Part II of the Preliminary Justification First Priority Life Insurance Company – Individual Market

Scope and Range:

First Priority Life Insurance Company (FPLIC) is requesting an average rate increase of 45.8% for the 2017 ACA-qualifying individual products with effective dates from January 1, 2017 to December 31, 2017. This is projected to affect 833 members.

These premium rates are being set at a level that is required to adequately cover rising costs, primarily due to increasing use of medical and pharmacy services in the Individual market, the phase-out of the federal reinsurance program, and higher utilization of out-of-area providers.

Historical Financial Experience:

FPLIC incurred a substantial underwriting loss in its Individual ACA programs in 2015 and will again in 2016. This loss is net of the expected risk adjustment and federal reinsurance programs.

Change in Medical Service Costs:

The projected average cost of medical care for the projected population is expected to increase due to general medical and pharmacy cost and use trend, and increased use of out-of-area providers. The increase will emerge in utilization and average cost per service, and is spread across all types of services.

Change in Benefits and Cost Sharing:

The non-Essential Health Benefit adult vision was removed from the 2017 plans. A few minor benefits were added to better align with the 2017 Benchmark Plan. These additional benefits have minimal impact on the rates. Some cost sharing parameters were changed in order to maintain compliance with Federal AV requirements. Additionally, some out of pocket maximum parameters were changed to keep up with the rising cost of health care. These out of pocket maximum changes also aided in mitigating the rate increase.

Administrative Costs and Anticipated Operating Results:

Overall, administrative costs as a percentage of premium in 2017 are similar to 2016. The anticipated operating results are not excessive or unreasonable. In accordance with regulations, the projected medical loss ratio is over 80%.

I. General Information

Document Overview

This document contains the Part III Actuarial Memorandum for First Priority Life Insurance Company's (FPLIC) individual block of business revised rate filing submitted 9/13/2016, for products with an effective date of January 1, 2017. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I Unified Rate Review Template, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the State of Pennsylvania Department of Insurance, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of FPLIC's rate filing. However, we recognize that this certification may become a public document. Milliman makes no representations or warranties regarding the contents of this letter to third parties. Likewise, third parties are instructed that they are to place no reliance upon this actuarial memorandum would result in the creation of any duty or liability under any theory of law by FPLIC or Milliman.

The results are actuarial projections. Actual experience is likely to differ for a number of reasons, including population changes, claims experience, and random deviations from assumptions.

I.1 Company Identifying Information:

- Company Legal Name: First Priority Life Insurance Company
- State: The State of Pennsylvania has regulatory authority over these policies.
- HIOS Issuer ID: 55957
- Market: Individual
- Effective Date: January 1, 2017

I.2 Company Contact Information:

- Primary Contact Name:
- Primary Contact Telephone Number:
- Primary Contact Email Address:

II. Proposed Rate Increase(s)

For all rate increases by plan see the 'Cum'tive Rate Change % (over 12 mos prior)' found in Worksheet 2 Row 26 of the URRT.

FPLIC is terminating all plans in the Individual market, with the exception of "myBlue Access \$6,000." Therefore, the only 2016-2017 rate increase shown in the URRT is for this plan.

The primary drivers of the rate increase is deterioration in base year experience (relative to risk score and risk transfer) and the change in parameters of the Federal Reinsurance Program.

III. Experience Period Premium and Claims

III.1 Paid through Date:

Experience Period claims were based on incurred calendar year 2015, paid through January 2016. This experience reflects only Affordable Care Act compliant plans.

III.2 Premiums (net of MLR Rebate) in Experience Period:

The premiums shown for the experience period were based on calendar 2015 actual revenues.

Based on preliminary information for calendar year 2015, no MLR rebates are anticipated to be refunded to enrollees. Therefore, we did not include an adjustment for MLR rebates in the 2015 premium amounts.

III.3 Allowed and Paid Claims Incurred During the Experience Period:

- Historical Experience: We chose FPLIC's current experience for the individual block of business for the period January 1, 2015 through December 31, 2015, with claims paid through January, 2016 as the basis for the 2017 projected individual market pricing.
- Claims Incurred During the 12-month Experience Period: Worksheet 1, Section I shows our best estimate of the amount of claims that were incurred during the 12-month experience period for FPLIC's individual book-of-business. This section includes:
 - The amount of claims which were processed through Company's claims system,
 - Claims processed outside of the FPLICs claims system, and
 - Our best estimate of claims incurred but not paid as of the paid through date stated above.

- Method for Determining Allowed Claims: For non-capitated claims, the allowed charges are summarized from FPLIC's detailed claim-level historical data. This experience includes 2015 claims for Affordable Care Act compliant business. For capitated and other off-system claims, historical capitations and experience were tabulated and added to the claims.
- Paid Claims: We also summarized the paid claims from detailed member records. The paid-to-allowed ratio for the experience period reflects the 2015 plan designs chosen by each member.
- Incurred but Not Paid (IBNR) Claims Estimate: FPLIC is using a completion factor of 0.972 to include IBNR claims in allowed charges. The IBNR completion factor was developed using the corporate reserving system for Highmark DE's individual business. We applied it equally to both paid and allowed total claims (as a change to utilization) to complete the experience.

IV. Benefit Categories

Historical cost and utilization data was summarized at the defined benefit categories included in Worksheet 1, Section II of the URRT. This data was used to allocate total claims into its components on the URRT.

The data provided in this section closely adheres to the preferred definitions of the Benefit Categories included in the URRT instructions, including the "Other Medical" category. The "Other Medical" category units reflect visits for PDN/home health, trips for ambulance and procedures for DME/prosthetics.

V. Projection Factors

V.1 Changes in the Morbidity of the Population Insured

We applied an adjustment of approximately 0% to reflect the anticipated changes in the average morbidity of the covered population (beyond allowable rating factors). This morbidity adjustment reflects that FPLIC offered all metal level options in the 2015 experience year but will only be offering a Bronze plan in 2017, and additional risks due to recent market dynamics.

V.2 Changes in Demographics

We project that the average rating factor (age, tobacco load and area combined) will decrease by about 1.6% due to the change in the population. The projected demographics are based on current 2016 FPLIC experience.

V.3 Trend Factors (cost/utilization)

This development of the CY2017 rates reflects an annual trend rate of 12.5% (5.0% cost, 7.1% utilization). These trends reflect FPLIC's expectations regarding increases in in-network contractual reimbursement. The annual trend estimates include the impact of trends in both projected in-network and out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The trend represents a blended average for all types of service and is applied to the aggregate experience for pricing. These trends represent assumed community-wide expectations. Claim variations due to the specific projected enrolled population in this single risk pool are reflected in the morbidity adjustment.

We reflected anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period: -4.6%.

VI. Credibility Manual Rate Development

VI. 1 Source and Appropriateness of Experience Data Used

FPLIC's individual experience is fully credible. No manual rate is developed or used in this projection. The Credibility Manual section of the URRT has been populated with zeroes to allow for finalization of the URRT Workbook.

VI. 1 Changes in Benefits

The following benefits were added to comply with the new state benchmark:

- Hospice respite care of 7 days per six consecutive months
- Artificial Insemination and related medication
- Addition of visit limits on Habilitative Services

No explicit adjustments were made to the experience to account for these benefits.

Additionally, FPLIC is removing its Non-EHB Adult Dental and Adult Vision benefits.

VII. Credibility of Experience

The experience is from FPLIC's individual book of business in 2015. It is large enough to be fully credible. Our results are based 100% on the experience rate, as adjusted.

VIII. Paid to Allowed Ratio

The paid to allowed ratio of 0.662 is the 2017 plan level paid to allowed ratio for the "myBlue Access \$6,000" plan. This paid to allowed factor was developed using the Milliman Managed Care Rating Model[®], which contains detailed benefit pricing by service category.

IX. Risk Adjustment and Reinsurance

IX.1 Projected Risk Adjustments PMPM:

The estimated average risk score for FPLIC's projected 2017 population was developed by using FPLIC's 2015 claim diagnoses and the updated risk adjustment coefficients as finalized in the Notice of Benefit and Payment Parameters for 2017. Similarly, allowable rating factors, actuarial value factors, and induced demand factors were estimated for FPLIC based upon its projected 2017 population.

We estimated the statewide average risk transfer factors based on current market assumptions with adjustments for known changes such as the new model coefficients for 2017. We estimated the statewide average premium using current market premium assumptions with adjustments for anticipated rate changes for 2017.

The actual calculation of the risk transfer followed the risk transfer methodology as prescribed.

The analysis resulted in FPLIC paying into the risk adjuster pool. This value is reflected in worksheet 1 net of the risk adjuster fee (\$0.13 PMPM) consistent with the single risk pool regulations.

IX.2 Projected ACA Reinsurance Recoveries Net of Reinsurance:

The Federal reinsurance program will be terminated prior to the start of plan year 2017.

X. Non-Benefit Expenses and Profit & Risk

X.1 Administrative Expense Load:

These revised rates reflect internal administrative costs including commissions and quality improvement administrative expenses. This cost was developed based on standard expense allocation methods.

X.2 Profit (or Contribution to Surplus) & Risk Margin:

These revised rates reflect a 0% contribution to surplus for all products and plans.

X.3 Taxes and Fees:

The following fees were added:

- \$0.20 Per Member Per Month for the Patient Centered Outcomes Research Fee.
- 0.0% for the Health Insurance Provider Fee
- 0% Exchange Fee

XI. Projected Loss Ratio

The anticipated medical loss ratio is about 90.1% relative to total premium less taxes and fees. This loss ratio is calculated consistently with the federally prescribed MLR methodology.

XII. Single Risk Pool

As described above the base experience used includes all FPLIC individual members in accordance with the Single Risk Pool regulations. The projected membership and their corresponding premiums and claims only include those members who will be enrolled in a fully ACA-compliant plan in 2017.

XIII. Index Rate

Please see Exhibit I for the numerical development of the projected index rate. The index rates as shown on Worksheet 1 of the URRT are simply the average allowed claims for the Essential Health Benefits for the experience and projected populations, respectively, for FPLIC. For the experience period, only non-grandfathered plans are included. For the projection period Index Rate, there are no benefits in addition to Essential Health Benefits. The Index Rate is not adjusted for reinsurance or risk adjustment programs or any other fee.

XIV. Market Adjusted Index Rate

Please see Exhibit I for a numerical demonstration of the Market Adjusted Index Rate development. The Market Adjusted Index Rate is the Index Rate further adjusted for risk adjustment, reinsurance, and the exchange fee. The Risk Adjustment factor is developed by adding the risk adjustment user fee PMPM to incurred claims and dividing by the projected incurred claims. The Federal Reinsurance Program factor is 1.0 because the program will end prior to 2017. The Exchange User Fee is \$0 because the plan is offered off-exchange only. These adjustments were developed as factors in accordance with the Part III instructions.

XV. Plan Adjusted Index Rates

A Plan Adjusted Index Rate is developed by taking the Market Adjusted Index Rate and adding the plan's actuarial value, relative benefit richness, any non EHB benefits, and retention. Please see Exhibit II for the development of the Plan Adjusted Index Rate. Only EHB benefits are offered.

XVI. Calibration

XVI.1 Age Curve Calibration:

The projected weighted average age factor for billable members is 1.758. This factor is calculated by dividing the all members age factor of 1.760 by the ratio of all members to billable members (1.001). The Plan Adjusted Index Rate represents the rate for an average member with an age factor of 1.758. Please note that no member will pay these rates because the age factor of 1.758 is not found on the HHS Age Curve. It only represents the average age factor of the projected population. The nearest age to that factor is for age 50, which has a factor of 1.786. Please see Exhibit I for the development of the calibration factor.

XVI.2 Geographic Factor Calibration:

FPLIC's service area is entirely contained within one rating area. Therefore, no calibration is necessary.

XVII. Consumer Adjusted Premium Rate Development

The plan adjusted index rate represents the rate for a non-smoker average age and average geographic member. Multiplying by the Combined Calibration Factor found in Exhibit I results in the value for a 50 year old non-smoker in a 1.0 geographical area. The standard HHS Age Curve along with the filed tobacco factors and geography factors can be used to calculate any rate found in the QHP rate template.

XVIII. AV Metal Values

The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based on the Federal AV Calculator. If any adjustments were required outside of the AV Calculator, appropriate certification has been provided to CMS through the QHP application process.

XIX. AV Pricing Values

Please see Exhibit II for the portion of the AV pricing value that is attributable to each of the allowable modifiers. The utilization due to differences in cost sharing is based on the factors adopted by the risk adjustment methodology. No differences due to health status are in these adjustments.

XX. Membership Projections

Membership projections are based on FPLIC's early 2016 off-exchange enrollment in the "myBlue Access \$4,000" plan.

XXI. Terminated Plans and Products

All terminated plans are listed in Exhibit III.

XXII. Plan Type

The Plan types listed in Worksheet 2, Section I of the Part I Unified Rate Review Template describe Highmark DE's plans adequately. No differences are needed.

XXIII. Warning Alerts

The following validation warnings occurred when finalizing the URRT workbook:

• Worksheet 2, Line 57:This represents the difference between the average Plan Adjusted Index Rate of the experience period on Worksheet 2 and the experience period premium on Worksheet 1. The Plan Adjusted Index Rates are based on member mix by age and area assumed in the 2015 rate filing, and is compared to experience using the actual 2015 age/area distribution in Worksheet 1, which causes this mismatch.

XXIV. Actuarial Certification

I, am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared to accompany FPLIC's rate filing for the Pennsylvania individual market.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1)),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The allowable modifiers used to generate plan-level rates were:

- The actuarial value and cost-sharing design of the plan.
- The plan's provider network, delivery system characteristics, and utilization management practices.

- The benefits provided under the plan that are in addition to the essential health benefits. These estimated benefits were pooled with similar benefits within the single risk pool and the claims experience from those benefits was utilized to determine rate variations.
- Administrative costs, excluding Exchange user fees.
- With respect to catastrophic plans, the expected impact of the specific eligibility categories for those plans.

I certify that the per cent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

I certify that the benefits included in FPLIC's plan is substantially equivalent to the Essential Health Benefits (EHBs) in the State of Pennsylvania's benchmark plan. I certify that any benefit substitutions are:

- Actuarially equivalent to the benefits being replaced,
- Are made within only the same essential health benefit category,
- Are based on a standardized plan population,
- Are determined regardless of cost-sharing,
- Are not prescription drug benefits, and
- Are based on an analysis performed in accordance with generally accepted actuarial principles and methodologies.

I certify that the geographic rating reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

The Part I Unified Rate Review Template does not demonstrate the process used by Milliman to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

Signed:

Date: September 13, 2016

I, certify that the AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based on the Federal AV Calculator. If any adjustments were required outside of the AV Calculator, appropriate certification has been provided to CMS through the QHP application process.

Signed:

Ms. Johanna Fabian-Marks, Director Bureau of Life, Accident & Health Insurance Office of Insurance Product Regulation and Market Enforcement Commonwealth of Pennsylvania Insurance Department 1311 Strawberry Square Harrisburg, PA 17120

Re: First Priority Life Insurance (FPLIC) Filing # 1A-DP-16-FPLIC (SERFF # HGHM-130536965) 2017 Individual Market Rates

Dear Ms. Fabian-Marks:

Pursuant to the conversation held with the Department on September 8, 2016, FPLIC is submitting a modified rate request.

FPLIC does not believe that some of the modifications requested by the Department are consistent with legal or historical interpretation or practice of both the company and the Department.

The Actuarial Memorandum has been updated to reflect the changes.

Should you have any questions regarding the attached filing, please feel free to contact me at (717) 302-2143 or via e-mail at: jeffrey.scheib@highmark.com.

Sincerely,

Jeffrey Scheib, ASA, MAAA Vice President, Actuarial Services

Highmark Inc.

cc: Greg Devine, Esq.

Frank Haver

Tija Hilton-Phillips, Esq.

William Sarniak

Actuarial Memorandum

1. Basic Information and Data

A. Company Information

- Company Name & NAIC #: First Priority Life Insurance Company, NAIC #60147 ("Company")
- 2. Market (Individual or Small Group): Individual ("Market")
- 3. On or Off Exchange: This Company sells Off Exchange in the Individual Market
- 4. Effective date of coverage: January 1, 2017
- 5. Average rate change requested: 45.8% increase
- 6. Range of rate change requested:

FPLIC will offer only one plan in 2017. This rate increase for this plan is 45.8%.

- 7. Product(s): PPO
- 8. Rating Areas: Rating Area 3
- 9. Metal Levels and Catastrophic Plans: This Company sells the following Metal Levels of coverage in the Individual Market: Bronze
- 10. Current number of covered lives and of policyholders: 833 covered lives and 608 policyholders in the renewing plan
- 11. Number of plans offered in 2017: 1

Inclusion of premium rates in this filing for a given offering should not be construed to mean that the offering will ultimately be made available for sale in the market. Final offering decisions will be made consistent with and within the timelines set forth in CMS rules and/or ACA regulations.

12. Corresponding contract form #, SERFF and Binder ID#s:

The corresponding SERFF binder number is HGHM-PA17-125061874 affecting the following Highmark products and forms:

Product Name / Type	Contract Form & SERFF#			
myBl ue Access	Contract Form #: FP-1-I-ACCESS-1/1/17; SERFF			
	Form Filing #: HGHM-130536967			

13. HIOS Issuer ID # and submission tracking #: HIOS Issuer ID #55957, FPLIC Filing #1A-DP-16-FPLIC; SERFF Rate Filing # HGHM-130536965.

B. Rate History and Proposed Variations in Rate Changes

The three most recent rate changes in Pennsylvania for the Company are as follows:

Year	Avg. Increase	SERFF ID#
2016	21.5%	BCNP-130071834
2015	6.9%	BCNP-129632010
2014	n/a – initial ACA rate filing	BCNP-129018017

For 2017, only one plan will be sold.

C. Average Rate Change

The SERFF Rate Review Detail Screen presents the revised "percent rate change requested" as 45.8%. This value is consistent with Table 10 cell AC13.

For comparison, the change in 21-year-old non-tobacco premium PMPM calculated in Table 11, cell AZ13, is the same 45.8% increase.

D. Membership Count

Please see Table 1 for the age breakdown and total number of members for the periods shown. Note that the February 2016 membership count differs from the February members for renewing plans shown in Table 10.

E. Benefit Changes

Benefit changes were required because of the new Actuarial Value (AV) calculator released for 2017 effective dates. The plan changes were mostly required so that the plans remained within the defined metal level AV requirements, and were enacted by increasing the deductible and the maximum out of pocket level.

The following were changes to the Essential Health Benefits due to the 2017 Benchmark Plan:

- Hospice Benefit addition of respite care for 7 days per six months
- Coverage for Artificial Insemination, including specific related medications
- Added visits for Habilitative Therapy Services

In addition, the non-EHB Adult Dental and Adult Vision Eye exam were removed from plan coverage.

The screenshots from the HHS AV calculator, showing the plan benefits and the resulting actuarial value, are in Attachment A. Also the PA Plan Design Summary and Rate Tables with the HIOS Plan IDs are submitted in SERFF Rate/Rule Schedule Tab.

F. Experience Period Claims and Premium

Please see Table 2 for the experience period data for the most recent calendar year, for the Company and Market. The experience period paid claims data represents the 2015 calendar year results for all non-grandfathered policies (including transitional policies) in the single risk pool, with run out through January 2016. This data is consistent with the data reported in Section I of Worksheet I of the URRT (see below commentary).

The components of this exhibit were developed as follows:

- The Earned Premium represents actual revenues earned in the experience period. Unlike the Premiums shown in the URRT, the Earned Premiums in Table 2 have not been adjusted for anticipated risk adjustment transfer payments. The sum of the Earned Premium and Estimated Risk Adjustment from Table 2 total the Premiums in the URRT.
- Incurred Claims represent claims paid by FPLIC net of expected CSR recoveries. Note that the URRT includes capitated services and is net of Rx Rebates. Those values are not included here as they are listed as separate items.
- The Allowed Claims represent our best estimate of the total claims prior to member cost sharing incurred during the experience period. The Allowed Claims include:
 - One month of run out from the end of the experience period,
 - Claims processed outside of the Company's claims system (e.g., claim settlement costs), and
 - Our best estimate of claims incurred but not paid as of the end of the run out period.

Note that the Incurred Claims and Allowed Claims presented in the URRT are net of the Prescription Drug Rebates, while Table 2 has the Prescription Drug Rebates separately identified.

• There are no non-EHB benefits or costs in the experience period.

- Prescription Drug Rebates are used to reduce the level of Incurred Claims in the experience period.
- The Estimated Risk Adjustment represents our best estimate of the year end risk adjustment transfer payment that the Company will incur based on the results in the experience period. This amount is developed based on an analysis of Company data (risk scores as defined in the HHS Notice of Benefit and Payment Parameters, as well as other risk transfer formula components), and an estimate as to the Market-wide risk transfer component profile. This Market-wide profile is developed from available Market data, including prior years' risk adjustment transfer results, publicly available data (such as MLR reports), and outside expertise from actuarial consultants.

G. Credibility of Data

The experience period data for this Company is large enough to be fully credible. The results are based 100% on the experience period data, adjusted as described herein.

H. Trend Identification

Table 3 identifies the proposed annual medical and prescription drug allowed claims cost and utilization trends. The underlying total annual trend is 12.5%. The definitions of service categories, cost, and utilization in Table 3 are consistent with the URRT instructions. The numbers entered in the Cost and Utilization columns are consistent with those entered in Worksheet I, Section 2 of the URRT, except as noted below.

The cost trends presented in Table 3 reflect the Company's expectations regarding increases in in-network contractual reimbursement, as well as projected out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The trend components represent a blended average for all types of service and are applied to the aggregate experience for pricing, and as such Table 2 shows the same trend components for each service category. Due to the significant change in the make-up of the ACA population in the first two years, the data included in table 4 was not used in the development of the projected trend. A separate regression study was developed by the Highmark valuation team that analyzed the ACA trend levels of cohorts of ACA members that were continuously enrolled in a significant portion of 2014 and through 2015 in the same metal level. The analysis took into consideration seasonality and removed outlier months. The resulting trend was compared to the group business and any industry available ACA data.

The URRT instructions require that anticipated changes in the average utilization of services due to differences in average cost sharing requirements from the experience period to the projection period be reflected in the Utilization trend component shown in Worksheet I, Section 2. Table 3 is populated consistent with this requirement.

I. Historical Experience

Table 4 presents the most recent 36 months (3 calendar years) of Company data with run-out through January 2016.

2. Rate Development & Change

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

The development of the Projected Index Rate, Projected Market-Adjusted Index Rate, and Projected Total Allowed Claims, shown in Table 5, closely follows that utilized the development presented in Worksheet 1 of the URRT, a discussion of which can be found in the Part III Actuarial Memorandum submitted in the Rate Filing Justification. Some of the items separately identified in Table 5 include:

- The Change in Demographics adjustment reflects the change in age and geography factors we expect from the experience period to the projection period.
- The Change in Network adjustment reflects the change in the allowed claims we anticipate due to network contracting changes between the experience period and the projection period.
- The Change in Benefits adjustment reflects the change in the EHB benefits (autism and pediatric benefits) we anticipate between the experience period and the projection period.
- The Change in Other adjustment reflects the change in the utilization of services due to benefit elections we anticipate between the experience period and the projection period.

B. Retention Items

Table 6 has been completed with the requested retention elements for the proposed rates for the rating period. The amounts presented separately sum to the total administrative expenses and taxes and fees presented in the rate development. Administrative costs reflect internal costs that the Company is projected to incur in the projected experience period, and are developed from standard expense allocation methods. Agent/broker fees and commissions reflect our anticipated costs for these items in the experience period.

Note the following regarding plan level retention items:

- These revised rates reflect a 0% risk/contribution to surplus margin for all products and plans.
- The Health Insurer Provider Fee is set at 0%.
- The administrative expenses are 10.7% of premium.
- 2.0% Pennsylvania Premium Tax was included.
- The \$0.20 PMPM PCORI fee was factored into the administrative expense percentage of premium.
- Expenses for Quality Improvement Initiatives are 1.29%.

C. Normalized Market-Adjusted Projected Allowed Total Claims

The normalization factors presented in Table 7 are each determined from the underlying membership demographics expected in the projected rating period. The 2016 values are pulled from the prior year's filing, while the 2017 values represent our projection for 2017 assumed in the 2017 rate development.

D. Components of Rate Change

Table 8 presents the components of change in the proposed 2017 Calibrated Plan Adjusted Index Rate (PMPM). The 2016 base period allowed claims as developed from the 2016 rate filing. Row H of Table 8 may differ from Row A due to the detailed breakdown of all the components of the increases in rows B through G not calculating exactly to the change in the calibrated plan adjusted index rate in Row A, which is the correct percentage change based on the rate development.

Table 9 presents the data elements supporting the calculations in Table 8.

3. Plan Rate Development

Table 10 showing the plan rate development has been completed following the instructions in the Health Insurance Rate Filing Guidance. This table shows the plan that the Company intends to offer in 2017, as well as plans recently discontinued from the 2016 portfolio for 2017 or the 2015 portfolio as members still exist in 2015 plans as of February 1, 2016. The calibrated plan adjusted index rates for 2017 and 2016, and all of the supporting factors, are calculated according to the instructions.

Note that the HHS Actuarial Value Calculator was unable to accommodate FPLIC's benefit design. The plans needing certification is marked in column I of Table 10. Screen shots of the AV calculations and the appropriate certifications are included in Attachment A.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 presents the Company's 21-year-old non-tobacco premium in the Market. As mentioned in Section 1.C above, the change in 21-year-old non-tobacco premium PMPM calculated in this table is 45.8%, which is consistent with the SERFF Rate Review Detail Screen "percent rate change requested" of 45.8%.

5. Plan Factors

A. Age and Tobacco Factors

Please see Table 12 for the Company's age and tobacco factors.

B. Geographic Factors

Please see Table 13 for the Company's geographic factors. The Company's factors for the rating period are unchanged from the currently approved factors.

C. Network Factors

Please see Table 14 for the Company's network rating factors.

D. Service Area Composition

The Company's service area consists of the following counties for 2017: Clinton, Pike, Sullivan, Susquehanna, Tioga, Wayne, and Wyoming.

E. Composite Rating

Not applicable to the Individual market.

6. Actuarial Certifications

I, am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of the Company to accompany its rate filing (for calendar year 2017) for the small group combined Market on and off the Pennsylvania Exchange.

I am affiliated with Milliman, an independent actuarial consulting firm that is not affiliated with, nor a subsidiary, nor in any way owned or controlled by the Company.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1)),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The allowable modifiers used to generate plan-level rates were:

- The actuarial value and cost-sharing design of the plan.
- The plan's provider network, delivery system characteristics, and utilization management practices.
- The benefits provided under the plan that are in addition to the essential health benefits. These estimated benefits were pooled with similar benefits within the single risk pool and the claims experience from those benefits was utilized to determine rate variations.
- Administrative costs, excluding Exchange user fees.

I certify that all factor, benefit and other changes from the prior approved filing have been disclosed in the 2017 PA Actuarial Memorandum Rate Exhibits.

I certify that the percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

I certify that the benefits included in the Company's plans are substantially equivalent to the Essential Health Benefits (EHBs) in the State of Pennsylvania's benchmark plans. I certify that any benefit substitutions are:

- Actuarially equivalent to the benefits being replaced,
- Are made within only the same essential health benefit category,
- Are based on a standardized plan population,
- Are determined regardless of cost-sharing,
- Are not prescription drug benefits, and
- Are based on an analysis performed in accordance with generally accepted actuarial principles and methodologies.

I certify that new plans are not considered modifications of existing plans (per the uniform modification standards in 45 CFR 147.106).

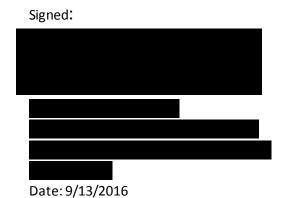

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

The Part I Unified Rate Review Template does not demonstrate the process used by Highmark to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I certify that the information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.

I, certify that the AV Metal Values included in Table 10 were based entirely on the Federal AV Calculator or one of the approved alternative approaches.
