Peter Camacci
Director of the Bureau of Life, Accident and Health Insurance
Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

RE: Inter-County Hospitalization/Health Plans, Inc.

Dear Mr. Camacci:

ICHP received approval for small group plans in accordance with the Patient Protection and Affordable Care Act on 10/31/2013.

ICHP is requesting an overall rate action of 1.75% effective 1/1/2016.

These plans will be “off exchange”. ICHP believes, at least for some time, that “off exchange” products will be an important source of healthcare insurance for Pennsylvanians.

If you have any questions or concerns, please contact John Bencker at 215-830-2620.

Sincerely,

A handwritten signature in black ink that reads "John M Bencker".

John M Bencker
Manager, Actuarial Services

June 30, 2015

Dear Rashmi Mathur:

We are responding to your questions from 6/5/15. We have re-copied the questions below for your convenience.

Q1. Please provide the SERFF Binder ID# that corresponds to this rate filing. Please ensure that the following templates are included in the binder: service area template, rates template and the business rules template.

A1. We have submitted all the service area templates, rate templates, and business rule templates to Contracts. They should be updating the Binder this week.

Q2. Please list all factor changes proposed in this filing relative to the approved 2015 rate filing and discuss the rationale for the changes.

A2. The following Factors were changed:

Age Factors: Age Factors were not changed, however they were normalized to latest enrollment and claims information.

Area Factors: The majority of ICHP business is in Area VIII. The predominant amount of the remaining enrollment is in Area VI, VII, and IX. Area Factors were developed from latest enrollment mix. Areas I to V were strictly developed from an Actuarial Manual. Areas VI to IX were primarily developed from Manual with some adjustment for experience.

Benefit Factors: The benefit factors were developed from the AV Calculator. Only minor changes were made, partially to ensure the plans remained in Metal compliant ranges.

Elasticity Factors: see question 4.

Q3. Please certify that the geographic rating factors reflect differences only in the cost of delivery and not the differences in population morbidity by geographic area. Please insert this certification in the Actuarial Certification on page 8 of the Actuarial Memorandum.

A3. As you are aware, ICHP has less than 7,000 members, and only a small fraction of these are in the small group metal plans. Therefore, ICHP relied heavily on its Actuarial Manual to develop geographic factors based on true cost of delivery. As noted in question 2, Areas I to V are based on the Actuarial Manual and Areas VI to IX were developed from experience and the Actuarial Manual due to lack of credibility.

On page 6, we mentioned the development of the Geographic Factor Calibration (Area Factor), which we quoted below for convenience:

"ICHP developed geographic adjustments for each area based on experience and ICHP's Actuarial Manual. The factors were normalized based on the expected enrollment mix for each area."

ICHP's provider relationships are strongest in 5-County, which is the reason why our area factor is lowest in Area VIII. Our relationships are weakest in the northern and western parts of the state, which is why our area factors are highest in Areas I through V. Our geographic area factors were primarily Manual based, therefore the area factors do reflect differences only in the cost of delivery.

Please advise if our note on page 6 of the memorandum is sufficient. If not, we will be more than happy to contact our outside Actuary and add this to the Actuarial Certification.

Q4. Rate Development Exhibits I-A, II-A, III-A, IV-A – Please document the assumptions and calculations of the Elasticity factors for all the plans. What is the purpose of these factors in the rate calculation?

A4. We used the term elasticity, which is often referred to as induced demand, which is the reduction of utilization that is incurred related to higher member cost. Unlike adverse selection which is mitigated by risk adjustment payments and refunds, utilization reductions not related to elasticity are permitted in the Affordable Care Act. ICHP believes it is essential to include these anticipated changes despite its limited experience, or else the rates would become untenable in the marketplace since larger carriers are reflecting elasticity in their rates. In addition, not accounting for elasticity demand will likely result in the Silver and Bronze Plans falling significantly below the 80% Medical Loss Ratio requirement for small groups.

Major studies have shown that as member cost increases, demand decreases significantly, especially for non-acute services. One study suggests that every 10% increase in member cost could lead to a 2% reduction in overall health care costs (from "Price and Income Elasticity of the Demand for Health Insurance and Health Care Services: A Critical Review of the Literature", page 47). For example, that could imply almost a 20% reduction in the Gold Plan alone. Clearly this would become extreme in a scenario where a member moves from Platinum to Bronze. We softened our elasticity factors based on the expected cost reduction.

Q5. Please provide the rates in the "Rate Page Filing Format" as requested in my e-mail of May 19, 2015.

A5. This was provided within the SERFF system.

Please feel free to contact me at 215.830.2620 if you have any additional questions.

Sincerely,

John Bencker

Proposed Rate Increase

Medical inflation and increased utilization will tend to cause an increase in rates.

The percent increases for each plan (using the age 21 year old rates) are shown below. The 2016 rates are the member weighted average of Q1 to Q4 rates:

Plan I Non Tobacco	Plan II Non Tobacco	Plan III Non Tobacco	Plan IV Non Tobacco	Plan V Non Tobacco	Plan VI Non Tobacco	Plan VII Non Tobacco	Plan VIII Non Tobacco
--------------------------	---------------------------	----------------------------	---------------------------	--------------------------	---------------------------	----------------------------	-----------------------------

ICHP kept all 32 plans from 2015. ICHP made minor changes to some plans to offer some small variations or to maintain similar AV Calculator values.

Experience Period Premium and Claims

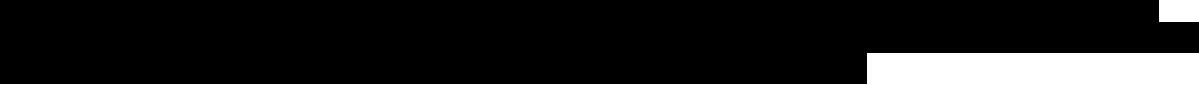

Benefit Categories

An Inpatient Hospital claim was defined as a medical procedure at a hospital that required an overnight stay. "Days" were selected as the utilization description. "Days" is determined by the net days between the end date and the start date plus one day for a single hospital stay. Outpatient Hospital, Professional, and Other Medical all use "Services" to count utilization. "Services" are defined as medical procedures or tests that can be done in a medical center without an overnight stay. Outpatient Hospital is at a hospital, facility, or clinic that does not require an overnight stay and includes short procedure units. Professional is a non-facility charge, and Other Medical is based on claims data that was not allocated to one of the categories. For Prescription Drug, "Prescriptions" count was selected, and that is defined as an individual prescription filled by an insured. ICHP does not have a capitation arrangement, so no data is in this field. A portion of ICHP's business is processed by an outside vendor. For this outside vendor business, ICHP estimated Outpatient Hospital services and Professional from claims based on the service/claim ratio of the claims processed by ICHP.

Projection Factors

A 23.5% factor is assumed for morbidity. ICHP believes that their current morbidity is significantly better than the morbidity of the market. 

ICHP historically made use of the flexibility allowed under rate deregulation in Pennsylvania. While ICHP did not medically underwrite per se, it did at times rely on prior carrier information and other factors which made the base experience select. With the advent of ACA, ICHP will no longer have this rating flexibility.

A 3.5% Benefit factor was included primarily to cover the additional costs of new Essential Health Benefits including Pediatric Dental and Vision, Habilitation services, and some additional women's health benefits. ICHP contracted with an outside vendor to handle Pediatric Dental and/or Vision Services.

All 32 plans proposed were brand new plan designs in 2014, designed to meet the metallic requirements of HCR using the Actuarial Tool provided by HHS. Since these plans have minimal claims experience, ICHP is relying on the actuarial values and ICHP's historical allowed claims experience to develop rates for these 32 plans.

Trend Factors (Cost/Utilization)

Benefit Category	Pop'l risk Morbidity	Other	Cost	Util
Inpatient Hospital	1.235	1.035	1.040	1.025
Outpatient Hospital	1.235	1.035	1.040	1.040
Professional	1.235	1.035	1.025	1.020
Other Medical	1.235	1.035	1.025	1.020
Capitation	1.000	1.000	1.000	1.000
Prescription Drug	1.235	1.035	1.080	1.030

ICHP experienced approximately an 18% overall medical trend in 2013 over 2012 and approximately a -16% trend for 2014 over 2013. The two year average trend is about 1.2%. ICHP is projecting its overall Medical/Rx cost to increase at approximately 7.3%. ICHP's small block does not demonstrate any consistent pattern by component. ICHP is assuming the following:

Inpatient Hospital - ICHP is assuming a 4.0% cost trend and a 2.5% utilization trend.

Outpatient Hospital – ICHP is assuming a 4.0% cost trend and a 4.0% utilization trend.

Professional/Other Medical - ICHP is assuming a 2.5% cost trend and a 2.0% utilization trend.

Rx – ICHP Rx trend has averaged about 14.0% per year over the last two years. ICHP assumed an 8.0% cost trend and a 3.0% utilization trend to account for the risk of additional Specialty Drug Cost.

Credibility Manual Rate Development

Credibility of Experience

Paid to Allowed Ratio

The paid to allowed ratio was developed using the AV pricing factors applied to the assumed distribution by plan per URRT WS 2.

Risk Adjustment and Reinsurance

Risk adjustment was not used and ACA reinsurance does not apply to small group.

Non-Benefit Expenses and Profit & Risk

[REDACTED]

Projected Loss Ratio

ICHP expects a loss ratio of 79.5%. Adjusting for Taxes, Fees, and Health Care Improvement cost, ICHP expects an MLR loss ratio of about 83%, which is within the guidelines for small group.

Single Risk Pool

[REDACTED]

Index Rate

The Q1 2016 Index Rate was calculated to be \$588.17 (WS 1 cell V32 in the URRT). It is simply allowed claims. There are no covered benefits in excess of EHB. The quarterly trend is 1.8% (based on the projected overall Medical/Rx increase of 7.3% mentioned earlier), and the 2016 trend adjusted weighted average Index Rate is \$604.09. The quarterly trend factors used in this filing are shown in the far right hand column of the following table and equal the ratio of the quarterly Index Rate to the weighted average.

Effective Quarter	Member Weight	Index Rate	Trend Factor
Q1 2016	25%	\$588.17	0.97366
Q2 2016	25%	\$598.66	0.99101
Q3 2016	25%	\$609.33	1.00868
Q4 2016	25%	\$620.19	1.02665
Weighted Average		\$604.09	

Market Adjusted Index Rate

The Market Adjusted Index Rate equals the 2016 member weighted average Index Rate of \$604.09 since:

- Federal reinsurance program does not impact small group
- Risk adjustment is assumed to be zero
- ICHP business is off exchange (i.e. no exchange user fees)

Plan Adjusted Index Rates

The Plan Adjusted Index Rates were developed from the Market Adjusted Index Rate adjusted for AV Pricing Values. The AV Pricing Values section outlines the general assumptions used for the Plan Adjusted Index Rates. The Plan Adjusted Index Rates include adjustments for elasticity and HRA/HSA employer contributions. Non-smoker rates were calculated using a reduction factor of 0.960, which was developed from a 2011 Center for Disease Control study. The rates were also adjusted for retention.

Calibration

Age Curve Calibration:

Geographic Factor Calibration:

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate equals the Plan Adjusted Index Rate divided by the average age adjustment [REDACTED] times the applicable age/tobacco adjustments, trend and geographic factor. Note that the Rate Development workbook shows the details.

Note that in computing family rates, ICHP will only include a maximum of 3 children under age 21.

AV Metal Values

The AV Calculator was used to develop the AV metal values for all plans.

AV Pricing Values

The fixed reference plan is a no copay 100% plan. The AV pricing factors were set equal to the product of the AV calculator value and an induced utilization factor (elasticity factor).

Currently the majority of ICHP experience would correlate most closely to Platinum or Gold Plans. ICHP does not have enough experience at the different Metal Tiers to estimate elasticity based on its own experience.

ICHP applied the following standard elasticity assumptions to the rates:

	Standard
Platinum	1.000
Gold	0.900
Silver	0.870
Bronze	0.720

Specific assumptions are shown in the Rate Development for HRA, HSA, and four Platinum plans.

HRA/HSA Employer contributions are not included in the Rate. The AV Calculator was used without the Employer Contribution to estimate the savings. If the plan design fell between tiers, the closest tier available was used to calculate the value.

Membership Projections

Membership is assumed to remain constant.

Terminated Plans and Products

No metal plans or products will be terminated prior to the effective date. The final column in URRT WS 2 represents terminated and transitional plan experience.

Plan Type

ICHP's plan type is Indemnity, which resembles a PPO-like product.

Warning Alerts

ICHP has warning alerts in cells A54 and A56 in URRT WS 2. These warning alerts can be attributed to terminated/transitional plan experience.

Reliance

The certifying actuary relied on premium data, claims data, and projection assumptions (morbidity, benefits and trend) provided by ICHP. The individuals relied on are listed in the first section of this memo.

Actuarial Certification

This report is considered a statement of actuarial opinion under the guidelines promulgated by the American Academy of Actuaries. This statement of actuarial opinion was developed by Richard Nelson, who is a member of the American Academy of Actuaries ("the Academy") and meets the Qualification Standards of the Academy to render the opinion contained herein. His work was conducted in a manner consistent with the Code of Professional Conduct of the Academy.

Federal

I certify that the projected index rate is:

- a) In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1)).
- b) Developed in compliance with the applicable Actuarial Standards of Practice.
- c) Reasonable in relation to the benefits provided and the population anticipated to be covered.
- d) Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.

I certify that the percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV was calculated in accordance with actuarial standards of practice.

I certify that the geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.

I certify that the AV calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template.

The Unified Rate Review Template does not demonstrate the process used by the issuer to develop rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

Pennsylvania

To the best of my knowledge and judgment, the entire rate filing is in compliance with the applicable laws and rules of Pennsylvania and the benefits are reasonable in relation to premiums.
