Ms. Johanna Fabian-Marks
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

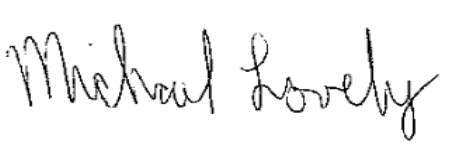
Dear Ms. Fabian-Marks,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Small Group On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2018 through through 12/31/2018.

Company Name/NAIC #: UPMC Health Options, Inc./15345
Market: Small Group
On or Off Exchange: On and Off
Effective Date of Coverage: 1/1/2018
Average Rate Change Requested: 4.57% ($12.46)
Range of Rate Change Requested: -0.70% to 6.35% (-$1.46 to $20.99)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 6, 7 (regions 3 and 7 added for 2018)
Metal Levels Offered: Bronze, Silver, Gold, Platinum
Currently Enrolled Lives: 65,575
Currently Enrolled Policyholders: 36,688
Number of Plans Offered in 2018: 92
Corresponding Contract Form #: EPOF02, PPOF02, PPOF05
Binder ID#: UPMC-PA18-125071566
HIOS Issuer ID #: 16322
Submission Tracking #: UPMC-131034854

If you have any questions or require additional information, please call me at 412-454-7849 or email me at lovelymt@upmc.edu.

Sincerely,



Michael Lovely, FSA, CERA, MAAA

INSURANCE DEPARTMENT

Rate Change Request Summary - 2018

Pennsylvania Insurance Department | www.insurance.pa.gov

UPMC Health Options, Inc. – Small Group Plans

Rate request filing ID # UPMC-131034850 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Initial requested average rate change:	4.37%
Revised requested average rate change:	4.57%
Range of requested rate change:	-0.70% to 6.35%
Effective date:	1/1/2018
People impacted:	65,575
Available in:	1, 2, 3, 4, 5, 6, 7

Key information

Jan. 2016-Dec. 2016 financial experience		
Premiums	$	536,479,256
Claims	$	500,341,525
Administrative expenses	$	23,765,913
Taxes & fees	$	18,398,033
Company made (after taxes)	**$**	**17,739,698**

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2018:

Claims:	85.69%
Administrative:	12.88%
Taxes & fees:	3.43%
Profit:	-2.00%

The company expects its annual medical costs to increase by approximately 2.54% for 2018.

Explanation of requested rate change

Additional premium is needed to account for that in addition to the higher cost and utilization of medical services each year. Additional revenue is also required to account for the return of the Health Insurance Tax in 2018.

RFJ Part II – Consumer Friendly Justification

Small Group Exchange EPO/PPO Rate Filing

The rate increase for UPMC Health Options Small Group plans is 4.57% for 2018.

Scope and Range of the Rate Increase

The number of individuals affected by this rate increase is 65,575. There will be no variation in the increase among affected members.

Financial Experience of the Product

Premiums	$ 536,479,256
Claims	$ 500,341,525
Administrative expenses	$ 23,765,913
Taxes & fees	$ 18,398,033
Company made (after taxes)	**$ 17,739,698**

Changes in Medical Service Costs

Cost and utilization increases are expected to increase by approximately 2.54% for 2018.

Changes in Benefits

No changes in benefits contributed significantly to the increase.

Administrative Costs and Anticipated Profits

No major changes in administrative costs or profits are anticipated and thus did not affect the increase.

RFJ Part III: Actuarial Memorandum - Redacted

General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Identifying Information:
Company Legal Name: UPMC Health Options, Inc.
NAIC #: 15345
State: PA
HIOS Issuer ID: 16322
Market: Small Group
Exchange: On and Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2018

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131034850
Form Filing SERFF Tracking #: UPMC-131025262, UPMC-131025228, UPMC-131025188, UPMC-131024732, UPMC-131025261
Binder SERFF Tracking #: UPMC-PA18-125071566

Rate History:
Historical and proposed rate changes vary by plan based on differences in network-level adjustment factors and differences in pricing AV factors between plans. The values listed below and overall proposed rate change for 2018 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change
UPMC-129389352	2014	0.0%
UPMC-129640669	2015	0.0%
UPMC-130071358	2016	0.0%
UPMC-130536887	2017	6.1%

Proposed Rate Increase(s)

Reasons for Rate Increase(s):
The proposed rate increase for 2018 is 4.57%. The major reasons for the increase include the following:

- Increasing cost and utilization trends
- Return of the Insurer Tax

Market Experience

Experience Period Premium and Claims

Paid Through Date:
The reported claims during the experience period have a paid through date of April 2017.

Premiums (net of MLR Rebate) in Experience Period:
Section I, worksheet 1 of the URRT contains calendar year 2016 premium for the captioned company and market. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium is also listed in Table 2 of the PA Actuarial Memorandum Exhibits. Please see Exhibit 1 of the Supporting Exhibits for a breakdown of the portion of premium generated from ACA-related business and transitional business.

Allowed and Incurred Claims Incurred During the Experience Period:
Section I, worksheet 1 of the URRT contains calendar year 2016 claims experience for the captioned company and market, paid through April 2017. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire fully insured block of business. Because of the changes in membership in our ACA-compliant plans year to year, we felt it would be better to use a more established and consistent data set. Because four months run-out is available the impact of IBNR is minimal. Please see Exhibit 1 of the Supporting Exhibits for a breakdown of the portion of claims corresponding to ACA-related business and transitional business.

Month	Completion Factor
1/1/2016	0.9990
2/1/2016	0.9986
3/1/2016	0.9986
4/1/2016	0.9987
5/1/2016	0.9976
6/1/2016	0.9968
7/1/2016	0.9955
8/1/2016	0.9943
9/1/2016	0.9925
10/1/2016	0.9899
11/1/2016	0.9857
12/1/2016	0.9784

Benefit Categories

Medical claims are split into nine categories in our data warehouse. They are mapped into the categories in the URRT as follows:

UPMC Benefit Category	URRT Benefit Category
Inpatient	Inpatient Hospital
Catastrophic	Inpatient Hospital
Outpatient	Outpatient Hospital
Behavioral	Outpatient Hospital
PCP	Professional
Specialist	Professional
Diagnostic	Other Medical
ER	Other Medical
Other	Other Medical
Pediatric Dental	Other Medical
Pediatric Vision	Other Medical

Drug claims are on separate tables and directly mapped into the Prescription Drugs category. The Other Medical category uses visits as units for utilization calculations.

Projection Factors

Changes in the Morbidity of the Population Insured:
We expect a morbidity trend of -6% when comparing our experience period population to our projected population. When ACA-compliant plans were first introduced into the small group market, the population that enrolled consisted of unhealthier members. Over the last few years, healthier members have enrolled in ACA-complant plans more frequently, decreasing the morbidity of the insured population on an annual basis. This adjustment will account for this trend in morbidity from the experience period to the projection period.

Changes in Benefits:
No changes were made to the PA EHB Benchmark plan for 2018, so no adjustments were necessary.

Changes in Demographics:
The average age for our 2016 experience period individual risk pool was 45 with an average premium factor of 1.45. This is comparable to our 2017 experience so far with age 46 and premium factor 1.48. Due to the stability of the population, no demographic adjustment has been made to the rates.

Other Adjustments:
No other adjustments to the experience period data were needed.

Trend Factors (cost/utilization):
The overall annual trend used in rate development is 2.54%. Historical allowed claims were used to develop year over year trend factors for use in the projected rates. Because of the large change in membership year over year, the data specific to the block of business associated with this filing was deemed too volatile to use for

trend development. The entire block of commercial business was included in Table 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development.

Credibility Manual Rate Development

Source and Appropriateness of Manual Rate Used:
The rate manual was developed using experience period data for groups enrolled in an ACA-compliant plan, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The rate manual consists of 463,360 member months of experience. The data for the entire block would not be appropriate as the majority of groups enrolled in grandmothered plans would not join the single risk pool until 2019.

Adjustments Made to the Data:
The trend and morbidity adjustments applied to the experience period data as discussed above were also applied to the manual data. Additionally, an adjustment to account for change in network has been applied as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. The manual data consists of a blend of UPMC's Premium Network along with the Standard Network, which is included in UPMC's Health Coverage rate filing for this market. The Premium Network covered rating areas 1, 2, 4, 5, and 6 during the experience period, but has since expanded to include rating area 7. The Partner Network has been introduced into the small group market for 2018 and provides plan offerings in rating area 3, which has not historically part of UPMC's service area in this market. Projected costs are expected to increase due to this expansion. A factor to account for this projected increase has been applied to the medical benefit categories in the "Other" adjustment column in worksheet 1 of the URRT. This load was not applied to prescription drugs since they were not affected by the network expansion.

Inclusion of Capitation Payments:
No benefits are projected to be paid for via capitation.

Credibility of Experience

The experience period data has a credible membership amount. However, most of this membership will not be joining the ACA-compliant portion of the single risk pool until 2019. Therefore, 0% credibility is used.

Paid to Allowed Ratio

The Paid to Allowed Average Factor was calculated by taking the weighted average of the HHS AV Metals Values for all plans using projected membership.

Risk Adjustment and Reinsurance

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:
Experience period Risk Adjustment for the small group market was estimated to be a receivable of $11,081,815 per suggestion from the Pennsylvania Insurance Department, which translates to a PMPM of $23.92. An exact amount is not yet known so estimates from two different consultants were used to develop estimates alongside

our own internal estimate and the aforementioned estimate provided by PID based on data accrued through April 2017. Based on these estimates and past experience, we believe this value is a reasonable estimate until the actual values are released later this year. No adjustments for the Traditional Reinsurance Program under PPACA were made as no recoveries are paid to the small group market.

Projected Risk Adjustments PMPM:
Projection period risk adjustment PMPM has been estimated to be a receivable of $12.81. Please see Exhibit 2 of the Supporting Exhibits for the derivation of the risk adjustment PMPM amounts for both the experience and projection period. The projected risk adjustment assumes any membership changes involve members of average risk. Thus the total dollar impact of these membership fluctuations was estimated to remain unchanged. $1.68 PMPY has been subtracted as a projected amount for the Risk Adjustment Administration Fee. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The effect is a decrease in premium since less revenue is required to account for the anticipated receivable.

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:
Administrative expenses are taken from our 2016 Supplemental Health Care Exhibit (SHCE). They are broken out by lines of business and market segments matching this filing and thus are appropriate for use. Differences between the SHCE and section I, worksheet 1 of the URRT stem from the fact that the SHCE include restatements of estimates from the prior year, while the URRT only contains actual experience from 2016 (experience period). We are unable to provide a breakdown between ACA and non-ACA business in Part 1 of the SHCE as we do not have the base data for these fields split between ACA and non-ACA categorization. However, in Exhibit 1 of the Supporting Exhibits, we have provided a breakdown of premium and incurred claims between ACA and non-ACA business. Please see Exhibit 3 of the Supporting Exhibits for a historical breakdown of the actual and projected administrative expenses by year.

Profit & Risk Margin:
The projected profit margin for this company in 2018 is -2%, which changed from 0% in 2017. This change was made to lessen the likelihood of owing MLR rebates for 2018 or 2019. With the everchanging population enrolled in ACA plans, predicting their costs and premiums is more difficult. The current MLR for our ACA product is comfortably above the minimum, but the entire small group block, including grandmothered plans, must be used to determine whether rebates are owed. While grandmothered plans are allowed a 15% range from the filed methodology when setting the rate, ACA rates do not have this flexibility. They are also filed well in advance and thus more difficult to update should actual trends turn out different than expected. Lowering the rate provides this missing flexibility, despite the negative profit margin. We do not anticipate owing rebates even with a 0% profit margin, but the negative value make it more likely that this will not occur.

Taxes and Fees:
Taxes and Fees increased from 2017 to 2018 to account for the return of the Health Insurance Tax for 2018. A PCORI amount of $0.20 PMPM has been added based on projections for 2018 by the IRS. Please note that the Risk Adjustment Administration Fee was not included in the Taxes and Fees field. As noted below in the "Market

Adjusted Index Rate" section, Marketplace user fees are applied as an adjustment to the Index Rate at the market level. However, with the announcement that Healthcare.gov will no longer be supporting enrollment in the Small Group market, no adjustment was made to account for the Marketplace User Fee despite these plans being offered both on and off the Federal Exchange.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology, is 90.4%.

Application of Market Reform Rating Rules

Single Risk Pool

The single risk pool consists of members enrolled in ACA-compliant and transitional policies offered under the captioned market.

Index Rate

For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to the lack of credibility. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 2.54% annual trend to the manual rate. Adjustments to account for changes in morbidity and network are then applied as discussed in the "Credibility Manual Rate Development" section above. Claims for routine foot care and acupuncture were not included in the calculation of the index rates despite being covered during the experience period since they are classified as non-EHBs.

Small Group Quarterly Rate Filings

Quarterly rate filings will not be submitted for this company.

Market Adjusted Index Rate

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment and Marketplace Fees adjustments are described above in the Projected Risk Adjustments PMPM and Taxes and Fees sections, respectively. Since the Market Adjusted Index Rate is calculated on an allowed claims basis, the projected paid Risk Adjustment was divided by the projected paid-to-allowed ratio when performing market-level adjustments.

Plan Adjusted Index Rates

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2018 Plan Adjusted Index Rates. The allowable modifiers applied in rate development are described below.

Plan Actuarial Value:
The AV for each plan was determined using the final 2018 HHS AV Calculator. Please see the "AV Metal Values" section below for a discussion on the treatment of plans that did not fit the AV Calculator.

Benefit Richness (induced demand)
Please see Exhibit 4 in the Supporting Exhibits for the induced utilization exhibit and a calculation demonstrating the normalization of benefit richness factors using projected membership. This adjustment was used to keep relativities between plans similar to what they were in the previous year while accounting for plan design changes. This will minimize rate increase variations by plan and consumer confusion that could result. In addition, current loss ratios exhibit significant variation between metal levels, which suggests a wider variation is necessary than what is indicated in the company-determined Pricing AV.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.16 PMPM.

Provider Network
No adjustments were made to account for provider network since the projected costs for each network included in this filing do not exhibit any significant differences.

Catastrophic Eligibility
Catasrophic plans will not be offered under this company and market in 2018, so no adjustment is necessary.

Tobacco Surcharge Adjustment
No tobacco load is applied in the Small Group market, so no adjustment is necessary.

Calibration

Age Curve Calibration:
The average age factor was calculated using our projected ACA-related Small Group population with the prescribed HHS Age Factors for 2018. We pulled them in summary alongside network and area data in order to back out age factor differences when determining network/area factors. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. The average age factor is 1.50 and corresponding age band is 46. Please see Exhibit 5 in the Supporting Exhibits for the calculation of this factor.

Geographic Factor Calibration:
Rating area factors for rating areas 1, 2, 4, 5, and 6 were set to 1.0 in 2017 and they will remain this way for 2018 as we do not anticipate significant variations in cost by geographical location for these particular regions. To account for the expansion of coverage into rating areas 3 and 7, geographical factors were developed for these areas using provider fee schedules from each region. The calibration factor of 1.01 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool. This calculation is demonstrated in Exhibit 6 of the Supporting Exhibits.

Tobacco Use Rating Factor Calibration:
No tobacco load is applied in the Small Group market, so no adjustment is necessary.

Consumer Adjusted Premium Rate Development

The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates. Please see Exhibit 7 of the Supporting Exhibits for historical Consumer Adjusted Premium Rate changes for this company and market for a 21-year-old non-tobacco user.

Plan Product Info

AV Metal Values

Metal values were determined using the final 2018 HHS AV Calculator. The Inside Advantage and MyCare Advantage products offered with a mixture of tiered and non-tiered in-network benefits do not fit the format of the AV Calculator. Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final AV for these tiered plans.

AV Pricing Values

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2018 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described in the "Plan Adjusted Index Rates" section above. The AV Pricing Values displayed in the URRT are the ratio of the Plan Adjusted Index Rates to the Market Adjusted Index Rate Please see Exhibit 8 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values.

Membership Projections

Membership projections were developed based on our anticipated competitive positioning in the market combined with our current enrollment distribution by plan. Please see Exhibit 9 of the Supporting Exhibits for various enrollment projections by plan.

Terminated Plans and Products

No plans were terminated for 2018.

Warning Alerts

After clicking the "validate" button on the URRT, some warning alerts appear. The total allowed PMPM values in section I and II of worksheet 1 do not match due to internal rounding error when breaking out claims data by closing category. The warning for cell G20 on worksheet 2 stems from an artificial product ID being used in the terminated products column and duplicates are not allowed in the URRT. The remaining warning alerts for values in row 47 on worksheet 2 arise from the current rate PMPM for several plans be reported as $0.00. This was done because these are each renewing plans that currently have no enrollment.

Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conductive effective rate review for all submitted rates.

Note on Possible Legislation Changes

Please note that any changes to the ACA involving the elimination of CSR subsidies, removal of the individual mandate for health insurance, or modifications to any other provisions may dramatically affect the makeup of the single risk pool and require us to re-evaluate rate development for this filing.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Historical Data for ACA-related and Transitional Policies
- Exhibit 2: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 3: Projected and Actual Administrative Expenses
- Exhibit 4: Induced Utilization Derivation
- Exhibit 5: Derivation of Age Calibration Factor
- Exhibit 6: Derivation of Geographical Calibration Factor
- Exhibit 7: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User
- Exhibit 8: Proportion of Plan Adjusted Index Rates and AV Pricing Values
- Exhibit 9a: Development of Projected Enrollment by Network and Metal Level
- Exhibit 9b: Development of Projected Enrollment by Plan
- Exhibit 9c: Projected Enrollment by Rating Area

Actuarial Certification

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

PA Actuarial Memorandum - Redacted

Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

Company Information

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Options, Inc.
NAIC #: 15345
HIOS Issuer ID: 16322
Market: Small Group
Exchange: On and Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2018

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131034850
Form Filing SERFF Tracking #: UPMC-131025262, UPMC-131025228, UPMC-131025188, UPMC-131024732, UPMC-131025261
Binder SERFF Tracking #: UPMC-PA18-125071566

Rate History and Proposed Variations in Rate Changes

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2018 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change
UPMC-129640669	2015	0.0%
UPMC-130071358	2016	0.0%
UPMC-130536887	2017	6.1%

Average Rate Change

The average rate change displayed in Table 10, column AC, of the PA Actuarial Memorandum Exhibits is 4.57%. The change in 21-year-old non-tobacco premium PMPM calculated in table 11, cell AN13, of the PA Actuarial Memorandum Exhibits is 4.0%. The percent increase over Experience Period calculated in cell V45 on worksheet 1 of the URRT is 13.00%. The annualized percent increase calculated in cell V46 on worksheet 1 of the URRT is 6.30%.

Membership Count

Various breakdowns of the membership count for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits. Please see Exhibit 9 of the Supporting Exhibits for various enrollment projections by plan.

Benefit Changes

A table with these changes has been included in Appendix I. No plans have actuarial values that fall in the expanded de minimis range.

Experience Period Claims and Premium

Claims and premium data from the experience period (January 2016 - December 2016) with four months of run-out are displayed in Table 2 of the PA Actuarial Memorandum Exhibits. This section provides a discussion of each field in the table and its relation to the corresponding fields on the URRT. Please see Exhibit 1 of the Supporting Exhibits for a breakdown of the portion of each quantity that belongs to ACA-related business and transitional business.

<u>Earned Premium:</u>
This represents the revenue accumulated by the captioned company and market during the experience period. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium listed in Table 2 does match the total premium listed in section I, worksheet 1 of the URRT because the value in the URRT does not include estimated Risk Adjustment receivables/payments per federal instructions.

<u>Paid Claims:</u>
This field includes uncompleted paid medical, pharmacy, pediatric dental, and pediatric vision experience period claims for the captioned company and market.

<u>Ultimate Incurred Claims:</u>
This field includes completed paid medical and pharmacy experience period claims for the captioned company and market. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire fully insured block of business. Because of the changes in membership in our ACA-compliant plans year to year, we felt it would be better to use a more established and consistent data set. Because four months run-out is available the impact of IBNR is minimal. The completion factors used are

displayed in the table below. Please note that the ultimate incurred claims shown in Table 2 do not match the total incurred claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the ultimate incurred claims less total prescription drug rebates listed in Table 2.

Month	Completion Factor
1/1/2016	0.9990
2/1/2016	0.9986
3/1/2016	0.9986
4/1/2016	0.9987
5/1/2016	0.9976
6/1/2016	0.9968
7/1/2016	0.9955
8/1/2016	0.9943
9/1/2016	0.9925
10/1/2016	0.9899
11/1/2016	0.9857
12/1/2016	0.9784

Member Months:
The sum of the experience period member months shown in Table 1 is also displayed in Table 2.

Estimated Cost Sharing:
This field represents the difference between allowed claims and ultimate incurred claims in Table 2.

Allowed Claims:
This field includes allowed medical and pharmacy experience period claims as well as pediatric dental and vision claims from the experience period for the captioned company and market. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail. Please note that the allowed claims shown in Table 2 do not match the total allowed claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the allowed claims less total prescription drug rebates listed in Table 2.

Non-EHB portion of Allowed Claims:
This field displayed the amount of allowed experience period claims that can be attributed to non-EHBs for the captioned market and company.

Total Prescription Drug Rebates:
This field shows the amount of prescription drug rebates received for the captioned company and market during the experience period. Pharmacy rebates have been removed from the total incurred and allowed claims displayed in section I, worksheet 1 of the URRT.

Total EHB Capitation:
No benefits were paid for via capitation during the experience period.

Total Non-EHB Capitation:
No benefits were paid for via capitation during the experience period.

Estimated Risk Adjustment:
Experience period Risk Adjustment for the small group market was estimated to be a receivable of $11,081,815 per suggestion from the Pennsylvania Insurance Department, which translates to a PMPM of $23.92. An exact amount is not yet known so estimates from two different consultants were used to develop estimates alongside our own internal estimate and the aforementioned estimate provided by PID based on data accrued through April 2017. Based on these estimates and past experience, we believe this value is a reasonable estimate until the actual values are released later this year.

Estimated Reinsurance Recoveries:
No adjustments for the Traditional Reinsurance Program under PPACA were made as no recoveries are paid to the small group market.

Credibility of Data

The experience period data has a credible membership amount. However, most of this membership will not be joining the ACA-compliant portion of the single risk pool until 2019. Therefore, 0% credibility is used. The rate manual was developed using experience period data for groups enrolled in a ACA-compliant plan, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The rate manual consists of 463,360 member months of experience. Adjustments include the trend, morbidity, and network adjustments discussed in the "Index Rate" section below.

Trend Identification

The overall annual trend used in rate development is 2.54%. Historical allowed claims were used to develop year over year trend factors for use in the projected rates. Because of the large change in membership year over year, the data specific to the block of business associated with this filing was deemed too volatile to use for trend development. The entire block of commercial business was included in Table 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development. Service categories were defined to be consistent with the URRT instructions. Quarterly rates are not proposed for this small group filing.

Historical Experience

Historical data from the three most recent calendar years for the captioned company and market with four months of run-out are provided in Table 4. Allowed claims were developed using the same manner described above for Table 2. As mentioned above, this data was deemed too volatile to use for trend development. The historical data listed in Table 4b belongs to our entire block of commerical business and was used to develop trend. Data for transitional policies was included in Table 4. A breakout of which data belongs to ACA-related business and transitional business is provided in Exhibit 1 of the Supporting Exhibits.

Rate Development & Change

Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below. Please note that Table 5a is not populated since quarterly trended rates will not be generated for this filing.

Index Rate:

For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to the lack of credibility. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 2.54% annual trend to the manual rate. Adjustments to account for changes in morbidity and utilization are then applied to get from the single risk pool population to the plan offerings of this specific segment. We expect a morbidity trend of -6% when comparing our experience period population to our projected population. When ACA-compliant plans were first introduced into the small group market, the population that enrolled consisted of unhealthier members. Over the last few years, healthier members have enrolled in ACA-complant plans more frequently, decreasing the morbidity of the insured population on an annual basis. This adjustment will account for this trend in morbidity from the experience period to the projection period. Additionally, an adjustment to account for change in network has been applied as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. The manual data consists of a blend of UPMC's Premium Network along with the Standard Network, which is included in UPMC's Health Coverage rate filing for this market. The Premium Network covered rating areas 1, 2, 4, 5, and 6 during the experience period, but has since expanded to include rating area 7. The Partner Network has been introduced into the small group market for 2018 and provides plan offerings in rating area 3, which has not historically part of UPMC's service area in this market. Projected costs are expected to increase due to this expansion. A factor to account for this projected increase has been applied to the medical benefit categories in the "Other" adjustment column in worksheet 1 of the URRT. This load was not applied to prescription drugs since they were not affected by the network expansion.

Market-Adjusted Index Rate:

The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a receivable of $12.81. Please see Exhibit 2 of the Supporting Exhibits for the derivation of the risk adjustment PMPM amounts for both the experience and projection period. The projected risk adjustment assumes any membership changes involve members of average risk. Thus the total dollar impact of these membership fluctuations was estimated to remain unchanged. $1.68 PMPY has been subtracted as a projected amount for the Risk Adjustment Administration Fee. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The effect for this adjustment is a decrease in premium since less revenue will be required due to the anticipated receivable. With the announcement that Healthcare.gov will no longer be supporting enrollment in the Small Group market, no adjustment was made to account for the Marketplace User Fee.

Total Allowed Claims:
The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine foot care and acupuncture. The experience period allowed claims for these benefits was $1.16 PMPM.

Retention Items

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

Administrative Expenses:
Administrative expenses are taken from our 2016 Supplemental Health Care Exhibit (SHCE). They are broken out by lines of business and market segments matching this filing and thus are appropriate for use. Differences between the SHCE and section I, worksheet 1 of the URRT stem from the fact that the SHCE include restatements of estimates from the prior year, while the URRT only contains actual experience from 2016 (experience period). We are unable to provide a breakdown between ACA-related and transitional business in Part 1 of the SHCE as we do not have the base data for these fields split between ACA-related and transitional categorization. Please see Exhibit 3 of the Supporting Exhibits for a historical breakdown of the actual and projected administrative expenses by year.

The calculation of the average commission is displayed in the table below. Commissions are paid under all circumstances and in all geographic locations. Broker agreements have been uploaded in the Supporting Documentation section in SERFF.

Monthly Payout for Market	Contracts	Average Commission
$955,230	46,844	$20.39

Taxes and Fees:
Taxes and Fees increased/decreased from 2017 to 2018 to account for the return of the Health Insurance Tax for 2018. A PCORI amount of $0.20 PMPM has been added. Please note that the Risk Adjustment Administration Fee was not included in the Taxes and Fees field. As noted above in the "Market-Adjusted Index Rate" section, Marketplace user fees are applied as an adjustment to the Index Rate at the market level. Despite this, the Taxes and Fees value listed in Table 6 will match the corresponding field in the URRT even though the federal instructions specify that Marketplace user fees should be included in this field in the URRT. This is so because no adjustment was made to account for the Exchange Marketplace User Fee due to the recent announcement that Healthcare.gov will not support Small Group enrollment in 2018.

Profit/Contingency:
The projected profit margin for this company in 2018 is -2%, which changed from 0% in 2017. This change was made to lessen the likelihood of owing MLR rebates for 2018 or 2019. With the everchanging population enrolled in ACA plans, predicting their costs and premiums is more difficult. The current MLR for our ACA product is comfortably above the minimum, but the entire small group block, including grandmothered plans, must be used to determine whether rebates are owed. While grandmothered plans are allowed a 15% range

from the filed methodology when setting the rate, ACA rates do not have this flexibility. They are also filed well in advance and thus more difficult to update should actual trends turn out different than expected. Lowering the rate provides this missing flexibility, despite the negative profit margin. We do not anticipate owing rebates even with a 0% profit margin, but the negative value make it more likely that this will not occur.

Normalized Market-Adjusted Projected Allowed Total Claims

Normalization factors for 2017 and 2018 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2017 factors have been taken from the prior rate filing of the captioned company and market. Detailed discussion on each of the 2018 factors are provided below.

Average Age Factor:
The average age factor was calculated using our projected ACA-related Small Group population with the prescribed HHS Age Factors for 2018. We pulled them in summary alongside network and area data in order to back out age factor differences when determining network/area factors. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. The average age factor is 1.50 and corresponding age band is 46. Please see Exhibit 5 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:
The calibration factor of 1.01 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 6 of the Supporting Exhibits. Please see the "Geographic Factors" section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:
No tobacco load is applied in the Small Group market, so the average tobacco factor is 1.0.

Average Benefit Richness:
Benefit richness factors were calculated so that the average value is 1.0 when weighted with projected membership. This normalization is demonstrated in Exhibit 4b of the Supporting Exhibits. These factors do not normalize to 1.0 in Table 10 of the PA Actuarial Memorandum Exhibits because this table uses current enrollment for normalization. Projected enrollment is more appropriate for this purpose due to recent changes in network and plan offerings under this company.

Average Network Factor:
Network factors were selected so that the average value is 1.0 when weighted with projected membership.

Components of Rate Change

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented in the 2017 columns have been taken from this company's 2017 rate filing.

Plan Rate Development

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2018 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described below. Please see Exhibit 8 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values.

Plan Actuarial Value:
The AV for each plan was determined using the final 2018 HHS AV Calculator. The Inside Advantage and MyCare Advantage products offered with a mixture of tiered and non-tiered in-network benefits do not fit the format of the AV Calculator. Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final AV for these tiered plans.

Benefit Richness (induced demand)
Please see Exhibit 4a in the Supporting Exhibits for the induced utilization exhibit. This adjustment was used to keep relativities between plans similar to what they were in the previous year. This will minimize rate increase variations by plan and consumer confusion that could result. In addition, current loss ratios exhibit significant variation between metal levels, which suggests a wider variation is necessary than what is indicated in the company-determined Pricing AV.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.16 PMPM.

Provider Network
The network factor applied for all networks included in this filing are 1.0, so no adjustment is necessary.

Catastrophic Eligibility
Catasrophic plans will not be offered under this company and market in 2018, so no adjustment is necessary.

Tobacco Surcharge Adjustment
No tobacco load is applied in the Small Group market, so no adjustment is necessary.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. Please see Exhibit 7 of the Supporting Exhibits for historical rate changes for this company and market for a 21-year-old non-tobacco user.

Plan Factors

Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2018 is used in the development of the Consumer Adjusted Premium Rates. No tobacco load will be applied for the small group market in 2018.

Geographic Factors

Rating area factors for rating areas 1, 2, 4, 5, and 6 were set to 1.0 in 2017 and they will remain this way for 2018 as we do not anticipate significant variations in cost by geographical location for these particular regions. To account for the expansion of coverage into rating areas 3 and 7, geographical factors were developed for these areas using provider fee schedules from each region. The calibration factor of 1.01 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool. This calculation is demonstrated in Exhibit 6 of the Supporting Exhibits.

Network Factors

No adjustments were made to account for provider network since the projected costs for each network included in this filing do not exhibit any significant differences.

Service Area Composition

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2018. Due to this company's recent expansion in this market, coverage will be offered in rating areas 3 and 7 in 2018. Service area maps for 2017 and 2018 have been uploaded in the Supporting Documentation section in SERFF.

Composite Rating

No composite rating is used with these plans.

Note on Possible Legislation Changes

Please note that any changes to the ACA involving the elimination of CSR subsidies, removal of the individual mandate for health insurance, or modifications to any other provisions may dramatically affect the makeup of the single risk pool and require us to re-evaluate rate development for this filing.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Historical Data for ACA-related and Transitional Policies
- Exhibit 2: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 3: Projected and Actual Administrative Expenses
- Exhibit 4: Induced Utilization Derivation
- Exhibit 5: Derivation of Age Calibration Factor
- Exhibit 6: Derivation of Geographical Calibration Factor
- Exhibit 7: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User
- Exhibit 8: Proportion of Plan Adjusted Index Rates and AV Pricing Values
- Exhibit 9a: Development of Projected Enrollment by Network and Metal Level
- Exhibit 9b: Development of Projected Enrollment by Plan
- Exhibit 9c: Projected Enrollment by Rating Area

Actuarial Certification

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

2018 Rates Table Template v7.1

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

Questions and Responses submitted 6/23/17

Question	Comment/Request	Response
1	The number of policyholders on the Rate/Rule Tab in SERFF should be the number of lives as per Department Guidelines on Page 5 – Section A. 2D. SERFF Rate/Rule Schedule Tab.	This change has been made in the post-submission update.
2	Please explain the discrepancy noted in the following: a) Ultimate Incurred Claims shown in Table 2 ($500,341,575) versus Table 4 ($501,348,830 – adding the 2016 ultimate incurred claims) b) Current enrollment is 130,032 in Table 1 and 65,575 in Table 10, Cover letter and Rate Change Request Summary (Attachment 1)	a. In Table 4, the completion factors are applied to incurred claims to generate the ultimate incurred claims. The incurred claims consist of both medical and pharmacy claims. For our internal calculations, we do not apply completion factors to pharmacy claims, but it is not possible to do this given the way Table 4 is set up. Table 2 reflects the claims data from our internal calculations, which leads to the disparity between the observed values. b. The current enrollment value listed in Table 1 includes enrollment in both ACA-related and transitional products. The current enrollment value listed in the other documents represented ACA-related enrollment only. The latter value has been revised to reflect current enrollment for both ACA-related and transitional business.
3	Please provide the data and calculations of the Paid to Allowed Ratio of 0.86.	This value has been changed to match the weighted-average of the plan actuarial values calculated in Table 10.
4	The Projected Index Rate calculated in Table 5 is $446.63 and on the URRT shows as 449.95. Please explain the discrepancy.	The index rate calculated in Table 5 only includes EHB claims, per the guidance provided by PID. The latter value includes both EHB and non-EHB claims as mentioned in federal instructions.
5	Please explain why the trends do not include an induced utilization component.	The minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend.
6	Please show a numerical development of the assumed annual trend used in projecting the experience period claims to the projected 2018 coverage year. Please include the trends based on historical experience for each benefit category for years 2014, 2015, 2016, and 2017 (year to date). We realize 2017 trends will be partially based on estimated claim costs.	Please see "HO SG Work for Responses to Objection Letter 06-23-17" for the requested data.
7	Please provide numerical support and explain the methodology used to determine the morbidity adjustment factor equal to 0.940	A narrative discussing the rationale behind the morbidity adjustment used in this filing is provided in the "Index Rate" section of the PA Actuarial Memorandum. This factor is intended to account for the fact that healthier members have enrolled in this company's ACA-compliant plans with each passing year. Recent times have seen this change occur more rapidly than in prior years, so we estimated that the morbidity of the insured population would decrease by approximately 6%.
8	The following questions are related to the demographic adjustment equal to 1.000 and age calibration factor equal to 1.497: a) It is stated in the Actuarial Memorandum that no demographic adjustment was made in developing the Index Rate due to the stability of the population. Please provide additional clarification regarding why a demographic adjustment was not made to the Index Rate even through an age calibration factor (1.497) greater than the average premium factor during the 2016 experience period (1.45) is being reflected.	The change in age calibration factor from the experience period to the projection period was small enough that the insured population is considered to be stable, and no additional adjustment for demographics was deemed necessary. Also, the calibration performed using the age calibration factor already account for changes in the age of the underlying population from year to year, meaning that an adjustment for demographics is not necessary simply due to a change in the age calibration factor.
9	We have the following questions regarding the risk adjustment PMPM value: a) Please demonstrate quantitatively how the 0.86 factor which is to be applied to the statewide average premium in the 2018 risk adjustment calculation was taken into account in developing the projected risk adjustment transfer shown in the URRT Wksh 1 Section II of $12.67 PMPM.	In early May, PID released 2016 risk adjustment transfer payment estimates for each carrier in each market. These estimates were used as the basis for calculating the risk adjustment PMPM for the projection period. It was assumed that this estimate was already calculated on a claims basis, which would eliminate the need to include the 0.86 factor in the calculations.
10	Please provide the numerical development of the Exchange User Fee of $0.20 PMPM as entered in Table 5. Be sure to show how this connects to the 0.04% member weighted average user fee as stated in the Actuarial Memorandum.	The Exchange User Fee listed in Table 5 has been removed from rate development due to the announcement made just prior to the submission deadline for this filing that Healthcare.gov will no longer support small group enrollment.
11	Please provide the numerical development of the projected 2018 MLR that shows compliance with the 80% minimum MLR.	Please see "HO SG Work for Responses to Objection Letter 06-23-17" for the calculation of the projected MLR using the prescribed methodology in PPACA.

12	The sum of the rate increase components shown in Table 8 line H does not approximate line A as indicated by the label. Please explain why this value is so different from the change in Calibrated Plan Adjusted Index Rate.	This disparity arises from various inconsistencies in Table 8. Network adjustments are accounted for twice and change in age calibration factors from year to year are not accounted for in row H of Table 8, which is being compared to the change in the Calibrated Plan Adjusted Index Rate.
13	Please explain the methodology used and show numerical support for the area factors assumed in Table 13.	Please see "HO SG Work for Responses to Objection Letter 06-23-17" for the development of each geographical factor.
14	Please show the development of the average commission and circumstances in which broker commissions will be paid and if they will vary based on geographic location, metal level, plan, open enrollment vs SEP enrollment, etc. Additionally, the current and 2018 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.	Commissions are paid under all circumstances and in all geographic locations. They will not vary by metal level or plan. Commissions are not paid for Special Enrollment Periods. Please see the "Administrative Expenses" section of the unredacted PA Actuarial Memorandum for a discussion on commissions and the calculation of the average commission. The current and 2018 broker agreement is located in the Supporting Documentation section in SERFF.
15	The average age in Table 1 should be the true age based on single year bands distribution. If not, please revise Table 1.	The average ages have been revised in Table 1 and the memoranda.
16	Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.	This has been confirmed.
17	The cover letter shows an NAIC # of 22312. The NAIC # for the captioned company is 15345. Please revise.	This has been revised in the cover letter, bulletin information, and memoranda.
18	Confirm HIOS submission and provide tracking number.	The submission has been confirmed. The tracking number is 16322-963015710651495432.
19	With the announcement that Healthcare.gov will no longer support small group enrollment, why has UPMC indicated on exchange?	This announcement was made a few days prior to the submission deadline for this filing. The filing was not updated to account for this due to the last minute nature of the announcement.
20	Please remove the exchange user fee in cell 32 of Table 5. As noted in the question above, the CMS will no longer support small group enrollment. As such, the fee is not applicable. Please remove.	This fee has been removed from rate development.
21	Table 6, cell B54, indicates the PCORI fee is $164,023.40. The 2018 PCORI pmpm amount should be $0.20. Please revise. Also review the percent of premium in cell C54 to ensure the yielding amount is consistent with $0.20.	The value listed in Table 6 has been revised. We can confirm that the percent of premium in cell C54 is consistent with $0.20 PMPM.
22	Table 6 cell C63 indicates the Single Risk Pool pmpm is $433.48, while the Single risk pool in the URRT in cell V43 indicates $435.49. Please reconcile.	This disparity arises from differences in the way trend is implemented in Table 3 versus the URRT. Table 3 uses weights for each benefit category when calculating the total applied trend projection factor. These weights were determined using the proportion of allowed claims that corresponded to each benefit category during the experience period. Since the trend adjustment for each benefit category is lumped into one factor that is applied to the total allowed EHB claims in Table 5 to account for the entire two-year period between the experience and projection periods, the weights implicitly remain static on an annual basis within this factor. However, the URRT applies the trend adjustment to the allowed claims and utilization for each benefit category separately. Handling the calculation in this manner allows the implicit weights to remain dynamic for each year and change as the allowed claims and utilization values are adjusted. The marginal error that arises from these two different styles of trend implementation propagates all the way to the values mentioned in this question.
23	Worksheet II cell G29 projected product increase indicate -4.66% rate increase, while Department exhibits from Tables 10 and Table 11 shows 4.37% and 4.2%, respectively. Please reconcile.	The rate change % in the worksheet II cell G29 uses the consumer adjusted premium rate to account for the current distribution of enrollment by age, geographic area, and tobacco status per the federal instructions. The PID Table 10 and 11 shows the rate increase between the plan adjusted index rates which don't account for these adjustments. Therefore, these values should be different, especially with the change in the age factors from 2017 to 2018.
24	In Table 4b cells C34-L45 are not populated. Please explain.	The companies associated with the manual data used in this filing did not have any business in the Small Group market during 2014.
25	Please show the development of the Health Insurance Industry Fee of 3.38% as shown in Table 6 cell C57.	Our actual insurer's tax for 2016 was 1.7% of our total revenue. According to the IRS website, the 2018 overall applicable amount ($14,300,000,000) is set to be about 126.5 % of the 2016 overall applicable amount ($11,300,000,000). We adjusted our 2016 rate of 1.7% by the same 126.5%. We then divided that value by 65% to account for the 35% corporate tax which ended up 3.38%.

26	Please explain why UPMC is pricing for a -2% profit.	As mentioned in the "Profit/Contingency" section of the PA Actuarial Memorandum, this profit margin was used to lessen the likelihood of owing MLR rebates for 2018 or 2019. With the everchanging population enrolled in ACA plans, predicting their costs and premiums is more difficult. The current MLR for our ACA product is comfortably above the minimum, but the entire small group block, including grandmothered plans, must be used to determine whether rebates are owed. While grandmothered plans are allowed a 15% range from the filed methodology when setting the rate, ACA rates do not have this flexibility. They are also filed well in advance and thus more difficult to update should actual trends turn out different than expected. Lowering the rate provides this missing flexibility, despite the negative profit margin. We do not anticipate owing rebates even with a 0% profit margin, but the negative value make it more likely that this will not occur.
27	Regarding the Historical Experience section of the PA AM, you indicate that the data in “Table 4b belongs to the entire block of commercial business and was the basis of trend development”. Please provide additional detail regarding the market, product, company, etc. of the source data.	The data includes both small and large groups, for all line of products (HMO, EPO, and PPO) in Health Options and Health Coverage.
28	Please indicate if the Company included an adjustment to account for the regulation that prohibits charging for more than three children per family, and, if applicable, demonstrate how the adjustment was derived and where it is included in the filing.	No adjustment was made to account for this regulation.
29	The PA AM indicates that 1.50 (1.49 is calculated) is the Average Age Factor and the weighted average of this population is 36. Per CMS instructions, once the average factor is determined, the nearest age on HHS Age Curve should be selected as the average age. Thus, the nearest age band to 1.497 is age 46. Please review and revise. Also, the Part III AM indicates an average age factor of 1.48. Please revise for consistency.	This has been revised in table 1 and the PA Actuarial Memorandum. The 1.48 factor references in the Part III Memorandum was calculated using a separate calculation where early 2017 data was used to calculate an average age factor. This factor was not used in 2018 rate development.
30	What is the basis for the projected age distribution used in developing the average age?	The projected age distribution was developed using the current (Feb 2017) age distribution.
31	Table 10 average benefit richness factor in row 15 does not equal 1.00. Quantitatively show how the average factor in cell L15 has been normalized.	The benefit richness factors were normalized using projected enrollment as opposed to the mapped enrollment displayed in table 10. The normalization is shown in exhibit 4b of the Supporting Exhibits.
32	In the Rate Development and Change section of the PA AM you indicate that quarterly trended rates will not be generated for this filing. However, Table 11 shows increasing rates in the 2, 3 and 4 quarters. Please review and revise or explain. The Department notes that Table 5A row 31 for quarters 2, 3 and 4 can be overwritten if the default months of trend are not applicable. In instances where there is no quarterly trend, these months should be overwritten with zeros. Please revise.	This was revised by changing the default months of trend listed in Table 5A.

Question 6

All fully-insured excluding SHOP members (Used for SG)

Completion Factor for Jan-May 2017: 0.832068293

Question 11

Projected Paid Claims	Projected Net Amount of Risk Adjustment	Projected Quality Improvement Initiatives	Projected Taxes & Fees	Projected Premium	Loss Ratio
$ 307,615,431.63	$ 10,352,107.69	$ 3,049,765.81	$ 12,559,346.00	$ 346,039,189.99	**90.4%**

Question 13

Rating Area 3

The contracted rate in the Rating Area 3 is	67.2%	higher than the rating areas 1,2,4,5,6 for the	Inpatient	services which make up	23.8%	of the total claims
The contracted rate in the Rating Area 3 is	67.0%	higher than the rating areas 1,2,4,5,6 for the	Outpatient	services which make up	14.8%	of the total claims
The contracted rate in the Rating Area 3 is	3.0%	higher than the rating areas 1,2,4,5,6 for the	Physician	services which make up	14.7%	of the total claims

Rating Area 3 Factor:	**1.263**

Rating Area 7

The contracted rate in the Rating Area 3 is	89.2%	higher than the rating areas 1,2,4,5,6 for the	Inpatient	services which make up	23.8%	of the total claims
The contracted rate in the Rating Area 3 is	99.0%	higher than the rating areas 1,2,4,5,6 for the	Outpatient	services which make up	14.8%	of the total claims
The contracted rate in the Rating Area 3 is	5.0%	higher than the rating areas 1,2,4,5,6 for the	Physician	services which make up	14.7%	of the total claims

Rating Area 7 Factor:	**1.366**

Questions and Responses submitted 7/5/17

Question	Comment/Request	Response
1	Please show the development of the average av	Please refer to the file 'Average AV Exhibit'.
2	Please show the development of the broker comission fee	The projected broker fee is $12.02 pmpm.
3	Update the PCORI amount	This has been updated.
4	Update the membership to ACA members only on the cover page	This has been updated. We also updated the value on the bulletin info, rate change request summary, and part II justification.
5	The Projected Index Rate calculated in Table 5 is $446.63 and on the URRT shows as 449.95. Please explain the discrepancy.	The manul projected index rate has been fixed and updated in the URRT to $448.11 which is closer to the value in the PID table 5. As mentioned before, the remaining difference is due to the fact that the index rate calculated in Table 5 only includes EHB claims, per the guidance provided by PID whereas the latter value includes both EHB and non-EHB claims as mentioned in federal instructions.

Average AV Exhibit

Plan ID	Projected Membership	Actuarial Value from Table 10	Weighted Average of Actuarial Values

Questions and Responses submitted 7/14/17

Question	Comment/Request	Response
1	The following questions are related to your response to Question 8: a) Please confirm whether the average premium factor equal to 1.45 based on the 2016 manual rate experience was developed using the 2018 federal age factors or the 2017 federal age factors. i.If it is based on the 2017 federal age factors, please provide what the average premium factor would have been if using the 2018 federal age factors. ii.If it is based on the 2018 federal age factors, please clarify what is meant in your response by the statement that "the calibration performed using the age calibration factor already accounts for the changes in the age of the underlying population from year to year." It is our expectation that if the projected Index Rate reflects cost levels associated with an average age factor of 1.45 (due to using the manual experience with no demographic adjustment), but the Plan Adjusted Index Rates are divided by an age calibration factor equal to 1.497 (based on the 2017 membership) the resulting rates will be approximately 3.1% too low (i.e. 1.45/1.497 – 1), all else equal.	a. The 1.45 age factor was developed using the 2017 federal age factors. i. When using 2018 federal age factors, this factor is 1.49. ii. The 1.497 factor used in rate development was calculated using the 2018 federal age factors along with projected membership for each age band, for which current enrollment was the basis. Furthermore, the HHS age curve does not necessarily reflect the difference in costs for different age groups. We mainly used the average age factor as a general comparison measure to see if there was a drastic change from one year to another that would require additional adjustments.
2	The following questions are related to your response to Question 9 regarding the risk adjustment PMPM value: a) It is noted that the 2016 risk transfer payment estimates released by PID in early May were assumed to be on a claims basis and so the 0.86 factor was not accounted for. Please describe why this was assumed to be the case. b) Based on your response, it is our understanding that anticipated changes to the statewide average premium between 2016 and 2018 were not considered in developing the projected risk adjustment transfer payment equal to $12.67 PMPM. Please confirm that this understanding is correct. If it is not correct, please clarify. c) Please provide the actual risk adjustment transfer payment PMPM per the CMS risk adjustment transfer report for the 2016 benefit year, which was released on 6/30/2017.	a. The PID estimate that was released didn't specify that the 0.86 was unaccounted for. We assumed that was the complete estimated Risk Adjustment Transfer Amount for our company. b. Yes, we confirm that is correct. c. The actual payment amount was $28.99 pmpm.
3	Per your response to Question 28, no adjustment was made to account for the regulation that prohibits charging for more than three dependents under the age of 21 per family. Is the reason for not applying an adjustment based on analysis by the company showing that the impact would be minimal? Or is there another reason for not applying the adjustment?	No adjustment was made because the impact of this regulation on projected costs would be minimal.
4	Regarding your response to question 5 of 6/30/2017: The projected non-EHB PMPM as per Table 5 of AM Exhibits is $1.16 and the URRT differs from the Table 5 calculation by $1.48 which you have attributed to non-EHB PMPM. Please explain the discrepancy.	This issue has been addressed and fixed in the URRT.
5	The Actuarial Memorandum indicates that average commission is $20.39. Please provide the numerical development of the Agent/Broker Fees and Commission of 2.75% shown in Table 6 of the AM exhibits.	We displayed the average commission on a contract level $20.39 in our memorandum because that is how the commissions are paid per agreement. However, for pricing purposes we used the average commission on a member level which is $11.38. We then increased this value by 1.3% our current % of on-exchange members to $11.53 to account for all members moving to off-exchange in 2018. This is 2.73% of the projected required revenue of $422.38. The value is slightly different from 2.75% due to a rounding error.
6	In response to question 15, you indicate that Table 1 has been revised. Please confirm that the average age in Table 1 is the true average age and not the average age based on the default age curve.	In question 21 of our initial correspondence with PID for our Health Coverage Small Group rate filing, we were instructed, "per CMS instructions, once the average factor is determined, the nearest age on HHS Age Curve should be selected as the average age." This revision has been made in Table 1 to ensure consistency across all filings.
7	The exchange intentions for this filing has been modified to off exchange only. Please confirm that all the filing narrative and exhibits and the associated binder have also been modified to the exchange intent you decide upon.	All documents have been updated to match our exchange intentions.
8	Regarding your response to Question 23 on Health Insurance Industry Fee of 3.38%. Please provide the numerical calculation. As per my calculation the fee is 3.31% (=0.017*1.265/0.65).	The 0.017 was the rounded actual of our insurer's tax for 2016. The unrounded value is 0.01738, and 0.01738*1.265/0.65 is 3.38%

9	If you wish to make adjustments to the projected RA amount included in this rate filing and the URRT, based on the June 30, 2017 Summary Report on Transitional Reinsurance Payments and Permanent Risk Adjustment Transfers, please do so in this submission. Provide narrative and an Excel spreadsheet demonstrating the development and assumptions.	No revision will be made since the estimate used for projected 2016 risk adjustment was nearly identical to the actual value.
10	Please note that all revisions must be reflected in this resubmission. The Department shall not allow any changes to the rates after this submission.	All revisions are reflected in this submission.
11	Please provide a PDF file for public review (Public Rate Filing PDF) in SERFF to show the updated rate request. The following updated supporting items must be included: • Cover Letter • Rate Change Request Summary (Attachment 1) • Part 1 - Unified Rate Review Template (URRT) • Part II – Consumer Friendly Justification • Part III – Federal Actuarial Memorandum (redacted) • PA Actuarial Memorandum (redacted) • PA Actuarial Memorandum Rate Exhibits • PA Plan Design Summary and Rate Tables • Federal Rates Templates • Service Area Maps • Correspondence – Q&A's Please remain cognizant of the limited redactions as outlined on pages 3 and 4 of the 2018 Guidance. Only those specific items may be redacted. Since AV screenshots and commission schedules are proprietary, they should not be included in this public PDF. Additionally, please ensure that documents and spreadsheets are internally consistent and that the Excel exhibit with formula corrections emailed to you on June 6, 2017 is used. The deadline for the revised PDF is COB July 18, 2017.	We will upload the final public rate filing pdf by 07/18/2017 as instructed.
