

#### May 17, 2023

Ms. Lindsi Swartz, Director Bureau of Life, Accident and Health Insurance Office of Insurance Product Regulation and Administration Commonwealth of Pennsylvania Insurance Department 1311 Strawberry Square Harrisburg, PA 17120

#### Re: Keystone Health Plan Central Individual Rates Filing No 23-34 TOI Code: H151 Individual Health – Hospital/Surgical/Medical Expense Sub-TOI Code: H151.001 Hospital/Surgical/Medical Expense Filing Type: Rate

Dear Ms. Swartz:

By this filing Capital Blue Cross, on behalf of its wholly owned subsidiary Keystone Health Plan Central, submits to the Department Individual Rates effective January 1, 2024.

The following is a summary of the rate filing:

- Company Name: Keystone Health Plan Central (KHPC)
- NAIC: 95199
- Market: Individual
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2024
- Average Rate Change Requested: 4.4%
- Range of Requested Rate Change: 2.5% to 8.7%
- Total additional annual revenue generated from the proposed rate change: \$98,186
- Product: HMO
- Rating Areas: 6,7,9
- Metal Levels: Bronze, Catastrophic
- Current Covered Lives and Policyholders: 387/294
- 2024 Number of Plans and Change: 2/No Plan Change
- Contract Form #: KHPC-Ind-HMO-21cnty-AGRMT-v0124
- Form Filing SERFF #: CABC-133645003
- Binder SERFF #: CABC-PA24-125116241
- HIOS Issuer ID: 53789

In support of this filing, I have included an Actuarial Memorandum with supporting exhibits, URRT, Rates Table Template, and PA Plan Design Summary and Rate Tables.

Sincerely,

ASA, MAAA Director, Actuarial Services Capital Blue Cross

Enclosures

cc: , FSA, MAAA, Senior Director, Actuarial Services

### **KEYSTONE HEALTH PLAN CENTRAL**

#### ACTUARIAL MEMORANDUM Individual Rates Effective January 1, 2024

#### **General Information**

#### **Company Information**

- Company Legal Name: Keystone Health Plan Central
- State: PA
- HIOS Issuer ID: 53789
- Market: Individual
- Effective Date: 1/1/2024

#### **<u>PID Company Information</u>**

- Company Name: Keystone Health Plan Central (KHPC)
- NAIC: 95199
- Market: Individual
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2024
- Average Rate Change Requested: 4.4%
- Range of Requested Rate Change: 2.5% to 8.7%
- Total additional annual revenue generated from the proposed rate change: \$98,186
- Product: HMO
- Rating Areas: 6,7,9
- Metal Levels: Bronze, Catastrophic
- Current Covered Lives and Policyholders: 387/294
- 2024 Number of Plans and Change: 2/No Plan Change
- Contract Form #: KHPC-Ind-HMO-21cnty-AGRMT-v0124
- Form Filing SERFF #: CABC-133645003
- Binder SERFF #: CABC-PA24-125116241
- HIOS Issuer ID: 53789

#### **Company Contact Information**

- Primary Contact Name:
- Primary Contact Telephone Number:
- Primary Contact Email Address:

#### Scope and Purpose

By this filing, Keystone Health Plan Central (KHPC), a subsidiary of Capital Blue Cross (Capital), submits rates for products to be made available to individuals on and after January 1, 2024. KHPC will only offer products off the PA state-based exchange.

#### **Rate History and Proposed Variations in Rate Changes**

| Market     | Company | Effective<br>Date | SERFF #        | Annual<br>Increase |
|------------|---------|-------------------|----------------|--------------------|
| Individual | КНРС    | 1/1/2020          | CABC-131915679 | -8.0%              |
| Individual | КНРС    | 1/1/2021          | CABC-132354935 | -1.7%              |
| Individual | КНРС    | 1/1/2022          | CABC-132795960 | -1.7%              |
| Individual | КНРС    | 1/1/2023          | CABC-133267272 | -8.5%              |

#### Average Rate Change

KHPC is proposing an aggregate annual 4.4% rate change, which varies by plan. The rate change is calculated in PA Rate Exhibits Part IV, Table 11, cell AN13.

The key drivers of the rate change and approximate impact are as follows:

- Future cost and utilization: 6.6%
- Favorable 2022 experience: -8.7%
- Proposed changes to the PA reinsurance program: 6.5%

#### **Regulatory Considerations**

Rates submitted by this filing assume changes to the current regulatory framework. As directed by the Insurance Department, the following factors have been applied to the rates for regulatory changes:

- Reinsurance Morbidity Adjustment of 1.0
- Reinsurance attachment point of \$60,000, a cap of \$100,000, and a coinsurance parameter of 0% (placeholder).

#### <u>Membership</u>

Membership is shown in PA Rate Template Part I, Table 1. The average age is 42.

#### Benefit Changes 2023-2024

A summary of proposed 2024 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2023. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

#### **Experience Period Premium and Claims**

**Single Risk Pool**: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for KHPC in the individual market.

**Base Experience Period**: The base experience period (BEP) includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2022 and December 31, 2022.

Paid Through Date: Claims in the BEP are paid through February 28, 2023

**Premiums (net of MLR Rebate) in BEP**: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments applied are equal to zero.

#### Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments.
- Capital only covers Essential Health benefits (EHBs).
- KHPC has PCP and mental health capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

**Estimated Incurred but Not Paid Claims**: Paid claims by date of service come directly from Capital's data warehouse. The method for calculating incurred claims in the BEP is as follows:

- 1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
- 2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
- 3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g.

harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.

- 4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.
- 5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
- 6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP Incurred Claims = \sum \frac{BEP Paid Claims by Incurred Month}{Completion by Incurred Month}$$

BEP Allowed Claims

 $= \sum \frac{BEP \text{ Paid Claims} + BEP \text{ Member Cost Share by Incurred Month}}{Completion by Incurred Month}$ 

**Risk Adjustment in BEP**: Risk adjustment amounts in the BEP are equal to the amounts sent by the Department on 5/3/2023.

**Loss Ratio in BEP:** Loss ratio is 56.25%

#### Credibility of Data

No Credibility Manual was used.

#### **Trend Identification**

Trend: 6.60%

Trend levels reflect Capital's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. Capital uses the following to project future costs:

- a. Vendor Physician Cost Model and Internal Hospital Contracting Model
  - i. The medical cost models use best estimates of Capital Blue Cross (Capital)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the Capital book of business level for all commercial business.
- b. Internal Prescription Drug Trend Model
  - i. Price Inflation
  - ii. Contract Pricing
  - iii. Member Cost-Sharing
  - iv. Units per Script
  - v. Brand/Generic Mix
  - vi. Therapeutic Mix
  - vii. Cost per Script
  - viii. Pipeline (new drugs)
- 2. Utilization Considerations:
  - a. Intensity of medical services rendered
  - b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
  - c. Further migration from brand prescription drugs to generic prescription drugs
  - d. Favorable impacts of value based benefits designs
  - e. Medical utilization estimates reviewed by Capital's Chief Medical Officer
- 3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.
- 4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.
- 5. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. Capital strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

**Benefit Categories**: Claims in the benefit categories displayed in URRT come directly from Capital's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for KHPC's pricing trend, as well as cost and utilization components of the pricing trend.

#### Rate Development & Change

#### **Projection Factors**

**Changes in Morbidity:** Found in URRT Worksheet 1, "Morbidity Adjustment", and PA Rate Exhibits, Table 5.

*Total Morbidity Factor* = [*Other Morbidity Factor*] × [*Reinsurance Morbdity Factor*]

The Reinsurance Morbidity Factor is discussed in *Regulatory Considerations* above. The Other Morbidity Factor is 1.0.

**Changes in Benefits:** Benefit changes are not applied to allowed claims as allowed should stay consistent from 2022 to 2024. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from Capital's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

In addition to cost-sharing changes, Capital is also implementing two benefit coverage changes.

- Senate Bill 8: Coverage of mammographic examinations and diagnostic breast imaging at no cost share. This bill goes into effect for Small Group and Individual policies in 2025, but Capital is adopting early compliance and will cover the relevant services at no cost share starting in 2024.
  - Claim PMPM is developed by pulling 2022 Group and Individual MRI and diagnostic breast imaging member cost share associated with the relevant diagnosis codes.
  - Additional Claim Cost PMPM is equal to member cost share divided by Group and Individual membermonths.
- The Mental Health Parity and Addiction Equity Act (MHPAEA) has expanded definitions of mental health services to include Autism coverage. With this expansion, Capital will cover Autism services in the Individual market starting in 2024.
  - Claim PMPM is developed by pulling 2022 Group and Individual denied Autism service claims.
  - Additional Claim Cost PMPM is equal to denied Autism claims divided by 2022 Group and Individual membermonths.

The additional claim cost PMPMs are shown on Exhibit D2. Senate Bill 8 only impacts incurred claims (the change is to member cost share), and MHPAEA change impacts both allowed and incurred claims.

The PMPM calculations are included with this filing in the following supporting workbooks:

Ind\_23-34\_Initial\_KHP\_HMO\_AutismDefinition\_Supporting\_20230517.xls Ind\_23-34\_Initial\_KHP\_HMO\_SenateBill8\_Supporting\_20230517.xls

**Changes in Demographics:** KHPC does not expect changes in demographics in its individual population.

Changes in Network: No network adjustment is applied.

Other Adjustments: No other adjustment is applied to the BEP.

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

#### Index Rate

The experience period index rate is KHPC's allowed claims PMPM, set in accordance with the single risk pool provision. All KHPC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

**Projected Allowed Claims:** The KHPC experience period allowed claims, benefit-adjusted, trended to the projection period (See <u>Projection Factors</u> section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits*. This number is reflected in Worksheet 1 of URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

- 1. Start with Projected Allowed Claims at Current Benefits
- 2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

#### Paid to Allowed Ratio

KHPC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid

levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, KHPC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

- 1. Gather claims experience as described in the Data section above.
  - a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
  - b. BEP Member Months
- 2. Develop BEP Paid and Incurred Claims:

 $BEP \ Paid \ and \ Incurred \ Claims = \frac{BEP \ Paid \ Claims}{Completion \ Factor}$ 

The development of completion factors is described in <u>Experience Period Premium</u> <u>and Claims</u> above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

 $BEP Paid and Incurred Claim PMPM = \frac{BEP Paid and Incurred Claims}{BEP Member Months}$ 

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the <u>Projection</u> <u>Factors</u> section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

Trended Claim PMPM

= [BEP Paid and Incurred Claim PMPM]  $\times (1 + [Trend\%])^{Trend Months/12}$ 

5. Develop *Projected Paid and Incurred Claim PMPM*:

Projected Paid and Incurred Claims PMPM = [Trended Claim PMPM] × [Benefit Adjustment] × [Morbidity Adjustment] + [Benefit Additions]

The Benefit Adjustment, Morbidity Adjustment, Network Adjustment, and Benefit Additions and are discussed in the Projections Factors section above

- 6. Develop Projected Claims PMPM by Benefit as follows:
  - a. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit

design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

 $Benefit Level Adjustment = \frac{Average Manual Cost in Projection Period}{Manual Cost of Base Plan}$ 

c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

Base Plan Paid and Incurred Claims PMPM =  $\frac{Benefit Adjusted Paid and Incurred Claims PMPM}{Benefit Level Adjustment}$ 

d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

 $Benefit Relativity A = \frac{Manual Cost of Benefit A}{Manual Cost of Base Plan}$ 

- e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:
  - i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a 2000 plan and 1000 plan must be less than \$1000.
  - ii. Adjustments for plan designs that fall outside of the actuarial cost model.
- a. So the Projected Claims PMPM by Benefit is:

Projected Claims PMPM Benefit A = Projected Claims PMPM Base Plan × Pricing Relativity A b. And to arrive at the *Total Projected Claims PMPM*, KHPC assumes a distribution of members across the benefit plans being offered in the projection period. The *Total Projected Claims PMPM* :

= Projected Claims PMPM Benefit A × Expected Member Dist of Benefit A + Projected Claims PMPM Benefit B × Expected Member Dis of Benefit B + …

7. The Paid-To-Allowed Ratio is then:

 $Paid to Allowed Ratio = \frac{Total Projected Claims PMPM}{Projected Allowed Claims at Current Benefits}$ 

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

#### Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable marketwide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

[Market Adjusted Index Rate]

= ([Index Rate] x [Paid to Allowed Ratio]

- [Projected Incurred Reinsurace Recoveries]

- [Projected Incurred Risk Adjustment PMPM]
- + [Exchange Fees PMPM]) ÷ [Paid to Allowed Ratio]

#### Projected Incurred Risk Adjustments PMPM:

Relevant to 2024 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2024. The following items are those that we deem important in generating a CRA payment transfer adjustment:

- 1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
- 2. Statewide average premiums
- 3. Current market penetration of this company and competitors in the market and in the state
- 4. 2018-2022 risk adjustment results
- 5. Market improvement in coding risk: Capital's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that Capital is disadvantaged in the market. This will drive Capital's relative risk to the market down over time.

Risk adjustment amounts have vary widely over the past 4 years, shown in Exhibit S. 2019-2021 averaged a risk adjustment PMPM of -\$150, while 2022 is +\$7. Because of the wild swings, projected 2024 RA was set well above the 4 year average, but below 2022 results. This is to stabilize the annual rate change while also reflecting the positive financial performance of this small population.

#### **Projected Incurred Reinsurance Recoveries:**

In order to calculate the value of reinsurance, the following is provided:

- 1. PA Rate Exhibits, tab II.a show the company-specific BEP claims data.
- 2. PA Rate Exhibits, tab II.b shows the company-specific projected claims. The claims represent BEP claims trended at 7% to the projection period.

#### **Exchange Fee PMPM:**

KHPC only offers plans off exchange, so the exchange fee is \$0.

The exchange fee PMPM is calculated as:

```
Exchange Fee PMPM
```

= [Avg 2024 On – Exchange Premium PMPM] × [% Members On – Exchange]

Where

[Avg 2024 On – Exchange Premium PMPM = [Avg 2023 On – Exchange Premium PMPM × (1 + [Avg Proposed Rate Change])

See Exhibit K for the development of the Market Adjusted Index Rate.

#### **Retention Items**

#### Administrative Expense Load:

- Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of \$0.21 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
- 2. Administrative Expense: Calculated using an allocation method from Capital's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all

costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to Capital individual products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.

- a. Value-Based Benefits (VBB): Standard with each plan, Capital Blue Cross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
  - i. Complete Health Risk Assessment questionnaire and receive a gift card.
  - ii. Participate in an online coaching program and receive a gift card reward.
  - iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
  - iv. Fees are included in overall administrative expense fee discussed above.
  - v. Included in URRT Worksheet 2 "Administrative Expense", and PA Rate Exhibits Table 6.
- 3. Broker Expense: Calculated based on Capital's explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Capital pays commissions for new business and renewal enrollment received during open enrollment and the special enrollment period (SEP), both on and off exchange, and in all geographic areas. Attached please find the proposed 2024 broker agreements redacted versions. Files are as follows:
  - a. Redacted Agent Agreement: "Ind\_23-34 Initial KHP HMO WBEBrokerIndRedacted Supporting 20220517.pdf"
  - b. Redacted Preferred Producer Master Agreement: "Ind\_23-
    - 34\_Initial\_KHP\_HMO\_PPMABrokerIndRedacted\_Supporting\_20230517.pdf"
- Additional Quality Improvement: Additional QI amounts applied in rating equal 0.0%. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

#### Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 1, "Profit and Risk", and PA Rate Exhibits Table 6.

#### **Taxes and Fees:**

- Fee for Patient-Centered Outcomes Research Trust Fund (PCORTF): As per the Notice of Proposed Rulemaking for Fees on Health Insurance Policies and Self-Insured Plans for the Patient-Centered Outcomes Research Trust Fund (REG-136008-11), 77 Fed. Reg. 22691: For policy years ending on or after October 1, 2022, and before October 1, 2023, the applicable dollar amount is \$3 per member per year (\$0.25 PMPM). Capital assumes the 2024 projected fee will be trended at 0%.
- 2. Exchange Fee All issuers participating in the state-based-facilitated exchange will remit 3% of premium. The exchange user fee is applied as an adjustment to the Index Rate at

the market level. KHPC only offers off-exchanges products, therefore no exchange fee is applied.

3. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, "Taxes and Fees", and PA Rate Exhibits, Table 6.

See Exhibit H for all retention values.

#### Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

- 1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using KHPC's actuarial cost model. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
- 2. Induced Demand: Please see Table 8. Induced Demand is calculated as:

 $[Pricing AV]^2 - [Pricing AV] + 1.24$ 

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

- 3. Provider Network: The Provider network is the same across all HMO plans.
- 4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
- 5. Catastrophic Plans: Applied to catastrophic plans to reflect lower morbidity. This factor is the same as approved in 2023.
- 6. Adjustment for distribution and administrative costs: Described in <u>Retention</u> section above.
- 7. Tobacco Adjustment: Calculated as the average tobacco factor applied across the risk pool.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

#### **Calibrated Plan Adjusted Index Rates**

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current individual enrollment by age in KHPC. Age factors are applied in accordance

with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file Ind\_23-34\_Initial\_KHP\_HMO\_List-Billed\_Supporting\_20230517.xlsb for the calculation.

**Geographic Factor Calibration**: The average geographic rating factor is calculated by taking the Capital member-weighted average by region.

Geographic Factors are changing from 2023 to 2024:

- a. Exhibit O1- Region shows the risk-adjusted loss ratio by region. The data shows that region 9 underperforms regions 6 and 7.
- b. Capital is proposing to incrementally improve the financial performance of 9 without significant disruption to those members.
- c. PA Rate Exhibits Table IV show the resulting average rate change by region, with region 9 approximate 4% above the average rate increase.

**Tobacco Factor Calibration:** Average tobacco factor is calculated using current month member by smoking status data.

The calibration is:

[Calibrated Plan Adjusted Index Rate] = [Plan Adjusted Index Rate] ÷ ([Age Curve Calibration] × [Geographic Factor Calibration] x [Tobacco Factor])

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10. The calibration factors and development are found on Exhibit N.

#### **Consumer Adjusted Premium Rate Development**

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

[Member – Level Consumer Adjusted Premium Rate] = [Calibrated Plan Adjusted Index Rate] × [Age Factor] × [Geographic Factor] × [Tobacco Factor]

 [Family Consumer Adjusted Premium Rate] = ∑[Member – Level Consumer Adjusted Premium Rate] With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

#### **AV Metal Values**

All AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

See AV Screenshots included with the submission: Ind 23-34 Initial KHP\_HMO\_AVScreenPrints\_Supporting\_CONF\_20230517

#### **AV Pricing Values**

All AV Pricing values were developed using KHPC's actuarial cost model and actuarial judgment as described in section <u>Paid to Allowed</u> above. Differences in health status are not included.

#### **Projected Loss Ratio**

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

#### **Membership Projection**

The membership projections found in Worksheet 2 of URRT were developed by assuming steady enrollment and similar distribution to current.

#### Projected versus Actual MLR

Exhibit R shows a history of projected versus actual MLR and Member Months. Projected comes from the 2019-2021 filings. Actual comes from Table 4.

|               | MLR    | Member Months |        |         |  |
|---------------|--------|---------------|--------|---------|--|
| Calendar Year | Actual | Pricing       | Actual | Pricing |  |
| 2019          | 90.76% | 86.95%        | 15,211 | 26,652  |  |
| 2020          | 81.03% | 83.72%        | 12,244 | 17,727  |  |
| 2021          | 68.00% | 86.83%        | 7,216  | 12,420  |  |

#### **Claim Cost Projection**

Exhibit S shows a history of claim cost projection versus actual from 2019-2022 filings.

#### Actuarial Statement

I, ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I,

, ASA, MAAA, do hereby certify that:

- 1. This filing has been prepared in accordance with the following:
  - a. Actuarial Standard of Practice No. 5, "Health and Disability Claims"
  - b. Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans"
  - c. Actuarial Standard of Practice No. 12, "Risk Classification"
  - d. Actuarial Standard of Practice No. 23, "Data Quality"
  - e. Actuarial Standard of Practice No. 25, "Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage"
  - f. Actuarial Standard of Practice No. 26, "Compliance with Statutory and

Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans"

- g. Actuarial Standard of Practice No. 41, "Actuarial Communications".
- 2. The index rate is:
  - a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
  - b. Developed in compliance with the applicable Actuarial Standards of Practice.
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
  - d. Neither excessive nor deficient.
  - e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.
- 3. The percent of total premium that represents essential health benefits were calculated in accordance with actuarial standards of practice.
- 4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.
  - a. The analysis was
    - i. conducted by a member of the American Academy of Actuaries, and
    - ii. performed in accordance with generally accepted actuarial principles and methods.
- 5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.
- 6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- 7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- 8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the Rate Filing Justification.

, ASA, MAAA Director, Actuarial Services Capital Blue Cross

# PA Rate Template Part VI - Rate Change Summary

### Table 15. Rate Change Summary Information

### Overview

| Initial Requested Average Rate Change: | 0.044073753              |
|--|--------------------------|
| Revised Requested Average Rate Change: | 4.41%                    |
| Minimum Requested Rate Change:         | 2.47%                    |
| Maximum Requested Rate Change:         | 8.74%                    |
| Mapped Members:                        | 387                      |
| Available in Rating Areas:             | Rating Areas 6, 7, and 9 |

### **Key Information**

| Jan. 2022 - Dec. 2022 Financial Experience |                |  |  |  |  |  |  |  |  |
|--|----------------|--|--|--|--|--|--|--|--|
| Premium                                    | \$2,735,178.23 |  |  |  |  |  |  |  |  |
| Claims                                     | \$1,662,968.53 |  |  |  |  |  |  |  |  |
| Administrative Expenses                    | (\$31,696.00)  |  |  |  |  |  |  |  |  |
| Taxes & Fees                               | \$229,515.00   |  |  |  |  |  |  |  |  |
| Company Made After Taxes                   | \$ 874,390.70  |  |  |  |  |  |  |  |  |

The company expects its annual medical costs to increase:

| • Future cost and utilization: 6.6%      |
|--|
| • Favorable 2022 experience: -8.7%       |
| • Proposed changes to the PA reinsurance |
| program: 6.5%                            |

Explanation of requested rate change:

| Carrier Name:        | Keystone Health Plan |
|----------------------|----------------------|
| Product(s):          | НМО                  |
| Market Segment:      | Individual           |
| Rate Effective Date: | 1/1/2024             |

### How It Plans to Spend Your Premium

| This is how the company plans to s collects in 2024: | pend the premium it |
|--|---------------------|
| Claims:  | 83%                 |
| Administrative Expenses:                             | 14%                 |
| Taxes & Fees:  | 1%                  |
| Profit:  | 2%                  |

6.60%

# **KEYSTONE HEALTH PLAN CENTRAL**

### ACTUARIAL MEMORANDUM Individual Rates Effective January 1, 2024

### **General Information**

### **Company Information**

- Company Legal Name: Keystone Health Plan Central
- State: PA
- HIOS Issuer ID: 53789
- Market: Individual
- Effective Date: 1/1/2024

#### **<u>PID Company Information</u>**

- Company Name: Keystone Health Plan Central (KHPC)
- NAIC: 95199
- Market: Individual
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2024
- Average Rate Change Requested: 4.4%
- Range of Requested Rate Change: 2.5% to 8.7%
- Total additional annual revenue generated from the proposed rate change: \$98,186
- Product: HMO
- Rating Areas: 6,7,9
- Metal Levels: Bronze, Catastrophic
- Current Covered Lives and Policyholders: 387/294
- 2024 Number of Plans and Change: 2/No Plan Change
- Contract Form #: KHPC-Ind-HMO-21cnty-AGRMT-v0124
- Form Filing SERFF #: CABC-133645003
- Binder SERFF #: CABC-PA24-125116241
- HIOS Issuer ID: 53789

#### **Company Contact Information**

- Primary Contact Name:
- Primary Contact Telephone Number:
- Primary Contact Email Address:

#### Scope and Purpose

By this filing, Keystone Health Plan Central (KHPC), a subsidiary of Capital Blue Cross (Capital), submits rates for products to be made available to individuals on and after January 1, 2024. KHPC will only offer products off the PA state-based exchange.

### **Rate History and Proposed Variations in Rate Changes**

| Market     | Company | Effective<br>Date | SERFF #        | Annual<br>Increase |
|------------|---------|-------------------|----------------|--------------------|
| Individual | КНРС    | 1/1/2020          | CABC-131915679 | -8.0%              |
| Individual | КНРС    | 1/1/2021          | CABC-132354935 | -1.7%              |
| Individual | КНРС    | 1/1/2022          | CABC-132795960 | -1.7%              |
| Individual | КНРС    | 1/1/2023          | CABC-133267272 | -8.5%              |

#### Average Rate Change

KHPC is proposing an aggregate annual 4.4% rate change, which varies by plan. The rate change is calculated in PA Rate Exhibits Part IV, Table 11, cell AN13.

The key drivers of the rate change and approximate impact are as follows:

- Future cost and utilization: 6.6%
- Favorable 2022 experience: -8.7%
- Proposed changes to the PA reinsurance program: 6.5%

#### **Regulatory Considerations**

Rates submitted by this filing assume changes to the current regulatory framework. As directed by the Insurance Department, the following factors have been applied to the rates for regulatory changes:

- Reinsurance Morbidity Adjustment of 1.0
- Reinsurance attachment point of \$60,000, a cap of \$100,000, and a coinsurance parameter of 0% (placeholder).

#### <u>Membership</u>

Membership is shown in PA Rate Template Part I, Table 1. The average age is 42.

#### Benefit Changes 2023-2024

A summary of proposed 2024 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2023. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

#### **Experience Period Premium and Claims**

**Single Risk Pool**: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for KHPC in the individual market.

**Base Experience Period**: The base experience period (BEP) includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2022 and December 31, 2022.

Paid Through Date: Claims in the BEP are paid through February 28, 2023

**Premiums (net of MLR Rebate) in BEP**: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments applied are equal to zero.

#### Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments.
- Capital only covers Essential Health benefits (EHBs).
- KHPC has PCP and mental health capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

**Estimated Incurred but Not Paid Claims**: Paid claims by date of service come directly from Capital's data warehouse. The method for calculating incurred claims in the BEP is as follows:

- 1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
- 2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
- 3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g.

harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.

- 4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.
- 5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
- 6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP Incurred Claims = \sum \frac{BEP Paid Claims by Incurred Month}{Completion by Incurred Month}$$

BEP Allowed Claims

 $= \sum \frac{BEP \text{ Paid Claims} + BEP \text{ Member Cost Share by Incurred Month}}{Completion by Incurred Month}$ 

**Risk Adjustment in BEP**: Risk adjustment amounts in the BEP are equal to the amounts sent by the Department on 5/3/2023.

**Loss Ratio in BEP:** Loss ratio is 56.25%

### **Credibility of Data**

No Credibility Manual was used.

### **Trend Identification**

Trend: 6.60%

Trend levels reflect Capital's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. Capital uses the following to project future costs:

- a. Vendor Physician Cost Model and Internal Hospital Contracting Model
  - i. The medical cost models use best estimates of Capital Blue Cross (Capital)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the Capital book of business level for all commercial business.
- b. Internal Prescription Drug Trend Model
  - i. Price Inflation
  - ii. Contract Pricing
  - iii. Member Cost-Sharing
  - iv. Units per Script
  - v. Brand/Generic Mix
  - vi. Therapeutic Mix
  - vii. Cost per Script
  - viii. Pipeline (new drugs)
- 2. Utilization Considerations:
  - a. Intensity of medical services rendered
  - b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
  - c. Further migration from brand prescription drugs to generic prescription drugs
  - d. Favorable impacts of value based benefits designs
  - e. Medical utilization estimates reviewed by Capital's Chief Medical Officer
- 3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.
- 4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.
- 5. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. Capital strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

**Benefit Categories**: Claims in the benefit categories displayed in URRT come directly from Capital's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for KHPC's pricing trend, as well as cost and utilization components of the pricing trend.

### Rate Development & Change

### **Projection Factors**

**Changes in Morbidity:** Found in URRT Worksheet 1, "Morbidity Adjustment", and PA Rate Exhibits, Table 5.

*Total Morbidity Factor* = [*Other Morbidity Factor*] × [*Reinsurance Morbdity Factor*]

The Reinsurance Morbidity Factor is discussed in *Regulatory Considerations* above. The Other Morbidity Factor is 1.0.

**Changes in Benefits:** Benefit changes are not applied to allowed claims as allowed should stay consistent from 2022 to 2024. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from Capital's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

In addition to cost-sharing changes, Capital is also implementing two benefit coverage changes.

- Senate Bill 8: Coverage of mammographic examinations and diagnostic breast imaging at no cost share. This bill goes into effect for Small Group and Individual policies in 2025, but Capital is adopting early compliance and will cover the relevant services at no cost share starting in 2024.
  - Claim PMPM is developed by pulling 2022 Group and Individual MRI and diagnostic breast imaging member cost share associated with the relevant diagnosis codes.
  - Additional Claim Cost PMPM is equal to member cost share divided by Group and Individual membermonths.
- The Mental Health Parity and Addiction Equity Act (MHPAEA) has expanded definitions of mental health services to include Autism coverage. With this expansion, Capital will cover Autism services in the Individual market starting in 2024.
  - Claim PMPM is developed by pulling 2022 Group and Individual denied Autism service claims.
  - Additional Claim Cost PMPM is equal to denied Autism claims divided by 2022 Group and Individual membermonths.

The additional claim cost PMPMs are shown on Exhibit D2. Senate Bill 8 only impacts incurred claims (the change is to member cost share), and MHPAEA change impacts both allowed and incurred claims.

The PMPM calculations are included with this filing in the following supporting workbooks:

Ind\_23-34\_Initial\_KHP\_HMO\_AutismDefinition\_Supporting\_20230517.xls Ind\_23-34\_Initial\_KHP\_HMO\_SenateBill8\_Supporting\_20230517.xls

**Changes in Demographics:** KHPC does not expect changes in demographics in its individual population.

Changes in Network: No network adjustment is applied.

Other Adjustments: No other adjustment is applied to the BEP.

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

#### Index Rate

The experience period index rate is KHPC's allowed claims PMPM, set in accordance with the single risk pool provision. All KHPC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

**Projected Allowed Claims:** The KHPC experience period allowed claims, benefit-adjusted, trended to the projection period (See <u>Projection Factors</u> section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits*. This number is reflected in Worksheet 1 of URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

- 1. Start with Projected Allowed Claims at Current Benefits
- 2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

#### Paid to Allowed Ratio

KHPC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid

levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, KHPC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

- 1. Gather claims experience as described in the Data section above.
  - a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
  - b. BEP Member Months
- 2. Develop BEP Paid and Incurred Claims:

 $BEP \ Paid \ and \ Incurred \ Claims = \frac{BEP \ Paid \ Claims}{Completion \ Factor}$ 

The development of completion factors is described in <u>Experience Period Premium</u> <u>and Claims</u> above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

 $BEP Paid and Incurred Claim PMPM = \frac{BEP Paid and Incurred Claims}{BEP Member Months}$ 

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the <u>Projection</u> <u>Factors</u> section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

Trended Claim PMPM

= [BEP Paid and Incurred Claim PMPM]  $\times (1 + [Trend\%])^{Trend Months/12}$ 

5. Develop *Projected Paid and Incurred Claim PMPM*:

Projected Paid and Incurred Claims PMPM = [Trended Claim PMPM] × [Benefit Adjustment] × [Morbidity Adjustment] + [Benefit Additions]

The Benefit Adjustment, Morbidity Adjustment, Network Adjustment, and Benefit Additions and are discussed in the Projections Factors section above

- 6. Develop Projected Claims PMPM by Benefit as follows:
  - a. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit

design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

 $Benefit Level Adjustment = \frac{Average Manual Cost in Projection Period}{Manual Cost of Base Plan}$ 

c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

Base Plan Paid and Incurred Claims PMPM =  $\frac{Benefit Adjusted Paid and Incurred Claims PMPM}{Benefit Level Adjustment}$ 

d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

 $Benefit Relativity A = \frac{Manual Cost of Benefit A}{Manual Cost of Base Plan}$ 

- e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:
  - i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a 2000 plan and 1000 plan must be less than \$1000.
  - ii. Adjustments for plan designs that fall outside of the actuarial cost model.
- a. So the Projected Claims PMPM by Benefit is:

Projected Claims PMPM Benefit A = Projected Claims PMPM Base Plan × Pricing Relativity A b. And to arrive at the *Total Projected Claims PMPM*, KHPC assumes a distribution of members across the benefit plans being offered in the projection period. The *Total Projected Claims PMPM* :

= Projected Claims PMPM Benefit A × Expected Member Dist of Benefit A + Projected Claims PMPM Benefit B × Expected Member Dis of Benefit B + …

7. The Paid-To-Allowed Ratio is then:

 $Paid to Allowed Ratio = \frac{Total Projected Claims PMPM}{Projected Allowed Claims at Current Benefits}$ 

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

### Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable marketwide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

[Market Adjusted Index Rate]

= ([Index Rate] x [Paid to Allowed Ratio]

- [Projected Incurred Reinsurace Recoveries]

- [Projected Incurred Risk Adjustment PMPM]
- + [Exchange Fees PMPM]) ÷ [Paid to Allowed Ratio]

### Projected Incurred Risk Adjustments PMPM:

Relevant to 2024 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2024. The following items are those that we deem important in generating a CRA payment transfer adjustment:

- 1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
- 2. Statewide average premiums
- 3. Current market penetration of this company and competitors in the market and in the state
- 4. 2018-2022 risk adjustment results
- 5. Market improvement in coding risk: Capital's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that Capital is disadvantaged in the market. This will drive Capital's relative risk to the market down over time.

Risk adjustment amounts have vary widely over the past 4 years, shown in Exhibit S. 2019-2021 averaged a risk adjustment PMPM of -\$150, while 2022 is +\$7. Because of the wild swings, projected 2024 RA was set well above the 4 year average, but below 2022 results. This is to stabilize the annual rate change while also reflecting the positive financial performance of this small population.

### **Projected Incurred Reinsurance Recoveries:**

In order to calculate the value of reinsurance, the following is provided:

- 1. PA Rate Exhibits, tab II.a show the company-specific BEP claims data.
- 2. PA Rate Exhibits, tab II.b shows the company-specific projected claims. The claims represent BEP claims trended at 7% to the projection period.

### **Exchange Fee PMPM:**

KHPC only offers plans off exchange, so the exchange fee is \$0.

The exchange fee PMPM is calculated as:

```
Exchange Fee PMPM
```

= [Avg 2024 On – Exchange Premium PMPM] × [% Members On – Exchange]

Where

[Avg 2024 On – Exchange Premium PMPM = [Avg 2023 On – Exchange Premium PMPM × (1 + [Avg Proposed Rate Change])

See Exhibit K for the development of the Market Adjusted Index Rate.

### **Retention Items**

### Administrative Expense Load:

- Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of \$0.21 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
- 2. Administrative Expense: Calculated using an allocation method from Capital's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all

costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to Capital individual products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.

- a. Value-Based Benefits (VBB): Standard with each plan, Capital Blue Cross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
  - i. Complete Health Risk Assessment questionnaire and receive a gift card.
  - ii. Participate in an online coaching program and receive a gift card reward.
  - iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
  - iv. Fees are included in overall administrative expense fee discussed above.
  - v. Included in URRT Worksheet 2 "Administrative Expense", and PA Rate Exhibits Table 6.
- 3. Broker Expense: Calculated based on Capital's explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Capital pays commissions for new business and renewal enrollment received during open enrollment and the special enrollment period (SEP), both on and off exchange, and in all geographic areas. Attached please find the proposed 2024 broker agreements redacted versions. Files are as follows:
  - a. Redacted Agent Agreement: "Ind\_23-34 Initial KHP HMO WBEBrokerIndRedacted Supporting 20220517.pdf"
  - b. Redacted Preferred Producer Master Agreement: "Ind\_23-
    - 34\_Initial\_KHP\_HMO\_PPMABrokerIndRedacted\_Supporting\_20230517.pdf"
- Additional Quality Improvement: Additional QI amounts applied in rating equal 0.0%. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

### Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 1, "Profit and Risk", and PA Rate Exhibits Table 6.

#### **Taxes and Fees:**

- Fee for Patient-Centered Outcomes Research Trust Fund (PCORTF): As per the Notice of Proposed Rulemaking for Fees on Health Insurance Policies and Self-Insured Plans for the Patient-Centered Outcomes Research Trust Fund (REG-136008-11), 77 Fed. Reg. 22691: For policy years ending on or after October 1, 2022, and before October 1, 2023, the applicable dollar amount is \$3 per member per year (\$0.25 PMPM). Capital assumes the 2024 projected fee will be trended at 0%.
- 2. Exchange Fee All issuers participating in the state-based-facilitated exchange will remit 3% of premium. The exchange user fee is applied as an adjustment to the Index Rate at

the market level. KHPC only offers off-exchanges products, therefore no exchange fee is applied.

3. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, "Taxes and Fees", and PA Rate Exhibits, Table 6.

See Exhibit H for all retention values.

### Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

- 1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using KHPC's actuarial cost model. KHPC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
- 2. Induced Demand: Please see Table 8. Induced Demand is calculated as:

 $[Pricing AV]^2 - [Pricing AV] + 1.24$ 

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

- 3. Provider Network: The Provider network is the same across all HMO plans.
- 4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
- 5. Catastrophic Plans: Applied to catastrophic plans to reflect lower morbidity. This factor is the same as approved in 2023.
- 6. Adjustment for distribution and administrative costs: Described in <u>Retention</u> section above.
- 7. Tobacco Adjustment: Calculated as the average tobacco factor applied across the risk pool.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

### **Calibrated Plan Adjusted Index Rates**

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current individual enrollment by age in KHPC. Age factors are applied in accordance

with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file Ind\_23-34\_Initial\_KHP\_HMO\_List-Billed\_Supporting\_20230517.xlsb for the calculation.

**Geographic Factor Calibration**: The average geographic rating factor is calculated by taking the Capital member-weighted average by region.

Geographic Factors are changing from 2023 to 2024:

- a. Exhibit O1- Region shows the risk-adjusted loss ratio by region. The data shows that region 9 underperforms regions 6 and 7.
- b. Capital is proposing to incrementally improve the financial performance of 9 without significant disruption to those members.
- c. PA Rate Exhibits Table IV show the resulting average rate change by region, with region 9 approximate 4% above the average rate increase.

**Tobacco Factor Calibration:** Average tobacco factor is calculated using current month member by smoking status data.

The calibration is:

[Calibrated Plan Adjusted Index Rate] = [Plan Adjusted Index Rate] ÷ ([Age Curve Calibration] × [Geographic Factor Calibration] x [Tobacco Factor])

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10. The calibration factors and development are found on Exhibit N.

### **Consumer Adjusted Premium Rate Development**

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

[Member – Level Consumer Adjusted Premium Rate] = [Calibrated Plan Adjusted Index Rate] × [Age Factor] × [Geographic Factor] × [Tobacco Factor]

[Family Consumer Adjusted Premium Rate] = ∑[Member – Level Consumer Adjusted Premium Rate]
 With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

### **AV Metal Values**

All AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

See AV Screenshots included with the submission: Ind 23-34 Initial KHP\_HMO\_AVScreenPrints\_Supporting\_CONF\_20230517

### **AV Pricing Values**

All AV Pricing values were developed using KHPC's actuarial cost model and actuarial judgment as described in section <u>Paid to Allowed</u> above. Differences in health status are not included.

### **Projected Loss Ratio**

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

### **Membership Projection**

The membership projections found in Worksheet 2 of URRT were developed by assuming steady enrollment and similar distribution to current.

### **Projected versus Actual MLR**

Exhibit R shows a history of projected versus actual MLR and Member Months. Projected comes from the 2019-2021 filings. Actual comes from Table 4.

|               | MLR    |         | Member | Months  |
|---------------|--------|---------|--------|---------|
| Calendar Year | Actual | Pricing | Actual | Pricing |
| 2019          | 90.76% | 86.95%  | 15,211 | 26,652  |
| 2020          | 81.03% | 83.72%  | 12,244 | 17,727  |
| 2021          | 68.00% | 86.83%  | 7,216  | 12,420  |

### **Claim Cost Projection**

Exhibit S shows a history of claim cost projection versus actual from 2019-2022 filings.

### **Attachments and Examples**

The following is a list of Exhibits and Data to support this filing:

PA Rate Exhibits Part I through Part VI

#### Table B

Exhibit A – Benefit Summary Exhibit B – Benefit Change Summary Exhibit C – Benefit Categories Exhibit D – Benefit Mix Exhibit D1 – Benefit Additions Exhibit E - Trend Exhibit F – URRT Exhibit G – Paid-to-Allowed Development Exhibit H – Retention Exhibit I – Projected Loss Ratio Exhibit J – Index Rate Exhibit K – Market Adjusted Index Rate Exhibit L – Rate Development by Plan Exhibit M – Plan Adjusted Index Rates Exhibit N – Calibration Exhibit O – Rating Factors Exhibit O1 – Region Exhibit P – Quarterly Base Rates Exhibit R – MLR Exhibit Exhibit S - Claim Cost Projection

### Actuarial Statement

I, ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I,

, ASA, MAAA, do hereby certify that:

- 1. This filing has been prepared in accordance with the following:
  - a. Actuarial Standard of Practice No. 5, "Health and Disability Claims"
  - b. Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans"
  - c. Actuarial Standard of Practice No. 12, "Risk Classification"
  - d. Actuarial Standard of Practice No. 23, "Data Quality"
  - e. Actuarial Standard of Practice No. 25, "Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage"
  - f. Actuarial Standard of Practice No. 26, "Compliance with Statutory and

Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans"

- g. Actuarial Standard of Practice No. 41, "Actuarial Communications".
- 2. The index rate is:
  - a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
  - b. Developed in compliance with the applicable Actuarial Standards of Practice.
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
  - d. Neither excessive nor deficient.
  - e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.
- 3. The percent of total premium that represents essential health benefits were calculated in accordance with actuarial standards of practice.
- 4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.
  - a. The analysis was
    - i. conducted by a member of the American Academy of Actuaries, and
    - ii. performed in accordance with generally accepted actuarial principles and methods.
- 5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.
- 6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- 7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- 8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the Rate Filing Justification.

# **KEYSTONE HEALTH PLAN CENTRAL**

## Standard Questions Individual Rates Effective January 1, 2024

**Question 1 – Membership.** If the projected membership for plan year 2024 significantly differs from the current 2/1/2023 membership, please explain why.

Answer 1. The projected membership for plan year 2024 does not significantly differ from the current 2/1/2023 membership.

## **Question 2 – Experience Period Claims.**

- a. Please confirm that all claims which are capitated have been removed from the experience period claims.
- b. Please confirm that all non-EHB claims have been removed from the experience period claims.
- c. How are drug rebates projected to change from the base period to the rating period? How has this change been reflected in the rate development?

#### Answer 2.

- a. I confirm that all claims which are capitated have been removed from the experience period claims.
- b. I confirm that all non-EHB claims have been removed from the experience period claims.
- c. Drug rebates are projected to be trended at the drug trend. This change has been reflected in the rate development in Exhibit G\_PdtoAll. Paid and allowed claims are net of rebates similar to the URRT.

### Question 3 – COVID.

- a. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.
- b. If there is a COVID adjustment other than 1.0, please provide a quantitative exhibit supporting the factor.

#### Answer 3.

- a. I confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. I also confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.
- b. There are no adjustments in the rate dev due to COVID.

## Question 4 – Trend.

- a. [SG Only] If the Total Annual Trend in Table 3 (weighted by credibility) and the Annual Trend used to calculate quarterly rates in Table 5A differ, please provide an explanation and exhibit in support of the variation.
- b. [SG Only] In Table 5A, if cells K32:M32 are left to equal J32, please explain why that is a reasonable assumption.

## Answer 4.

- a. N/A
- b. N/A

## Question 5 – Retention.

- a. Please confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%. If other adjustments were made in Table 6, cell C57, please provide a demonstration of how this number was calculated and an explanation of the other adjustments included in the calculation.
- b. Please confirm that the Risk Adjustment User Fee PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2024.
- c. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please provide a detailed explanation as to the reason for the difference.

### Answer 5.

- a. I confirm that the federal income tax in calculated using a Federal Income Tax Rate of 21%.
- b. I confirm that the Risk Adjustment User Fee PMPM is consistent with the HHS Final Notice of Benefit and Payment Parameters for plan year 2024.
- c. Brokers are paid more for new business to appropriately compensate them for the additional time required to enroll a new member over an existing member, i.e. marketing and the time to educate a new enrollee over a renewal.

|          | OEP     | SEP     |
|----------|---------|---------|
| New      | \$22.00 | \$22.00 |
| Renewing | \$18.00 | \$18.00 |

### **Broker Commissions**

### **Question 6 – Pricing AVs.**

- a. Please confirm that the Pricing AVs were calculated using a single risk pool (i.e., claims experience is not separated by metal level).
- b. Please identify and support any differences between the company's metallic AV calculator results and the corresponding Pricing AVs.

#### Answer 6.

- a. I confirm that the Pricing AVs were calculated using a single risk pool.
- b. Capital uses Milliman, Inc. Health Cost Guidelines Commercial Rating Structures (for active employees) to develop benefit relativities, which translate into pricing AVs.
   Below, I am pulling from Milliman's methodology description. Anything in quotations is directly from Milliman, Inc.

"Milliman utilizes an enrollment and utilization database of full medical and prescription drug claims experience for over 78 million lives, of which approximately 41 million lives were selected and used as the primary source in developing the [model]. Other sources include a database of inpatient admission representing a large percentage of all admissions nationwide, retail pharmacy information, and other reference data sources." CBC adjusts nationwide data to CBC's average costs and contracting in our service area.

Capital uses the actuarial cost model noted above to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

The reference to actuarial judgment in the memorandum is a general statement to show that the model is evaluated regularly to ensure pricing relativities are reasonable. For this filing, all pricing AVs are developed in the Milliman model.

The pricing AV is calculated relative to the paid-to-allowed ratio. It is important to note that the average pricing AV in Table 10 matches the pricing AV calculated in Exhibit G, so rates are not inflated. Relativities are developed from Capital's manual cost model.

**Question 7 – Expanded Bronze Plans.** Please provide an exhibit which demonstrates that the criteria for expanded bronze plans have been met.

**Answer 7.** Please see the following file for an exhibit which demonstrates that expanded bronze plans have been met.

"Ind\_23-34\_Initial\_KHP\_HMO\_ExpandedBronze\_Supporting\_20230517.xlsx"

### **Question 8 – PAAM Exhibits – Consumer Factors.**

- a. Please provide quantitative and qualitative support for the proposed geographic rating area factors, if different from the previous year.
- b. Please provide quantitative and qualitative support for the proposed network factors, if different from the previous year.

#### Answer 8.

- a. The proposed 2024 geographic rating area factors are changing from 2023. The qualitative and quantitative support are found in the actuarial memorandum, Calibrated Plan Adjusted Index Rates, Geographic Factor Calculation.
- b. The proposed 2024 network factors are changing from 2023, and two additional networks are being offered. The qualitative and quantitative support are found in the actuarial memorandum, Plan Adjusted Index Rates, 3. Provider Network.

### **Question 9 – Public Health Emergency.**

- a. With the Public Health Emergency expected to end on May 11th, how has the rate development been affected? Please provide support for any adjustments, or support for making no adjustments, if applicable.
- b. Furthermore, with the Public Health Emergency scheduled to end on May 11th, has any adjustment been made specifically to the morbidity assumption for Plan Year 2024?
- c. Please provide commentary on how the Company believes services such as COVID vaccinations and COVID testing will be handled in PY24. Within your response please clarify if these services will be considered preventative and covered at 100%.

#### Answer 9.

- a. The rate development has no adjustments due to the Public Health Emergency ending. All projections that would affect the Individual market are assumed to affect CAAC only and have no impact on KHPC.
- b. No adjustments were made to the morbidity assumption for Plan Year 2024.
- c. Beginning with the end of the PHE, Capital will revert to handling COVID testing by application of normal benefits and cost sharing. Coverage for OTC COVID tests will be discontinued. COVID vaccinations will be covered as part of the preventive benefit at 100%.

#### **Question 10 – MLR Exhibit.**

- a. Please complete table below which summarizes the most recent three years of complete MLR information.
  - i. Actual is the final information which was filed for the specified calendar year
  - ii. Pricing is the information which was projected in the final annual filing for the given year (i.e., 2020 pricing information is from the plan year 2020 annual filing submitted in 2019)
- b. Are the MLRs and Member Months between Actual and Pricing comparable? If not, explain.
- c. Does the insurer expect to pay MLR rebates for the 3-year period above?

#### Answer 10.

a. The MLR Exhibit is below:

|               | MLR    |         | Member | Months  |
|---------------|--------|---------|--------|---------|
| Calendar Year | Actual | Pricing | Actual | Pricing |
| 2019          | 90.76% | 86.95%  | 15,211 | 26,652  |
| 2020          | 81.03% | 83.72%  | 12,244 | 17,727  |

|--|

- b. Historically, the projected MLR has been higher than actual due to instability in the Individual market, making both claim and risk adjustment projections difficult to predict.
- c. KHPC does not expect to refund any MLR rebates in the BEP.

#### **Question 11 – Plan of Withdrawal.**

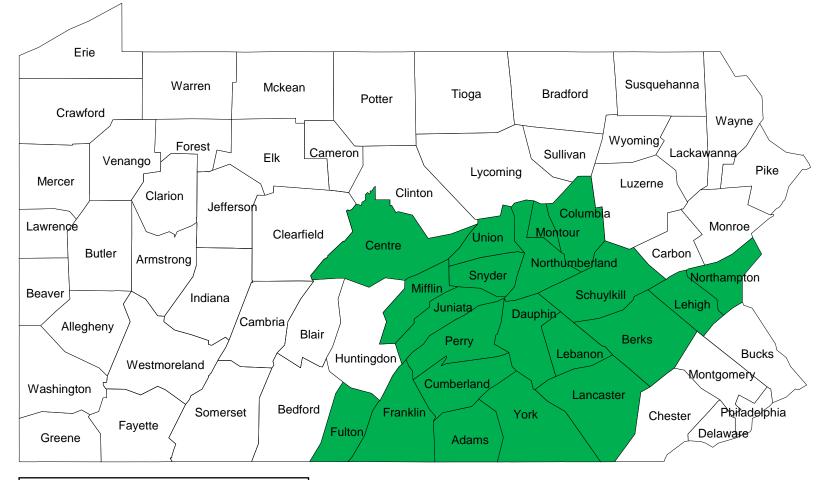

a. Please confirm that a Plan of Withdrawal has been submitted if any plans are being discontinued. For further information regarding the Plan of Withdrawal process, click here. Please send all Plan of Withdrawals to Jeffery Rohaly, wrohaly@pa.gov.

#### Answer 11.

a. I confirm that a Plan of Withdrawal has been submitted for discontinued plans.
