Ms. Johanna Fabian-Marks – Special Deputy and Acting Director  
Bureau of Life, Accident and Health Insurance  
Commonwealth of PA – Department of Insurance  
1311 Strawberry Square  
Harrisburg, PA 17120

Dear Ms. Fabian-Marks,

The following is in response to the Department's guidance as of September 20, 2017:

1. Company Name & NAIC#: Geisinger Health Plan – NAIC# 95923
2. Market: Individual
3. On and Off Exchange
4. Effective date of coverage: January 1, 2018
5. Average rate change:
  - a. Including only changes made to the filing in response to Department review: -4.9%
  - b. Including all changes made to the filing, both in response to Department review and including adjustments related to CSR non-payment and the assumption related to uncertainty regarding the individual mandate: 31.3%
6. Range of rate change requested for item #5(b): 0.2% to 34.5%
7. Product: HMO, POS
8. Rating areas: 2, 3, 5, 6, 7 and 9 (NO change from 2017)
9. Metal Levels & Catastrophic Plans: Gold, Silver, Bronze, and Catastrophic plans
10. Current number of covered lives and of policyholders as of 2/1/17: 46,937 covered lives and 34,491 policyholders
11. Number of plans offered in 2018: 8 gold plans, 13 silver plans, 6 bronze, and 5 catastrophic plans (for a total of 32 plans); Number of plans offered in 2017: 8 gold plans, 8 silver plans, and 8 catastrophic plans (for a total of 24 plans)
12. Contract form #: M-152-192-F Rev. 01/18, M-152-176-F Rev. 01/18, M-152-178-F Rev. 01/18, M-152-316-F Dev 01/18, M-152-330-F Dev. 01/18; SERFF #: GSHP-131024095; Binder ID #: GSHP-PA18-125072375
13. HIOS issuer ID: 22444; HIOS submission tracking#: 22444-963015710651495434
14. Summary of changes in response to Department review:
  - a. revised morbidity load to 14%
  - b. reduced margin of 2%
15. Summary of changes to adjust for CSR non-payment and the assumption related to uncertainty regarding the individual mandate:
  - a. application of .94/.7 to each Silver plan to be offered on-Exchange
  - b. introduction of 4 new Silver plans to be offered off-Exchange only
  - c. revised morbidity load by adding an additional 6% to get a 20% morbidity load
16. Summary of changes to introduce Lebanon County plans:
  - a. Reduced Rating Area 9 Factor by 5%, changes normalization of Rating Area
  - b. Reduced Morbidity to neutralize Rating Area change, new factor is 19.1%, which is comprised of 13.1% for the revised morbidity load plus 6% for the uncertainty regarding the individual mandate

- c. Added 5 new plans to cover Lebanon County
- d. Removed 6 plans that will not be offered in 2018

For a detailed explanation of our rate development, please refer to the "actuarial memorandum and attestation" uploaded in SERFF under the "supporting documentation" tab.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

Kurt J. Wrobel, FSA, MAAA  
Chief Financial Officer and Chief Actuary

cc. Sarah MacDerment, FSA, MAAA, Actuarial Director  
Everard Riley, ASA, MAAA, Associate Actuary

## Geisinger Health Plan – Individual Plans

Rate request filing ID # GSHP-131024095 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

### Overview

Initial requested average rate change:	8.1%
Revised requested average rate change:	31.3%
Range of requested rate change:	0.2%-34.5%
Effective date:	1/1/2018
People impacted:	46,937
Available in:	Rating areas 2, 3, 5, 6, 7 and 9

### Key information

#### Jan. 2016-Dec. 2016 financial experience

Premiums	\$122,977,965
Claims	\$112,956,998
Administrative expenses	\$10,494,072
Taxes & fees	\$2,665,322
Company made (after taxes)	<b>\$(3,138,427)</b>

The company expects its annual medical costs to increase 8.7%.

#### How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2018:

Claims:	87.78%
Administrative:	5.97%
Taxes & fees:	4.25%
Profit:	2.00%

### Explanation of requested rate change

Geisinger Health Plan has proposed an overall base rate increase of 31.3% for Individual HMO/POS members renewing in the Marketplace effective January 1, 2018 through December 1, 2018. The actual range of proposed rate increases vary from a minimum of 0.2% to a maximum of 34.5%. The key drivers of this increase are the increase in morbidity of the ACA population, annual claims trend, changes in the federal risk adjustment program, potential changes to the cost-sharing reduction program and the enforcement of the individual mandate. The total projected 2018 administrative costs are higher than those used for the current 2017 rates. As required by federal regulations and using the Federally prescribed MLR methodology, the projected loss ratio exceeds 80%. There were minimal benefit changes proposed for 2018.

# Actuarial Memorandum – Individual HMO/POS

## General Information

### **Company Identifying Information** (as included in Table 0)

Company Legal Name: Geisinger Health Plan

State: Pennsylvania

HIOS Issuer ID: 22444

NAIC Number: 95923

Market: Individual

Effective Date: 1/1/2018

### **Company Contact Information**

Primary Contact Name: Sarah MacDerment

Primary Contact Phone: 570-214-2348

Primary Contact email address: [smmacderment@thehealthplan.com](mailto:smmacderment@thehealthplan.com)

### **Filing Information**

HIOS Submission Tracking Number: 22444-963015710651495434

Contract Form Number: M-152-192-F Rev. 01/18, M-152-176-F Rev. 01/18, M-152-178-F Rev. 01/18, , M-152-316-F Dev 01/18, M-152-330-F Dev. 01/18

SERFF Number: GSHP-131024095

Binder ID Number: GSHP-PA18-125072375

## Rate History and Proposed Variations in Rate Changes

### Rate History

The recent historical rate increases are summarized in the table below.

Year	Average Increase	SERFF ID#
2015	20.1%	GSHP-129625382
2016	20.0%	GSHP-130072597
2017	42.1%	GSHP-130558318

For 2015, the increase was not uniform, but varied by plan. These increased varied from 0% to 37.2%. For 2016, the increases also varied by plan and ranged from 16.1% to 22.5% for an overall increase of 20.0%. The increases for 2017 varied by plan and ranged from 30.4% to 76.0% increase for an overall increase of 42.1%.

### Proposed Rate Increase

This filing applies to HMO and POS products, sold on and off exchange in rating areas 2, 3, 5, 6, 7 and 9. There will be 8 gold plans, 13 silver plans, 6 bronze, as well as 5 catastrophic plans, for a total of 32 plans offered in 2018. As of February 2017, 46,937 covered lives and 34,491 policyholders will be impacted by this filing. The proposed overall rate increase is 31.3% but is not uniform by plan. The increases range from 0.2% to 34.5%. Given the current uncertainty regarding payments of cost-sharing reductions (CSR), we have introduced 5 new Silver plans to be offered off-Exchange only. We have also introduced 5 new HIOS Plan IDs for Lebanon County plans. These plans are shown in Table 10.

For all existing plans, Table 10 also shows the increases at the plan level. These increases vary by plan due to benefit changes necessary to maintain the desired metal level and cost sharing changes mandated by ACA as well changes in pricing factors.

Devised 5/18/17

Revised 9/21/17

### **Average Rate Change**

The average rate change entered as the “percent rate change requested” in the SERFF Rate Review Detail Screen is the same as listed in Table 10, cell AC15. It is the change in the Calibrated Plan-adjusted Index rate (as instructed by the Department). In addition, the change in 21-year-old non-tobacco premium PMPM, as calculated in Table 11, cell AN13, is 36.4%. Finally, the URRT Worksheet 1 “percent increase over Experience Period” (in cell V45) is 64.61% and the “percent increase annualized” (in cell V46) is 28.30%.

### **Membership Count**

**Table 1** shows the average age and the member months in the experience period of calendar year 2016, as well as the average age and the current members as of February 1, 2017 by age range. The projected member months for the rating period are also included.

### **Benefit Changes**

There are many benefit and cost sharing changes to the plans covered by this filing. Benefits for adult eye exam were removed from the experience period as a result of the change in the 2017 benchmark plan for Pennsylvania. These services are estimated to account for .08% of the claims cost. As a result of changes to the AV calculator, several plan’s cost sharing elements were adjusted to maintain the same metal level. To meet the metallic level, plans were adjusted by first changing the out-of-pocket maximum, then the deductible, and finally the copays, while only adjusting as necessary to meet the metallic level and still offer a competitive product.

### **Reason for Rate Increase**

The components of this rate increase are:

- Single Risk Pool experience (i.e. the “Base period allowed claims before normalization” on Table 8) which is more adverse than assumed in current rates;
- Medical Inflation;
- Utilization trend;
- Changes in administrative expenses;
- Changes in ACA fees;
- Changes in covered benefits
- Changes in Risk Adjustment;
- Changes in Morbidity

Each of these components is discussed in detail under the “Adjustments Made to the Data” section of this document and are displayed in Table 8 of the exhibits.

### **Experience Period Claims and Premium**

#### **Paid Through Date**

The Experience Period data provided in the URRT Worksheet 1, Section I and in Table 2 is incurred in calendar year 2016 and paid through February 2017. As discussed below, the data in Table 2 of the exhibits is consistent with the data provided in the URRT in Worksheet 1, Section 1 (except for the incurred claims and the allowed claims).

### **Premiums (net of MLR Rebate) in Experience Period**

Premiums include earned premiums for calendar year 2016 for the Single Risk Pool. Premiums are not reduced by taxes and/or assessments. MLR rebates are not expected to be paid for this block of business. Initial estimates of rebates have been completed utilizing the methodology required for the CY 2016 rebate filing. Estimates suggest that the individual market MLR will be above the minimum MLR target of 80%.

### **Allowed and Incurred Claims Incurred During the Experience Period**

The Experience Period Claims are based on individual non-grandfathered business incurred and paid claims with IBNR added for the tail of claims incurred but not paid. Allowed claims are directly from claim records. However, per the 2018 URRT Instructions, we have added all private reinsurance recoveries back into both our paid and allowed claims (since our claims records were net of these recoveries). For both paid and allowed claims the same IBNR factors were used. The IBNR factors were based on legal-entity level claims completion tables which include individual and group commercial experience. This method is appropriate in order to assure proper credibility and because timing of claims payment to providers does not vary by market or product.

There were no non-EHB benefits in the experience period.

Geisinger outsources several benefits and therefore has capitation expenses. The capitated expenses cover chiropractic services, nurse line, and mental health services including autism. The capitation amount for the experience period is displayed on Table 2 and is included in both the Incurred Claims and Allowed Claims on Worksheet 1 of the URRT. The capitation charges are uniform and do not vary by age. NOTE: The capitation amount paid for our private reinsurance program (net of actual recoveries) has been removed from the capitation amount in Table 2 and moved to the "Change in Other" category in Table 5.

Pharmacy rebates are listed on Table 2. These rebate dollars would be removed from the Ultimate Incurred Claim liability to the insurer and are removed from the Incurred Claims and the Allowed Claims on Worksheet 1 of the URRT.

The estimated risk adjustment for the experience period are based on an external analysis performed by the Department. They estimated the Risk Adjustment transfer payment based on the population risk scores relative to an assumed market average risk score and market average premium.

The Experience Period Reinsurance amount was estimated using the 2016 attachment point of \$90k after which reinsurance payments begin, with a cap of \$250k where after payments stop for high cost enrollees. Reimbursement is set at 50% of a member's claims in that range. These threshold amounts are applied to each member in the Experience Period and a total reinsurance receivable amount is calculated. The estimated Reinsurance recovery is displayed on Table 2.

**Benefit Categories**

<b><u>Benefit Category</u></b>	<b><u>Description</u></b>
Inpatient Hospital	Determined by place of service (Hospital—IP)
Outpatient Hospital	Determined by place of service (Hospital—OP)
Professional	Determined by place of service (Physician’s office)
Other Medical	N/A
Capitation	Claims per Financial Department
Prescription Drug	Claims per contracted PBM

**Credibility of Data**

The existing non-grandfathered business shown in the Experience Period data in Table 2 does not reflect the anticipated risk and composition of the Projection Period. The Credibility Manual Rate is developed using population segments that are in the Experience Period blended with population segments (Grandfathered business) that are not in the Experience Period. The Credibility Manual Rate is a combination of our HMO and PPO experience, giving us an even more credible manual rate. Combining the HMO and PPO Single Risk Pools also aids in consistency between the products. In order to avoid double counting the Experience Period and avoid complicated adjustments to reflect the expected distribution of enrollment in each segment, the credibility of the Experience Period is set to 0.0%. This approach is consistent with the Actuarial Standard of Practice #25.

The Credibility Manual Rate is developed based on the expected enrollment in each of these segments, as summarized in the table below. Each segment is described in more detail in the “Adjustments Made to Data” section below.

<b>Segment</b>	<b>% of population Assumed in Projection Period</b>
ACA Compliant - PPO	100%
ACA Compliant – HMO/POS	100%
Non-ACA Non-GF – PPO	0%
Non-ACA Non-GF -- HMO	75%
Non-ACA GF -- HMO	75%

The credibility manual data is shown in Table 2b. Since the credibility manual data is given a weight of 100%, the “blended” data would be the same as the data in Table 2b.

As requested by the Department, the experience period data for our transitional (non-ACA non-GF) Individual HMO block is:

Premium = \$18,991

Incurred Claims = \$8,023

Member Months = 53.

### **Adjustments Made to the Data**

The following segments are included in the development of the Credibility Manual Rate and adjusted when appropriate.

*ACA Compliant Experience HMO/POS and PPO* – This population is represented in the Experience Period and is expected to continue into the Projection Period. The Projected Allowed Experience Claims are adjusted for benefits changes as described in the section below.

*Non-ACA Individual Non-Grandfathered Experience HMO and PPO* – This population is represented in the Experience Period and a portion is expected to continue into the Projection Period. The Projected Allowed Experience Claims are adjusted to represent the essential health benefits.

*Non-ACA Individual Grandfathered Experience HMO* – This product was withdrawn and a portion of this population transitioned to the ACA Single Risk Pool on April 1, 2016. This segment is not represented in the Experience Period for the Single Risk Pool. Claims for this segment need to be adjusted to represent the essential health benefits, as described below.

### **Morbidity Adjustments**

We worked with the Department to estimate the change in morbidity and are using an adjustment factor of 1.191. This factor is intended to reflect the change in morbidity as well as the impact for the uncertainty of the individual mandate.

### **Changes in Benefits**

Additional benefits due to Essential Health Benefits requirements are included in both of the non-ACA Compliant Experience segments listed above:

- + Pediatric Eye Exam: \$2.98 PMPM
- + Pediatric Eyewear: \$2.19 PMPM
- + 100% coverage of adult physicals: 0.75% of claims
- + Chiropractic Coverage: \$1.85 PMPM
- + Extraction of Wisdom Teeth: \$0.84 PMPM
- + Pediatric Dental: \$1.17 PMPM
- + Pharmacy (optional in non-ACA block): \$0.13 PMPM (\$15.58 @ 0.8% weight)

### **Changes in Demographics**

Each segment of the Projection Period is expected to have a similar demographic distribution as represented in the 2016 Base Period. There is no adjustment for demographic changes to any population segments.

### **Change in Other**

As noted above, the capitation amount paid for our private reinsurance program (net of actual recoveries) has been removed from the capitation amount in Table 2 and moved to the “Change in Other” category in Table 5.

### **Trend Factors**

Experience data was trended using an annual trend of 8.7%. Table 3 shows the breakdown between service category and cost vs. utilization. Table 3 uses the PMPM by service category to weight to develop the total composite trend. Trend factors are projected for unit cost and utilization components:

- Unit cost trend factors are based on recorded anticipated increases in facility and professional fees from the Experience to Projection Period. These increases are composited across all facilities and provider groups.
- Utilization trend projections are based on least-square regression modeling, taking into account historical claims patterns, anticipated economic activity and changes in care patterns.
- Seasonality adjustments are made to the claims to account for changes in work days.
- Further adjustments have been made to the trends to reflect expected changes due to new medical management initiatives that are expected to yield savings in the projection period.

Our trends are analyzed at a higher level than these individual segments and are the same for the experience data and the credibility manual data. Due to the lack of stability in the ACA experience, we based our trends on data from our commercial large group experience. Table 4b is provided for this large group experience.

### **Inclusion of Capitation Payments**

If a capitated benefit is not in the experience period, an adjustment was added to account for those services (e.g. Pediatric dental).

### **Historical Experience**

Table 4 includes the most recent 36 months of data with run out through February 2017. Allowed claims are directly from claim records. As mentioned above, Table 4b displays the large group data that was used to determine the trends used.

As requested by the Department, the most recent 36 months of data for our transitional (non-ACA non-GF) Individual HMO block is:

<b>Non-ACA non-GF HMO</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>
Premium	\$1,380,352	\$616,307	\$18,991
Incurred Claims	\$1,450,470	\$816,036	\$8,023
Member Months	3,383	1,499	53

### **Paid to Allowed Ratio**

The Projected Paid to Allowed Average Ratio is displayed on Table 5. It is determined for the Projection Period based on the member weighted average Pricing AV for each plan and the projected member months in each plan. There are variations between the AV Pricing Values and the AV Calculator values because of different cost structures and management approaches than what is reflected in the national average data used in the AV Calculator.

## **Risk Adjustment and Reinsurance**

### **Experience Period Risk Adjustment and Reinsurance Adjustments PMPM**

As stated above, the estimated risk adjustment transfer payment for the experience period (in Table 2) was based on an external analysis performed by the Department. The Experience Period Reinsurance amount was estimated using the 2016 benefits, applied to member level claims as discussed above.

### **Projected Risk Adjustments PMPM**

Our Individual HMO Exchange population is expected to have had a less healthy risk profile than the state average in 2016 resulting in potential payment transfers from the Risk Adjustment program. Premium levels for 2018 need to incorporate the expected payment from the Risk Adjustment program. We have used the Department's estimated 2016 Risk Adjustment (for our Individual HMO block) for both 2018 filings. The adjustment is shown on Table 5.

### **Projected ACA Reinsurance Recoveries Net of Reinsurance Premium (on URRT)**

This is a holdover from prior years. The reinsurance program ended in 2016 so the expected recoveries is 0 for 2018.

## **Non-Benefit Expenses and Profit & Risk**

### **Administration Expense Load**

Administration expenses are based on activity-based allocation by product for calendar year 2018. This methodology applies for all variable costs and all fixed costs. Table 6 provides a breakdown of the administrative expenses, as well as the taxes and fees. The administrative expenses are a consistent percentage of premium and do not vary by plan. The proposed percentage of premium for 2018 is shown in both Tables 6 and 10.

### **Profit & Risk Margin**

The risk margin is set at 2% of premium.

### **Taxes, Fees, and Subsidies**

Table 6 displays these items. For 2018, the federal government will collect the Health Insurer Provider Fee so it is included in this development.

### **Projected Loss Ratio**

The anticipated loss ratio is **93.3%** in aggregate as shown below using the Federally-prescribed MLR methodology:

MLR Numerator = Projected Claims + Quality Initiatives = 616.08 + .0146\*691.28 = 626.17

MLR Denominator = Projected Premiums – Taxes and Fees + Risk Adjustment = 691.28 – 29.38 + 9.27 = 671.17

Federal MLR = 626.17 / 671.17 = 93.3%

The Quality Initiatives amount is based on the latest estimate for this product.

## **Development of Projected Index Rate, Market-Adjusted Index Rate & Total Allowed Claims**

### **Single Risk Pool**

The Single Risk Pool has been established in accordance with the requirements in 45 CFR 156.80(d) as was discussed previously in the Experience Period Premium and Claims section. The Experience Period includes transitional policies and the Projection Period includes transitional policies only to the extent that we anticipate members will transition into the ACA Compliant products.

### **Index Rate**

The Experience Period Index Rate is based on the manual Allowed Claims PMPM and is the starting value on Table 5. The Credibility Manual Rate is a combination of our HMO and PPO experience, giving us an even more credible manual rate. No benefits were covered in addition to Essential Health benefits in the policies being offered.

The Projected Index Rate for this Single Risk Pool is the Adjusted Projected Allowed EHB Claims PMPM and is the manual rate. The projected claims reflect the trend and benefits described earlier in this memorandum. There are no benefits covered in addition to Essential Health benefits in the policies being offered.

### **Market Adjusted Index Rate**

The Market Adjusted Index Rate and Market Adjusted Total Allowed Claims are calculated in Table 5. The Projected Index Rate is converted to a paid basis by multiplying by the Projected Paid to Allowed ratio (described above). The allowable market-wide modifiers (risk adjustment and Exchange User Fees) are added to this paid basis PMPM. This PMPM is then converted back to an allowed basis, again using the projected paid to allowed ratio. Any non-EHB claims would then be added to this value. We have none, so this PMPM is the Market-Adjusted Projected Total Allowed Claims PMPM.

### **Normalized Market-Adjusted Projected Allowed Total Claims**

The Market-Adjusted Projected Allowed Total Claims is normalized using the projected average factors for age, geography, tobacco, benefit richness (induced demand) and network. These average factors for 2017 and 2018 are displayed on Table 7.

### **Projected Membership**

Members were projected for each plan to be sold in 2018. Sales and marketing were consulted in developing these projections. Overall, membership is expected to remain approximately at the current levels, so February 2017 membership is expected to best represent calendar year 2018 for *existing* plans. Members from discontinued plans are assumed to move to the plan where they are mapped, in general. Since all new plans also need projected members, we assumed each new plan would have five members. This movement was modeled based on internally developed expectations. The projected membership for the new plans is added to the February 2017 membership to get the total 2018 projected membership. Projected membership is used to calculate the normalization factors discussed below.

## **Plan Factors**

### **Age Factor**

The federal age curve, as shown in Table 12, is used to determine a normalization factor to account for the age mix of business used in generating the Index Rate. The average age factor includes a factor of 0 for non-billable members. The average factors for 2017 and 2018 are shown on Table 7.

### **Geographic Factor**

The geographic rating area factors used to determine premium rates are shown on Table 13. The normalization factor is determined using these factors weighted using projected membership by area.

### **Tobacco Factor**

A standard 10% load is applied for applicants who indicate tobacco usage by affirmatively answering the question—“Have you used tobacco at least four times a week for the past six months?” This load assumption was validated using the study “*Impact of height, weight, and smoking on medical claims costs*”, a research report done by Milliman to update their Medical Underwriting Guidelines in April 2009. We utilized the 2016 ACA compliant population to determine the percentage of members that admit to the use of tobacco and pay the increased premium for their entire contract in 2016. The average tobacco factor is shown on Table 7. Table 12 shows the age bands, age factors and tobacco factors where it demonstrates that the tobacco factors are uniform across all age bands (for 18+).

### **Benefit Richness (Induced Demand)**

Induced Demand factors are applied to each metallic to reflect the expected utilization, not the expected health status. To ensure revenue neutrality, a normalization factor is applied. The average benefit richness factor is shown on Table 7 and the factors by plan ID are shown below (under the “Plan Rate Development” section).

### **Network Factors**

Only one network rating factor per market is used for each network. In 2017, we introduced a Select Network which features efficient cost providers. There are separate HIOS ID’s for these plans. A network factor of .95 is applied to these plans (in Table 10) to represent the cost savings of the providers in this network. The average network factor is calculated using the projected enrollment in this Select network and the .95 network factor. This is shown in Table 14.

### **Catastrophic Eligibility**

Given the current uncertainty regarding payments of CSRs, we have applied the Department’s factor of .94/.7 to each of our Silver plans that are to be offered on-Exchange in 2018. The application of this factor is shown in column O in Table 10.

### **Service Area Composition**

All the counties and services areas are defined in the QHP Service Area Template.

### **Components of Rate Change**

Table 8 shows the components of the Rate Change developed in this filing. The key drivers of this increase are the increase in morbidity of the ACA population, as well as annual claims trend and changes in the federal risk adjustment program. Table 9 supports the calculations in Table 8.

### **Plan Rate Development**

The projected market-adjusted index rate is used to develop the calibrated plan adjusted index rates in columns Z and AA of Table 10. Each plan's rate is developed as the product of the market-adjusted index rate, the allowable factor and calibration for age and geography.

Each plan is identified as either modified, new, or "discontinued & mapped". Discontinued plans are mapped to plans that will be in existence in 2018. Column G lists the metallic tier. This is the value we calculated using the HHS Actuarial Value Calculator. Screen shots of this calculation are provided in the file "GHP Indiv Screen Shots 20170922.pdf." The Actuarial Certification, at the end of this document, includes attestation that the Federal AV calculator was used to determine the metallic values. Please also refer to the "Unique AV Plan Justification" documents for further details. As directed by the Department, columns L, N and P were normalized using projected (CY2018) membership. The supporting exhibit for column L ["Benefit Richness (induced demand)"] is shown below:

Induced Utilization Exhibit								
Plan ID	Metal Level	Projected Membership	Projected Allowed Claims	Projected Paid Claims	Paid to Allowed Factor	Average Tobacco Factor	AV & Cost Sharing Factor	(8)/(6*7)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
22444PA0010035	Gold	2,640	\$27,818,813	\$24,786,563	0.8910	0.990	0.9495	1.0764
22444PA0010036	Gold	113	\$1,190,730	\$1,060,940	0.8910	0.990	0.9495	1.0764

**Plan Premium Development for 21-Year-Old Non-Tobacco User**

The projected calibrated plan-adjusted index rate is used to develop the 21-year-old non-tobacco premium in the individual market. These rates are displayed on Table 10, column AA. Table 11 uses the 21-year-old non-tobacco premiums from Table 10, adjusted by the current approved geographic factors (from Table 13), to develop the 21-year-old non-tobacco premiums by rating area.

**Consumer Adjusted Premium Rate Development**

The Consumer Adjusted Premium Rates are developed by applying the following allowable rating factors to the *calibrated* Plan Adjusted Index Rates:

1. Age – reflecting the HHS defined age curve
2. Geographic – as discussed previously
3. Tobacco status – as discussed above.

The final Premium rates for *all* filed benefit plans are displayed in the QHP Rating Template.

**Composite Rating**

Composite rating is not used.

**Terminated Plans and Products**

No products are being terminated. Terminated plans are noted on Table 10.

**Plan Type**

All plan offerings meet the plan type definitions available in the URRT Worksheet 2, Section I.

**Changes to URRT**

We acknowledge that the URRTs submitted with both the first and the final filings in SERFF, will also be updated in HIOS.

**Reliance**

We relied on the Department’s 2016 projected risk adjustment payment to develop the estimate for 2018.

**Warning Alerts**

The following Warning Alert as noted in Worksheet 2 is described below.

**Total Premium row 83:** As noted above, the total premium in row 83 of Worksheet 2 reflects the application of the Department’s factor of .94/.7 to each of our Silver plans that are to be offered on-Exchange in 2018 (to account for uncertainty regarding payments of CSRs). The “Single Risk Pool” premium in row 43 of Worksheet 1 does not include this adjustment.

**Additional Exhibits**

The following required exhibits have been uploaded in SERFF under the tabs noted next to the exhibit:

- Department Plan Design Summary – submitted under the “Rate/Rule Schedule” tab;
- Service Area Map – submitted under the “Supporting Documentation” tab.

\*\*\*\*\*

## Actuarial Certification

I certify that:

1. I am a member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform this work.
2. The projected Index Rate is:
  - a. In compliance with all applicable state and Federal regulations including 45 CFR 156.80(d)(1)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice,
  - c. Is reasonable in relation to the benefits provided and the population anticipated to be covered,
  - d. Is neither excessive nor deficient based on available information.
3. The Index Rate is used to develop the plan level rates using only the allowable modifiers in accordance with 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2).
4. The essential health benefits are determined in accordance with 45 CFR Part 156 and that the percentage of total premium (in Worksheet 2, Sections III and IV of the URRT) that represents the essential health benefits is calculated in accordance with actuarial standards of practice.
5. The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
6. The Federal AV Calculator was utilized, with an acceptable alternative methodology when appropriate, to determine the AV Metal Values shown above and in Worksheet 2, Section I of the URRT, following ASOP 50. Please refer to the "Unique AV Plan Justification" document for further details.
7. All factor, benefit and other changes from the prior (2017) approved filing have been disclosed in the actuarial memorandum.
8. New plans have not been considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
9. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2018 Rate Filing Justification.

I confirm that the rates submitted comply with the ACA rating requirements and with the Single Risk Pool per market requirement. The URRT does not demonstrate the process used to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

# Completeness and Redaction Justification Checklist

## Instructions for Completion and Redaction Justification Checklist

This checklist is required for all issuers submitting ACA-Compliant rates for 2017 comprehensive major medical rate filings and should be submitted, as supporting documentation, with each 2017 ACA-Compliant comprehensive major medical rate filing. The checklist is organized by heading, section and subsection as outlined in the Draft 2018 ACA-Compliant Health Insurance Rate Filing Guidance (Guidance) released on February 8, 2017.

### "Completed" Column

The first input column is labeled "Completed". In order for the filing to be considered complete and ready for department review, X must appear in each field in the column, except where data tables are marked "if applicable". The X indicates that the actuary has read the Guidance and has provided the requested information and data, as required in the PA Actuarial Memorandum and Rate Exhibits and further, that the data templates are completely and appropriately populated.

### "Redaction Justification" Columns

The "Redaction Justification" section contains three columns. If the issuer's filing contains redacted information or data in the named section, "Y" must be populated in the "Redacted" column.

New this year, each issuer should submit a "Public Rate Filing PDF." The PDF document must contain all required documents, tables and exhibits. If the issuer chooses to make the limited redactions anticipated by the Department, those redactions should be made only in this document. The "Page # in Public PDF" section should reference the page number of the Public Rate Filing PDF where the redacted information and/or data can be located.

If any information is redacted, a justification must be submitted that specifically justifies why that information should be redacted. Correspondingly, the "Justification" column should be populated with a "Y" in any rows where it is indicated that information is redacted, and with an "NA" if information is not redacted. To reiterate the redaction criteria contained in the Guidance, only information that is trade secret or confidential commercial or financial information as defined in HHS's Freedom of Information Act (FOIA) regulations at 45 CFR§ 5.65 may be redacted.

Consistent with guidance provided during the 2017 annual rate review cycle, the Department does not anticipate redactions other than the following items:

1. AV screenshots
2. Statements specifying a company's anticipated risk level in relation to the state average risk level (e.g., the underlined portion could be redacted in the following statement: "we expect the risk level of membership to be X% higher/lower than the state average risk level")
3. Opining actuary's name
4. Specific provider contracting information (note: such information was not submitted in plan year 2017 rate filings and the department does not anticipate receiving such information in plan year 2018 rate filings)
5. Commission schedules

Please remain cognizant that non-redacted information and data must be submitted for review.

You may contact Johanna Fabian-Marks at [jfabianmar@pa.gov](mailto:jfabianmar@pa.gov) if you have any questions regarding this checklist.

## **HIOS Part 2 Consumer Justification Narrative Individual HMO/POS**

Geisinger Health Plan has proposed an overall base rate increase of 31.3% for Individual HMO/POS members renewing in the Marketplace effective January 1, 2018 through December 1, 2018. The actual range of proposed rate increases vary from a minimum of 0.2% to a maximum of 34.5%. The key drivers of this increase are the increase in morbidity of the ACA population, annual claims trend, changes in the federal risk adjustment program, potential changes to the cost-sharing reduction program and the enforcement of the individual mandate. The total projected 2018 administrative costs are higher than those used for the current 2017 rates. As required by federal regulations and using the Federally prescribed MLR methodology, the projected loss ratio exceeds 80%. There were minimal benefit changes proposed for 2018.

2018 Rates Table Template v7.1		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.			
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

22444PA0040084 Rating Area 9	Tobacco User/Non-Tobacco User	62	838.34	922.09
22444PA0040084 Rating Area 9	Tobacco User/Non-Tobacco User	63	861.40	947.48
22444PA0040084 Rating Area 9	Tobacco User/Non-Tobacco User	64 and over	875.40	962.94

1. Please confirm HIOS submission and update the cover letter to include the HIOS submission tracking number.

The RRJ Part I, II & III have been submitted in HIOS. The HIOS submission tracking # is 22444-963015710651495434.

2. Please confirm that you have tested to ensure that the PID rate exhibits and the Federal rates template included in this filing and the binder are all the same.

Confirmed.

3. The Rate Rule Schedule tab show 34,491 policy holders. Be advised that the 2018 Guidance, consistent with the 2017 guidance, states that the policy holders in the Rate/Rule Schedule tab should show data for the number of covered lives. Please review and revise.

The Rate Rule Schedule tab will be revised to reflect the 46,937 covered lives.

4. Please provide the experience period data for the manual claims data in the same format as Worksheet I, sections I and II in the URRT.

This data is contained in the file "Manual Claims CY2016 Data" and has been uploaded in SERFF.

5. The following questions are related to the morbidity adjustment equal to 1.200 which is being utilized in the Index Rate development:

a. It is shown that the estimated risk score for members who were active in 2016 and retained in 2017 deteriorated significantly. Please provide the estimated CY 2017 risk score for any newly enrolled members, demonstrating that the risk scores for those members are also at the high level being observed for the retained members.

We do not have an estimate for CY2017 yet.

b. Please provide the CY 2016 average risk score for those members who were active in 2016 and were retained in 2017, split by subsidized and unsubsidized members.

The CY2016 average risk scores, split by subsidized and unsubsidized members, appear on page 5 of the Actuarial Memo. The last column "CY 2017 estimated risk score (Renewing members only)" is the CY2016 average risk score for those members that were retained in 2017.

c. It is noted that Geisinger expects the entire state wide risk pool to deteriorate even more than that being observed internally. Please provide any quantitative and/or qualitative justification which is available to support this assumption.

We look forward to working with the Department to refine our morbidity assumption. Given that Geisinger holds less than 10% market share in the state, we hope the Department can assist us with this estimate.

d. Please demonstrate quantitatively how the projected risk adjustment transfer PMPM for 2018 was adjusted to reflect the assumed increase in morbidity of the Individual book of business.

Given the interdependent nature of morbidity and the risk adjustment, for simplicity, we've only adjusted our morbidity assumption. The impact of morbidity has not been explicitly reflected in

our 2018 risk adjustment transfer estimate. We are simply using the 2016 actual risk adjustment transfers as our best estimate for 2018.

6. Please provide a detailed quantitative exhibit displaying the development of the Changes in Benefit adjustment being utilized in the Index Rate Development.

This exhibit is contained in the file "Changes in Benefit Adjustment" and has been uploaded in SERFF.

7. Please review the Change in Benefit expenses and discuss the cost differences in Pediatric eye exams and pediatric dental in this year's filing compared to the 2017 filing.

The cost estimate for pediatric eye exams has been updated for 2018 to reflect more current projections from a national consulting firm. The pediatric dental cost estimate was updated to use cost projections from our third party dental vendor, along with the number of children under age 18 currently enrolled in our Exchange.

8. Page 6 of the PA AM - Changes in Benefits- lists additional benefits due to EHBs requirements included in the experience of both non-ACA. Are these capitated services? Under which URRT benefit category are these services included? Please provide the projected period pmpm for these services.

Only two of these "additional benefits" are capitated (i.e. pediatric dental and chiropractic). The rest of the services are not covered under our non-ACA Individual product and were thus included to bring them up to the EHB-required level. The URRT does not show the development of the Credibility Manual PMPM and therefore additional EHB benefits included in the Credibility Manual PMPM are not shown on the URRT. Table 5 shows the Single Risk Pool Adjustment Factors applied to our Unadjusted Projected Allowed EHB Claims PMPM, which is the Credibility Manual PMPM before allowable adjustments. The additional EHB described on page 6 of the Actuarial Memorandum is included in the "Change in Benefits" category on Table 5. The Adjusted Projected Allowed EHB Claims PMPM on Table 5 equals the Credibility Manual Total PMPM on the URRT.

The projected period PMPMs are shown on the top of page 6 of the Actuarial Memo.

9. Page 6 of the PA AM, Inclusion of Capitation Payments, states if a capitated benefit is not in the experience period an adjustment was added to account for those services (pediatric dental). Is this the case with Geisinger? If so, please show all adjustments and discuss where they are included in the filing. Additionally, why is pediatric dental specifically called out when this benefit was included in the benefit changes identified on the top of page 6?

Please see Item #8. It was our understanding that the instructions wanted us to refer to this (i.e. pediatric dental) in both the discussion of capitated benefits and in the discussion of benefit changes since it applies to both categories.

10. Page 3 of the PA AM discusses capitated expenses and includes reinsurance expenses for private reinsurance.

a. Please show the experience period pmpm and the projected rating period pmpms associated with each named expense category (chiropractic, nurse line, mental service including autism and reinsurance).

A file showing these adjustments has been uploaded to SERFF (see "Capitated Expenses").

b. Remove the reinsurance expense. As an Effective Rate Review State, Pennsylvania has determined that neither reinsurance expenses nor recoveries should be included in allowed/incurred claims. These items should be included elsewhere.

We can move the reinsurance expenses out of the Allowed Claims Index rate and slot them to the "Other" category (as directed in the 2018 URRT Instructions). There will be no net impact on the 2018 rates themselves.

c. What is the basis for the assumed 5% capitation trend in Table 3 and the URRT?

This trend is based on an average of expected capitation increases.

11. Please explain why it is appropriate to apply a 1.000 network adjustment in the development of the Index Rate, despite introducing a new low-cost network, as shown in Table 14 of the PA Actuarial Memorandum Rate Exhibits excel file.

The "Select" network is not "new" in that it was approved in 2017 for our Small Group PPO product. The "Select" network plans are priced at a lower premium to the member as reflected in the "provider network" column of Table 10. The overall provider network factor in Table 10 is "1.0" since the "Select" plans are new for 2018 and have no enrolled members.

12. A demographic adjustment equal to 1.000 is being applied in the development of the Index Rate. Please provide the distribution of membership by age for those members underlying the 2016 manual rate as well as for those currently in force in 2017, demonstrating that it is reasonable to assume the demographic mix should not be expected to change substantially between 2016 and 2018.

A file showing these membership distributions has been uploaded to SERFF (see "Manual CY2016 Membership" and "Current Manual Membership"). The average age factors changed only slightly (i.e. within 1%). Given the uncertainty of the membership distribution for 2018, we decided to not adjust for this.

13. Please provide a quantitative exhibit demonstrating the development of the risk adjustment transfer PMPM, as shown in Table 5 of the PA Actuarial Memorandum Rate Exhibits excel file. Please explicitly show that the statewide average premium is adjusted downward by a factor of 0.860 to account for the change to the risk transfer formula as outlined in the 2018 Benefit and Payment Parameters Notice.

We do not know what to expect for 2018 so our best estimate, at this time, is to use the full 2016 risk adjustment transfer. While it's acknowledged that the risk adjustment formula will be adjusted to remove admin expenses, the overall impact of the risk adjustment transfer is still unknown.

14. Please justify quantitatively how the paid-to-allowed ratio shown in Worksheet I of the URRT was developed.

This ratio is also used in Table 5 of the PA Actuarial Memorandum Rate Exhibits excel file. The derivation of this ratio can be seen in Table 10, cell K15 (i.e. it is the weighted average of the pricing AV's and the projected membership as calculated by plan).

15. The following questions pertain to Market Adjusted Index Rate calibration factors, as shown in Table 7 of the PA Actuarial Memorandum Rate Exhibits excel file.

a. Please quantitatively demonstrate the calculation of the age curve calibration factor, additionally providing the projected distribution of members by age. Please clarify whether an age rating factor of 0.000 was assumed for members expected to pay no premium (i.e., for cases where there are more than three dependent children under the age of 21 within a given family).

A file showing the development of the age calibration factor has been uploaded to SERFF (see "Age Calibration"). As referenced on page 9 of the Actuarial Memorandum, we did account for this regulation in the development of our average age factor, i.e. a factor of "0" was used for all "non-billable" members (e.g. all dependent children beyond the third child on a family contract). This calculation is illustrated in the file noted above.

b. Please quantitatively demonstrate the calculation of the geographic calibration factor, including the assumed distribution of members by rating region.

A file showing the development of the geographic calibration factor has been uploaded to SERFF (see "Area Calibration").

c. For the individual products, there is a significant difference in the age calibration factors being used between Geisinger Health Plan (1.862) and Geisinger Quality Options (1.582), implying that the demographic mix of the membership for the two entities is projected to be significantly different in 2018. Similarly, there is a fairly sizable difference between the geographic calibration factors (i.e. 1.047 for GHP and 0.982 for GQO).

i. It does not appear that these demographic and geographic differences are being accounted for in the development of the Index rate for each entity, given that both have the same projected Index Rate (i.e. \$804.39). Please explain why this is appropriate.

That is correct, the Index Rate is developed using all available experience. This includes combining our HMO, POS and PPO products from both entities. We believe this approach is appropriate for these reasons:

- due to the small size of our single risk pool in each entity,
- we experience over 50% turnover from year to year,
- many members transition between our products/entities year over year, and
- we have withdrawn our PPO products from the federal marketplace in 2017.

It is our interpretation that an issuer should use all available information to estimate the total Individual market projected allowed PMPM in the state. Page 4 of the Actuarial Memorandum describes that we believe that combining the experience of Geisinger Health Plan and Geisinger Quality Options is a better representation of the Single Risk Pool. Our intention is to accurately project the Single Risk Pool experience based on all available information for that Single Risk Pool and we believe that combining the experience of HMO, POS and PPO products will accomplish that.

ii. If the projected demographic and geographic differences are being accounted for elsewhere in the rate development (prior to applying the calibration factors), please explain where in the process this is occurring.

Demographic and geographic differences by entity are captured in the calibration factors. The Index Rate for each entity is the same based on our approach explained above.

d. Please quantitatively demonstrate the calculation of the tobacco calibration factor, including the assumed distribution of tobacco/non-tobacco users by age.

A file showing the development of the tobacco calibration factor has been uploaded to SERFF (see "Tobacco Calibration").

e. Please quantitatively demonstrate the calculation of the induced calibration factor. Please quantitatively show and provide a detailed description as to how the induced demand factor shown in Table 7 relates to the induced utilization factors calculated in the Induced Utilization Exhibit shown in the Actuarial Memorandum. Please provide this data in Excel.

The Induced Utilization Exhibit shown in the Actuarial Memorandum shows the factors after normalization has been applied. Therefore, the result is a 1.0 at the bottom of column (9). The file provided in Excel named "Induced Utilization Exhibit 2018\_GHP\_Indiv.xlsx" shows this development with the pre-normalization factors calculated.

16. The following questions relate to the retention items populated in Table 6 of the PA Actuarial Memorandum Rate Exhibits excel file.

a. Please describe the differences in expense structures between the Geisinger Health Plan and Geisinger Quality Options entities.

There are basically no differences in expense structure which is why the same admin expense PMPM (for the "General and Claims" category) was used for both Individual HMO & Individual PPO.

b. Please provide a quantitative exhibit demonstrating the development of the assumed Health Insurer Fee and the federal income tax as a percent of premium.

A file showing the development of these fees/taxes has been uploaded to SERFF (see "Taxes & ACA Fees").

17. Table 6, cell B54, indicates the PCORI fee is ~~\$0.07~~ \$0.18. The 2018 PCORI pmpm amount should be \$0.20. Please revise. Also, review the percent of premium in cell C54 to ensure the yielding amount is consistent with \$0.20.

The PCORI fee for the projection period is an estimate based on the annual fee for plans that end on or before October 1, 2017 plus inflation. If the PID requests that we change our estimate to \$0.20 PMPM we will update the rate filing documents to reflect this amount. If we update this PMPM amount, the percent of premium will change as well.

18. Please show the development of the 1.003 Other adjustment in cell D19 of Table 5.

This exhibit is contained in the file "Changes in Benefit Adjustment" and has been uploaded in SERFF.

19. Regarding the credibility of data on page 4 of the PA AM, for each identified segment with the exception of the non-ACA Non-GF HMO, please provide the number of member months, the associated

total incurred claims and premium. Also, please discuss why only a percentage of the population is assumed in the projection period.

This data is contained in the file "Manual CY2016 Data-by segment" and has been uploaded in SERFF. A weight of 75% was applied to the non-ACA Individual HMO data since not all members transitioned to our ACA products.

20. Please show the development of the average commission and circumstances in which broker commissions will be paid and if they will vary based on geographic location, metal level, plan, open enrollment vs SEP enrollment, etc. Additionally, the current and 2018 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.

The commission fee (paid to brokers for Individual ACA) does not vary by any of the items mentioned above. It only varies depending on whether the ACA member is "new" or "renewing". The broker agreements are considered *proprietary* documents.

21. Table 14 shows a new narrow network and factor. Please discuss the network and the development of the factor.

The "Select" network is not "new" in that it was approved in 2017 for our Small Group PPO product. The "Select" network plans are priced at a lower premium to the member as reflected in the "provider network" column of Table 10. The overall provider network factor in Table 10 is "1.0" since the "Select" plans are new for 2018 and have no enrolled members.

22. The cover letter indicates that 29 plans will be offered in 2018, however, only 16 AV screenshots have been provided.

All 29 plans to be offered in 2018 are included on the 16 AV screenshots. We have several plans with the exact same cost-sharing (and AVC values) but different HIOS ID #'s. The multiple HIOS ID #'s for the 29 plans are displayed under the "Plan Description, Plan HIOS ID" section of the screenshots (i.e. bottom right side of exhibit).

1. The response to question 5c did not meet the requested level of detail. Please provide any quantitative justification available to demonstrate the development of the assumption that the entire state wide risk pool will deteriorate an additional 7.6% (i.e.  $[1.20 / (1.905 / .1.770)]$ ) beyond that which has been observed internally (i.e. from CY 2016 to CY 2017).

We are deeply concerned with the direction of the overall risk pool for the ACA market. Since we cover only a small fraction of the statewide ACA members, we do not have visibility of the entire market. As we learned from Cherri Sanders-Jones on 7/11/2017, we understand that the Department is evaluating our request for assistance in refining our estimate of the morbidity estimate for the entire risk pool.

2. The following questions pertain to the response to question 13.

a. The CMS 2016 benefit year risk adjustment transfers were released on 6/30/2017. As stated in the response to question 13, Geisinger expects to assume the same risk adjustment transfer in 2018 as in 2016. Please update the rate development to reflect the updated risk adjustment transfers from the 6/30/2017 CMS risk adjustment transfer report for the 2016 benefit year. Provide narrative and an Excel spreadsheet demonstrating the development and assumptions.

The June 30th Risk Adjustment Program payment notices from CMS match the transfer payment estimates provided to Geisinger from the PID on May 12th. Geisinger utilized the transfer payment estimates provided by the PID.

b. Please confirm whether any anticipated changes in the statewide average premium (relative to calendar year 2016) were considered in the projected 2018 risk adjustment transfer amount, including whether the 0.860 state wide average premium adjustment as outlined in the 2018 Benefit and Payment Parameters Notice, was accounted for.

We do not know what to expect for 2018 so our best estimate, at this time, is to use the full 2016 risk adjustment transfer. While it's acknowledged that the risk adjustment formula will be adjusted to remove admin expenses, the overall impact of the risk adjustment transfer is still unknown. Also, the substantial increase in premiums in 2017, and expected increases in 2018, will increase any risk adjustment transfers and negate this reduction of 0.860.

3. The following questions relate to the responses provided to question 15.

a. Please explain the purpose of and quantitatively demonstrate the development of the 0.777 "pre-normalization" adjustment shown in cell K3 of the "Induced Utilization Exhibit 2018\_GHP\_Indiv" file.

The 0.777 factor is the projected weighted average factor to normalize the induced utilization factors. This is demonstrated in the "Induced Utilization Exhibit 2018\_GHP\_Indiv" file and is necessary to keep the average allowed PMPM a true weighted average. That is, the induced utilization factors must not change the total allowed PMPM. This normalization ensures that is true by making the weighted average a 1.000, as demonstrated in the "Induced Utilization Exhibit 2018\_GHP\_Indiv" file.

b. Please reconcile the membership counts provided in the “Tobacco Calibration” (46,042), “Area Calibration” (46,937), and “Induced Utilization Exhibit 2018\_GHP\_Indiv” (47,022) excel files.

The total members shown in “Area Calibration” of 46,937 also matches Table 1 of the “PA Actuarial Memorandum Rate Exhibits 2018\_GHP\_Indiv.xlsx” file. This is the current member count as of 2/1/2017. The “Induced Utilization Exhibit 2018\_GHP\_Indiv” showing 47,022 is projected members. Our projected membership is increased to include additional members in plans with no enrollment and new plans. The “Tobacco Calibration” showing 46,042 is from an alternative data source that captures tobacco status. Unfortunately, a small amount of members are unavailable from this alternative data source. Since the factor is applied as a relativity, we’ve assumed that the rate of tobacco use is the same for members that are not captured in this alternative data source.

c. As confirmed in your response to question 15(c)(ii), the experience of the HMO, POS, and PPO products has been combined for the purpose of developing rates for 2018. Further, the projected 2018 Index Rate which has been developed is the same between the GHP and GQO Individual rate filings. Because the projected Index Rate is the same (i.e. \$804.39 PMPM) between the two filings, this implies that the projected mix of membership by age and gender, geographic rating area, tobacco use, and morbidity is also being projected to be the same.

i. Please confirm that this is correct. If so, it is our expectation that the projected risk adjustment receipt PMPM, age calibration factor, geographic calibration factor, and tobacco use calibration factor would also each be the same between the two filings. In that case, please revise the proposed rates and corresponding rate development exhibits to reflect these four items being the same between the two filings.

This is correct, we believe the combined GHP and GQO experience projected to 2018 is our best estimate of the projected total allowed costs, or Index Rate. We do not believe that (ii) below is a better approach, so we have revised the filings to reflect your expectations on calibration. For risk adjustment, we have updated our analysis and exhibits to use the Individual HMO PMPM from 2016 as our best estimate for 2018 for both products. Given our drastic drop in PPO enrollment, from over 6,000 members to less than 400, and that only a minority of the members moved to our own HMO product, we feel using the extremely high risk adjustment transfer for PPO of over \$100 PMPM would be significantly risky. We believe that, in addition to the calibration factors and risk adjustment, we must also normalize the induced utilization factors to reflect the combined experience of GHP and GQO.

ii. If the projected mix of membership is not expected to be the same, please revise the Index Rate for each filing such that it reflects the projected mix of membership by age and gender, geographic rating area, tobacco use, and morbidity specific to each product (i.e. HMO/POS and PPO)

We believe the combined GHP and GQO experience projected to 2018 is our best estimate of the projected total allowed costs, or Index Rate. We do not believe that the product differences between GHP and GQO warrant a different Index Rate. The differences in the products offered can be captured in the factors allowed to develop premium after the Index Rate, i.e. taxes, AV, etc.

4. Given that the manual rate reflects the claims experience of the HMO, POS, and PPO products combined, it is not clear why the GHP Index Rate was not adjusted to reflect the cost level associated with a different product mix (i.e. HMO and POS only).

a. Please provide the estimated difference in costs (on a normalized basis) which would be associated with a product mix of HMO and POS only as compared to HMO, POS, and PPO combined.

There is no difference in contracted costs for these products at Geisinger.

b. Please either (1) revise the GHP Index Rate and resulting rates to reflect the difference in costs that would be expected for a product mix of HMO and POS only relative to the product mix underlying the manual rate or (2) provide justification as to why it is reasonable to assume there is no cost differential between the two product mixes (i.e. HMO & POS vs. HMO & POS & PPO).

There is no difference in contracted costs for these products at Geisinger.

5. It appears that no adjustment is being applied in the development of the Index Rate to reflect a different mix of membership by geographic area in the projection period (2018) relative to the base period (2016). Please provide the distribution of membership by geographic rating area for those members underlying the 2016 manual rate as well as for those currently in force in 2017, demonstrating that it is reasonable to assume the mix of membership by geographic area should not be expected to change substantially between 2016 and 2018.

We have experienced large growth coupled with low retention in this market. It is not any more reasonable to assume the mix in 2017 than 2016. The attached file, "Mix of membership by geography.xlsx", demonstrates this volatility. The growth in Rating Area 7 is due to our competitive rates in that area and we do not know that this competitive position will carry forward to 2018.

6. Regarding question 6, the Change in Benefits exhibit shows additional pharmacy coverage amount of \$15.58. Please discuss the additional coverage and why it was not identified in the actuarial memorandum.

Not identifying this item in our actuarial memorandum was simply an oversight. This adjustment was necessary since Pharmacy is optional in our non-ACA Individual block. Therefore, we needed to adjust pharmacy expenses in the experience period to account for any non-ACA members who did not have Pharmacy. Thus, our projected experience will reflect pharmacy benefits for all plans. Please note that the pharmacy item has been added to the revised Actuarial Memorandum and is only \$0.13 PMPM when allocated over the entire Individual Single Risk Pool.

7. In response to question 10, you provided an Excel worksheet that included an item labeled “Quality Fund PQS” and the associated capitated expense of \$11.00 pmpm for the rating period. This item was not mentioned in the actuarial memorandum nor was it included in the response discussion. Section D.1.f on page 9 of the PA guidance specifically addresses the issue of “quality incentive payments” and directs issuers to include such payments in the administrative expenses in Table 6. Additionally, Table 6 also includes a load for quality improvement expenses of 1.46%. This appears to be double counted. Please review and revise.

The items shown in our 6/23/17 response to question 10 are capitated medical expenses, including “Quality Fund PQS”. This item is not an administrative expense and therefore does not meet the federal definition of a quality incentive payment. The term “Quality Fund” is internal Geisinger nomenclature and should not be confused with the quality incentive category referenced in the federal guidelines.

a. In your response to question 10 a. you indicated that the reinsurance expense item would be moved to “Other” but did not do so. Please revise.

Reinsurance expense has been moved out of claims and into the “Other” category with the updated rate filing.

b. In response to question 10. C., you indicate that the capitation trend is based on average of expected capitation increases. What is the bases for the assumed 5% capitation trend in Table 3 and the URRT? What informs your expectation? Please provide a detailed response.

The historical cap increases for the two significant items are included in an amended copy of our 6/23/17 “Capitated Expenses” file. While each of these items have increased by more than 5% historically, Geisinger continues to strive to limit increases with our capitated vendors. We feel 5% is a reasonable estimate.

8. In response to question 17, it is my understanding that the PCORI fee for 2018 is \$2.47 PMPY/12 = \$0.20 PMPM. If you have conflicting information, please share your source and show the development of the \$0.18.

PCORI has been adjusted with the updated rate filing.

9. In response to question 20, you did not show the development of the average commission nor did you provide the broker agreements as requested. Please show the development of the average commission. Additionally, the current and 2018 actual broker schedule (or estimated if actual not yet set) should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.

For Individual ACA products, we no longer pay broker commissions except on members that joined prior to 2016. Details on our broker commissions are confidential and proprietary. Please see the file “Broker Fees-Indiv HMO-20170713.xls.”

10. In your June 14th response you indicated that corrections would be when the final files are uploaded in SERFF. Be advised, all revisions must be reflected in this resubmission.

We will be submitting all revised Exchange filing files, along with our responses to the Department, by the requested deadline.

11. Please provide a PDF file for public review (Public Rate Filing PDF) in SERFF to show the updated rate request. The following updated supporting items must be included:

- Cover Letter
- Rate Change Request Summary (Attachment 1)
- Part 1 - Unified Rate Review Template (URRT)
- Part II – Consumer Friendly Justification
- Part III – Federal Actuarial Memorandum (redacted)
- PA Actuarial Memorandum (redacted)
- PA Actuarial Memorandum Rate Exhibits
- PA Plan Design Summary and Rate Tables
- Federal Rates Templates
- Service Area Maps
- Correspondence – Q&A's

We will be submitting the revised Public Rate Filing PDF by the requested deadline of COB July 18<sup>th</sup>.
