2018 ACA-Compliant Health Insurance Rate Filing Guidance

Pennsylvania Insurance Department

March 14, 2017

UnitedHealthcare Insurance Company – Small Group Plans

Rate request filing ID # 23489 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	1.8% ¹
Revised requested average rate change:	4.4% ¹
Range of requested rate change:	-5.9% to 12.8%
Effective date:	1/1/2018
People impacted:	28,285
Available in:	All

Key information

Jan. 2016-Dec. 2016 financial experience

Premiums	\$105,536,184
Claims	\$89,505,469
Administrative expenses	\$13,926,266
Taxes & fees	\$5,438,951
Company made (after taxes)	-\$3,334,502

The company expects its annual medical costs to increase **7.6%**.

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2018:

Claims:	79.51%
Administrative:	13.2%
Taxes & fees:	5.88%
Profit:	1.41%

Explanation of requested rate change

UnitedHealthcare insurance Company in requesting the rate increase because of the increase in medical costs and utilization of health care services.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

UnitedHealthcare Insurance Company

Pennsylvania Small Group

2018 Non-Grandfathered Employer Rates

(1) Scope and Range of the Rate Increase

The requested rate change for small group health benefit plans sold in the state of Pennsylvania will be effective January 1, 2018 and impact 28,285 covered lives. The rate change experienced by members will vary depending on plan selection and geographic area. Additional premium changes may occur upon renewal due to changes in member age, changes in plan selection, and changes in geographic location.

(2) Financial Experience of the Product

The benefit care ratio for these products during the 2016 calendar year is 81.8%. This ratio is the portion of premium that is needed to pay medical claims. The complement of the benefit care ratio is the portion of premium needed for taxes and fees, administrative expenses, and margin.

(3) Changes in Medical Service Costs

There are many different healthcare cost trends that contribute to increases in the overall U.S. healthcare spending each year. These trend factors affect health insurance premiums, which can mean a premium rate increase to cover costs. Some of the key healthcare cost trends that have affected this year's rate actions include:

- Increasing cost of medical services: Annual increases in reimbursement rates to healthcare providers, such as hospitals, doctors, and pharmaceutical companies.
- Increased utilization: The number of office visits and other services continues to grow. In addition, total healthcare spending will vary by the intensity of care and use of different types of health services. The price of care can be affected by the use of expensive procedures such as surgery versus simply monitoring or providing medications.
- Higher costs from deductible leveraging: Healthcare costs continue to rise every year. If deductibles and copayments remain the same, a higher percentage of healthcare costs need to be covered by health insurance premiums each year.
- Cost shifting from the public to the private sector: Reimbursements from the Centers for Medicare and Medicaid Services (CMS) to hospitals do not generally cover the cost of providing care to these patients. Hospitals typically make up this reimbursement shortfall by charging private health plans more.
- Impact of new technology: Improvements to medical technology and clinical practice often result in the use of more expensive services, leading to increased healthcare spending and utilization.

(4) Changes in Benefits

Changes in covered benefits impact costs and therefore affect premium changes. Benefit plans are typically changed for one of three reasons: to comply with the requirements of the Affordable Care Act or state law, to respond to consumer feedback, or to address a particular medical cost issue to provide greater long-term affordability of the product.

(5) Administrative Costs and Anticipated Margins

UnitedHealthcare Insurance Company works to directly control administrative expenses by adopting better processes and technology and developing programs and innovations that make healthcare more affordable. We have led the marketplace by introducing key innovations that make healthcare services more accessible and affordable for customers, improve the quality and coordination of healthcare services, and help individuals and their physicians make more informed healthcare decisions. Taxes and fees imposed by the State and Federal government are significant factors that impact healthcare spending and have to be included in the administrative costs associated with

the plans. These fees include Affordable Care Act taxes and fees which impact health insurance costs and need to be reflected in premium. Another component of premium is margin, which is set to address expected volatility and risk in the market.

The requested rate change is anticipated to be sufficient to cover the projected benefit and administrative costs for the 2018 plan year.

Section 1: Purpose

Following is a rate filing prepared by UnitedHealthcare Insurance Company. This filing has been prepared to provide the necessary information required by the Department of Health and Human Services and the state of Pennsylvania. The purpose of this memorandum is to provide information relevant to the Federal Part I Unified Rate Review Template (URRT).

This filing establishes rates intended to be used for non-grandfathered PPACA compliant small group health benefit plans sold off the Small Business Health Options Program in Pennsylvania for the 2018 plan year. A rate increase is being filed at this time. The rates and other information in this submission are based on the current regulations and guidance from HHS. Changes to this filing may be necessary if there are revisions to the regulations or updated guidance from HHS.

This memorandum is intended solely for the information of and use by the Department of Health and Human Services and the Pennsylvania Department of Insurance and Financial Services. It will demonstrate compliance with state and federal laws and regulations related to the development of the index rate and allowable rating factors and is not intended to be used for any other purpose.

The attached document contains confidential, proprietary information and trade secrets. This information is strictly confidential and protected from disclosure by 40 P.S. § 65.2-A. If the prohibition against disclosure by the Department of Insurance and Financial Services is reassessed at a later date, it may not be disclosed to any other state or federal regulatory agencies unless the recipient agrees in writing prior to receipt to maintain the confidentiality of the information.

Section 2: General Information

Company Identifying Information

Company Legal Name: UnitedHealthcare Insurance Company
State: Pennsylvania
HIOS Issuer ID: 23489
Market: Small Business, 1-50
Proposed Effective Date: January 01,2018

Primary Contact Information

Name: [REDACTED]
Telephone Number: [REDACTED]
Email Address: [REDACTED]

Section 3: Proposed Rate Changes

The proposed change in rates for this filing is 8.9% compared to the prior year. These changes are applied uniformly to all Rating Areas. The proposed change also includes adjusting pricing trend to 9.6% annually.

- Changes to the age factors - changes were made to reflect the new ACA age factors; these changes were made revenue neutral, the base rates were reduced 2.94% to make the change revenue neutral.
- Changes in medical service costs - we are adjusting our pricing trend to 9.6% up from 9.4% in 2017.
 - Increasing Cost of Medical Services – Annual increases in reimbursement rates to health care providers – such as hospitals, doctors and pharmaceutical companies.
 - Increased Utilization – The number of office visits and other services continues to grow. In addition, total health care spending will vary by the intensity of care and/or use of different types of health services. Patients who are sicker generally have a higher intensity of health care utilization. The price of care can be affected by the use of expensive procedures such as surgery vs. simply monitoring or providing medications.
 - Higher Costs from Deductible Leveraging – Health care costs continue to rise every year. If deductibles and copayments remain the same, a greater percentage of health care costs need to be covered by health insurance premiums each year.
 - Cost shifting from the public to the private sector – Reimbursements from the Center for Medicare and Medicaid Services (CMS) to hospitals do not generally cover all of the cost of care. The cost difference is being shifted to private health plans. Hospitals typically make up this difference by charging private health plans more.
 - Impact of New Technology – Improvements to medical technology and clinical practice often result in the use of more expensive services - leading to increased health care spending and utilization.
- Administrative costs and anticipated profit
 - UnitedHealthcare works to directly control administrative expenses by adopting better processes and technology and through the development of programs and innovations that make health care more affordable. We have led the marketplace by introducing key innovations that make health care services more accessible and affordable for customers, improve the quality and coordination of health care services, and help individuals and their physicians make more informed health care

decisions.

- Additionally, UnitedHealthcare indirectly controls medical cost payments by using appropriate payment structures with providers and facilities. UnitedHealthcare's goal is to control costs, maximize efficiency, and work closely with physicians and providers to obtain the best value and coverage.
- State and/or Federal government imposed taxation and fees are another significant factor that impacts health care spending. These fees include ACA taxes and fees which will have increased health insurance costs and need to be reflected in premium. The change in ACA fee impacted the average rate change by 1.4%
- Changes that vary by plan
 - All plan relativity factors have been updated to reflect UnitedHealthcare's most recent pricing model. We made the model changes revenue neutral and updated the base rate to reflect the revenue neutrality adjustment. There is also a 4.4% reduction in the average plan relativity because of benefit changes.
 - The impact of any changes to plans that have occurred due to uniform modification are also reflected in the updated plan relativity factors. Please see the "Plan Adjusted Index Rate" section of the memorandum for more detail on these changes.

We refined the medical and pharmacy plan price relativities to reflect the most recent pricing methodology and pricing models. The methodology is based on UnitedHealthcare nationwide experience data, which contains utilization frequencies and unit costs by service category, in addition to claim distributions and adjustment factors for a large number of plan design variables. Benefit design parameters such as deductibles, coinsurance, copays, out-of-pocket maximums, etc. were input for each plan. The expected paid-to-allowed relativities and expected utilization differences due to differences in cost sharing for each plan are then used to develop the plan factors for each benefit plan. All benefit plans are priced consistently with each other, with the rates differing by the estimated value of the benefits and the expected utilization differences due to differences in cost sharing. The utilization differences do not reflect differences due to health status. The net impact of all changes by plan can be found in Worksheet 2, Section I of the Unified Rate Review Template.

Significant factors driving the proposed rate changes are discussed in further detail in Section 6 (*Projection Factors*) and Section 7 (*Credibility Manual Rate Development*) of this memorandum.

Section 4: Experience Period Premium and Claims

Paid Through Date

The experience period is 1/1/2016 through 12/31/2016, with claims paid through 2/28/2017.

Premiums (net of MLR Rebate) in Experience Period

Earned premium for our small group market business in Pennsylvania for 2016 was approximately \$109,363,921. MLR rebate payments are not anticipated in Pennsylvania for the 2016 calendar year, an estimate that was provided by UnitedHealthcare's finance department. Therefore, premium net of MLR rebates and risk adjustment (payment/receivable) is \$102,975,382.

Support for estimate of incurred but not paid claims

The UnitedHealthcare Reserving process utilizes the Reserve Production System (RPS) to record reserves into the PeopleSoft general ledger. Fee for service and paid and payable claim data is loaded into RPS and becomes the basis for the monthly reserve calculations at the various legal entity, market and group size levels. The assignment of the claims data into RPS packages is based on the mapping rules maintained by the Corporate Actuarial department. RPS calculates a preliminary best estimate Incurred But Not Reported (IBNR) for each reserving model (package) primarily using standard algorithms based on historical claim experience. The Claims Accounting Reserving Team adjusts the preliminary IBNR based on specific knowledge of the entity (i.e. catastrophic claims, pended claims, etc.) to calculate the final IBNR. In months where adjudicated claims experience is not complete enough for an estimate using completion factors, a seasonally adjusted PMPM is used to estimate incurred claims.

A description of the Sarbanes Oxley controls, audited by Deloitte & Touche, in place regarding the reserving process includes:

- 1) Market Paid claim Tie-outs: To verify completeness and accuracy of financial data in RPS, paid claim data is tied out between source system (RPS) and PeopleSoft general ledger.
- 2) Market Expense Tie-outs: RPS reserve changes on the income statement are tied to the PeopleSoft general ledger to ensure that information is accurate subsequent to computing the reserve.
 - Allowed claims by benefit category were obtained from UnitedHealthcare claim paying system reports.

The same completion factors are applied to both incurred and allowed claims amounts.

Section 5: Benefit Categories

Claims were assigned to each of the benefit categories based on where services were administered and the types of medical services rendered. The benefit categories were defined by our claims department using standard industry definitions.

Inpatient Hospital

Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.

Outpatient Hospital

Includes non-capitated facility services for surgical, emergency room, laboratory, radiology, therapeutic, observation, and other services provided in an outpatient facility setting and billed by the facility.

Professional

Includes non-capitated primary care, specialist care, therapeutic, the professional component of laboratory and radiology, and other professional services, other than hospital based professionals whose payments are included in facility fees.

Other Medical

Includes non-capitated ambulatory, home health care, durable medical equipment, prosthetics, supplies, vision exams, dental services and other services.

Capitation

Includes all services provided under one or more capitated agreements.

Prescription Drug

Includes drugs dispensed by a pharmacy. This amount is net of rebates received from drug manufacturers.

Section 6: Projection Factors

Changes in the Morbidity of the Population Insured

The total Population Risk Morbidity Adjustment is 1.005. It is comprised of the following factors:

Demographic Creep:

A morbidity adjustment of 0.5% was made for expected claim costs in 2018 compared to the experience period. The adjustment is needed to account for policies being quoted on an “issue-age” basis, where a 12-month rate is developed based on a members age as of the effective date of the policy. The age factors do not account for aging that occurs during the policy year.

Other Adjustments

The total other adjustments are 1.011, it is comprised of the following factors:

Catastrophic Claims Adjustment:

An adjustment was made to account for catastrophic claims experience in the experience period. The claims were adjusted by -1.3% to align with expected catastrophic claim levels in the rating period.

Changes in Demographics:

The HHS-specified age curve was used in rating.

Induced Demand Shift:

An adjustment of 0.4% was made to account for the expected change in allowed claims due to the shift in the distribution of benefit plans between the experience period and the rating period.

All Other Adjustments:

All other adjustments account for 2.0% of the total other adjustments.

Trend

24 months of trend were applied to our 2016 experience to project it to the 2018 rating period. Our most recent analysis indicates annual trend in the state of Pennsylvania for the 2017 and 2018 calendar years will be 7.63% and 7.63%, respectively. The table below details the components of each trend factor.

Trend Component	2017 (a)	2018 (b)	Annualized for URRT Wksh1 (c) = ((1+a)*(1+b))-1
Unit Cost	4.03%	4.03%	4.03%
Utilization	3.46%	3.46%	3.46%
Total	7.63%	7.63%	7.63%

UnitedHealthcare develops forward-looking medical expense estimates based on a number of considerations. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, and benefit leveraging identified for each category. Future trends are developed based on a projection of each component.

Utilization rates by category are measured and projected. Forward looking utilization levels are developed based on emerging market level data, supplemented by regional and/or national level utilization data. Macroeconomic data is often used to develop assumptions regarding directional changes in national health care consumption rates. UnitedHealthcare uses same store analysis to reflect utilization.

Market-level unit cost projections are developed based on evaluations of current and anticipated provider contract economics, as well as consideration to both current and expected changes in non-contracted provider cost exposure. Unit cost projections also consider the estimated cost impact of new technologies, service availability/mandates, or other factors that might influence mix of procedures. Unit cost is based on our contractual changes with providers.

In addition, market-level healthcare affordability activities that are expected to impact forward-looking medical costs are recognized. Depending on the nature of individual initiatives, the impact may be recognized in one or more of the component cost items discussed above. Only incremental activities are recognized for this purpose in the expected trend impact for any particular period.

Section 7: Credibility Manual Rate Development

Source and Appropriateness of Data Used

- The combined experience has 279,575 member months, which exceeds the minimum member months to be considered fully credible.

Adjustments Made to the Data

Adjustments similar to the ones described in Section 6 were applied to the experience of the credibility manual to project it to the projection period. In addition, the credibility manual was adjusted to reflect the average age, geography, plan design and morbidity of the adjusted experience period claims.

An adjustment to the credibility manual was made to account for catastrophic claims experience in the experience period.

Inclusion of Capitation Payments

Capitation payments are included in both the experience and projections.

Section 8: Credibility of Experience

Stable claim patterns with limited member months; 100% credible

The block of business has historically demonstrated relatively stable claims patterns. For the purpose of developing rates, we regard it to be fully credible.

Section 9: Paid-to-Allowed Ratio

Paid-to-allowed ratios were developed for each plan using the proprietary UnitedHealthcare pricing model. This model uses nationwide UnitedHealthcare experience, which is fully credible. Claim data is projected to the pricing period based on national projections of utilization and unit costs. These projections are done at the service category level (inpatient, outpatient, etc.). Benefit design parameters such as deductibles, copays, and coinsurance rates are applied to the claim distributions of the matching service category. Cost sharing is applied, and the values of each service category are summed to determine an overall benefit value, or paid-to-allowed ratio. In order to preserve consistency, the same claim experience and projection assumptions are applied to all plan relativity calculations.

The average paid-to-allowed ratio is based on the paid-to-allowed ratios developed for each plan using the model discussed above and weighting them by the projected membership by plan. The member distribution is discussed under Section 21 (*Membership Projections*) of this memorandum.

Section 10: Risk Adjustment and Reinsurance

Experience Period Risk Adjustment and Reinsurance Adjustments (PMPMs)

Risk Adjustments for the experience period were recently published.

Our 2016 risk adjustment transfer PMPM is \$-22.85 applied to the experience period premium.

Since this is a small group filing and the state of Pennsylvania chose not to combine its individual and small group markets, reinsurance recoveries are not applicable to this rate filing. As such, no adjustments were made to the experience.

Projected Risk Adjustments Net of Risk Adjustment User Fees

UnitedHealthcare Insurance Company anticipates paying an average of \$20.70 PMPM for risk adjustment transfers in the state of Pennsylvania for the 2018 plan year. We are assuming the risk level of our business relative to that of our competitors for the 2018 plan year will be similar to what it was in the 2016 plan year. Since risk adjustment transfer payments are a function of the market level premium, our 2018 risk adjustment transfer PMPM amount is calculated by adjusting our estimated 2016 risk adjustment transfer PMPM amount for the projected market level trend, changes in reinsurance fees and recoveries, and other adjustments based on the overall financial performance of the market. The HHS Notice of Benefit and Payment Parameters for 2018 specifies a risk adjustment user fee of \$0.14 PMPM.

The projected risk adjustment transfers net of risk adjustment user fees are therefore \$-20.84 PMPM.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

The reinsurance program ended in 2016. As such, reinsurance premiums were not included in the 2018 rate development.

Section 11: Non-Benefit Expenses and Profit

Administrative Expense Load

The administrative expense load is a long-term estimate of administrative expenses, including selling expenses and general administrative expenses. This load varies by plan. These assumptions are based on the general ledger actual results (GAAP) for 2016 with known adjustments. Known adjustments include, but are not limited to, pay increases/raises for employees and administrative expenses as a result of Healthcare Reform and compliance requirements. The administrative expense allocation methodology used in pricing is appropriate because it is consistent with how UnitedHealthcare runs its business and how it allocates administrative costs for Statutory Filings and the Healthcare Reform Exhibits.

Profit and Risk Margin

The profit and risk margin is shown in Worksheet 1, Section 3 of the URRT. This target does not vary by product or plan.

The profit and risk margin is derived from the difference between the target loss ratio and the administrative expenses, taxes and fees.

The profit and risk margin results in a MLR above the minimum requirements as described in the Projected Loss Ratio section.

Taxes and Fees

Taxes and fees are expected to be 5.91% and include premium tax, exchange fees, PCORI fees, and federal income tax. The following is a breakdown of the taxes and fees.

Premium Taxes and Fees Allocation	Estimated % of Premium
Federal / State Income Tax on Profit & Risk Load	0.76%
Premium Tax	1.76%
ACA Taxes: Insurer Fee	3.25%
ACA Taxes: Reinsurance Fee	0.00%
ACA Taxes: PCORI Fee	0.04%
ACA Taxes: Risk Adjustment User Fee	0.03%
ACA Taxes: Exchange User Fee	0.00%
All Other Taxes & Fees	0.07%
Total	5.91%

Section 12: Projected Loss Ratio

The projected loss ratio using the federally prescribed MLR methodology for calendar year 2018 is 84.8%. UnitedHealthcare Insurance Company agrees to comply with the rebate requirements of 45 CFR Part 158 should the actual market MLR fall below the 80.0% requirement.

Section 13: Single Risk Pool

The single risk pool reflects all covered lives for every small group non-grandfathered product and plan combination for UnitedHealthcare Insurance Company in the state of Pennsylvania. It is established in accordance with the requirements of 45 CFR §156.80(d).

Section 14: Index Rate

The Index Rate for the experience period is approximately 98.41% of allowed claims due to benefits in excess of EHBs. The reported percentage amount is based on experience data. The index rate of the experience period has been reported accordingly, rounded to the nearest whole dollar value as required by the URRT. The Index Rate in the projection period represents 98.41% of allowed claims due to the benefits in excess of EHBs.

Small Group Trend Adjustment

We are proposing premium rates that trend by quarter. The trend assumption only includes unit cost and utilization trend as this calculation is on an allowed basis.

	Q1	Q2	Q3	Q4	Average
CY 2018 Index Rate	\$ 457.49	\$ 457.49	\$ 457.49	\$ 457.49	\$ 457.49
Average Quarterly Trend	1.000	1.020	1.041	1.062	1.037
Quarterly Index Rate	\$ 457.49	\$ 466.81	\$ 486.03	\$ 486.03	\$ 474.41
Member Months	85,128	50,574	62,248	146,840	344,790

Section 15: Market Adjusted Index Rate

The market adjusted index rate includes market-wide adjustments for the risk adjustment program and exchange user fees. Please refer to Section 10 (*Risk Adjustment*) and Section 11 (*Non-Benefit Expenses and Profit*) of this memorandum for a brief description of each of these items. Incurred values were grossed up by the average paid-to-allowed ratio to reflect an allowed basis.

Index Rate	Net Risk Adjustment (allowed basis)	Exchange Fee Adjustment (allowed basis)	Market Adjusted Index Rate
\$474.41	\$26.43	\$0.00	\$500.84

The figures above may not tally exactly due to rounding of the display.

Section 16: Plan Adjusted Index Rates

The development of the projected index rate and all rating factors is in compliance with all applicable federal statutes and regulations (45 CFR 156.80 and 147.102)

Actuarial Value and Cost Sharing Adjustment

UnitedHealthcare has a proprietary pricing model that was used in developing the actuarial value and cost sharing adjustment for each plan. The model calculates plan relativity factors for medical and pharmacy benefits. Also included under the actuarial value and cost sharing adjustment are adjustments for leveraging and the difference between the average plan relativity factor and the projected paid to allowed ratio.

UnitedHealthcare Insurance Company does not utilize Induced Demand factors in our rate development. Instead, our plan-specific pricing factors are based on an analysis of UnitedHealthcare Insurance Company's nationwide block of Small Group health insurance, which reflects over 10 million member months of experience. Our approach complies with the prohibition of rating for morbidity differences by normalizing out the cost differences attributable to morbidity as measured by HHS's risk adjustment mechanism.

Historical UnitedHealthcare experience was used to develop the actuarial value and cost sharing adjustment.

Provider network, delivery system and utilization management adjustment

Any adjustments for these items are included in the plan relativity factors.

Benefits in Addition to EHBs

The Index Rate for the experience period is approximately 98.41% of allowed claims due to benefits in excess of EHBs. The reported percentage amount is based on experience data. The index rate of the experience period has been reported accordingly, rounded to the nearest whole dollar value as required by the URRT. The Index Rate in the projection period represents 98.41% of allowed claims due to the benefits in excess of EHBs.

Distribution and Administrative Costs

Distribution and administrative costs include premium tax, PCORI fees, SG&A, quality improvements, federal income tax, and after-tax income. These items were previously discussed in Section 11 (*Non-Benefit Expenses and Profit*) of this memorandum. Risk adjustment transfers and user fees and exchange fees are excluded because they are accounted for in the market adjusted index rate.

Section 17: Calibration

Plan Adjusted Index Rates need to be calibrated to apply the allowable rating factors of age and geography in order to calculate the Consumer Adjusted Premium Rates. Calibration factors are applied uniformly to all plans.

Age Calibration

The calculated age curve calibration is 1.414, which equals the average age factor of the expected member distribution by age. This corresponds with an approximate age of 44 years. The age factors used in this calculation are the HHS-specified age curve. Please see the Age Calibration exhibit.

Geographic Calibration

The geographic factor calibration is 0.852, which equals the expected average area factor. A table of the geographic rating factors is below.

Rating Area	Area Factor
1	0.734
2	0.769
3	1.003
4	0.760
5	0.773
6	0.941
7	0.998
8	0.950
9	0.891

Geographic rating factors are reviewed periodically versus UnitedHealthcare claims data that reflects unit cost differences by county. Such a review was conducted as part of our January 1, 2018 rate development.

Our analysis did not indicate that there were credible, material differences indicated by the comparison of currently approved area factors and the UHC data reflecting unit cost differences.

Population morbidity by area was not considered when determining geographic area factors.

Calibrating the plan adjusted index rate to the age curve and geographic distribution results in the calibrated premium rate for each plan. The calibrated premium rate represents the preliminary premium rate charged to an individual before applying the consumer specific rating adjustments for age and area.

Tobacco Calibration

Tobacco factors are not used in the rating of these products, and calibration is needed.

Section 18: Consumer Adjusted Premium Rate Development

The consumer adjusted premium rate is the final premium rate that is charged to an individual. It is developed by calibrating the plan adjusted index rate by the average age and geographic rating factors, and applying the consumer specific age and geographic rating factors. The calculation is provided below.

Plan Adjusted Index Rate

/ Age Calibration Factor

/ Geographic Calibration Factor

* Consumer Specific Age Rating Factor

* Consumer Specific Geographic Rating Factor

* Small Group Trend Adjustment

=Consumer Adjusted Premium Rate

Small Group Trend Adjustment

Since this is a small group filing that includes rates with schedule trend increases by quarter, the Index Rate, Market Adjusted Index Rate and Plan Adjusted Index Rate reflect the member weighted average premium over the calendar year. As such, the Consumer Adjusted Premium Rate needs to include a trend adjustment specific to the quarter for which the rates are being calculated. The trend factors used to develop the consumer adjusted premium rates are shown below.

	Quarterly Trend (a)	Average Trend (b)	Trend Adjustment (a) / (b)
Q1	1.012	1.050	0.964
Q2	1.035	1.050	0.986
Q3	1.059	1.050	1.009
Q4	1.084	1.050	1.033

Section 19: AV Metal Values

The AV calculator used to calculate the AV metal values is based on a prescribed methodology and, therefore, does not necessarily reflect a reasonable estimate of the portion of allowed costs covered by the associated plan. Please refer to Section 9 (*Paid-to-Allowed Ratio*) of this memorandum for further detail regarding our estimate of the portion of allowed costs covered by each plan.

Some plans within this portfolio have cost sharing features that differ between individual and family coverage (i.e., when two or more people are covered by the plan). For all plans, consistent with the Actuarial Value Calculator inputs, we have used only the cost sharing provisions applicable for individuals in the actuarial value calculation.

The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. Additional details are provided below to describe the types of adjustments that were made for plan designs that are not directly compatible with the AV calculator.

Copays Paid in Conjunction with Coinsurance

Some of our plan designs include copays that are paid in conjunction with coinsurance in the coinsurance range. This benefit design is not directly compatible with the AV calculator, so the alternate methodology described in 45 CFR 156.135(b)(2) was used for the AV calculation. In order to modify the AV calculator input for a copay paid in conjunction with coinsurance, the following formula was used to estimate the insurer's cost share.

$$\text{Effective Insurer Coinsurance Rate} = (1 - \text{Member Copay}/\text{Average Unit Cost}) * (1 - \text{Member Coinsurance Rate})$$

The benefit was then marked as "Subject to Deductible" and "Subject to Coinsurance" with a "Coinsurance, if different" equal to the effective insurer coinsurance rate as calculated above. The copay was entered in the "Copay if separate" column.

The average unit cost was calculated based on the claims data included within the AV calculator continuance tables for each metal level. For example, if the plan was expected to fall within a Silver Metal Tier, the average unit cost was calculated from the Silver continuance tables. All enrollees within a continuance table whose claims exceeded \$1,500 were included in the calculation of the average unit cost for each benefit type.

Benefits that Vary Based on Place of Service

For some types of services, our plan designs include different benefit levels based on the place of service (i.e. physician's office, free standing facility, or outpatient hospital facility). To incorporate this differentiation in benefits, the Tiered Network Option was selected within the AV calculator, and utilization was assigned to each tier based on historical experience of affiliated carriers.

Physician Tiering

Select plan designs include lower cost sharing when members utilize providers we designate as meeting cost and efficiency standards. The tiered network functionality of the AV calculator was utilized to account for the cost sharing differences. The utilization of providers was based on a UnitedHealthcare's study of differences in cost sharing and their effectiveness at driving utilization patterns.

Per Occurrence Copays

Select plan designs have per occurrence copays where a copay is paid before coinsurance is applied between the deductible and maximum out of pocket. These copays accumulate to the maximum out of pocket. To reflect this type of benefit an effective insurer coinsurance rate was calculated based on the average unit cost of the service and member coinsurance rate. The calculation is as follows:

Effective Insurer Coinsurance Rate = $(1 - \text{Member Copay}/\text{Average Unit Cost}) * (1 - \text{Member Coinsurance Rate})$

Some of the copays only apply to portions of the benefit categories that the AV calculator defines. For example, the Inpatient Hospital Services includes both physician and facility charges. To the extent the plan design per occurrence copay only applies to a portion of the services, the tiered Network functionality was utilized. The mix of services within the AV calculator benefit categories was based on historical experience.

The average unit cost was calculated based on the claims data included within the AV calculator continuance tables for each metal level where available.

Section 20: AV Pricing Values

The AV pricing values represent the cumulative effect of adjustments made by the issuer to move from the market adjusted index rate to the plan adjusted index rate. Each of the allowable modifiers to move from the market adjusted index rate to the plan adjusted index rate was previously discussed in Section 16 (*Plan Adjusted Index Rates*) of this memorandum.

Section 21: Membership Projections

The 2018 plan year membership projection was developed utilizing the experience period plan level membership distribution along with sales and persistency targets. Member distribution by plan was then based on current enrollment, taking into consideration changes in the portfolio of plans to be offered in 2018. Strictly for purposes of the URRT, we have projected membership by plan.

Section 22: Terminated Products

There are no products being terminated in this rate filing.

A list of terminated Single Risk Pool plans can be found in the appendix. Terminated plans will be mapped to another plan in the projection period for purposes of completing the URRT. The mapping is included in the appendix. It should be noted that this mapping is preliminary and may deviate based on business decisions and practices at a future date.

Section 23: Plan Type

A plan type of EPO, POS, & PPO has been selected, which describes the plans exactly.

Section 24: Warning Alerts

None.

Section 25: Reliance

Due to responsibility allocation, I have relied upon other individuals within the UnitedHealthcare organization to provide certain assumptions. Although I have performed a limited review of the information and have not found it unreasonable or inconsistent, I have not reviewed it in enough detail to fully judge the reasonableness of the information due to the substantial amount of additional time required. I have therefore relied upon the expertise of those individuals who have developed the assumptions, and am providing the information required by Actuarial Standard of Practice 41, section 4.3. A list of reliances is included below.

UnitedHealthcare Finance Department

- Projected SG&A Assumption
- Total Projected Membership

UnitedHealthcare National Pricing Team

- Plan Relativity Modeling

UnitedHealthcare Healthcare Economics Department

- Projected Trend
- Claims Reserves
- ACO/Premium Designated Provider
- Cost savings estimates
- Plan Relativity Modeling

Section 26: Actuarial Certification

I, , am an Associate Director Actuarial Services for UnitedHealthcare, and a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering statements of actuarial opinion with respect to the filing of rates for health insurance products.

To the best of my knowledge and judgment, I certify that:

- The projected index rate is:
 - In compliance with state and federal statutes and regulations related to the development of the index rate and allowable rating factors (such as 45 CFR 156.80 and 147.102).
 - Developed in compliance with the applicable Actuarial Standards of Practice.
 - Reasonable in relation to the benefits provided and population anticipated to be covered.
 - Neither excessive, deficient, nor unfairly discriminatory.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. The unique plan design actuarial certification required by 45 CFR Part 156.135 has been separately attached.
- The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop their rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.

7/13/2017

Date

Actuarial Memorandum
UnitedHealthcare Insurance Company, NAIC #79413
PA Small Group Rate Filing

July 13th, 2017

This rate filing presents proposed premium rates effective January 1, 2018 through December 31, 2018 for medical and Rx benefit plans to be sold by the UnitedHealthcare Insurance Company to small group employers.

The filing has been prepared as required by the “2018 ACA Compliant Health Insurance Rate Filing Guidance Final”, as well as current ACA rules. This rate filing should not be used for any other purposes. Within that context, there are no limitations or constraints on the use or applicability of the rating items discussed herein. The intended user of this filing is the PA Department of Insurance.

1. Basic Information and Data

A. Company Information

UnitedHealthcare Insurance Company NAIC Company Code **79413**
Small Group Rate Filing Off Exchange only

B. Rate History and Proposed Variations in Rate Changes

UHLC – 129638130 submitted 7/16/2014 for effective date 1/1/2015-12/31/2015
0% rate change and 7.2% annual trend applied quarterly. All rate revisions were applied uniformly

UHLC – 130076987 submitted 5/15/2015 for effective date 1/1/2016-12/31/2016
-1.5% rate change and 8% annual trend applied quarterly. All rate revisions were applied uniformly

UHLC - 130536849 submitted 5/11/2016 for effective date 1/1/2017-12/31/2017
4.23% year over year increase which includes 7.8% annual trend applied quarterly. We also adjusted area factors as follows:

<u>Rating Area</u>	<u>Change</u>
Rating Area 1	2.7%
Rating Area 2	10.2%
Rating Area 3	5.1%
Rating Area 4	6.0%
Rating Area 5	8.9%
Rating Area 6	-1.5%
Rating Area 7	-0.1%
Rating Area 8	-5.4%
Rating Area 9	-1.0%

UHLC – 130830047 submitted 12/2/2016 for effective date 4/1/2017-12/31/2017
+3% rate change and 9.4% annual trend applied quarterly. All rate revisions were applied uniformly

C. Average Rate Change

Please see Table 10 for the calculation of the average rate change in the attached PA Actuarial Memorandum Rate Exhibits

The average rate increase without trend is 4.4% in cell AC15 on III. Plan Rates tab and the indicated increase for a 21 year old rate PMPM 1Q2018 over 1Q2017 in cell AN13 is 9.4%.

As requested, for comparison purposes, these are the two rate increase amounts calculated on the URRT worksheet 1:

- The percent increase over Experience Period in cell V45 is 22.69%
- The percent increase, annualized, in cell V46 is 10.77%

D. Membership Count

	Member-months	Members	Member-months
	Experience Period	Current Period (as of 02-01-2017)	Projected Rating Period
Average Age	34	34	34
Total	279,575	28,285	344,790
<18	61,228	6,130	74,724
18-24	28,502	2,802	34,156
25-29	24,808	2,491	30,365
30-34	26,817	2,665	32486
35-39	23,620	2,404	29304
40-44	21,229	2,135	26025
45-49	24,319	2,492	30377
50-54	26,191	2,634	32108
55-59	24,512	2,507	30560
60-63	12,942	1,429	17419
64+	5,407	596	7266

*Tables 1, 2 and 4 must include data for all non-grandfathered business (ACA compliant and Transitional)

E. Benefit Changes

Changes to member cost sharing were required for certain benefit plans. Use of the new federal Actuarial Value (AV) Calculator led to some benefit plans falling outside the allowed AV metal ranges. Benefit plan changes were made to move these plans back into the allowed AV ranges. The benefit changes for these plans are listed in Exhibit 2.

We refined the medical and pharmacy plan price relativities to reflect the most recent pricing methodology and pricing models. The methodology is based on UnitedHealthcare nationwide experience data, which contains utilization frequencies and unit costs by service category, in addition to claim distributions and adjustment factors for a large number of plan design variables. Benefit design parameters such as deductibles, coinsurance, copays, out-of-pocket maximums, etc. were input for each plan. The expected paid-to-allowed relativities and expected utilization differences due to differences in cost sharing for each plan are then used to develop the plan factors for each benefit plan. All benefit plans are priced consistently with each other, with the rates

differing by the estimated value of the benefits and the expected utilization differences due to differences in cost sharing. The utilization differences do not reflect differences due to health status.

All the changes are revenue neutral and the Plan Relativity Factors are listed in Exhibit 3a, 3b and 3c. Also, the revenue neutrality factor development is shown in Exhibit 14.

F. Experience Period Claims and Premium

Premiums (net of MLR Rebate) in Experience Period

Earned premium for our small group market business in Pennsylvania for 2016 was approximately \$ 109,363,921. MLR rebate payments are not anticipated in Pennsylvania for the 2016 calendar year, an estimate that was provided by UnitedHealthcare's finance department. The actual 2016 benefit year risk adjustment transfer payment is \$ 6,388,539.

The claims data was available directly from company claims records. The claims data represents all non-grandfathered policies in the single risk pool. Table 2 is consistent with the data used in the URRT.

The claims and premiums for the transitional policies were included in the experience data. The transitional policies cover 68,090 member months with earned premiums of \$26,118,044 and incurred claims of \$19,076,824.

Paid Through Date

The experience period is January 1, 2016 to December 31, 2016, with claims paid through February 28, 2017.

Support for estimate of incurred but not paid claims

The UnitedHealthcare Reserving process utilizes the Reserve Production System (RPS) to record reserves into the PeopleSoft general ledger. Fee for service and paid claim data is loaded into RPS and becomes the basis for the monthly reserve calculations at the various business unit, location, and line of business levels. The assignment of the paid claims into RPS packages is based on the mapping rules maintained by the Corporate Actuarial department. RPS calculates a preliminary best estimate Incurred But Not Reported (IBNR) for each reserving model (package) primarily using standard completion factors based on historical claim experience. The Claims Reserving Team adjusts the preliminary IBNR based on specific knowledge of the entity (i.e. catastrophic claims, pending claims, etc.) to calculate the final IBNR. In months where adjudicated claims experience is not complete enough for an estimate using completion factors, a seasonally adjusted PMPM is used to estimate incurred claims.

A description of the Sarbanes Oxley controls, audited by Deloitte & Touche, in place regarding the reserving process includes:

- 1) Market Paid claim Tie-outs: To verify completeness and accuracy of financial data in RPS, paid claim data is tied out between source system (RPS) and PeopleSoft general ledger.
- 2) Market Expense Tie-outs: RPS reserve changes on the income statement are tied to the PeopleSoft general ledger to ensure that information is accurate subsequent to computing the reserve.

Allowed claims by benefit category were obtained from UnitedHealthcare claim paying system reports. The same completion factors are applied to both incurred and allowed claims amounts.

Non-EHB benefits and the experience period cost

The non-EHB claims account for 1.6% of the total claims in the experience period.

Capitation

Capitation includes all services provided under one or more capitated agreements and it is applied uniformly across all membership during the experience period. For this experience period, the capitated amount is \$14.37 PMPM.

Pharmacy Rebates

The prescription drug cost is net of rebates received from drug manufacturers. For this experience period the average pharmacy rebate is -\$17.18 PMPM.

Risk Adjustment and Reinsurance:

Risk Adjustments for the experience period were recently released.

Our 2016 risk adjustment transfer PMPM is \$-22.85 PMPM applied to the experience period premium.

Since this is a small group filing and the state of Pennsylvania chose not to combine its individual and small group markets, reinsurance recoveries are not applicable to this rate filing. As such, no adjustments were made to the experience.

G. Credibility of Data

The experience for this legal entity exceeds the number of member months we consider to be the standard of full credibility for rate development purposes. As such, the experience is given 100% credibility.

We believe that the small group experience used for developing the manual rates for this product to be fully credible. A specific credibility formula was not used for this determination, but rather professional actuarial judgment. As ASOP 25, section 3.4 states: “Professional Judgment - The actuary should use professional judgment when selecting, developing, or using a credibility procedure. The use of credibility procedures is not always a precise mathematical process.”

H. Trend Identification

Two years of annual trend were applied to the 2016 experience to project it to 2018 rating period. The table below details the components of each trend factor.

Service Category	Cost*	Utilization*	Induced Demand*	Composite URRT Trend **	Weight*
Inpatient Hospital	4.29%	2.75%	0.00%	7.16%	21.51%
Outpatient Hospital	4.34%	5.24%	0.00%	9.80%	33.09%
Professional	2.50%	2.21%	0.00%	4.76%	20.20%
Other Medical	3.48%	-5.93%	0.00%	-2.65%	4.78%
Capitation				5.05%	5.20%
Prescription Drugs	4.80%	6.36%	0.00%	11.47%	15.22%
Total Annual Trend				7.63%	100.00%
Months of Trend				24	
Total Applied Trend Projection Factor				1.158	

* Express Cost, Utilization, Induced Utilization and Weight as percentages
 ** Should = URRT Trend

See the definition in the Historical Experience section.

We are proposing quarterly rate changes.

I. Historical Experience

Month-Year	Total Annual Premium	Incurred Claims	Completion Factors*	Ultimate Incurred Claims	Members	Ultimate Incurred PMPM	Estimated Annual Cost Sharing (Member + HHS)	Prescription Drug Rebates**	Allowed Claims (Net of Prescription Drug Rebates)	Allowed PMPM
Jan-14		\$ 5,609,591.61	1.0000	\$ 5,609,591.61	18,521	\$ 302.88		\$ 220,029.48	\$ 6,743,342.51	\$ 364.09

UnitedHealthcare develops forward-looking medical expense estimates based on a number of considerations. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, and benefit leveraging identified for each category. Future trends are developed based on a projection of each component.

Utilization rates by category are measured and projected. Forward looking utilization levels are developed based on emerging market level data, supplemented by regional and/or national level utilization data. Macro-economic data is often used to develop assumptions regarding directional changes in national health care consumption rates. UnitedHealthcare uses same store analysis to reflect utilization.

Market-level unit cost projections are developed based on evaluations of current and anticipated provider contract economics, as well as consideration to both current and expected changes in non-contracted provider cost exposure. Unit cost projections also consider the estimated cost impact of new technologies, service availability/mandates, or other factors that might influence mix of procedures. Unit cost is based on our contractual changes with providers.

In addition, market-level healthcare affordability activities that are expected to impact forward-looking medical costs are recognized. Depending on the nature of individual initiatives, the impact may be recognized in one or more of the component cost items discussed above. Only incremental activities are recognized for this purpose in the expected trend impact for any particular period.

This rate filing proposes quarterly rates.

2. Rate Development & Change

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Development of the Projected Index Rate	Actual Experience
Total Allowed EHB Claims + EHB Capitation PMPM (net of prescription drug rebates) PMPM	\$ 388.71
Two year trend projection Factor	1.158
Unadjusted Projected Allowed EHB Claims PMPM	\$ 450.27
<u>Single Risk Pool Adjustment Factors</u>	
Change in Morbidity	1.005
Change in Other	1.011
Change in Demographics	1.000
Change in Network	1.000
Change in Benefits	1.000
Change in Other	1.011
Total Adjusted Projected Allowed EHB Claims PMPM	\$ 457.49
Credibility Factors	100%
Blended Projected EHB Claims PMPM	
Development of the Market-Adjusted Index Rate and Total Allowed Claims	
Adjusted Projected Allowed EHB Claims PMPM	\$ 457.49
Adjusted Projected Allowed EHB Claims PMPM [will only populate for small group filings]	\$ 474.41
Projected Paid to Allowed Ratio	0.776
Projected Paid EHB Claims PMPM	\$ 368.14
<u>Market-wide Adjustments</u>	
Projected Risk Adjustment PMPM	\$ (20.51)
Projected Paid Exchange User Fees PMPM	
Market-Adjusted Projected Paid EHB Claims PMPM	\$ 388.65
Market-Adjusted Projected Allowed EHB Claims PMPM	\$ 500.84
Projected Allowed Non-EHB Claims PMPM	\$ 7.41
Market-Adjusted Projected Paid Total Claims PMPM	\$ 394.41
Market-Adjusted Projected Allowed Total Claims PMPM	\$ 508.26

The Index Rate for the experience period is approximately 98.4% of allowed claims due to benefits in excess of EHBs. The reported percentage amount is based on experience data. The Index Rate in the projection period represents 98.4% of allowed claims due to the benefits in excess of EHBs.

The Index rate calculation in worksheet 5 is demonstrated in the table below:

Effective Date	1/1/2018	4/1/2018	7/1/2018	10/1/2018	Total Single Risk Pool
# of Member Months Renewing in Quarter	85,128	50,574	62,248	146,840	344,790
Adjusted Projected Allowed EHB Claims PMPM Q1	\$ 457.49	\$ 457.49	\$ 457.49	\$ 457.49	\$ 457.49
Months of Trend	-	3	6	9	
Annual Trend	8.40%	8.40%	8.40%	8.40%	
Single Risk Pool Projected Allowed Claims	\$ 457.49	\$ 466.81	\$ 476.32	\$ 486.02	\$ 474.41
Quarterly Trend Factor	100.0%	102.0%	104.1%	106.2%	103.7%
2018 Trend Factors by Quarter	0.964342685	0.983985528	1.004028479	1.024479687	

The market adjusted index rate includes market-wide adjustments for the risk adjustment program and exchange user fees. Incurred values were grossed up by the average paid-to-allowed ratio to reflect an allowed basis.

Plan adjusted index rates include adjustments for all allowable plan level modifiers as defined in the market rating rules, 45 CFR 156.80(d)92). The adjustments are as follows:

Actuarial Value and Cost Sharing Adjustment

UnitedHealthcare has a proprietary pricing model that was used in developing the actuarial value and cost sharing adjustment for each plan. The model calculates plan relativity factors for medical and pharmacy benefits. Also included under the actuarial value and cost sharing adjustment are adjustments for leveraging and the difference between the average plan relativity factor and the projected paid to allowed ratio.

Historical affiliated carrier experience was used to develop the actuarial value and cost sharing adjustment for each plan as well as the distribution and administrative costs adjustment.

Provider network, deliver system and utilization management adjustment

Any adjustments for these items are included in the plan relativity factors.

Benefits in Addition to EHBs

Benefit Extra EHB is the percentage of claims that are covered and are not included in EHB. The projected non- EHB impact is 1.6%.

Distribution and Administrative Costs

Distribution and Administrative Costs include premium tax, PCORI fees, SG&A, quality improvements, federal income tax, and after-tax income. These items are discussed in the section Non-Benefit Expenses and Profit of this memorandum. Risk adjustment transfers and user fees and exchange fees are excluded because they are accounted for in the market adjusted index rate.

Tobacco Factors

Tobacco factors are not used in rating. As such, no adjustment is made for costs that are expected to be recouped through the tobacco surcharge.

Calibration

Plan Adjusted Index Rates need to be calibrated to apply the allowable rating factors of age and geography in order to calculate the Consumer Adjusted Premium Rates. Calibration factors are applied uniformly to all plans.

Age Calibration

The calculated age curve calibration is 1.414, which equals the average age factor of the expected member distribution by age. This corresponds with an approximate age of 44 years. The age factors used in this calculation are the HHS-specified age curve.

Exhibit 7 shows the Average Age calibration factor development.

Geographic Calibration

The geographic factor calibration is 0.852, which equals the expected average area factor. A table of the geographic rating factors is below.

Geographic Area Factors			
Area	Counties	Current Factor	Proposed Factor
Rating Area 1	Erie, Crawford, Mercer, Venango, Clarion, Forest, Warren, McKean	0.734	0.734
Rating Area 2	Elk, Cameron, Potter	0.769	0.769
Rating Area 3	Tioga, Clinton, Lycoming, Sullivan, Bradford, Susquehanna, Wyoming, Lackawanna, Wayne, Pike, Monroe, Carbon, Luzerne	1.003	1.003
Rating Area 4	Lawrence, Beaver, Washington, Greene, Butler, Allegheny, Westmoreland, Armstrong, Indiana, Fayette	0.760	0.760
Rating Area 5	Jefferson, Clearfield, Cambria, Somerset, Bedford, Blair, Huntingdon	0.773	0.773
Rating Area 6	Centre, Mifflin, Union, Snyder, Montour, Northumberland, Columbia, Schuylkill, Lehigh, Northampton	0.941	0.941
Rating Area 7	Adams, York, Lancaster, Berks	0.998	0.998
Rating Area 8	Chester, Delaware, Montgomery, Bucks, Philadelphia	0.950	0.950
Rating Area 9	Fulton, Franklin, Cumberland, Perry, Juniata, Dauphin, Lebanon	0.891	0.891

Geographic rating factors are unchanged from our approved April 1, 2017 rate filing.

Exhibit 8 shows the Average Geographic factor calibration development.

Population morbidity by area was not considered when determining geographic area factors changes.

Calibrating the plan adjusted index rate to the age curve and geographic distribution results in the calibrated premium rate for each plan. The calibrated premium rate represents the preliminary premium rate charged to an individual before applying the consumer specific rating adjustments for age, area, and tobacco status.

Consumer Adjusted Premium Rate Development

The consumer adjusted premium rate is the final premium rate that is charged to an individual. It is developed by calibrating the plan adjusted index rate by the average age and geographic rating factors, and applying the consumer specific age, geographic, and tobacco status rating factors. The calculation is provided below.

	Plan Adjusted Index Rate
/	Age Calibration Factor
/	Geographic Calibration Factor
x	Consumer Specific Age Rating Factor
x	Consumer Specific Geographic Rating Factor
x	Tobacco Status Factor
x	Small Group Trend Adjustment
=	Consumer Adjusted Premium Rate

Small Group Trend Adjustment

Since this is a small group filing that includes rates with schedule trend increases by quarter, the Index Rate, Market Adjusted Index Rate and Plan Adjusted Index Rate reflect the member weighted average premium over the calendar year. As such, the Consumer Adjusted Premium Rate needs to include a trend adjustments quarter the rates are being calculated.

B. Retention Items

Administrative Expense Load

The administrative expense load is a long-term estimate of administrative expenses, including selling expenses and general administrative expenses. This load varies by plan. These assumptions are based on the general ledger actual results (GAAP) for 2016 with known adjustments. Known adjustments include, but are not limited to, pay increases/raises for employees and administrative expenses as a result of Healthcare Reform and compliance requirements.

The administrative expense allocation methodology used in pricing is appropriate because it is consistent with how UnitedHealthcare runs its business and how it allocates administrative costs for Statutory Filings and the Healthcare Reform Exhibits.

For this filing, this is calculated at 13.2%.

Administrative Expenses Allocation	Estimated % of Premium
Selling Expenses (Commissions, Broker Bonus)	4.08%
General Admin Expenses	9.11%
Total	13.20%

Profit and Risk Margin

The Profit and Risk Margin of 1.41% is shown in Worksheet 1, Section 3 of the URRT. This target does not vary by product or plan.

Taxes and Fees

Taxes and fees are expected to be 5.91% and include premium tax, exchange fees, PCORI fees, and federal income tax. The following is a breakdown of the taxes and fees.

Premium Taxes and Fees Allocation	Estimated % of Premium
Federal / State Income Tax on Profit & Risk Load	0.76%
Premium Tax	1.76%
ACA Taxes: Insurer Fee	3.25%
ACA Taxes: Reinsurance Fee	0.00%
ACA Taxes: PCORI Fee	0.04%
ACA Taxes: Risk Adjustment User Fee	0.03%
ACA Taxes: Exchange User Fee	0.00%
All Other Taxes & Fees	0.07%
Total	5.91%

C. Normalized Market-Adjusted Projected Allowed Total Claims

The normalization factors are in the table below. The two factors with the biggest difference are the Average age and average geographic factors.

The 2018 average age factor is slightly higher than the 2016 factor, the average age in 2018 is 1.414 compared to 1.359 in 2017. The age factors used in this calculation are the HHS-specified age curve. The 2018 average geographic factor is .852 compared to 0.831 in 2017.

D. Components of Rate Change

Table 7. Normalized Market-Adjusted Projected Allowed Total Claims

	2017	2018
<u>Normalization Factors</u>		
Average Age Factor	1.359	1.414
Average Geographic Factor	0.831	0.852
Average Tobacco Factor	1.000	1.000
Average Benefit Richness (induced demand)	1.106	1.134
Average Network Factor	1.000	1.000
Market-Adjusted Projected Allowed Total Claims PMPM	\$ 429.24	\$ 508.26
Normalized Market-Adjusted Projected Allowed Total Claims PMPM	\$ 343.68	\$ 372.09

Table 9. Year-over-Year Data to Support Table 8

	2017	2018
Paid-to-Allowed	0.826	0.776
URRT Trend (Total Applied Trend Factor)	1.144	1.158
URRT Morbidity	1.005	1.005
URRT "Other"	0.927	1.011
Risk Adjustment	\$ 12.93	\$ 20.51
Exchange User Fee		\$ -
Capitation	\$ 13.68	\$ 16.91
Network	1.000	1.000
Pricing AV	0.826	0.791
Benefit Richness	1.106	1.122
Catastrophic Eligibility	1.000	1.000
Administrative Expenses	12.60%	13.20%
Taxes and Fees	5.32%	5.88%
Profit and/or Contingency	2.00%	1.41%

Changes in "Other" include the changes in the catastrophic claims adjustment impact. The risk adjustment estimate changed from -6.6% for 2017 to -6.1% for 2018 assessment. The capitation arrangements for 2017 resulted in a projection of \$13.68 PMPM while for 2018 is \$16.91 PMPM.

3. Plan Rate Development

Table 10 has been populated as instructed.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 has been populated as instructed.

5. Plan Factors

A. Age and Tobacco Factors

Table 12 has been populated as instructed using the default federal standard age curve.

B. Geographic Factors

Table 13 has been populated as instructed

C. Network Factors

Table 14 has been populated as instructed

D. Service Area Composition

There is just one service area that includes all the counties.

E. Composite Rating

No composite rating is offered for this product.

6. Actuarial Certifications

I, [REDACTED], an Actuary at UnitedHealthcare, I am a members of the American Academy of Actuaries, and I meet the Academy's qualification standards for rendering statements of actuarial opinion with respect to the filing of rates for health insurance products. I have reviewed applicable ASOPs during the preparation of this rate filing.

To the best of my knowledge and judgment, I certify that:

- The projected index rate is:
 - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),
 - Developed in compliance with the applicable Actuarial Standards of Practice,
 - Reasonable in relation to the benefits provided and population anticipated to be covered,
 - Neither excessive, deficient, nor unfairly discriminatory.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification
- All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. The unique plan design actuarial certification required by 45 CFR Part 156.135 has been separately attached.
- The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop their rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.
- All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2017 Rate Filing Justification.

I certify that the anticipated loss ratio meets the minimum requirement, the rates are reasonable in relation to benefits, the filing complies with the laws and regulations of PA and all applicable Actuarial Standards of Practice, including ASOP No. 8 and the rates are not unfairly discriminatory.

Mrs. Rashmi Mathur | Actuary
Pennsylvania Insurance Department
1311 Strawberry Square | Harrisburg, PA 17120

Re: United HealthCare Insurance Company (UHIC)
PA Small Business Filing 1.1.2018 Off Exchange Only - Rate Filing
SERFF ID# UHLC-131030030

Dear Mrs. Rashmi Mathur,
Thank you for your letter reviewing our SERFF filing submission dated 6/19/2017. These are our responses.

The Pennsylvania Insurance Department has received and conducted a preliminary review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within five business days of the date of this letter. If you have any questions or difficulties in providing the data within this time frame, please call me.

1. The number of policyholders on the Rate/Rule Tab in SERFF should be the number of lives as per Department Guidelines on Page 5 of Section A. 2D. SERFF Rate/Rule Schedule Tab. Please correct.
We've corrected the Rate/Rule Tab in SERFF.

2. Were changes in provider contracting considered in the development of cost trends?
Changes in provider contracting were considered in the development of our forward pricing trend.

3. The Incurred claims (IC) and Allowed Claims (AC) in Table 2 should not include Rx Rebates and should match the IC and AC amounts in Table 4. The URRT IC and AC must be net of Rx Rebates. There is discrepancy in the two sets of numbers. Please correct.
Table 2 and 4 were updated to fix the discrepancy. Incurred Claims now match between the two tables. Allowed Claims do not match because Table 4 requests net of Rx Rebates and Table 2 does not include Rx Rebates.

4. Please explain the discrepancy between the trends shown in Table 3 and Section II of the URRT. Please correct.
Please see Exhibit 4 in the objection response workbook. Section II of the URRT contains the utilization at 3.5% and unit cost at 4.0%. These are the weighted average results of the trends entered in Table 3.

5. The index rate of the experience period in Table 2 (\$388.71) is the same in Section 1 of URRT but is different in Section 2 of the URRT (\$395.01). Please explain.
The \$388.71 is EHB only while the \$395.01 includes Non-EHB. Non-EHB is removed from the experience period claims on Worksheet 2 of the URRT.

6. Please provide a detailed explanation and show the calculations underlying the pricing impact of cost sharing shown in Exhibit 5b for each plan.
UnitedHealthcare has a proprietary pricing model that calculates plan relativity factors for medical and pharmacy benefits. The pricing impact was calculated by comparing the plan relativity factor of the 2017 benefit designs run through our 2018 pricing tool to the plan relativity factor of the 2018 benefit design.

7. The following questions relate to the Base Rate:
a. Please provide a detailed quantitative exhibit with a detailed explanation of the various components used in developing the Base Rate as shown in Exhibit 4. Please include every adjustment utilized (e.g., experience allowed PMPM, claims trend, demographics, etc.) in arriving at the Base Rate.
See Exhibit 7A in the objection response workbook.

b. Please provide a detailed quantitative exhibit and explanation as to how the Index Rate relates to the Base Rate.

In determining appropriate base rate levels, UnitedHealthcare projects net claims experience to the proposed rating period and compares this projection to existing rate levels. This comparison provides us with the appropriate rate action to take regarding the adjustment of current base rate levels. The URRT Index Rate is based on allowed claims experience projected to the rating period and is developed for the purpose of satisfying certain data requirements per Federal regulation. Please note the following qualifying statement that was included in the Actuarial Certification section of the Part III memorandum:

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop their rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.

8. Please explain the purpose of and how the revenue neutrality adjustment shown in Exhibit 14 is used for in the rate development.

In pricing the 2018 portfolio, we utilized an updated pricing tool with revisions to the underlying costs and utilizations of various procedures. When we ran our 2017 portfolio through the revised tool, plan relativities were on average 6.4% lower than actual 2017 pricing. In order to make the change in pricing tool revenue neutral, the base rate was increased by 6.4%.

9. The following questions pertain to benefit plan relativities summarized in Exhibits 3a, 3b and 3c.

a. Please provide a detailed description of how the medical and pharmacy relativities were developed.

Medical and Rx plan relativities are developed using our proprietary pricing models as described in the actuarial memoranda. These models generate net and allowed PMPMs, where net PMPMs vary based on cost sharing features (copay, deductible, coinsurance, etc.). The ratio of net PMPM-to-allowed PMPM produces the plan relativity. The PMPMs produced by these models are used solely for producing plan relativities.

b. Please provide a detailed quantitative exhibit that summarizes the development of the medical and pharmacy relativities for all plans. Please show paid-to-allowed ratios and any other adjustments made to arrive at the medical and pharmacy relativities.

No adjustments were made to the results received from the pricing model. Paid to Allowed by plan can be found on Exhibit 10 in the initial filing.

10. The following questions pertain to the Index Rate adjustments shown in Exhibit 9:.

a. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 1.005 Demographic Creep adjustment.

The Demographic Creep adjustment is to reflect the effect of aging of the population that occurs from the single risk pool experience period to projection period. We assume the same population of insured will be covered in the projection period and that this factor will adjust for the full amount of aging that occurs.

b. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 0.987 Catastrophic Claim Adjustment.

See Exhibit 10b in the objection response workbook.

c. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 1.008 Market Drop-Out adjustment.

We have removed the Market Drop-Out Adjustment. Our initial strategy was to offer ACA renewal effective 1/1/2017 to all groups still utilizing the transitional relief program. When the program was extended, we resumed the renewal under the transitional relief under their current renewal date. The adjustment was supposed to recognize the rate impact that groups who would receive the higher ACA increase would elect not to renew. Since the program was extended, we recognized the need to remove this adjustment.

d. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 1.004 Induced Demand adjustment.

See Exhibit 10d in the objection response workbook.

e. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 1.020 Multichoice adjustment.

See Exhibit 10e in the objection response workbook for the development of the Multichoice adjustment. We initially offered our Multichoice package on a limited subset of plans from our portfolio. However, in 2016, we have expanded the package to include all plans in our portfolio. Since 2016 was the first year we offered the expanded package, very few groups have elected to offer more than one option. Our pricing guidelines indicate the pricing load should be 3.3% due to the spread between highest and lowest priced plans. Recognizing this option was available in 2016, we only applied 60% of the recommended pricing load in our guidelines.

f. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 0.946 Rx Rebates adjustment.

Our pricing model develops rates starting with incurred claims net of Rx rebates and projects the claim cost for the rating period. However, we inadvertently subtracted the Rx rebates a second time later in the pricing process. We recognized this while reviewing these objections. Since we removed RX rebates twice the incurred claim estimate in the projection period is lower than it should be by this amount. Since we also are removing another factor we used in the development of the 2018 rate, mentioned in response 10c, we are leaving the requested rate increase as filed rather than revise the filing to file the higher indicated rate change.

As stated in the memorandum (see excerpt included with response to objection 7b), the URRT does not demonstrate the process of developing our rates. In order to tie the processes together, a balancing item must be included to account for the process differences. In our original filing we included an RX rebate balancing item of .946, this balancing item was located in the paid-to-allowed factor. With the removal of the Rx Rebates adjustment, we moved the balancing item to the Other Adjustment Factor. Please see exhibit 10f in the objection response workbook for the illustration of these changes.

11. Please describe what non-EHB services account for 1.6% of total claims, as discussed in section 1F of the Actuarial Memorandum.

The non-EHB services include Acupuncture, Cochlear Implants, Hearing Aids, Mental Health – ABA, Ostomy Supplies, and Private Duty Nursing.

12. Please separately identify and describe the capitation arrangements United will utilize in 2018. Additionally, please separately show the PMPM value of each capitated service.

Below is the approximate breakdown of the estimates for our capitated services:

Behavioral Health	52%
Physical Health (Chiro)	10%
Medical Management Programs	17%
Other Medical Expenses (ex. Claims surcharges, assessments)	21%

13. Please provide quantitative support for the 9.30% capitation trend assumption.

In researching the answer to this objection, it was determined the original estimate of capitation trend only included the trend for one component on the capitations. When all capitations are taken into account, the capitation trend was lowered to 5.1%. The revised number can be found on Exhibit 4 in the objection response workbook.

14. The following questions pertain to the Risk Adjustment calculation shown in Exhibit 15:

a. Please explain why the statewide average premium is not adjusted downward by a factor of 0.860 to account for changes to the risk transfer formula as outlined in the 2018 Benefit and Payment Parameters Notice.

We did not adjust for the 0.86, because the risk adjustment number being used was already lower than the risk adjustment estimates we received from PA DOI. Please see exhibit 14a in the objection response workbook. We plan to adjust this when the final CMS numbers are released.

b. Please provide a detailed quantitative exhibit and explanation in developing the 0.77 Credibility Adjustment.

Our credibility adjustment has two components. One component is based on a credibility formula using our member months ($0.0044 \times M^{0.4241}$), where M is the member months from the last complete calendar year study. The other component is based on market participation and is simply a linear function where full

credibility is at 95% participation and credibility decreases by 0.5% for every 1.0% participation below 95%. So, the first component is 80%, and the second component reduces that by 3% resulting in the 77% value.

c. Please provide a detailed quantitative exhibit and explanation in developing the -3.6% Adjusted Transfer Percentage.

The calculation of the -3.6% can be found in the original filing under Exhibit 15.

d. Please provide a detailed explanation in how the appropriate adjustments were made in moving from calculating the initial risk adjustment percentage based on the statewide average premium and applying the final percentage to United's projected incurred claims.

The only adjustment made to the initial risk adjustment percentage was applying the credibility discussed in 14b.

15. Please justify quantitatively how the paid-to-allowed ratio shown in Worksheet I of the URRT was developed.

See Exhibit 15 in the objection response workbook.

16. Please provide a detailed MLR calculation. Please start with projected incurred claims PMPM and projected premiums PMPM, and then explicitly show the impact PMPM of each adjustment applied to claims and premiums (e.g. risk adjustment, QI expenses, exchange user fee, etc.) in arriving at the projected MLR.

See Exhibit 16 in the objection response workbook.

17. Please adjust Table 5 of the PA Actuarial Memorandum Rate Exhibit to move the \$0.14 PMPM risk adjustment fee from the Projected Paid Exchange User Fees PMPM line into the Projected Risk Adjustment PMPM line.

This has been adjusted.

18. There appears to be a discrepancy between the quarterly trend factors presented in Table 5A of the PA Actuarial Memorandum Rate Exhibit excel file, Exhibit 1, Section 14 of the Part III Actuarial Memorandum, and Section 18 of the Part III Actuarial Memorandum. Please justify the differences. If necessary, please revise any filing submission items.

Section 18 trend factors are calculated to represent the midpoint of the quarter since that is the midpoint of the rating period. Table 5A and Section 14 trend factors are calculated to the beginning of the quarter.

19. There appears to be a discrepancy between the trend assumptions presented in Exhibit 6, Section II of Worksheet 1 of the URRT, Table 3 of the PA Actuarial Memorandum Rate Exhibit excel file, Table 5A of the PA Actuarial Memorandum Rate Exhibit excel file, and Section 6 of the Part III Actuarial Memorandum. Please justify the difference. If necessary, please revise any filing submission items.

Exhibit 6 is our forward pricing trend. Table 5A is our forward pricing trend with leveraging removed. Table 3 and Section 6 are our claims trend. The difference between our forward pricing trend and claims trend is the forward pricing trend reflects future expected contracting changes and the additional uncertainty of projecting further into the future.

20. The taxes and fees shown in Section 11 of the Part III Actuarial Memorandum do not match the taxes and fees presented in Section III of Worksheet I of the URRT. Please justify the differences. If necessary, please revise any filing submission items.

Section 11 includes the 0.14 PMPM for the risk adjustment user fee. This PMPM is under the Projected Risk Adjustments PMPM on Section III of Worksheet 1 of the URRT and not under taxes and fees.

21. Please provide a quantitative exhibit demonstrating the development of the Health Insurer Fee, as shown in Section 11 of the Part III Actuarial Memorandum.

See Exhibit 21 in the objection response workbook.

22. The incurred and allowed claims in Section I, Worksheet I of the URRT should include capitated claims and be net of pharmacy rebates. It appears the incurred and allowed claims populated in the URRT are not

adjusted to include capitated claims and to remove pharmacy rebates. Please revise any filing submission items.

Section I, Worksheet I of the URRT includes capitated claims and is net of pharmacy rebates. We had incorrect values in the tables included in the PA Actuarial Memorandum Exhibits. These have been revised.

23. Please provide justification for the increase in the profit and risk non-benefit expense assumption relative to 2017.

We initially filed for a 3.1% profit and risk non-benefit exposure assumption in our 1/1/2017 filing. The state required us to lower the assumption in the final rates to 2.0%. For the 2018 development, we slightly lowered our profit assumption to 2.27% from what was initially filed last year.

24. Please show the development of the average commission and circumstances in which broker commissions will be paid and if they will vary based on geographic location, metal level, plan, open enrollment vs SEP enrollment, etc. Additionally, the current and 2018 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.

We relied on the corporate finance area for the expense estimates. Based on the modeling performed 4.08% of premium was estimated. We then applied this percentage in the rate expense section of the rate filing. The commission estimate is based on the commissions we pay brokers, any commissions we pay to general agents as well as any broker bonus. Commissions vary by group size, first vs renewal, and by geographic area. See attached exhibit 24.

25. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

Our portfolio has two expanded Bronze plans. The justification is below.

AUAG is a HSA plan so qualifies as a HDHP.

AUAQ: Generic Rx Copay \$10 / Average Unit Cost \$42.67 = 23.4% < 50%

26. The average age in Table 1 should be the true age based on single year bands distribution. If not, please revise Table 1.

It is the average age based on single year bands distribution.

27. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.

PA Plan Design Summary and Rate Tables, Federal Rates Template, and the binder are identical. Table 11 is slightly different.

Sincerely,

Maria Ilea, ASA, MAAA

Re: United HealthCare Insurance Company (UHIC)
PA Small Business Filing 1.1.2018 Off Exchange Only - Rate Filing
SERFF ID# UHLC-131030030

Dear Mrs. Rashmi Mathur,
Thank you for your letter reviewing our SERFF filing submission dated 7/6/2017. These are our responses.

The Pennsylvania Insurance Department has received and conducted a preliminary review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within five business days of the date on this letter. If you have any questions or difficulties in providing the data within this time frame, please call me.

1. The response to question 6 did not meet the required level of detail requested. Please provide an exhibit that summarizes the plan relativity factor of the 2017 benefit designs, the plan relativity factor of the 2018 benefit designs, and the corresponding price impact relativity shown for each plan in Exhibit 5b of the Actuarial Memorandum.

Please see Exhibit 1 in the new objection response exhibits file. The price impact can be found highlighted in gray.

2. The following questions pertain to the Base Rate exhibit provided on the '7a' tab of the "Objection Response Exhibits 06.26.2017" excel file.

a) Please provide a quantitative exhibit that demonstrates the development of the \$637.44 2018Q1 Base Rate. Please show the complete build up starting with experience period allowed or paid PMPM (i.e., please do not use the last PA approved base rate as the starting point). Please clearly quantitatively show and describe how each adjustment (e.g., demographics, trend, morbidity, etc.) was developed and its purpose.

Please see exhibit 2A in the objection response exhibits file. This demonstration is for the new filing with the revised base rates, risk adjustment number and profit changes.

b) Please explain what the 1.09527 factor used in the "2017 Trend & Insurer Fee" line represents and provide a quantitative exhibit demonstrating how it was developed. Please explain how this factor relates to the assumed trends utilized in the 2018 rate development. If this represents a full calendar year of trend, please explain why United believes it is appropriate to apply a full calendar year of trend rather than a partial year trend.

The exhibit 2B in the objection response file shows how we go from our approved 4/1/2017 base rates and applied the approved trend and insurer fee quarterly increases and extended to 1/1/2018. The Trend and Insurer Fee of 1.09527 is just 3 quarters of our filed and approved 2017 pricing trend and insurer fee effective 4/1/2017. It is the amount of trend needed to get from our last filed base rate (4/1/2017) to 1/1/2018. This is demonstrated on Exhibit 2B in the objection response exhibits file. Since we increased the insurer fee by 0.8% to go from 4Q2017 to 1Q2018 in this calculation, we need to reduce the 1Q2018 applied insurer fee adjustment by 0.3%.

c) Please explain what the 0.997 factor used in the "2017 Trend & Insurer Fee" line represents and provide a quantitative exhibit demonstrating how it was developed.

Please see the objection response and exhibit for 2B for the explanation of this adjustment.

d) Please explain why the "Age Factor Rev Neutrality" is necessary. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 0.971 "Age Factor Rev Neutrality" adjustment used in the 2018 Base Rate development.

Please see exhibit 2D in the objection response exhibits file for the development of the 0.971. We have modeled the average age factor using the previous age schedule and the revised 2018 age schedule. The impact is an increase in premium due to the higher 0-20 age factors. As a result, we have applied a reduction to the base rates to bring the expected revenue back to be consistent to the pre-2018 age table. If we did not make the revenue neutral adjustment the YOY average rate increase would be 3% higher and the expected BCR about 3% lower.

3. The following questions relate to the response provided in question 8.

a) Please describe and quantitatively value the changes made to the United pricing model used in the 2018 rate development relative to the 2017 rate development.

The following updates were made in the most recent pricing model. Some of the changes interact with each other making quantifying the value of each specific change difficult to do. Updates made include factors related to utilization based on benefit differences based on more recent claim experience and an updated

view of the impact of risk adjustment transfers. In addition, plan values were determined using an effective date of 1/1/2018 in order to realize the impact of trend leveraging on different plan designs. A more detailed category-specific unit cost and utilization trend is now applied. The utilization adjustment applied to the Rx portion of Integrated Rx calculations has been updated to be consistent with the standalone Rx utilization adjustment. In the prior model, the medical slope applied to both the Medical and Rx portion of net costs. OON Factors have also been updated.

b) A 6.4% decrease in average plan relativities relative to 2017 indicates plan relativities used in the 2017 rate development were overstated by 6.4% according to the revised tool. Please explain why United believes it is appropriate to apply the 6.4% upward adjustment (and not correct for the plan relativity overstatement) in developing the 2018 Base Rate.

The plan relativity model and the base rates go hand-in-hand to come up with the total rate to be charged by plan. The model gives us the estimated relative cost difference between plans. Multiplying the plan relativities by the base rate gets us the total rate to charge for each plan. There are changes to the underlying data every year and model updates based on enhancements to the model every year. When we make changes to the plan relativities from one year to the next, we apply the difference in the model changes as a revenue neutral adjustment. So in total, we would collect the same amount of premium. In 2017, we had two separate models that we used. There was a medical model and a separate RX model. We combined the data of the two models to develop plan relativity factors. The 2018 model is one model that includes medical and RX. The revenue neutrality factor is needed to make sure that, in total, we are collecting the same amount of revenue. In the base rate development, we take the claims from the experience period and trend them to the projection period. We then compare the expected claims to the current level premiums to determine if a rate change is needed. In the 2018 rate development, we compare the expected claims to the current premium levels (2017 rates and plan rels) to determine if a base rate adjustment is needed. If we did not make a revenue neutrality adjustment, the expected premium in the 2018 rate development would be low by the results of the change in model. Making the revenue neutrality adjustment gets the total premium consistent with 2017 premium levels (base rate * plan rels).

4. The following questions relate to the response provided in question 9.

a) The response to question 9a states, "The ratio of net PMPM-to-allowed PMPM produces the plan relativity." Please explain why the medical relativity of the AVJL plan shown in Exhibit 3a is greater than 1. UHIC utilizes only one medical base rate in PA for all product types. We calculate relativities to the allowed PMPM for the POS plans (In-Full Rate). Therefore, the allowed PMPM base for relativity calculations is the same across all plans. Indemnity plans are substantially richer than our EPO and POS plans. This is why the Indemnity plan relativities are greater than 1. Exhibit 1 in the objection response file should help depict this (highlighted in gold).

b) Please explain why the pharmacy relativities are 0.000 for select plans in Exhibits 3b and 3c (e.g., Rx code 602).

For HSA plans, all costs associated with the plan are under the medical relativity. All HSA Rx codes have plan relativities set to 0 for the ease of implementation. If we look to Exhibit 1 in the objection response file, we see Rx plan 602 for the integrated plan AUA6 has a different Net PMPM than 602 for integrated plan AUAU. Instead of having different relativities for the same plan code in our system, 602-HSA is set to 0, so it is consistent for all plans that utilize the code.

c) Please provide an exhibit that shows the net PMPM, allowed PMPM and ratio of net PMPM to allowed PMPM for every plan shown in Exhibits 3a, 3b and 3c. Please demonstrate this is consistent with the medical and pharmacy relatives presented in Exhibits 3a, 3b and 3c and how they tie to the 'Paid to Allowed Factors' presented in Exhibit 10.

Please see exhibit 4C in the objection response file.

5. The following questions relate to the response provided in question 10.

a) Please provide a quantitative exhibit demonstrating the development of the 1.005 Demographic Creep Adjustment.

The manual rate development utilizes a methodology that projects the average age to the midpoint of a forecasted period for revenue. In practice, the age is determined as of the effective date of the group. The 50bps adjustment is necessary to adjust for the approximately 6 months of demographics between the manual methodology and how rates are actually established. The 0.5% taken is less than most factor increases.

Example: When a 25 year-old reaches age 26, the age factor increases from 1.004 to 1.024 which is a 2.0% increase.

b) Please explain how the Demographic Creep Adjustment relates to the "Age Factor Rev Neutrality" adjustment shown on tab '7a' of the "Objection Response Exhibits 06.26.2017" excel file.

It does not relate. These are two separate adjustments.

c) Please explain and provide a quantitative exhibit illustrating the development of the 13.2% "Expected Cat

Claim Level %" and the \$41.47 "Expected Cat Claims PMPM" figures presented in tab '10b' of the "Objection Response Exhibits 06.26.2017" excel file. Please explain why the 0.987 catastrophic adjustment does not appear to be used in developing the 2018 Base Rate, as shown on the '7a' tab of the "Objection Response Exhibits 06.26.2017" excel file.

Our expected Cat Claim Level % is a national model and is calculated with the following process. First, it is determined which claims exceed \$200K. Two years of claims are used for each market and region. To smooth out the Cat claim % from quarter to quarter, a credibility factor is developed for each market based on membership. The regional catastrophic percentage is blended with the state specific catastrophic claim percentage. Please see exhibit 5C for the calculation of the 13.2% Expected Cat Claims % and PMPM. Please see exhibit 2A for the use in the development of the base rate.

d) Please explain why the 1.004 induced utilization adjustment does not appear to be used in developing the 2018 Base Rate, as shown on the '7a' tab of the "Objection Response Exhibits 06.26.2017" excel file.

Please see exhibit 2A for the use in the development of the base rate.

e) Please explain what the "Maximum MultiChoice Spread" and "Single Rate Structure" values represent on tab '10e' of the "Objection Response Exhibits 06.26.2017" excel file. Please explain why the 1.020 MultieChoice adjustment does not appear to be used in developing the 2018 Base Rate, as shown on the '7a' tab of the "Objection Response Exhibits 06.26.2017" excel file.

The maximum multichoice spread is the spread between the highest and lowest cost plans eligible for multichoice packages. The single rate structure is a rating methodology that requires the same plan included in a multichoice package to have the same rate as the plan offered as a single option. This requires a rate adjustment for the additional risk which would increase with the spread of the multichoice options. The larger the spread, the more selection is available. The pricing should reflect the added selection. For our portfolio, the 54% spread equates to a 3.3% multichoice adjustment. Since not all groups will utilize the maximum spread we used actuarial judgment to determine the factor to use in the rate development. We assumed only 60% of the maximum 3.3% load which is 2.0%. Please see exhibit 2A for the use in the development of the base rate of the multi choice adjustment.

6. Please explain why the weighted average unit cost trend increased from 3.9% to 4.0% even though the capitation trend decreased from 9.3% to 5.1%.

The original trend exhibit categorized some capitation claims under the professional category. The revised 5.1% capitation trend was the result of moving the additional claims to capitation and recalculating the trend. The original unit cost trend was 3.94%, so this small shift affected the rounding. Please see exhibit 6 for the full unit cost breakdown before and after the revision. The differences between the two exhibits are highlighted in gray.

7. The following questions pertain to the response provided to question 14.

a) The 0.860 statewide average premium adjustment is intended to remove administrative costs from the statewide average premium utilized in the risk adjustment transfer calculation. This factor should be included in the calculation as a multiplication to the statewide premium amount as outlined in the 2018 Notice of Benefit and Payment Parameters. Please update your calculation to include this adjustment. We've revised the filing based on the risk adjustment transfer released on 6/30/2017 with the 0.860 adjustment.

b) The 2016 Benefit Year risk adjustment transfer was released 6/30/2017. Please provide revised filing submission items containing updated assumptions impacted by the report (e.g., risk adjustment transfer, morbidity adjustment, etc.).

We've revised the filing based on the risk adjustment transfer released on 6/30/2017.

8. The following questions relate to the response provided to question 15.

a) Please show the development of the 81.0% experience period paid-to-allowed ratio. We are unable to replicate the calculation using the data provided in the "PA Actuarial Memorandum Rate Exhibits 2018 Final Annual Protected" excel file.

$\text{Incurred Claim PMPM} / \text{Allowed Claim PMPM} = \$320.15 / \$395.01 = 81.0\%$

Table 2 has been updated. $\text{Paid Claims} / (\text{Allowed Claims} [\text{Non-Capitated}] + \text{Rx Rebates} + \text{EHB Capitation}) = 81\%$

b) The 1.0208 leveraging impact adjustment applied in developing the projected paid-to-allowed ratio is not consistent with the 1.0% shown in the trend exhibit provided in tab '4' of the "Objection Response Exhibits 06.26.2017". Please justify the difference.

This is the 1.0% trended from the experience period to the projection period.

$1.01^{(25 \text{ months}/12)} = 1.0208$

c) Please provide a detailed quantitative exhibit and explanation of the various components used in developing the 0.9374 "Cost Sharing Distr. Shift" adjustment.

Please see exhibit 8C in objection response file.

9. Please explain why the \$637.44 Base Rate provided in the 6/26/2017 updated Actuarial Memorandum did not change relative to the Base Rate presented in the initial rate filing, despite making assumption adjustments (e.g., adjusting capitation trend, removing the "Market drop -Out Adjustment", etc.). We have revised the rate filing and increased the base rate. We also adjusted the other factors and lowered the profit assumption. In the original rate filing after we made the changes to the other factors, we also had a balancing factor that was changed from a negative to a positive (Exhibit 10F in the original objection response) which is how we kept the base rate the same.

10. If you wish to make adjustments to the projected RA amount included in this rate filing and the URRT, based on the June 30, 2017 Summary Report on Transitional Reinsurance Payments and Permanent Risk Adjustment Transfers, please do so in this submission. Provide narrative and an Excel spreadsheet demonstrating the development and assumptions.

Please see exhibit 10 in the objection response file.

11. As discussed with you on telephone, please make all the corrections (such as Market Dropout adjustment, double counting of Rx rebates, correction of capitation trend, etc.) to this filing.

Filing has been adjusted as discussed in objection 9.

12. Please note that all revisions must be reflected in this resubmission. The Department shall not allow any changes to the rates after this submission.

Noted.

13. Please provide a PDF file for public review (Public Rate Filing PDF) in SERFF to show the updated rate request. The following updated supporting items must be included:

- Cover Letter
- Rate Change Request Summary (Attachment 1)
- Part 1 - Unified Rate Review Template (URRT)
- Part II – Consumer Friendly Justification
- Part III – Federal Actuarial Memorandum (redacted)
- PA Actuarial Memorandum (redacted)
- PA Actuarial Memorandum Rate Exhibits
- PA Plan Design Summary and Rate Tables
- Federal Rates Templates
- Service Area Maps
- Correspondence – Q&A's

Please remain cognizant of the limited redactions as outlined on pages 3 and 4 of the 2018 Guidance. Only those specific items may be redacted. Since AV screenshots and commission schedules are proprietary, they should not be included in this public PDF. Additionally, please ensure that documents and spreadsheets are internally consistent and that the Excel exhibit with formula corrections emailed to you on June 6, 2017 is used. The deadline for the revised PDF is COB July 18, 2017.

Updated.

Sincerely,

Maria Ilea, ASA, MAAA

Associate Director Actuarial Services
4 Research Drive
Shelton, CT 06484
