KEYSTONE HEALTH PLAN CENTRAL, INC.
RFJ Part II – Consumer Friendly Justification

1. Company Name & NAIC #: Keystone Health Plan Central (KHPC), NAIC #95199
2. Market: Individual
3. Product: HMO
4. Average Rate Change (% and $) and Range: 20.4%/$836.09 PMPY, -13.8% to 28.7%
5. Current Covered Lives and Policyholders: 37,479/26,852
6. Financial Information:

Jan. 2015-Dec. 2015 financial experience	
Premiums	$8,218,230
Claims	$15,598,423
Administrative expenses	$2,058,977
Company made (before taxes)	**-$9,439,170**

7. Rate Increase Considerations:
   Primary drivers of requested change
   - Historical claim experience
   - Loss of federal reinsurance program in 2017

   Changes being requested are also based upon consideration of the factors that influence future period cost structures. The primary drivers of change in future costs are:
   - Anticipated increase in facility and physician unit costs
   - Anticipated changes in prescription drug unit costs
   - Continuing change in utilization such as
     - Intensity of medical services rendered
     - Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
     - Further migration from brand prescription drugs to generic prescription drugs
     - Favorable impacts of value based benefits designs
   - Prescription drug patent expirations and new to market brand drugs
   - Leveraging associated with unchanged cost share components such as deductible and copays
   - Inflation adjustment to administrative expenses

   Tax Changes
   - Suspension of Health Insurer Tax in 2017
   - Increase in exchange fees due to on-exchange enrollment growth

Health care benefit programs issued or administered by Capital BlueCross and/or its subsidiaries, Capital Advantage Insurance Company® and Keystone Health Plan® Central. Independent licensees of the Blue Cross and Blue Shield Association. Communications issued by Capital BlueCross in its capacity as administrator of programs and provider relations for all companies.

7. Additional Revenue from Rate Increase: $31.3M

Health care benefit programs issued or administered by Capital BlueCross and/or its subsidiaries, Capital Advantage Insurance Company® and Keystone Health Plan® Central. Independent licensees of the Blue Cross and Blue Shield Association. Communications issued by Capital BlueCross in its capacity as administrator of programs and provider relations for all companies.

Keystone Health Plan Central (KHPC) – Individual Plans

Rate request filing ID # CABC-130539563- This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Requested average rate change:	20.4%
Range of requested rate change:	-13.6% to 28.7%
Effective date:	1/1/2017
People impacted:	37,479
Available in:	Rating Area 6, Rating Area 7, and Rating Area 9

Key information

Jan. 2015-Dec. 2015 financial experience

Premiums	$8,218,230
Claims	$15,598,423
Administrative expenses	$2,058,977
Company made (before taxes)	**-$9,439,170**

The company expects its annual medical costs to increase **7.8%**.

How it plans to spend your premium
This is how the insurance company plans to spend the premium it collects in 2017:

Claims:	80.2%
Administrative:	13.6%
Taxes & fees:	4.1%
Profit:	2.0%

Explanation of requested rate change

Primary drivers of requested change

- Historical claim experience
- Loss of federal reinsurance program in 2017

Changes being requested are also based upon consideration of the factors that influence future period cost structures. The primary drivers of change in future costs are:

- Anticipated increase in facility and physician unit costs
- Anticipated changes in prescription drug unit costs
- Continuing change in utilization such as
  - Intensity of medical services rendered
  - Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
  - Further migration from brand prescription drugs to generic prescription drugs
  - Favorable impacts of value based benefits designs
- Prescription drug patent expirations and new to market brand drugs
- Leveraging associated with unchanged cost share components such as deductible and copays
- Inflation adjustment to administrative expenses

Tax Changes

- Suspension of Health Insurer Tax in 2017
- Increase in exchange fees due to on-exchange enrollment growth

Scope and Purpose

By this filing, Keystone Health Plan Central (KHPC), a subsidiary of Capital BlueCross (CBC), submits rates for products to be made available to individuals on and after January 1, 2017. KHPC will offer individual products on and off the federally-facilitated exchange.

KHPC is continuing to offer an on-exchange narrow network product that will be offered to eight of the twenty-one counties in our service area. The remaining thirteen counties have the option to buy KHPC's broad network product. The narrow network is offered on-exchange only. Individuals buying off-exchange are only offered the broad network product regardless of their county. The purpose of the narrow network is to lower costs by negotiating lower reimbursements with hospitals, and removing higher costs hospitals from the network.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Individual	KHPC	1/1/2014	CABC-129034249	0.00%
Individual	KHPC	1/1/2015	CABC-129635491	-8.00%
Individual	KHPC	1/1/2016	CABC-130076965	1.40%

Proposed Rate Increases

KHPC is proposing an aggregate annual 20.4% rate increase. The rate change does vary by plan. The rate change is calculated in PA Rate Template Part IV, Table 11, cell AZ13.

Membership

Membership is shown in PA Rate Template Part I, Table 1.

Benefit Changes 2016-2017

There are several benefit changes being implemented in 2017. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and

a new plan was created in its place. All terminated plans are listed in Exhibit R, and a summary of proposed 2017 benefits is included in Exhibit A.

Benefit changes by plan are listed in Exhibit A1, highlighted in yellow.

Experience Period Premium and Claims

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2015 and December 31, 2015.

Paid Through Date: Claims in the BEP are paid through March 31, 2016

Premiums (net of MLR Rebate) in Experience Period: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as KHPC does not expect to refund any MLR rebates.

Allowed and Incurred Claims during the Experience Period:

	Incurred	Allowed
Amount of claims processed through the issuer's claim system:	$9,653,286	$11,361,446
Amount of claims processed outside of the issuer's claim system:	$0	$0
Amount of claims that represent best estimate of incurred but not paid:	$188,991	$402,786

Allowed claims are developed by combining paid claims with member cost-sharing.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from CBC's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a

lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.

5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims\ = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Benefit Categories

Claims in the benefit categories displayed in the URRT come directly from CBC's data warehouse. See Exhibit C for a description of benefits by benefit category.

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Pop'l risk Morbidity". KHPC expects negative morbidity changes in its population in the projection period over the BEP. This is due to significant enrollment growth in 2016. As enrollment grows, KHPC expects claim costs to regress to the mean. The adjustment also accounts for the impact of risk adjustment. Due to enrollment growth, KHPC is projecting $0 in risk adjustment. And because claims and risk are inversely proportional, that assumptions translates into a lower claims PMPM.

Changes in Benefits:

1. Pediatric Dental and Pediatric Vision: The following PMPM allowed charges are added to the projection period allowed claims PMPM:

   - Pediatric dental coverage: 5.01
   - Pediatric vision coverage 0.46

   This was added to the projected allowed claims in Exhibit B by applying a factor to the experience period, "Other Medical" claims. The development of pediatric dental and vision projected claims is described below. Pediatric Dental and Vision benefits are underwritten by KHPC's subsidiary, Capital Advantage Assurance Company (CAAC).

   See Exhibit C for the pediatric dental and vision rate development.

Changes in Demographics: KHPC does not expect changes in demographics in its individual population.

Other Adjustments: Found in URRT, Worksheet 1, "Other".

1. List-Billed Adjustment: KHPC is adjusting the claim experience for the impact of the list-billing rating methodology required under CFR Part 147.102. This section requires that family rates are calculated by summing the premiums for each individual family member, provided at most three child dependents under age 21 are taken into account. This rating rule requires an adjustment to premium.
2. Network Adjustment: The projection period assumes a great percentage of value network members than in the experience period. Because of this movement, both incurred and allowed claims will be less than in a stable population. The network adjustment is calculated in Exhibit D – Benefit Mix Changes.

Trend Factors: Trend levels reflect our best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. KHPC uses a hospital and physician contracting model to determine future trends. This model contains all known contracted payment increases, as well as estimated increases in provider payments.
2. Utilization Considerations:
    a. Intensity of medical services rendered
    b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
    c. Further migration from brand prescription drugs to generic prescription drugs
    d. Favorable impacts of value based benefits designs
3. Intensity: Intensity is defined as the amount of inputs used to provide each unit of service. This can best be seen in an example:

Year 2015

Type of Service	Units	Cost per Unit
X-Ray	1	$200
MRI	1	$5,000
Total	2	$5,200

Year 2016

Type of Service	Units	Cost per Unit
X-Ray	0	$200
MRI	2	$5,000
Total	2	$10,000

Total Annual Trend	92%

2. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. KHPC strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

See Exhibit E for KHPC's pricing trend, as well as cost and utilization components of the pricing trend.

Credibility Manual Rate Development

KHPC individual data was used to develop rates. No credibility manual is used.

Credibility of Experience

Credibility Manual Rate Development: KHPC experience data is given 100% credibility.

Paid to Allowed Ratio

KHPC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. The URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, KHPC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
    a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
    b. BEP Member Months

2. Develop BEP *Paid and Incurred Claims*:

$$BEP\ Paid\ and\ Incurred\ Claims = \frac{BEP\ Paid\ Claims}{Completion\ Factor}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP\ Paid\ and\ Incurred\ Claim\ PMPM = \frac{BEP\ Paid\ and\ Incurred\ Claims}{BEP\ Member\ Months}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

$$Trended\ Claim\ PMPM = [BEP\ Paid\ and\ Incurred\ Claim\ PMPM] \times (1 + [Trend\%])^{Trend\ Months/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$Projected\ Paid\ and\ Incurred\ Claims\ PMPM = [Trended\ Claim\ PMPM] \times [Benefit\ Adjustment] \times [Morbidity\ Adjustment] \times [Network\ Adjustment] \times [List - Billed\ Adjustment]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *List-Billed Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

   a. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
   b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$Benefit\ Level\ Adjustment = \frac{Average\ Manual\ Cost\ in\ Projection\ Period}{Manual\ Cost\ of\ Base\ Plan}$$

c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$Base\ Plan\ Paid\ and\ Incurred\ Claims\ PMPM = \frac{Benefit\ Adjusted\ Paid\ and\ Incurred\ Claims\ PMPM}{Benefit\ Level\ Adjustment\ x\ Avg\ Induced\ Demand\ x\ Avg\ Network\ x\ Avg\ Catastrophic}$$

Where Avg Induced Demand is the average premium impact of induced demand rating factor. Avg Network is the average premium impact of network factors. And Avg Catastrophic is the average premium impact of Catastrophic Adjustment factor. These factors are discussed in the Plan Adjusted Index Rate section below.

d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$Benefit\ Relativity\ A = \frac{Manual\ Cost\ of\ Benefit\ A}{Manual\ Cost\ of\ Base\ Plan}$$

e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:

i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a HMO 2000 and HMO 1000 must be less than $1000.

ii. Adjustments for plan designs that fall outside of the actuarial cost model.

a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} &Projected\ Claims\ PMPM\ Benefit\ A \\ &\quad = Projected\ Claims\ PMPM\ Base\ Plan \\ &\quad \times Pricing\ Relativity\ A \end{aligned}$$

b. And to arrive at the *Total Projected Claims PMPM*, KHPC assumes a distribution of members across the benefit plans being offered in 2017. The *Total Projected Claims PMPM* :

$$\begin{aligned} = &Projected\ Claims\ PMPM\ Benefit\ A\ \times Expected\ Member\ Dist\ of\ Benefit\ A \\ &+ Projected\ Claims\ PMPM\ Benefit\ B \\ &\times Expected\ Member\ Dis\ of\ Benefit\ B + \cdots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$Paid\ to\ Allowed\ Ratio = \frac{Total\ Projected\ Claims\ PMPM}{Projected\ Allowed\ Claims\ at\ Current\ Benefits}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*.

Risk Adjustment

Projected Risk Adjustments PMPM:

Relevant to 2017 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2017. The 2017 pricing impact is:

$$[Net\ Projected\ Risk\ Adjustments\ PMPM] = [Projected\ CRA\ Transfer\ PMPM] - [Risk\ Adjustment\ Fee\ PMPM]$$

The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. The impact of transitional policies throughout the remainder of 2016 and 2017

Given the uncertainty of the bullets above, it is difficult to determine whether the impact of 2017 earned CRA payment transfers will be positive or negative. Enrollment growth in 2016 further lessens our ability to predict 2017. Therefore, an appropriate estimate of [Projected CRA Transfer PMPM] is $0.

To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of $0.13 PMPM. The Risk Adjustment Fee PMPM is included in the URRT Worksheet 1, "Projected Risk Adjustments PMPM".

$$[Net\ Projected\ Risk\ Adjustments\ PMPM] = 0 - 0.13 = -0.13\ PMPM$$

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:

1. Administrative Expense: Calculated using an allocation method from KHPC's finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in

percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to KHPC individual products. Administrative expenses are included in the URRT Worksheet 1, "Administrative Load".

2. Broker Expense: Calculated based on KHPC's explicit per contract broker fee. Broker Expense is included in the URRT Worksheet 1, "Administrative Load".
3. Member Out-Of-Pocket (OOP) and Ways to Save:
    a. Description: These products offer enhanced transparency to cost savings potential both prospectively and retrospectively. These are new services included in each of KHPC's plans that work to decrease costs by engaging members in their health care decisions. The Member OOP program will show a member, prospectively, the value of a service and the impact of member cost-sharing when that service is incurred. It allows a member to shop for the best price while introducing transparency related to the member's expected cost share at the time of service. The "Ways to Save" program allows members to receive alerts, retrospectively, informing them of cost savings that could have been incurred had they have known about competing medical providers in the area. The alerts are retrospective and offer transparency around member's healthcare options.
    b. Costs: The vendor of these products charge both per contract per year (PCPY) user fees as well as initial implementation fees and annual subscription fees. The PCPY user fees are $0.115 and $1.7955 for "Member Out of Pocket" and "Way to Save" respectively. The vendor also charges a 25% administrative load, annual subscription fee, and a $100,000 implementation fee. The implementation fee is amortized over 5 years across several hundred thousand members. Using book of business member-to-contract ratios and converting to a per member per month (PMPM), in conjunction with the administrative load and implementation fee yields a PMPM charge of $0.0128 and $.20 for Member Out of Pocket and Ways to Save respectively. Annual subscription fees charged yields another $0.04 PMPM. All of these items combined allow us to arrive at a requested $0.25 PMPM. These programs are included in the URRT Worksheet 1, "Administrative Load".
4. Value-Based Benefits (VBB): Standard with each plan, Capital BlueCross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
    a. Complete CBC Personal Profile and receive a gift card reward.
    b. Complete one online coaching program and receive a gift card reward.
    c. The wellness program is administered through a vendor and costs are based on vendor fees.
5. Identity Theft Coverage: Identity protection offering will include the following components:
    a. Credit monitoring – Monitors activity that may affect credit

b. Fraud detection – Identifies potentially fraudulent use of identity or credit
c. Fraud resolution support – Assists members in addressing issues that arise in relation to credit monitoring and fraud detection

Profit (or Contribution to Surplus) & Risk Margin:

6. Contingency: Contingency is included in the URRT Worksheet 1, "Profit and Risk".

Taxes and Fees:

1. Fee for Patient-Centered Outcomes Research Trust Fund (PCOR): As per the Notice of Proposed Rulemaking for Fees on Health Insurance Policies and Self-Insured Plans for the Patient-Centered Outcomes Research Trust Fund (REG-136008-11), 77 Fed. Reg. 22691: For policy years ending on or after October 1, 2013, and before October 1, 2014, the applicable dollar amount in $2 per member per year ($0.17 PMPM), trended annually. At an estimated trend of 4%, the 2016 projected fee is $0.18 PMPM. PCOR is included in the URRT Worksheet 1, "Taxes and Fees".
2. Health Insurer Fee (HIF) – Section 9010 of PPACA and Section 1406 of the Reconciliation Act (which modified PPACA) refer to HIF. The fee is a fixed-dollar amount distributed across health insurance providers: $8 billion in 2014, $11.3 billion in 2015-2016, suspended in 2017, and $14.3 billion in 2018. Because HIF is suspended in 2017, it is not included in 2017 individual rates.
3. Exchange Fee – All issuers participating in a federally-facilitated exchange will remit 3.5% of premium to HHS. KHPC expects 93% of its membership enroll on-exchange. This translates into a projected $13.18 PMPM. The Exchange fee is included in the URRT Worksheet 1, "Taxes and Fees". The exchange user fee is applied as an adjustment to the Index Rate at the market level.
4. Federal Income Tax: Projected that Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in the URRT Worksheet 1, "Taxes and Fees".
5. State Income Tax: Projected that State Income Tax will be collected on the 2% contingency built into the premium. The projected State Income Tax is included in the URRT Worksheet 1, "Taxes and Fees".

See Exhibit H for all KHPC retention values.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Single Risk Pool

The data used to develop rates and shown in the URRT abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-

grandfathered product/plan combination for KHPC in the individual market segment. KHPC did not have any individual transitional policies in the experience period.

Index Rate

The experience period index rate is KHPC's allowed claims PMPM, set in accordance with the single risk pool provision. All KHPC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index. Only two EHB categories are not included in the experience period: pediatric dental and pediatric vision. Pediatric dental and pediatric vision claim PMPMs are added to the projected index rate as described in the Projection Factors section above.

Projected Allowed Claims: The KHPC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits.* This number is reflected in Worksheet 1 of the URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J for the Index Rate.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$\begin{aligned}&[Market\ Adjusted\ Index\ Rate]\\&\quad = ([Index\ Rate]\ x\ [Paid\ to\ Allowed\ Ratio]\\&\quad - [Net\ Projected\ ACA\ Reinsurace\ Recoveries]\\&\quad - [Net\ Projected\ Risk\ Adjustments\ PMPM] + [Exchange\ Fees\ PMPM])\\&\quad \div [Paid\ to\ Allowed\ Ratio]\end{aligned}$$

See Exhibit K for the development of the Market Adjusted Index Rate.

Plan Adjusted Index Rate

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of the URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using KHPC's actuarial cost model. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
2. Induced Demand: Higher than average utilization due to benefit richness.
3. Provider Network: The Provider network varies across plans. All "Narrow Network" plans have a smaller provider network than "Broad Network" plans. The provider network factor for those plans is shown in Exhibit L. Development of provider network factors is discussed in Geographic Rating Factors and Network Analysis
4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Catastrophic Plans: Applied to catastrophic plans to reflect lower morbidity.
6. Adjustment for distribution and administrative costs: Described in Non-Benefit Expenses and Profit & Risk section above.
6. Tobacco Adjustment: Calculated as the average tobacco factor applied across the risk pool.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibration

A calibration must be performed in order to apply the allowable rating factors (age and geography) to the Plan Adjusted Rate in order to calculate the Consumer Adjusted Premium Rates.

Age Curve Calibration: The projected average age factor is 1.663. This is calculated by taking the member-weighted average of current individual enrollment by age in KHPC. Age factors are applied in accordance with CMS's Standard Age Curve.

Geographic Factor Calibration: The projected average geographic factor is 1.004. This is calculated by taking the KHPC member-weighted average by region.

The calibration is:

$$[Calibrated\ Plan\ Adjusted\ Index\ Rate] = [Plan\ Adjusted\ Index\ Rate] \div ([Age\ Curve\ Calibration] \times [Geographic\ Factor\ Calibration])$$

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. The calibration factors and development are found on Exhibit N. Age and Geographic factors are displayed in Exhibit O.

Geographic Rating Factors and Network Analysis

Geographic Factors: CMS has approved nine geographical rating areas (GRA) in the state of Pennsylvania. KHPC operates in a 21-county area of Pennsylvania, encompassing three of the nine defined regions.

KHPC performed regional analysis to quantify the cost difference between the three regions in our service area. The analysis gathered allowed claims in a 12-month period by region, normalized for demographics. We then compared the claim cost for each of the three regions, and found cost differentials between the regions, mostly due to differences in hospital contracting between regions. The data from the analysis is found in Exhibit Q.

A complicating factor in the regional analysis is the introduction of KHPC's narrow network product. This product will be offered to eight of our twenty-one counties in our service area. KHPC expects cost-savings in the narrow network through lower reimbursements negotiated with providers, as well as the removal of higher-cost hospitals from the network. The complication surfaces because three geographic rating areas in our service area do not exactly match our eight/thirteen narrow/broad network split. In order to understand the GRA/network breakouts, three maps are shown in Exhibit O1 – GRA map, Network Map, and the Combined Map.

Network and region factors are not mutually-exclusive. Hospital reimbursements drive the cost differentials between regions. The narrow network product eliminates some of these costs, which in turn changes the regional impacts. To deal with the correlation of region and network, KHPC did a combined analysis using region and network data.

1. Gathered the following for both inpatient and outpatients services by hospital and county:

    - 2014 cases
    - 2014 payments
    - Severity index
    - 2014 severity-adjusted payments per case
    - Expected 2016 payments per case based on newly negotiated contracts in narrow network hospitals

2. Categorized the hospitals as follows:

	In Narrow Network Area	Not in Network Area
In Narrow Network	In Net/In Area	
Not in Narrow Network	Out Net/In Area	Out Net/Out Area

3. Assumed that all cases from Out Net/In Area hospitals will move to the In Net/In Area hospitals, but at lower payment rates. So In Net/In Area hospital payments will be:

   In Net/In Area Payments = In Net/In Area cases × In Net/In Area 2014 payments per case + Out Net/In Area cases × In Net/In Area severity-adjusted payments per case x Out Net/In Area Severity index

4. Out Net/Out Area hospitals will have no Narrow Network impact.

5. The sum of total expected 2017 payments divided by the sum of original 2017 payments gives the expected change in cost resulting from the introduction of the narrow network.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$[Member - Level\ Consumer\ Adjusted\ Premium\ Rate] = [Calibrated\ Plan\ Adjusted\ Index\ Rate] \times [Age\ Factor] \times [Geographic\ Factor]$$

2. $[Family\ Consumer\ Adjusted\ Premium\ Rate] = \sum[Member - Level\ Consumer\ Adjusted\ Premium\ Rate]$
   With no more than three child dependents under age 21 taken into account

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

The AV Metal Values included in Worksheet 2 of the URRT were based on the federally issued AV Calculator. Plans 53789PA0100015, 53789PA0110015, 53789PA0110035, and 53789PA0110036 used Approach 1 under CFR 156.135(b)(2). All other plans fit into the calculator.

AV Pricing Values

All AV Pricing values were developed using KHPC's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Membership Projection

The membership projections found in Worksheet 2 of the URRT were developed by assuming that moderate growth and similar distribution to current.

Terminated Products

See Exhibit R for a list of terminated products.

PA Rate Template Part I through Part V

Actuarial Statement

I, [redacted], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [redacted], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:

a. Actuarial Standard of Practice No. 5, “Health and Disability Claims”
b. Actuarial Standard of Practice No. 8, “Regulatory Filings for Rates and Financial Projections for Health Plans”
c. Actuarial Standard of Practice No. 12, “Risk Classification”
d. Actuarial Standard of Practice No. 23, “Data Quality”
e. Actuarial Standard of Practice No. 25, “Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage”
f. Actuarial Standard of Practice No. 26, “Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans”
g. Actuarial Standard of Practice No. 41, “Actuarial Communications”.

2. The index rate is:
    a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
    b. Developed in compliance with the applicable Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
    e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary.

Scope and Purpose

By this filing, Keystone Health Plan Central (KHPC), a subsidiary of Capital BlueCross (CBC), submits rates for products to be made available to individuals on and after January 1, 2017. KHPC will offer individual products on and off the federally-facilitated exchange.

KHPC is continuing to offer an on-exchange narrow network product that will be offered to eight of the twenty-one counties in our service area. The remaining thirteen counties have the option to buy KHPC's broad network product. The narrow network is offered on-exchange only. Individuals buying off-exchange are only offered the broad network product regardless of their county. The purpose of the narrow network is to lower costs by negotiating lower reimbursements with hospitals, and removing higher costs hospitals from the network.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Individual	KHPC	1/1/2014	CABC-129034249	0.00%
Individual	KHPC	1/1/2015	CABC-129635491	-8.00%
Individual	KHPC	1/1/2016	CABC-130076965	1.40%

Proposed Rate Increases

KHPC is proposing an aggregate annual 20.4% rate increase. The rate change does vary by plan. The rate change is calculated in PA Rate Template Part IV, Table 11, cell AZ13.

Membership

Membership is shown in PA Rate Template Part I, Table 1.

Benefit Changes 2016-2017

There are several benefit changes being implemented in 2017. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and

a new plan was created in its place. All terminated plans are listed in Exhibit R, and a summary of proposed 2017 benefits is included in Exhibit A.

Benefit changes by plan are listed in Exhibit A1, highlighted in yellow.

Experience Period Premium and Claims

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2015 and December 31, 2015.

Paid Through Date: Claims in the BEP are paid through March 31, 2016

Premiums (net of MLR Rebate) in Experience Period: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as KHPC does not expect to refund any MLR rebates.

Allowed and Incurred Claims during the Experience Period:

	Incurred	Allowed
Amount of claims processed through the issuer's claim system:	$9,653,286	$11,361,446
Amount of claims processed outside of the issuer's claim system:	$0	$0
Amount of claims that represent best estimate of incurred but not paid:	$188,991	$402,786

Allowed claims are developed by combining paid claims with member cost-sharing.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from CBC's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a

lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.

5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims\ = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Benefit Categories

Claims in the benefit categories displayed in the URRT come directly from CBC's data warehouse. See Exhibit C for a description of benefits by benefit category.

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Pop'l risk Morbidity". KHPC expects negative morbidity changes in its population in the projection period over the BEP. This is due to significant enrollment growth in 2016. As enrollment grows, KHPC expects claim costs to regress to the mean. The adjustment also accounts for the impact of risk adjustment. Due to enrollment growth, KHPC is projecting $0 in risk adjustment. And because claims and risk are inversely proportional, that assumptions translates into a lower claims PMPM.

Changes in Benefits:

1. Pediatric Dental and Pediatric Vision: The following PMPM allowed charges are added to the projection period allowed claims PMPM:

   - Pediatric dental coverage: 5.01
   - Pediatric vision coverage 0.46

   This was added to the projected allowed claims in Exhibit B by applying a factor to the experience period, "Other Medical" claims. The development of pediatric dental and vision projected claims is described below. Pediatric Dental and Vision benefits are underwritten by KHPC's subsidiary, Capital Advantage Assurance Company (CAAC).

   See Exhibit C for the pediatric dental and vision rate development.

Changes in Demographics: KHPC does not expect changes in demographics in its individual population.

Other Adjustments: Found in URRT, Worksheet 1, "Other".

1. List-Billed Adjustment: KHPC is adjusting the claim experience for the impact of the list-billing rating methodology required under CFR Part 147.102. This section requires that family rates are calculated by summing the premiums for each individual family member, provided at most three child dependents under age 21 are taken into account. This rating rule requires an adjustment to premium.
2. Network Adjustment: The projection period assumes a great percentage of value network members than in the experience period. Because of this movement, both incurred and allowed claims will be less than in a stable population. The network adjustment is calculated in Exhibit D – Benefit Mix Changes.

Trend Factors: Trend levels reflect our best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. KHPC uses a hospital and physician contracting model to determine future trends. This model contains all known contracted payment increases, as well as estimated increases in provider payments.
2. Utilization Considerations:
    a. Intensity of medical services rendered
    b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
    c. Further migration from brand prescription drugs to generic prescription drugs
    d. Favorable impacts of value based benefits designs
3. Intensity: Intensity is defined as the amount of inputs used to provide each unit of service. This can best be seen in an example:

Year 2015

Type of Service	Units	Cost per Unit
X-Ray	1	$200
MRI	1	$5,000
Total	2	$5,200

Year 2016

Type of Service	Units	Cost per Unit
X-Ray	0	$200
MRI	2	$5,000
Total	2	$10,000

Total Annual Trend	92%

2. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. KHPC strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

See Exhibit E for KHPC's pricing trend, as well as cost and utilization components of the pricing trend.

Credibility Manual Rate Development

KHPC individual data was used to develop rates. No credibility manual is used.

Credibility of Experience

Credibility Manual Rate Development: KHPC experience data is given 100% credibility.

Paid to Allowed Ratio

KHPC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. The URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, KHPC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
    a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
    b. BEP Member Months

2. Develop BEP *Paid and Incurred Claims*:

$$BEP\ Paid\ and\ Incurred\ Claims = \frac{BEP\ Paid\ Claims}{Completion\ Factor}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP\ Paid\ and\ Incurred\ Claim\ PMPM = \frac{BEP\ Paid\ and\ Incurred\ Claims}{BEP\ Member\ Months}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

$$Trended\ Claim\ PMPM = [BEP\ Paid\ and\ Incurred\ Claim\ PMPM] \times (1 + [Trend\%])^{Trend\ Months/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$Projected\ Paid\ and\ Incurred\ Claims\ PMPM = [Trended\ Claim\ PMPM] \times [Benefit\ Adjustment] \times [Morbidity\ Adjustment] \times [Network\ Adjustment] \times [List - Billed\ Adjustment]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *List-Billed Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

   a. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
   b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$Benefit\ Level\ Adjustment = \frac{Average\ Manual\ Cost\ in\ Projection\ Period}{Manual\ Cost\ of\ Base\ Plan}$$

c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$Base\ Plan\ Paid\ and\ Incurred\ Claims\ PMPM = \frac{Benefit\ Adjusted\ Paid\ and\ Incurred\ Claims\ PMPM}{Benefit\ Level\ Adjustment\ x\ Avg\ Induced\ Demand\ x\ Avg\ Network\ x\ Avg\ Catastrophic}$$

Where Avg Induced Demand is the average premium impact of induced demand rating factor. Avg Network is the average premium impact of network factors. And Avg Catastrophic is the average premium impact of Catastrophic Adjustment factor. These factors are discussed in the Plan Adjusted Index Rate section below.

d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$Benefit\ Relativity\ A = \frac{Manual\ Cost\ of\ Benefit\ A}{Manual\ Cost\ of\ Base\ Plan}$$

e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:

i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a HMO 2000 and HMO 1000 must be less than $1000.

ii. Adjustments for plan designs that fall outside of the actuarial cost model.

a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} &Projected\ Claims\ PMPM\ Benefit\ A \\ &\quad = Projected\ Claims\ PMPM\ Base\ Plan \\ &\quad \times Pricing\ Relativity\ A \end{aligned}$$

b. And to arrive at the *Total Projected Claims PMPM*, KHPC assumes a distribution of members across the benefit plans being offered in 2017. The *Total Projected Claims PMPM* :

$$\begin{aligned} = &Projected\ Claims\ PMPM\ Benefit\ A\ \times Expected\ Member\ Dist\ of\ Benefit\ A \\ &+ Projected\ Claims\ PMPM\ Benefit\ B \\ &\times Expected\ Member\ Dis\ of\ Benefit\ B + \cdots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$Paid\ to\ Allowed\ Ratio = \frac{Total\ Projected\ Claims\ PMPM}{Projected\ Allowed\ Claims\ at\ Current\ Benefits}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*.

Risk Adjustment

Projected Risk Adjustments PMPM:

Relevant to 2017 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2017. The 2017 pricing impact is:

$$[Net\ Projected\ Risk\ Adjustments\ PMPM] = [Projected\ CRA\ Transfer\ PMPM] - [Risk\ Adjustment\ Fee\ PMPM]$$

The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. The impact of transitional policies throughout the remainder of 2016 and 2017

Given the uncertainty of the bullets above, it is difficult to determine whether the impact of 2017 earned CRA payment transfers will be positive or negative. Enrollment growth in 2016 further lessens our ability to predict 2017. Therefore, an appropriate estimate of [Projected CRA Transfer PMPM] is $0.

To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of $0.13 PMPM. The Risk Adjustment Fee PMPM is included in the URRT Worksheet 1, "Projected Risk Adjustments PMPM".

$$[Net\ Projected\ Risk\ Adjustments\ PMPM] = 0 - 0.13 = -0.13\ PMPM$$

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:

1. Administrative Expense: Calculated using an allocation method from KHPC's finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in

percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to KHPC individual products. Administrative expenses are included in the URRT Worksheet 1, "Administrative Load".

2. Broker Expense: Calculated based on KHPC's explicit per contract broker fee. Broker Expense is included in the URRT Worksheet 1, "Administrative Load".
3. Member Out-Of-Pocket (OOP) and Ways to Save:
    a. Description: These products offer enhanced transparency to cost savings potential both prospectively and retrospectively. These are new services included in each of KHPC's plans that work to decrease costs by engaging members in their health care decisions. The Member OOP program will show a member, prospectively, the value of a service and the impact of member cost-sharing when that service is incurred. It allows a member to shop for the best price while introducing transparency related to the member's expected cost share at the time of service. The "Ways to Save" program allows members to receive alerts, retrospectively, informing them of cost savings that could have been incurred had they have known about competing medical providers in the area. The alerts are retrospective and offer transparency around member's healthcare options.
    b. Costs: The vendor of these products charge both per contract per year (PCPY) user fees as well as initial implementation fees and annual subscription fees. The PCPY user fees are $0.115 and $1.7955 for "Member Out of Pocket" and "Way to Save" respectively. The vendor also charges a 25% administrative load, annual subscription fee, and a $100,000 implementation fee. The implementation fee is amortized over 5 years across several hundred thousand members. Using book of business member-to-contract ratios and converting to a per member per month (PMPM), in conjunction with the administrative load and implementation fee yields a PMPM charge of $0.0128 and $.20 for Member Out of Pocket and Ways to Save respectively. Annual subscription fees charged yields another $0.04 PMPM. All of these items combined allow us to arrive at a requested $0.25 PMPM. These programs are included in the URRT Worksheet 1, "Administrative Load".
4. Value-Based Benefits (VBB): Standard with each plan, Capital BlueCross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
    a. Complete CBC Personal Profile and receive a gift card reward.
    b. Complete one online coaching program and receive a gift card reward.
    c. The wellness program is administered through a vendor and costs are based on vendor fees.
5. Identity Theft Coverage: Identity protection offering will include the following components:
    a. Credit monitoring – Monitors activity that may affect credit

b. Fraud detection – Identifies potentially fraudulent use of identity or credit
c. Fraud resolution support – Assists members in addressing issues that arise in relation to credit monitoring and fraud detection

Profit (or Contribution to Surplus) & Risk Margin:

6. Contingency: Contingency is included in the URRT Worksheet 1, "Profit and Risk".

Taxes and Fees:

1. Fee for Patient-Centered Outcomes Research Trust Fund (PCOR): As per the Notice of Proposed Rulemaking for Fees on Health Insurance Policies and Self-Insured Plans for the Patient-Centered Outcomes Research Trust Fund (REG-136008-11), 77 Fed. Reg. 22691: For policy years ending on or after October 1, 2013, and before October 1, 2014, the applicable dollar amount in $2 per member per year ($0.17 PMPM), trended annually. At an estimated trend of 4%, the 2016 projected fee is $0.18 PMPM. PCOR is included in the URRT Worksheet 1, "Taxes and Fees".
2. Health Insurer Fee (HIF) – Section 9010 of PPACA and Section 1406 of the Reconciliation Act (which modified PPACA) refer to HIF. The fee is a fixed-dollar amount distributed across health insurance providers: $8 billion in 2014, $11.3 billion in 2015-2016, suspended in 2017, and $14.3 billion in 2018. Because HIF is suspended in 2017, it is not included in 2017 individual rates.
3. Exchange Fee – All issuers participating in a federally-facilitated exchange will remit 3.5% of premium to HHS. KHPC expects 93% of its membership enroll on-exchange. This translates into a projected $13.18 PMPM. The Exchange fee is included in the URRT Worksheet 1, "Taxes and Fees". The exchange user fee is applied as an adjustment to the Index Rate at the market level.
4. Federal Income Tax: Projected that Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in the URRT Worksheet 1, "Taxes and Fees".
5. State Income Tax: Projected that State Income Tax will be collected on the 2% contingency built into the premium. The projected State Income Tax is included in the URRT Worksheet 1, "Taxes and Fees".

See Exhibit H for all KHPC retention values.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Single Risk Pool

The data used to develop rates and shown in the URRT abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-

grandfathered product/plan combination for KHPC in the individual market segment. KHPC did not have any individual transitional policies in the experience period.

Index Rate

The experience period index rate is KHPC's allowed claims PMPM, set in accordance with the single risk pool provision. All KHPC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index. Only two EHB categories are not included in the experience period: pediatric dental and pediatric vision. Pediatric dental and pediatric vision claim PMPMs are added to the projected index rate as described in the Projection Factors section above.

Projected Allowed Claims: The KHPC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits.* This number is reflected in Worksheet 1 of the URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J for the Index Rate.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$\begin{aligned}&[Market\ Adjusted\ Index\ Rate]\\&\quad = ([Index\ Rate]\ x\ [Paid\ to\ Allowed\ Ratio]\\&\quad - [Net\ Projected\ ACA\ Reinsurace\ Recoveries]\\&\quad - [Net\ Projected\ Risk\ Adjustments\ PMPM] + [Exchange\ Fees\ PMPM])\\&\quad \div [Paid\ to\ Allowed\ Ratio]\end{aligned}$$

See Exhibit K for the development of the Market Adjusted Index Rate.

Plan Adjusted Index Rate

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of the URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using KHPC's actuarial cost model. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
2. Induced Demand: Higher than average utilization due to benefit richness.
3. Provider Network: The Provider network varies across plans. All "Narrow Network" plans have a smaller provider network than "Broad Network" plans. The provider network factor for those plans is shown in Exhibit L. Development of provider network factors is discussed in Geographic Rating Factors and Network Analysis
4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Catastrophic Plans: Applied to catastrophic plans to reflect lower morbidity.
6. Adjustment for distribution and administrative costs: Described in Non-Benefit Expenses and Profit & Risk section above.
6. Tobacco Adjustment: Calculated as the average tobacco factor applied across the risk pool.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibration

A calibration must be performed in order to apply the allowable rating factors (age and geography) to the Plan Adjusted Rate in order to calculate the Consumer Adjusted Premium Rates.

Age Curve Calibration: The projected average age factor is 1.663. This is calculated by taking the member-weighted average of current individual enrollment by age in KHPC. Age factors are applied in accordance with CMS's Standard Age Curve.

Geographic Factor Calibration: The projected average geographic factor is 1.004. This is calculated by taking the KHPC member-weighted average by region.

The calibration is:

$$[Calibrated\ Plan\ Adjusted\ Index\ Rate] = [Plan\ Adjusted\ Index\ Rate] \div ([Age\ Curve\ Calibration] \times [Geographic\ Factor\ Calibration])$$

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. The calibration factors and development are found on Exhibit N. Age and Geographic factors are displayed in Exhibit O.

Geographic Rating Factors and Network Analysis

Geographic Factors: CMS has approved nine geographical rating areas (GRA) in the state of Pennsylvania. KHPC operates in a 21-county area of Pennsylvania, encompassing three of the nine defined regions.

KHPC performed regional analysis to quantify the cost difference between the three regions in our service area. The analysis gathered allowed claims in a 12-month period by region, normalized for demographics. We then compared the claim cost for each of the three regions, and found cost differentials between the regions, mostly due to differences in hospital contracting between regions. The data from the analysis is found in Exhibit Q.

A complicating factor in the regional analysis is the introduction of KHPC's narrow network product. This product will be offered to eight of our twenty-one counties in our service area. KHPC expects cost-savings in the narrow network through lower reimbursements negotiated with providers, as well as the removal of higher-cost hospitals from the network. The complication surfaces because three geographic rating areas in our service area do not exactly match our eight/thirteen narrow/broad network split. In order to understand the GRA/network breakouts, three maps are shown in Exhibit O1 – GRA map, Network Map, and the Combined Map.

Network and region factors are not mutually-exclusive. Hospital reimbursements drive the cost differentials between regions. The narrow network product eliminates some of these costs, which in turn changes the regional impacts. To deal with the correlation of region and network, KHPC did a combined analysis using region and network data.

1. Gathered the following for both inpatient and outpatients services by hospital and county:

    - 2014 cases
    - 2014 payments
    - Severity index
    - 2014 severity-adjusted payments per case
    - Expected 2016 payments per case based on newly negotiated contracts in narrow network hospitals

2. Categorized the hospitals as follows:

	In Narrow Network Area	Not in Network Area
In Narrow Network	In Net/In Area	
Not in Narrow Network	Out Net/In Area	Out Net/Out Area

3. Assumed that all cases from Out Net/In Area hospitals will move to the In Net/In Area hospitals, but at lower payment rates. So In Net/In Area hospital payments will be:

   In Net/In Area Payments = In Net/In Area cases × In Net/In Area 2014 payments per case + Out Net/In Area cases × In Net/In Area severity-adjusted payments per case x Out Net/In Area Severity index

4. Out Net/Out Area hospitals will have no Narrow Network impact.

5. The sum of total expected 2017 payments divided by the sum of original 2017 payments gives the expected change in cost resulting from the introduction of the narrow network.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$[Member - Level\ Consumer\ Adjusted\ Premium\ Rate] = [Calibrated\ Plan\ Adjusted\ Index\ Rate] \times [Age\ Factor] \times [Geographic\ Factor]$$

2. $[Family\ Consumer\ Adjusted\ Premium\ Rate] = \sum[Member - Level\ Consumer\ Adjusted\ Premium\ Rate]$
   With no more than three child dependents under age 21 taken into account

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

The AV Metal Values included in Worksheet 2 of the URRT were based on the federally issued AV Calculator. Plans 53789PA0100015, 53789PA0110015, 53789PA0110035, and 53789PA0110036 used Approach 1 under CFR 156.135(b)(2). All other plans fit into the calculator.

AV Pricing Values

All AV Pricing values were developed using KHPC's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Membership Projection

The membership projections found in Worksheet 2 of the URRT were developed by assuming that moderate growth and similar distribution to current.

Terminated Products

See Exhibit R for a list of terminated products.

Attachments and Examples

The following is a list of Exhibits and Data to support this filing:

PA Rate Template Part I through Part V

Actuarial Statement

I, [redacted], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [redacted], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:

a. Actuarial Standard of Practice No. 5, “Health and Disability Claims”
b. Actuarial Standard of Practice No. 8, “Regulatory Filings for Rates and Financial Projections for Health Plans”
c. Actuarial Standard of Practice No. 12, “Risk Classification”
d. Actuarial Standard of Practice No. 23, “Data Quality”
e. Actuarial Standard of Practice No. 25, “Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage”
f. Actuarial Standard of Practice No. 26, “Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans”
g. Actuarial Standard of Practice No. 41, “Actuarial Communications”.

2. The index rate is:
    a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
    b. Developed in compliance with the applicable Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
    e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary.

2017 Rates Table Template v6.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are a community rating state, select Family Option under Age and fill in all columns.			
	If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2017 Rates Table Template v6.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are a community rating state, select Family Option under Age and fill in all columns.			
	If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2017 Rates Table Template v6.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are a community rating state, select Family Option under Age and fill in all columns.			
	If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2017 Rates Table Template v6.0

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.

If you are a community rating state, select Family Option under Age and fill in all columns.

If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.
