

I DO NOT support the Governor's recommendations concerning out of network medical bills. True emergencies (accidents, sudden onset etc.) should be handled at the Medicare/Medicaid rate by all insurance companies and Medical providers.

Non-emergencies should be billed/paid according to umbrella agreement of the medical facility. All medical providers within an umbrella group (hospital/medical facility should be bound by the facilities agreements.

No more knee jerk, feel good laws or regulations. Fix the problem, don't create new problems while showing how populist we can be.

Constance Eissler
