

**Time Insurance Company II**  
**April 6, 2020**

**SERFF #:** MULF-131849945

**Filing Summary:**

Time II Insurance Company filed for an LTC rate increase on 3/1/19 (SERFF # MULF-131849945). Time II was seeking increases on the 4060 Series. In 2000, John Hancock entered into an agreement whereby it would administer and reinsure the Time II LTC block.

Block Name	Forms	Number of PA Policies	Requested Average Increase	Actual Requested Range
Time II 4060 Series Block	4060-PA, 4061-PA, 4062-PA, 4063-PA, 4072-PA, 4073-PA	964	147.50%	25.4% to 235.3%

The Department approved a 20% increase on the block.

**Effective date of rate change:** Renewals on and after 4/6/2020.

The current policies in place are not generating sufficient premium to pay future claims to policyholders. This is a common problem for a number of insurers nationwide because policyholders are keeping their policies longer than expected and are living longer than projected. As a result, policyholders are using more benefits on average than the company anticipated when the policies were originally sold. This means the company has to pay out more for benefits than it originally projected.

In making this decision, the Department considered the projected loss ratio for each block of policy forms, that is, the projected total amount of benefits paid out versus the total amount of premium collected, the reasonableness of the assumptions the company used in its projections, and the company's financial situation. The Department also considered the financial impact this rate increase would pose to consumers, the past rate increases policyholders have faced, and the availability of options to limit the rate increase by reducing benefits.

The company is offering ways for policyholders to limit the rate increase by reducing benefits. The company will let you know your options when they contact you directly about this premium increase.
