant investments that benefit our members that the government does not allow us to use in this calculation. These investments include customer service, health quality activities like disease management programs, and the development of new information technologies.

What is Aetna doing to keep premiums affordable?

Aetna strives to keep our products as affordable as possible and to address the underlying cost of health care. We are:

- Developing new agreements, arrangements, and partnerships with health care providers that base provider compensation on the quality of care.
- Creating medical management programs that address potential health issues for members earlier, improving health outcomes and reducing the need for high-cost health care services.
- Working to reduce the ability of out-of-network providers to collect unreasonably excessive payments for services they provide.

We are dedicated to increasing transparency within the health care system and helping members best utilize the plans that they have. Members can access Aetna Navigator, a secure member website, which allows them to research their specific plan benefits, health care providers in a given area, and in some locations, the cost of certain health care services. The Aetna Navigator streamlined mobile app is also available to allow members to take their care on the go.

Additionally, Aetna's Plan for Your Health website aims to educate all consumers on how to take advantage of their health care benefits.

Actuarial Memorandum and Certification

General Information

Company Identifying Information:

Company Legal Name:	**Aetna Health, Inc. & Aetna Health Ins. Co.**
State:	**Pennsylvania**
HIOS Issuer ID:	**64844**
Market:	Small Group
Effective Date:	01/01/2018
Rate Filing Tracking Number:	**AETN-131033648 & AETN-131033632**
Policy Form(s):	**HI SG HCOC-2018 02 & HO SG HCOC-2018 02**
Form Filing Tracking Number:	**AETN-130908211 & AETN-130908220**

Company Contact Information:

Name: [redacted]
Telephone Number:
Email Address:

1. Purpose, Scope, and Effective Date

The purpose of this filing is to:

1) Provide support for the development of the Part I Unified Rate Review Template;
2) Provide support for the assumptions and premiums rate development for the products supported by the policy forms referenced above;
3) Request approval of the proposed monthly premium rates; and
4) Provide benefit plan designs summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation.
These rates are for plans issued in Pennsylvania beginning January 1, 2018. The rates comply with all rating guidelines under federal and state regulations. The filing covers plans that will be offered outside the public Marketplace in Pennsylvania.

2. Proposed Rate Increase

This filing includes new benefit plans that will be marketed to Small Groups in Pennsylvania for coverage effective beginning January 1, 2018.

3. Experience Period Premium and Claims

A. Paid Through Date:

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2016 through December 31, 2016 and paid through February 28, 2017, for Aetna Health, Inc. (and AHIC) which now includes Health America PA (HAPA). Experience for both community-rated ACA and transitional plans have been included.

B. Premiums (Net of MLR Rebate) in Experience Period:

Experience period premiums are date-of-service premiums from our actuarial experience databases for Small Group business in Pennsylvania. Our internal projections indicate that no MLR rebate is expected to be paid in 2017 (for 2016 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

C. Allowed and Incurred Claims Incurred During the Experience Period:
Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

4. Benefit Categories
Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in March, 2017. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

5. Projection Factors

A. Changes in the Morbidity of the Population Insured:
The experience period data includes experience for:

- Community-rated policies issued to small employers in 2016
- Medically underwritten policies renewed under the Transitional Policy.

We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2018.

B. Changes in Benefits:
The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that

have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2017 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

C. Changes in Demographics:
Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts.

D. Other Adjustments:
The 'Other' adjustment includes the projected impact of changes in network composition and provider contracts.

E. Trend Factors (Cost/Utilization):
Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Exhibit 8 shows the anticipated annual trend from the experience period to the rating period.

6. Credibility Manual Rate Development
A. Source and Appropriateness of Experience Data Used:
The source data for our manual rate is the experience incurred from January 1, 2016 to December 31, 2016 and paid through February, 2017 for Aetna and Coventry community-rated policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

B. Adjustments Made to the Data:
The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend, as discussed in the previously referenced exhibits.

C. Inclusion of Capitation Payments:
No adjustments to the experience period data have been made for capitation arrangements because we expect little to no capitation services to be provided in 2018.

7. Credibility of Experience

No credibility is assigned to the experience data. This is due to the use of alternative experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

8. Paid-to-Allowed Ratio

The projected paid to allowed ratio is 84.5%. Paid to allowed ratios are based on 2016 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

9. Reinsurance and Risk Adjustment

A. Reinsurance – Experience Period

Transitional Reinsurance recoveries do not apply to Small Group business. The experience period data reflects the Reinsurance Contribution of $2.25 PMPM assessed during 2016.

B. Risk Adjustment – Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2016 Wakely data and our internal projections of how our risk relative to market has changed since that report was issued. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2016 Risk Adjustment fees of $0.15 PMPM in Worksheet 2.

C. Risk Adjustment – Projection Period

We used the projected Risk Adjustment Transfer amounts provided by the Pennsylvania Insurance Department on May 12, 2017, which incorporated carrier data as of May 1, 2017, to develop our initial projected risk adjustment transfer assumption.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2018 Notice of Benefit and Payment Parameters. The 2018 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost. We subtracted from that Risk Adjustment transfer .5% of premiums for National High Risk pool funding, and added our anticipated High Risk Pool recoveries. High Risk Pool recoveries were estimated based on the average of member-level recoveries that we would have received under this program for 2014-2016 claims as a percent of premium, for Silver Off-Exchange plans.

As a result, we project a risk adjustment payable, net of the 2018 user fee of $0.14 PBMPM.

10. Non-Benefit Expenses and Profit & Risk

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2017 projections, and projected changes in expenses, inflation, and membership for 2018 for our National book of Small Group business. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements.

The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2018, as well as Federal income tax and State Premium taxes. The risk adjustment user fee, as previously mentioned in Section 9, is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in the initial pricing of our 2017 plans.

11. Projected Loss Ratio

The expected 2018 MLR for this filing, as defined by PPACA and before any credibility adjustment, is shown in Exhibit 11.

12. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in Pennsylvania through Aetna Health, Inc. and Aetna Health Ins. Co. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d). Rates for plans that may be renewed outside the Single Risk Pool (due to either being grandfathered or permissible transitional offerings) are not covered in this filing.

13. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs and catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Small Group Market Trend Adjustments: Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2018.

14. Market-Adjusted Index Rate

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment was discussed, previously. The risk adjustment on is displayed on a paid-basis and the exchange user fee is estimated as a PMPM based on the target premium rate on Worksheet 1 of the URRT. These values have been have each been converted to percent of allowed claims in this Exhibit.

15. Plan-Adjusted Index Rates

Exhibit E-2 illustrates the development of the Plan Adjusted Index Rates, and displays each plan-specific adjustment made to the Market Adjusted Index Rate. The 2018 Plan Adjusted Index Rates are displayed in Column 7. The following briefly describes how each set of adjustments was determined.

A. Actuarial Value, Cost Sharing:

The factors in Column 2 are the product of two separate adjustments:

1. We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage.
2. We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2018 membership.

B. Distribution and Administrative Costs:
Exhibit E-2, Column 3, reflects the adjustment for projected administrative costs, including any sales, marketing, and profit & risk. These are discussed above in the 'Non-Benefit Expenses and Profit & Risk' section, and exclude the Risk Adjustment User Fee, and Exchange User Fee, which are reflected in the Market-Adjusted Index Rate. These expense and profit assumptions do not vary by plan.

C. Provider Network, Delivery System, and Utilization Management:
The factors in Column 4 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

D. Benefits in addition to EHBs:
The factors in Column 5 adjust for the impact of benefits in addition to EHBs. The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). Hence, all factors in Column 5 are 1.00.

E. Catastrophic Plan Eligibility:
This filing does not include catastrophic plans.

16. Calibration
Exhibit C-1 shows an example of how calibration is applied to all plan adjusted index rates.

A. Age Curve Calibration:
The age factors are based on the HHS Default Standard Age curve. The factors are shown in Exhibit C-2. Exhibit C-2 demonstrates the determination of the Plan-Level Average Age Factor. Plan membership is based on issuer's similar January 2017 plan membership and projected changes in the market.

To Age-Calibrate the Plan-Adjusted Index Rates, We project a premium-weighted average age factor for the 2018 membership using the prescribed age curve and the projected age for each plan, as illustrated on exhibit C-2, The overall Age Calibration factor is developed in Column B of Exhibit C-1. This factor is based on the weighting of plan-adjusted index rate and membership weighted by each plan's average age factor membership. The Age-Calibrated Plan Adjusted Index Rate is determined multiplying each Plan Adjusted Index Rate by the Plan-Level Average Age Factor and then dividing by the weighted over-all average age factor.

The age that most closely corresponds to the premium weighted overall average age factor is the average age for the single risk pool.

B. Geographic Factor Calibration:
Exhibit C-2 summarizes the rating area definitions and factors, and displays the projected premium by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor, and is applied in column F of Exhibit C-1. Projected area factors are shown

in Exhibits 6 and C-2. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors.

C. Small Group Premium Rates:
The development of the average projected trend factor is discussed above.

17. Consumer-Adjusted Premium Rate Development
Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as:
Calibrated Plan Adjusted Index Rate * Age Factor * Area Factor * Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation for a family of six, with more than three dependents under age 21, is shown in Exhibit 14.

18. Composite Premiums
Small employers will not be able to elect to have rates set using a composite approach as permitted by Pennsylvania.

19. AV Metal Values
The AV Metal Values on Worksheet 2 were based on the AV 2018 Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

20. AV Pricing Values
The AV Pricing Values are calculated as the ratio of the Plan Adjusted Index Rate to the Market Adjusted Index Rate. The adjustments reflected in the AV Pricing Values are discussed in Section 15. AV Pricing Values do not differ based on morbidity differences or benefit selection anticipated within the Single Risk Pool.

21. Membership Projections
Exhibit 15/C-2 summarizes the membership projections by plan. Membership projections are based on historical experience, enrollment in ACA-compliant plans through January 2017, and our expectations for future sales as additional members move to these plans from grandfathered and transitional plans. (We assume that total enrollment will be similar to our current enrollment.)

Terminated Plans and Products
Exhibit 16 provides a plan and product crosswalk from 2016 to 2018. The crosswalk includes the list of products that have experience in the single risk pool experience period, and products that were made available in 2017 and 2018. Consistent with the URRT instructions, experience for non-single risk pool terminated products is reported in aggregate under the terminated product with the largest membership in the experience period.

22. Plan Type
All plans are consistent with the plan type indicated on Worksheet 2.

23. Warning Alerts
The Experience Period Plan Adjusted Index Rate on Worksheet 2 differs from the Experience Period Premium PMPM on Worksheet 1 since 1) the Experience Period Premium reflects the actual enrollment mix for all non -grandfathered business in the market in 2016 while the average Plan Adjusted Index Rate reflects the projected (vs. actual) ACA mix for single risk pool experience and a zero rate for non-single risk pool experience , and 2) premiums reported on Worksheet 1 are net of estimated risk adjustment transfers and MLR rebates while the Plan Adjusted Index Rates on Worksheet 2 do not consider the impact of risk adjustment transfers or MLR rebates.

For the same reasons, the experience period Total Premium (TP) differs between Worksheets 1 and 2.

The Experience Period Incurred claims and Incurred Claims PMPM on Worksheet 2 adjust for the impacts of Reinsurance and Risk Adjustment. The Incurred Claims on Worksheet 1 are not adjusted for the impact of Reinsurance and Risk Adjustment. The warning alerts on rows 68 and 73 of Worksheet 2 result from the different treatment of Reinsurance and Risk Adjustment on the two worksheets.

The Projected Plan Adjusted Index Rate on Worksheet 2 differs from the Gross Premium Average Rate on Worksheet 1. This difference results from the value on Worksheet 1 being the rate that corresponds to claims incurred in the 12 months starting January 1, 2017, while the average on Worksheet 2 is the average rate for the market for coverage that begins between January 1, 2017 and December 31, 2017.

For the same reason, Total Premium (TP) differs between Worksheets 1 and 2.

24. Benefit Design
This filing includes two Silver plans.

Please refer to the corresponding policy forms for detailed benefit language. Information on the cost-sharing parameters of the covered benefit plans, including deductibles, copays, and Actuarial Values, is summarized in the supporting exhibits. All benefit and cost sharing parameters comply with Pennsylvania benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

25. Marketing
Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including HHS Plan Finder and our own website. In addition, members of our 2017 plans will be mailed a discontinuance or renewal letter, in accordance with CMS guidelines. Marketing and distribution approaches may change from time to time at management's discretion.

26. Underwriting
Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations.

27. Renewability
These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

28. Company Financial Condition
As of December 31, 2016, the capital and surplus held by Aetna Health, Inc. (PA) was approximately $458 million. This amount is disclosed in page 3, line 33 of the Company's statutory financial statement dated December 31, 2016. The Company issues commercial and Medicare Advantage coverage in

various states for multiple business segments, including to large employer, small employer, and individual purchasers.

Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [redacted] am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:

    a. ASOP No. 5, Incurred Health and Disability Claims
    b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
    c. ASOP No. 12, Risk Classification
    d. ASOP No. 23, Data Quality
    e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
    f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    g. ASOP No. 41, Actuarial Communications

h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

2. The Projected Index Rate is:
    a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
    b. Developed in compliance with the applicable Actuarial Standards of Practice,
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
    d. Neither excessive, deficient, nor unfairly discriminatory.

3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.

4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Aetna

Aetna Health, Inc. – Small Group Plans

Rate request filing ID# AETN-131033648 & AETN-131033632 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Initial requested average rate change:	11%[1]
Revised requested average rate change:	N/A[1]
Range of requested rate change:	-18.6% to 70.3%
Effective date:	January 1, 2018
People impacted:	4,733
Available in:	Rating Areas 1-3 and 5-9, certain counties excluded

Key information

Jan. 2016-Dec. 2016 financial experience

Premiums	$176M
Claims	$121M
Administrative expenses	$17M
Taxes & fees	$16M
Company made (after taxes)	**$22M**

How it plans to spend your premium
This is how the insurance company plans to spend the premium it collects in 2018:

Claims:	77.4%
Administrative:	9.8%
Taxes & fees:	8.9%
Profit:	3.9%

The company expects its annual medical costs to increase **12%**.

Explanation of requested rate change

Medical costs are going up, and we are changing our rates to reflect this increase. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Rate increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

[1] Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Unified Rate Review v4.2

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.

If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.

If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.

If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.

If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

Objection Letter Status:Pending Industry Response

Objection Letter Date:06/16/2017

Respond By Date:06/23/2017

Submitted Date:06/16/2017 02:17 PM

Introduction: The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 5 business days of the date of this letter.

1. URRT Worksheet 2 does not show any plans as “Renewing” while tab IV of the PA Act Memo Exhibits does show the mapping of plans occurring. Please provide an explanation for the inconsistency between the workbooks and which of them is accurate.

2. While we acknowledge the explanation on Page 8 of the Federal Actuarial Memorandum (Act Memo), it is not clear why there is such a large variation between Worksheet (WS) 1 and WS2 Section III of the URRT. Specifically, why does the membership shown vary from 430,412 on WS1 to 119,964 on WS2?? We would expect that the experience period membership would not vary between these sheets. The same concern follows for the other information creating a ‘WARNING’ on WS2. Please provide an illustration of how these numbers reconcile and are consistent with the 2018 URRT Instructions.

3. Please correct or justify the discrepancy on Page 2 of PA Act Memo which shows the average rate change of 11.5%, whereas Table 10, Cell AC15, as referenced in the same section on Page 2 shows 11.0%. There is a similar discrepancy between the 13.0% in the PA Act Memo and Table 11, Cell AN13.

4. The rate change of 11.0% in Table 10, Cell AC15 includes the mapping of Bronze, Gold, and Platinum plans to Silver plans. When only Silver-to-Silver plan mapping is considered, the rate change increases to 25.3%. Please quantify all drivers of the 25.3% increase when only Silver-to-Silver plan mapping is considered.

5. Plans with a Mental Health/Substance Abuse (MH/SA) benefits set to the Specialist cost sharing may not be Mental Health Parity (MHP) compliant. Please illustrate that the $75 copay on MH/SA is compliant with MHP regulations.

6. Please provide an explanation for how the AV Calculator (AVC) inputs for the Specialty Drug benefit were determined when there is different cost sharing between preferred and non-preferred drugs, as shown in Exhibit A-2.

7. Please provide an explanation and illustration for the calculation of the 0.845 paid-to-allowed ratio for the Silver plans.

8. Please illustrate the development of the network factors.

9. Please illustrate the development of the trend factor used in Exhibit 12 (~12.1% trend) as it relates to Exhibit 8 (~10.6% trend); specifically, please show how the leveraging is applied, as noted on Page 5 of the Federal Act Memo.

10. Please provide numerical support for the trend assumptions shown in Exhibit 8. We understand that additional considerations are applied other than historical trends as stated in the Act Memos, but please justify the large discrepancy in historical pharmacy trend with what is being shown in Exhibit 8.

11. Please provide numerical support for the morbidity assumption for both the Actual Experience Data and Manual Data.

12. Please provide Exhibit 5, as noted on Page 4 of the PA Act Memo.

13. Please show the breakout of the components that make up the ‘other’ adjustment for both the Actual Experience Data and Manual Data. Clearly illustrate the ‘Change in Network’ is not being double counted, as the PA Act Memo states the ‘Change in Network’ is included in ‘Change in Other.,’ but Table 5 shows it applied on its own.

14. Please provide numerical support for the development of the Risk Adjustment amount.

15. Please reconcile the discrepancy between Table 5, Cell C27, which shows $527.02 and Exhibit E-1, Cell D9, which shows $530.10.

16. Please reconcile the discrepancy between Table 5's projected risk adjustment which is shown as a payment of $28.96, compared to Exhibit E-1 which equates to $30.26 ((565.91 – 530.10) * 0.845).

17. Please provide numerical support for the development of the Health Insurer Fee.

18. Please provide an explanation for the increase in the 'Profit & Risk Load,' 'Premium Tax,' and 'Federal Income Tax' percentages when comparing them to the 2017 filing.

19. Please reconcile the discrepancy between Exhibit 11's 'Premium (pmpm)' of $589.79 compared to URRT WS1 which shows $586.93.

20. Please reconcile the discrepancy between Exhibit 11's 'Medical Cost (pmpm)' of $454.75 compared to URRT WS1 which shows $455.35.

21. Please reconcile the discrepancy between Exhibit 11's 'Taxes and Fees' of $55.47 compared to URRT WS1 which shows $52.13.

22. The Service Area Template included in the Binder indicates that AHI is statewide; however the Service Area Map included in this rate filing shows 16 counties in which coverage will not be offered in 2018. Please review and revise.

23. Please confirm the HIOS submission and update the cover letter to include the Binder # in addition to the HIOS Issuer ID.

24. Please confirm that you have tested to ensure that the PID rate exhibits the Federal rates template included in this filing and the binder are the same.

25. The Rate/Rule Schedule tab shows 2,701 policy holders while cell V15 of Table 10 shows 4,576 and the Rate Change Request Summary Attachment shows 4,698 covered lives as of February 1, 2017. Be advised that the 2018 Guidance, consistent with the 2017 Guidance, states that the policyholders in the Rate/Rule

Schedule tab should show the number of covered lives and that this number should equal the figure shown in Table 1 and Table 10. Please review the Mapping instructions in section D.3.C and revise.

26. Please provide the experience period data and projection factors used to develop the credibility manual data, in the same format as Worksheet I, Sections I and II of the URRT.

27. Section F of the Pennsylvania actuarial memorandum indicates that the experience period claims included in this filing includes AHI (and AHIC) which now includes Health America PA (HAPA). The experience period claims shown in worksheet I of the Part I URRT should be solely for the named entity submitting the filing, with the exception of claims related to the offering of POS products which may be jointly offered. Please explain and revise as appropriate.

28. Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the --$28.96 Projected Risk Adjustments PMPM amount found in Section III, Worksheet 1 of the URRT and in Table 5 cell C31. Also provide a detailed narrative that describers the development of the estimated risk adjustment transfer payment. In demonstrating the development of the transfer payment, please show all risk transfer formula components, the estimated market-wide average risk assumptions as well as support for those assumptions. Since this response should include detailed insight into the risk adjustment transfer methodology, you may redact this response as appropriate.

29. Please show quantitatively the derivation of the trend assumptions for each benefit category as shown in Table 3b. Please include the sources and source claims data in Table 4b. Also provide a detailed narrative that explains why this data is appropriate and how it was used in developing the trend, including all assumptions and adjustments. Also discuss the impact of provider contracting and leveraging on trend. The specific provider contracting agreement and amount may be redacted, but not aggregate amounts.

30. Table 6, cell B54, indicates the PCORI fee is $0.19. The 2018 PCORI pmpm amount should be $0.20 or $0.21. Please revise.

31. 2018 projected administrative expenses calculated using the data shown in Table 6 are $58.66 pmpm as compared to the projected 2017 administrative expenses of $46.03 pmpm calculated similarly and approved in the previous year's filing. As this represents an increase of 27.4%, please show the development of and provide support for all expenses that do not reflect payments made to providers under the contract for covered medical services. Describe the methodology used for developing the estimate of these non-benefit expenses expected during the projection period for the applicable market, including any allocation of corporate overhead.

32. On page 14 of the 2018 Guidance, the department requested data regarding the development of the Pricing AVs and Induced Demand in Table 10. Please provide this data in Excel.

33. Please show quantitatively, including an Excel spreadsheet with formulas, the development of the age (1.428) and geographic (.985) calibration factors in cells T4 and T5 of Table 10. Also, state the associated age.

[redacted]

35. Please show quantitatively, including an Excel spreadsheet with formulas the development of and discuss the basis for the federal income tax of 2.10% in cell C56 and the Health Insurer Provider Fee of 3.15% in cell C57 of Table 6.

36. Please support the assumption of 0% credibility for the experience data, given the relative volumes of experience and manual data as shown Tables 4 and 4b.

37. Please show quantitatively, including an Excel spreadsheet with formulas the development of and discuss the basis for the Change in Morbidity (1.093), Change in Demographics (1.025), Change in Network (.979) and the Change in Other (.997) in Table 5.

38. Table 6 cell C63 indicates the Single Risk Pool pmpm is $611.27, while the Single risk pool in the URRT in cell V43 indicates $586.93. Please reconcile.

39. Please show the development of the average commission and circumstances in which broker commissions will be paid and if they will vary based on geographic location, metal level, plan, open enrollment vs SEP enrollment, etc. Additionally, the current and 2018 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm dollar amount.

40. Provide a sample calculation of a Consumer Adjusted Premium Rate for age 44 insured, rating area 9, quarter 2 for HIOS plan numbers 64844PA0060113 (POS) .

41. Provide a sample calculation of a Consumer Adjusted Premium Rate for age 44 insured, rating area 9, quarter 2 for HIOS plan numbers 64844PA0070135 (HMO).

42. Table 10 column F maps discontinued plans to other 2018 plans; however, the discontinued plans to which they were mapped do not appear in column B.

Please be advised that there may be additional questions subsequent to your responses to the above. To the extent that concerns have been raised by the Department in this filing and not in this entity's other market or affiliate companies, where the issue exists in the other market or affiliate, please make the appropriate adjustment and advise in the response to the data call. Data and exhibits in response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas. Should you have any questions regarding this correspondence, please contact me at (717) 783-2115.

Conclusion:

Sincerely,

Michael Gurgiolo

June 23, 2017

Mr. Michael Gurgiolo
Actuarial Review Division
Bureau of Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Subject: Aetna Health Inc.
Small Group Rate Filing
SERFF # AETN-131033648

Dear Mr. Michael Gurgiolo:

Enclosed is additional information related to the items contained in your objection letter dated 06/16/2017 for the above referenced rate filing.

1. URRT Worksheet 2 does not show any plans as "Renewing" while tab IV of the PA Act Memo Exhibits does show the mapping of plans occurring. Please provide an explanation for the inconsistency between the workbooks and which of them is accurate.

   All members from 2017 are being offered a 2018 plan which is shown in the exhibits. However, the 2018 plan does not meet the UBM mapping requirements of the URRT, therefore it is considered a new plan.

2. While we acknowledge the explanation on Page 8 of the Federal Actuarial Memorandum (Act Memo), it is not clear why there is such a large variation between Worksheet (WS) 1 and WS2 Section III of the URRT. Specifically, why does the membership shown vary from 430,412 on WS1 to 119,964 on WS2?? We would expect that the experience period membership would not vary between these sheets. The same concern follows for the other information creating a 'WARNING' on WS2. Please provide an illustration of how these numbers reconcile and are consistent with the 2018 URRT Instructions.

   Worksheet 1icludes the historical experience for the Small Group transitional policies or Keep What You Have. This is consistent with the 2018 URRT instructions (page 13). However, Worksheet 2 does not include these plans.

3. Please correct or justify the discrepancy on Page 2 of PA Act Memo which shows the average rate change of 11.5%, whereas Table 10, Cell AC15, as referenced in the same section on Page 2 shows 11.0%. There is a similar discrepancy between the 13.0% in the PA Act Memo and Table 11, Cell AN13.

   The discrepancy has been corrected and updated. Please see "Updated 2018 PA Actuarial Memorandum SG AHI-AHIC".

4. The rate change of 11.0% in Table 10, Cell AC15 includes the mapping of Bronze, Gold, and Platinum plans to Silver plans. When only Silver-to-Silver plan mapping is considered, the rate change increases to 25.3%. Please quantify all drivers of the 25.3% increase when only Silver-to-Silver plan mapping is considered.

The drivers of the rate change are:

Trend	[redacted]
Population Morbidity	[redacted]
HIF	[redacted]
Profit	[redacted]
Other Changes	[redacted]
Total	[redacted]

5. Plans with a Mental Health/Substance Abuse (MH/SA) benefits set to the Specialist cost sharing may not be Mental Health Parity (MHP) compliant. Please illustrate that the $75 copay on MH/SA is compliant with MHP regulations.

Aetna's plan complies with the "substantially all" and "predominant" tests of the Mental Health Parity and Addiction Equity Act ("MHPAEA"). MHPAEA provides that the financial requirement applicable to behavioral health and substance use disorder benefits must arise from a comparison of all medical and surgical benefits within a given classification. In the case of the "Outpatient- In Network" classification, MHPAEA permits plans to subclassify benefits as "Office Visits," including specialist, primary care and behavioral health office visits, and "All Other."

In accordance with MHPAEA, for the plan in Aetna's filing, the cost share for outpatient behavioral health benefits is the "type" applicable to "substantially all" (or at least 2/3 of) medical and surgical benefits within the applicable sub-classification. Further, the "level" (or amount) of any such cost share is no greater than the "predominant" level (or applicable to more than 1/2 of) for medical and surgical benefits.

In the case of the plan at issue here, the "substantially all" actuarial analysis set forth in MHPAEA results in a cost share for the behavioral health "outpatient office" sub-classification that aligns in "type" (e.g., copay or coinsurance) with both primary care and specialist office visits. On the other hand, the "predominant" actuarial analysis results in a cost share "level," or amount, which aligns with specialist office visits, not primary care.

When tested on the basis of actuarially-credible data, the Plan passes the substantially all and predominant tests. The BH/SUD cost share type (copay) applies to 85.4% (or substantially all) of the in-network M/S benefits in the office subclassification. Further, the level of that cost share ($75) applies to 85.1% (predominant) of the M/S benefits. In other words, the plan passes the substantially all and predominant tests.

6. Please provide an explanation for how the AV Calculator (AVC) inputs for the Specialty Drug benefit were determined when there is different cost sharing between preferred and non-preferred drugs, as shown in Exhibit A-2.

   When calculating the AV, we entered the preferred tier cost sharing. Weighting between the preferred and non-preferred tiers is not material to the Actuarial Value.

7. Please provide an explanation and illustration for the calculation of the [redacted] paid-to-allowed ratio for the Silver plans.

   Paid to allowed ratios are based on 2016 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

8. Please illustrate the development of the network factors.

   The network factors were developed taking into consideration the different level of Out of Network coverage based on proprietary pricing models.

9. Please illustrate the development of the trend factor used in Exhibit 12 ([redacted]% trend) as it relates to Exhibit 8 ([redacted]% trend); specifically, please show how the leveraging is applied, as noted on Page 5 of the Federal Act Memo.

   Exhibit 8 uses our projected Allowed trend, while Exhibit 12 uses our projected Paid trend. The only difference between the two is the adjustment for leveraging. We apply an adjustment separately to Inpatient, Outpatient and Physician to appropriately reflect the leveraging impact by cost category.

10. Please provide numerical support for the trend assumptions shown in Exhibit 8. We understand that additional considerations are applied other than historical trends as stated in the Act Memos, but please justify the large discrepancy in historical pharmacy trend with what is being shown in Exhibit 8.

    Please see Exhibit 8 for the trend components by category. For utilization trends, our trends are determined by studying our national Small Group data. We use a rolling-12 utilization per thousand statistic for a continuous, normalized population, and exclude catastrophic claims.

    For Unit Costs, we track projected unit cost increases at each facility/provider and develop a weighted average increase based on our volume at each facility location.

    Pharmacy Unit Cost trend considers the impact of formulary changes, patent expirations, new drugs, and other general market share shifts. It is important to note for both medical and pharmacy unit cost trend, historical unit costs are not indicative of the known changes we include in our forward projections.

11. Please provide numerical support for the morbidity assumption for both the Actual Experience Data and Manual Data.

    Please see the table below for changes in the average morbidity of the population.

	Experience	Manual

Experience Period	[redacted]
Projection Period	
Morbidity Factor	

**Morbidity factor is developed by taking the Projection Period Factor/Experience Period Factor ([redacted])*

12. Please provide Exhibit 5, as noted on Page 4 of the PA Act Memo.

    Please see "Updated PA SG HMO FACT Exhibits.xlsx".

13. Please show the breakout of the components that make up the 'other' adjustment for both the Actual Experience Data and Manual Data. Clearly illustrate the 'Change in Network' is not being double counted, as the PA Act Memo states the 'Change in Network' is included in 'Change in Other.,' but Table 5 shows it applied on its own.

    Please see tab 'Objection 13' and 'Objection 13 cont." of "Objections 6-16-17.xlsx". The Network change is only utilized in one place in the formula.

14. Please provide numerical support for the development of the Risk Adjustment amount.

    Please see the table below for the calculation of the Projected Risk Adjustment PMPM

Risk Transfer Estimate from PA DOI	[redacted]
Adjustment for Admin components of Premium	
2018 Risk Adjustment Fee	
2018 Net High Risk Pool Prem less Recoveries	
Projected Risk Adjustment PMPM	

15. Please reconcile the discrepancy between Table 5, Cell C27, which shows $[redacted] and Exhibit E-1, Cell D9, which shows $[redacted].

    The discrepancy has been corrected and updated. Please see "Updated PA SG HMO FACT Exhibits.xlsx".

16. Please reconcile the discrepancy between Table 5's projected risk adjustment which is shown as a payment of $[redacted], compared to Exhibit E-1 which equates to $[redacted].

    Exhibit E-1 provides the risk adjustment value on an allowed bases (before the paid to allowed adjustment) and trended to the midpoint of the projection period for all policies offered in 2018 (not just the first quarter policies as on Worksheet I of the URRT).

17. Please provide numerical support for the development of the Health Insurer Fee.

    We are estimating the Health Insurer Fee to be 3.15% of premium for 2018. The Health Insurer Fee was calculated for Aetna by taking the total dollar value due to the HIF and by estimating

our national market share. To calculate this, we used growth assumptions for Aetna by market and compared to industry wide growth assumptions.

18. Please provide an explanation for the increase in the 'Profit & Risk Load,' 'Premium Tax,' and 'Federal Income Tax' percentages when comparing them to the 2017 filing.

    Profit & Risk Load has been updated to match the long term profit expectations of our national Small Group business. Premium Tax has been updated to include all taxes and assessments from the Commonwealth of Pennsylvania. Federal Income Tax increases as Profit & Risk Load increases.

19. Please reconcile the discrepancy between Exhibit 11's 'Premium (pmpm)' of $[redacted] compared to URRT WS1 which shows $[redacted].

    Exhibit 11 has been updated to reflect the correct value of $[redacted]. The URRT and Exhibit now reconcile. Please see "Updated PA SG HMO FACT Exhibits.xlsx".

20. Please reconcile the discrepancy between Exhibit 11's 'Medical Cost (pmpm)' of $[redacted] compared to URRT WS1 which shows $[redacted].

    The corrected value on Exhibit 11 is $[redacted]. [redacted] of costs are moved from medicate costs to Taxes and fees to account for the cost of the high risk pool.

21. Please reconcile the discrepancy between Exhibit 11's 'Taxes and Fees' of $[redacted] compared to URRT WS1 which shows $[redacted].

    The difference is we are increasing the Taxes and fees by the.[redacted]% of premium that was reduced from the Medical Cost for the high risk pool.

22. The Service Area Template included in the Binder indicates that AHI is statewide; however the Service Area Map included in this rate filing shows 16 counties in which coverage will not be offered in 2018. Please review and revise.

    A revised binder will be submitted. We apologize for the oversight.

23. Please confirm the HIOS submission and update the cover letter to include the Binder # in addition to the HIOS Issuer ID.

    HIOS was submitted and the Binder tracking number is AETN-PA18-125071664. The cover letter has been updated to reflect this.

24. Please confirm that you have tested to ensure that the PID rate exhibits the Federal rates template included in this filing and the binder are the same.

    We have confirmed the rates match.

25. The Rate/Rule Schedule tab shows 2,701 policy holders while cell V15 of Table 10 shows 4,576 and the Rate Change Request Summary Attachment shows 4,698 covered lives as of February 1, 2017. Be advised that the 2018 Guidance, consistent with the 2017 Guidance, states that the

policyholders in the Rate/Rule Schedule tab should show the number of covered lives and that this number should equal the figure shown in Table 1 and Table 10. Please review the Mapping instructions in section D.3.C and revise.

2,701 is the number of current policy holders, 4,576 is the number of current covered lives mapped to 2018 plans, and 4,733 is the total covered lives as of February 1, 2017. The Rate/Rule Schedule tab as well as the Rate Change Request Summary Attachment will be updated to match Table 1's cell D18 and Table 10's cell AP15 value of 4,733 covered lives. We apologize for the oversight.

26. Please provide the experience period data and projection factors used to develop the credibility manual data, in the same format as Worksheet I, Sections I and II of the URRT.

    Please see tab 'Objection 13' of "Objections 6-16-17.xlsx".

27. Section F of the Pennsylvania actuarial memorandum indicates that the experience period claims included in this filing includes AHI (and AHIC) which now includes Health America PA (HAPA). The experience period claims shown in worksheet I of the Part I URRT should be solely for the named entity submitting the filing, with the exception of claims related to the offering of POS products which may be jointly offered. Please explain and revise as appropriate.

    The AHI and HAPA entities legally merged, therefore it is appropriate to include the experience from both companies.

28. Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the -- $[redacted] Projected Risk Adjustments PMPM amount found in Section III, Worksheet 1 of the URRT and in Table 5 cell C31. Also provide a detailed narrative that describers the development of the estimated risk adjustment transfer payment. In demonstrating the development of the transfer payment, please show all risk transfer formula components, the estimated market-wide average risk assumptions as well as support for those assumptions. Since this response should include detailed insight into the risk adjustment transfer methodology, you may redact this response as appropriate.

    Please see the response to Question 14. As noted above, our projected Risk Adjustment PMPM relied upon the information provided by the Pennsylvania DOI.

29. Please show quantitatively the derivation of the trend assumptions for each benefit category as shown in Table 3b. Please include the sources and source claims data in Table 4b. Also provide a detailed narrative that explains why this data is appropriate and how it was used in developing the trend, including all assumptions and adjustments. Also discuss the impact of provider contracting and leveraging on trend. The specific provider contracting agreement and amount may be redacted, but not aggregate amounts.

    Please see the response to Question 10 for the derivation of the trend assumption. The data in Table 4b is not appropriate to develop trend assumptions as it has not been normalized for benefit changes, demographic changes, or catastrophic claims. We also develop a prospective forward looking trend estimate, rather than a historical view so that we able to appropriately price for the projected claims for the 2018 policies.

30. Table 6, cell B54, indicates the PCORI fee is $[redacted]. The 2018 PCORI pmpm amount should be $[redacted] or $[redacted]. Please revise.

    Table 6 had been updated to reflect a $[redacted] PCORI pmpm amount.

31. 2018 projected administrative expenses calculated using the data shown in Table 6 are $[redacted] pmpm as compared to the projected 2017 administrative expenses of $[redacted] pmpm calculated similarly and approved in the previous year's filing. As this represents an increase of [redacted] %, please show the development of and provide support for all expenses that do not reflect payments made to providers under the contract for covered medical services. Describe the methodology used for developing the estimate of these non-benefit expenses expected during the projection period for the applicable market, including any allocation of corporate overhead.

    PMPM expenses are increasing for two reasons: 1) Some expenses are variable (a percent of premium), therefore as total premiums increase, the PMPM expenses increase; and 2) Other expenses are fixed expenses and the PMPM will increase as our SG ACA membership decreases.

32. On page 14 of the 2018 Guidance, the department requested data regarding the development of the Pricing AVs and Induced Demand in Table 10. Please provide this data in Excel.

    Please see Question 7 for the development of the Pricing AV. Induced Demand is 1.0 for the plans in this filing.

33. Please show quantitatively, including an Excel spreadsheet with formulas, the development of the age ([redacted]) and geographic ([redacted]) calibration factors in cells T4 and T5 of Table 10. Also, state the associated age.

    Please see "Objection 33- Geographic Calibration" tab of "Objections 6-16-17.xlsx".

[redacted]

[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]

35. Please show quantitatively, including an Excel spreadsheet with formulas the development of and discuss the basis for the federal income tax of 2.10% in cell C56 and the Health Insurer Provider Fee of 3.15% in cell C57 of Table 6.

    Please see tab 'Objection 35' in "Objections 6-16-17.xlsx". The Health Insurer Fee was calculated for Aetna by estimating our national market share based on growth assumptions and compared to industry growth assumptions.

36. Please support the assumption of 0% credibility for the experience data, given the relative volumes of experience and manual data as shown Tables 4 and 4b.

    The manual data is more appropriate as it combines the HMO and PPO experience in the SG ACA single risk pool market, where as the experience data includes transitional policies which were extended through 2018.

37. Please show quantitatively, including an Excel spreadsheet with formulas the development of and discuss the basis for the Change in Morbidity ([redacted]), Change in Demographics ([redacted]), Change in Network ([redacted]) and the Change in Other ([redacted]) in Table 5.

    Please see tab 'Objection 13 cont. & Obj 37' in "Objections 6-16-17.xlsx".

38. Table 6 cell C63 indicates the Single Risk Pool pmpm is $[redacted], while the Single risk pool in the URRT in cell V43 indicates $[redacted]. Please reconcile.

    Table 6 uses the average of all policies offered through the year, while the URRT Worksheet 1 cell V43 only represents the first quarter policies.

39. Please show the development of the average commission and circumstances in which broker commissions will be paid and if they will vary based on geographic location, metal level, plan, open enrollment vs SEP enrollment, etc. Additionally, the current and 2018 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm dollar amount.

    As noted in our actuarial memorandum, the commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

40. Provide a sample calculation of a Consumer Adjusted Premium Rate for age 44 insured, rating area 9, quarter 2 for HIOS plan numbers 64844PA0060113 (POS) .

    The 64844PA0060113 plan will not be offered in 2018. For a sample rate calculation, please see Exhibit 14.

41. Provide a sample calculation of a Consumer Adjusted Premium Rate for age 44 insured, rating area 9, quarter 2 for HIOS plan numbers 64844PA0070135 (HMO).

    The 64844PA0070135 plan will not be offered in 2018. For a sample rate calculation, please see Exhibit 14.

[redacted]

42. Table 10 column F maps discontinued plans to other 2018 plans; however, the discontinued plans to which they were mapped do not appear in column B.

    The two new plans have been added to Table 10.

Please let us know if you need any additional information to complete your review of this filing.

Sincerely,

[redacted]

Introduction: The Department has the following additional questions regarding the subject filing. To facilitate a timely review, we request this information be provided within 5 business days of the date of this letter:

1) In reference to response #1, please review Sections '2.2.1 Guaranteed Renewability and Uniform modification of Coverage' and '2.2.2 Plan Mapping Instructions' beginning on page 25 of the Unified Rate Review (URR) Instructions. We would expect one or more plans to be listed as 'Renewing' in the URR template in order to avoid a market withdrawal. Please provide support for having all 2018 plans listed as 'New' in the URR template while avoiding a market withdrawal or revise the URR template accordingly.

2) In reference to response #2, please include the transitional policies (or Keep What You Have) on Worksheet 2 of the URR template. Refer to Page 33 of the URR Instructions, under 'Product,' which states "all products included in the single risk pool experience shown on Worksheet 1 must be entered in this section of Worksheet 2."

3) In reference to response #9, please illustrate how the paid trend in Exhibit 12 ties to the allowed trend in Exhibit 8 and show the leveraging impact, including how it was calculated, by cost category.

4) In reference to response #11, please provide further information on how the experience period and projection period factors were calculated and what the factors represent.

5) In reference to response #13, please illustrate the development of the 'Area Mix' and 'Deductible Suppression' factors. In addition, please provide an explanation for what the 'Deductible Suppression' factor represents.

6) In reference to response #14, please illustrate the development of the '2018 Net High Risk Pool Prem less Recoveries' amount was calculated. How was it determined that the premium paid would be more than the recoveries received?

7) In reference to response #17, please provide numerical support for the development of the 3.15% Health Insurer Fee assumption.

8) In regards to response #20 and #21, please provide support for deducting the risk adjustment high risk pool amount from premium as our understanding is that it is not an allowable adjustment in the MLR

calculation.

9) In regards to response #31, please provide a cross-walk from the projected 2017 administrative expense amount of $46.03 to the projected 2018 administrative expense amount of $58.66 by the various categories showing the numerical impact of the two items you mentioned causing the increase in the administrative expenses.

10) Regarding response #33, please review the heading of the response worksheet with respect to the rating period and objection #. I note that the response addresses geographic factors but not age factors. Please provide the requested information regarding the age calibration factors and associated age.

[redacted]

12) Regarding response #37, please ensure that the factors supported in the Objections 6-16-17 workbook are consistent with those shown in Table 5, and provide the requested discussion of the development of these factors.

13) Regarding response #39, the Agent/Broker Fees and Commissions line in Table 6 should include only scheduled compensation paid to agents and brokers; all other advertising/marketing expenses should be shown under Administrative Expenses – General and Claims.

If you wish to make adjustments to the projected RA amount included in this rate submission and the URRT, based on the June 30, 2017 Summary Report on Transitional Reinsurance Payments and Permanent Risk Adjustment Transfers, please do so. Provide narrative and an Excel spreadsheet demonstrating the development and assumptions.

In your June 14th response you indicated that corrections would be when the final files are uploaded in SERFF. Be advised, all revisions must be reflected in this resubmission.

Please provide a PDF file for public review (Public Rate Filing PDF) in SERFF to show the updated rate request. The following updated supporting items must be included:

• Cover Letter
• Rate Change Request Summary (Attachment 1)

- Part 1 - Unified Rate Review Template (URRT)
- Part II – Consumer Friendly Justification
- Part III – Federal Actuarial Memorandum (redacted)
- PA Actuarial Memorandum (redacted)
- PA Actuarial Memorandum Rate Exhibits
- PA Plan Design Summary and Rate Tables
- Federal Rates Templates
- Service Area Maps
- Correspondence – Q&A's and supporting exhibits

Please remain cognizant of the limited redactions as outlined on pages 3 and 4 of the 2018 Guidance. Only those specific items may be redacted. Since AV screenshots and commission schedules are proprietary, they should not be included in this public PDF. Additionally, please ensure that documents and spreadsheets are internally consistent and that the Excel exhibit with formula corrections emailed to you on June 6, 2017 is used. The deadline for the revised PDF is COB July 18, 2017.

Conclusion:

Sincerely,

Michael Gurgiolo

July 14, 2017

Mr. Michael Gurgiolo
Actuarial Review Division
Bureau of Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Subject: Aetna Health Inc.
Small Group Rate Filing
SERFF # AETN-131033648

Dear Mr. Michael Gurgiolo:

Enclosed is additional information related to the items contained in your objection letter dated 07/07/2017 for the above referenced rate filing.

1) In reference to response #1, please review Sections '2.2.1 Guaranteed Renewability and Uniform modification of Coverage' and '2.2.2 Plan Mapping Instructions' beginning on page 25 of the Unified Rate Review (URR) Instructions. We would expect one or more plans to be listed as 'Renewing' in the URR template in order to avoid a market withdrawal. Please provide support for having all 2018 plans listed as 'New' in the URR template while avoiding a market withdrawal or revise the URR template accordingly.
Prior CMS guidance deemed carriers discontinuing all current plans to withdraw from a market even if those carriers already filed new plans for the following year. However, because this guidance evidenced a disconnect between traditional market withdrawal concepts and a carrier's evidence of continued commitment to a market, CMS recently revised its position through a Q&A document. Now, discontinuing all current plans and replacing with all new plans will not be deemed to be a market withdrawal. CMS does specify that carriers cannot use this approach to avoid the rate review process and must apply the reasonable rate review process to the newly filed plans.

The applicable excerpt from the Q&A says:

To reflect these exceptions to market withdrawal requirements, we proposed to add new paragraph (d)(3) to § 147.106 to provide that an issuer has not discontinued offering all health insurance coverage in a market if the issuer continues to offer and make available a product in the applicable market in a State and subjects the new product to the rate review requirements under part 154 of this title (to the extent otherwise applicable to coverage of the same type and in the same market) as if that part applied to that product, and reasonably identifies a discontinued product that corresponds to the new product for purposes of such rate review. We are finalizing the proposal as proposed by adding § 147.106(d)(3) with minor non-substantive modifications to the structure and text of the regulation, and also making conforming amendments to §§ 146.152(d)(3) and 148.122(e)(4).

2) In reference to response #2, please include the transitional policies (or Keep What You Have) on Worksheet 2 of the URR template. Refer to Page 33 of the URR Instructions, under 'Product,' which states "all products included in the single risk pool experience shown on Worksheet 1 must be entered in this section of Worksheet 2."
We will revise and provide an updated copy of the URRT to reflect the requested revision by COB July 18, 2017.

3) In reference to response #9, please illustrate how the paid trend in Exhibit 12 ties to the allowed trend in Exhibit 8 and show the leveraging impact, including how it was calculated, by cost category.
Please see tab 'Objection 3' of Objection Response 7-7-17for PA_DOI.xlsx.
The leveraging impact was calculated by assessing the impact of fixed member cost share on the overall ratio of paid to allowed claims, after unit cost and utilization trend. Historical levels of paid to allowed changes at the cost category level are used to determine the factor to apply.

4) In reference to response #11, please provide further information on how the experience period and projection period factors were calculated and what the factors represent.
The Experience Period factor represents the average morbidity of the population covered during the 2016 historical period. It is calculated based on internal risk scores. The Projection period factors represent the average morbidity we expect in 2018 and was calculated by projecting forward the populations that would be in the single risk pool in 2018.

5) In reference to response #13, please illustrate the development of the 'Area Mix' and 'Deductible Suppression' factors. In addition, please provide an explanation for what the 'Deductible Suppression' factor represents.
Please see tabs 'Objection 5' of Objection Response 7-7-17 for PA_DOI.xlsx.
The deductible suppression factor represents the durational impact of members in the base period not being active for the full 12 months of the year. The result of this is that a higher level of allowed claims is applied to deductible in the base period than would be expected in the projection period. The deductible suppression factor adjusts the base period claims to the expected level for a 12 month contract.

6) In reference to response #14, please illustrate the development of the '2018 Net High Risk Pool Prem less Recoveries' amount was calculated. How was it determined that the premium paid would be more than the recoveries received?
We anticipate, based on historical ACA national averaging, that our high risk pool recoveries will be [redacted] of overall claims. With the expected risk pool premium charge of [redacted] we anticipate premium less recoveries to equal [redacted] of total premium.

7) In reference to response #17, please provide numerical support for the development of the 3.15% Health Insurer Fee assumption.
The 3.15% is calculated based on the national Aetna HIF liability and relies on market share projections in each State. Unfortunately we are not able to publically disclose these detailed market share projection calculations. In prior years, this methodology has produced accurate results.

8) In regards to response #20 and #21, please provide support for deducting the risk adjustment high risk pool amount from premium as our understanding is that it is not an allowable adjustment in

the MLR calculation.
We reached out to HHS for clarification on this point, and received the following response: "The pooling charge should be considered a fee, while the recoveries should be reflected in the 'Allowed Claims which are not the Issuer's Obligation."

9) In regards to response #31, please provide a cross-walk from the projected 2017 administrative expense amount of $[redacted] to the projected 2018 administrative expense amount of $[redacted] by the various categories showing the numerical impact of the two items you mentioned causing the increase in the administrative expenses.
Based on Table 6 we agree that 2018 has a calculated administrative expense amount of $[redacted] However, using the Table 6 from 2017 and following the same methodology we calculate an administrative expense amount of $[redacted] Unfortunately, we are unable to locate the $[redacted] referenced above.

10) Regarding response #33, please review the heading of the response worksheet with respect to the rating period and objection #. I note that the response addresses geographic factors but not age factors. Please provide the requested information regarding the age calibration factors and associated age.
The heading has been corrected, please see tab Objection 10 (GEO) of the Objection Response 7-7-17 for PA_DOI.xlsx spreadsheet.
We have also included development of the age calibration factor, please see 'Objection 10(AGE)" tab of the Objection Response 7-7-17 for PA_DOI.xlsx spreadsheet.
The state associated age is 35.

[redacted]

12) Regarding response #37, please ensure that the factors supported in the Objections 6-16-17 workbook are consistent with those shown in Table 5, and provide the requested discussion of the development of these factors.
The factors are consistent with the ones shown in Table 5. The development of these factors can be seen in the excel workbook previously provided. These factors were developed by:
Change in morbidity- The Experience Period factor represents the average morbidity of the population covered during the 2016 historical period. It is calculated based on internal risk scores. The Projection period factors represents the average morbidity we expect in 2018 and was calculated by projecting forward which populations will remain in the single risk pool in 2018.
Change in Demographic- The change in demographic factor represents comparing the average demographic profile for the manual membership to the demographic of the projected enrollment in 2018.
Change in Network-This factor was developed by comparing the average network factor in the experience period, to the average network factor available in 2018

Change in Other-The components of this factor includes the deductible suppression factor of [redacted] which is discussed in response to objection 5.

13) Regarding response #39, the Agent/Broker Fees and Commissions line in Table 6 should include only scheduled compensation paid to agents and brokers; all other advertising/marketing expenses should be shown under Administrative Expenses – General and Claims.
We believe we have appropriately bucketed this expense.

If you wish to make adjustments to the projected RA amount included in this rate submission and the URRT, based on the June 30, 2017 Summary Report on Transitional Reinsurance Payments and Permanent Risk Adjustment Transfers, please do so. Provide narrative and an Excel spreadsheet demonstrating the development and assumptions.

In your June 14th response you indicated that corrections would be when the final files are uploaded in SERFF. Be advised, all revisions must be reflected in this resubmission.

Please provide a PDF file for public review (Public Rate Filing PDF) in SERFF to show the updated rate request. The following updated supporting items must be included:

• Cover Letter
• Rate Change Request Summary (Attachment 1)
• Part 1 - Unified Rate Review Template (URRT)
• Part II – Consumer Friendly Justification
• Part III – Federal Actuarial Memorandum (redacted)
• PA Actuarial Memorandum (redacted)
• PA Actuarial Memorandum Rate Exhibits
• PA Plan Design Summary and Rate Tables
• Federal Rates Templates
• Service Area Maps
• Correspondence – Q&A's and supporting exhibits

Please remain cognizant of the limited redactions as outlined on pages 3 and 4 of the 2018 Guidance. Only those specific items may be redacted. Since AV screenshots and commission schedules are proprietary, they should not be included in this public PDF. Additionally, please ensure that documents and spreadsheets are internally consistent and that the Excel exhibit with formula corrections emailed to you on June 6, 2017 is used. The deadline for the revised PDF is COB July 18, 2017.

Rating Area	Experience Period Membership	Experience Period Area Factor	Projected Membership	Projected Area Factor
[redacted]				

Average Experience Period Area [redacted]

Note:
Average Experience Period Area Factor computed
as the weighted average of Experience Period Area
Factors by experience period membership distribution.

Average Projected Area Factor [redacted]

Calibration Factor [redacted]

Note:
Projected Area Factor
computed as the weighted average of Projection Period
Area Factors by projected membership distribution.

Area Shift [redacted]

Note:
Area Shift Factor computed as the ratio of the Projected
Membership by Area over the Experience Membership by Area
Factor represents:
The impact due to the shift of the population
distribution across areas.

Area Factor [redacted]

Note:
Area Factor Change computed as the ratio of the Projected
Area Factor over the Experience Area Factor both using projected membership
Factor represents:
The impact due to cost relativity changes, including
changes to provider networks and contracts,
from the experience period to the rating period.
