Form Filing Tracking Number: AETN-132313503

Dear Ms. Altman:

The purpose of this filing revision is to provide details of the premium rate development and resulting proposed monthly premium rates for Small Group policies which will be offered off-Exchange in the state of PA for effective dates of January 1, 2021 and later. This filing is being provided to comply with regulatory rate filing requirements, and is not intended to be used for other purposes.

The health benefit plans proposed in this filing are in compliance with all state-specific benefit requirements and rating regulations, as well as the benefit plan requirements of the Patient Protection and Affordability Act (P.L. 111-148). This rate filing is intended for new business issued through the State of PA off-Exchange marketplace effective January 1, 2021.

All products and associated proposed monthly premium rates contained within this rate filing will be available to existing business upon their request. Existing business that is not considered grandfathered under PPACA regulation will be converted to the plans and rates in this filing upon renewal.

We have tried to present this information in a manner that will facilitate your Department's review. If there are changes we can make to improve the process or you would like us to present the information differently in the future, please let us know.

Please feel free to contact me at the above listed telephone number and/or e-mail address if you have any additional questions.

Sincerely,

 FSA, MAAA
Aetna

Attachment I

Rate Change Summary

Aetna Health Assurance of Pennsylvania – Small Group Plans

Rate request filing ID # AETN-132308680 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at

<http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	7.3% ¹
Revised requested average rate change:	N/A
Range of requested rate change:	7.3% -7.3%
Effective date:	1/1/2021
Mapped Members:	5
Available in:	Rating Areas 1-3 and 5-9, certain counties excluded

Key information

Jan. 2019-Dec. 2019 financial experience

Premiums	\$2.8 M
Claims	\$2.0 M
Administrative expenses	\$2.0 M
Taxes & fees	\$0.2 M
Company made (after taxes)	-\$1.4 M

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2021:

Claims:	87.4%
Administrative:	8.9%
Taxes & fees:	1.7%
Profit:	2.0%

The company expects its annual medical costs to increase **9.43%**.

Explanation of requested rate change

Medical costs are going up, and we are changing our rates to reflect this increase. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Rate increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

2021 Pennsylvania Actuarial Memorandum

1. Basic Information and Data

A. Company Information

Company Legal Name:	Aetna Health Assurance of PA
NAIC #:	18527
Market:	Small Group Off-Exchange
Effective Date:	01/01/2021
Avg rate change requested:	7.3%
Range of rate change requested:	7.3% - 7.3%
Products:	EPO
Rating Areas:	Rating Areas 1-3 and 5-9, certain counties excluded
Metal Levels:	Silver
Current # covered lives:	5
Current # policyholders:	5
Number of plans offered:	1
HIOS Issuer ID / Binder #:	18939
Rate Filing Tracking Number:	AETN-132308680
Policy Form(s):	AHASPA SG HCOC-2021-EPO 05
Form Filing Tracking Number:	AETN-132313503

B. Rate History and Proposed Variations in Rate Changes

- April 1, 2016
 - Introduction of legal entity
 - AETN-130242360
- October 1, 2016
 - Increased previously filed 4Q16 rates by 7.4%
 - AETN-130565231
- January 1, 2017
 - Filed a 27.3% rate increase
 - AETN-130533528
- January 1, 2018
 - Filed a 1.7% rate decrease
 - AETN-131033573
- January 1, 2019
 - Filed a 8.5% rate increase
 - AETN-131455851
- January 1, 2020
 - Filed a 7.1% rate increase
 - AETN-131899743

C. Average Rate Change

The average rate change, as noted in cell AZ15 of Table 10 and the percent change rate requested on the SERFF Rate Review Detail screen, is 7.3%. The change in the 21-year-old non-tobacco premium pmpm as stated in cell AN13 on Table 11 is 7.3%.

D. Membership Count

Total current membership by age bucket is shown on Table 1.

E. Benefit Changes

We are continuing to offer one silver plan for each product; the out-of-pocket maximum on this plan has increased from \$8,150 to \$8,550. The HIOS IDs are as follows:

2020 HIOS Plan ID	2020 Plan Name	2021 HIOS Plan ID	2021 Plan Name
18939PA0040001	PA Silver OAEPO 6000 80% AHASPA	18939PA0040001	PA Silver OAEPO 6000 80% AHASPA

F. Experience Period Claims and Premium

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2019 through December 31, 2019 and paid through February 29, 2020, for AHASPA.

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

Experience period premiums are date-of-service premiums from our actuarial experience databases for Small Group business in Pennsylvania. Our internal projections indicate that no MLR rebate is expected to be paid in 2020 (for 2019 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB).

The manual experience includes capitation for the same services that are expected to be capitated for the products in this filing in 2021.

Transitional Reinsurance recoveries do not apply to Small Group business. Risk Adjustment transfer is accrued at the issuer and market level based on 2019 Wakely data and our internal projections of how our risk relative to market has changed since that report was issued. The transfer is allocated to the member-level by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result.

Pharmacy rebates have been subtracted out of the experience period data. The loss ratio for the experience period is 69.7%.

G. Credibility of Data

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

The source data for our manual rate is the experience incurred from January 1, 2018 to December 31, 2019 and paid through February 29, 2020 for Aetna community-rated policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

H. Trend Identification

The trend values are:

Service Type	Unit Cost	Utilization
Facility Inpatient	4.7%	2.8%
Facility Outpatient	3.4%	6.8%
Physician	1.9%	6.3%
Capitation	0.0%	-0.7%
Medical	3.3%	5.6%
Pharmacy	8.9%	1.9%
Total (Med + Rx)	4.3%	4.9%

The quarterly trend factors for this filing are:

Effective Quarter	Trend Factor
1Q 2021	1.000
2Q 2021	1.030
3Q 2021	1.060
4Q 2021	1.092
Total	1.048

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in March 2019. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services is counted by service type and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

Trend factors are developed from annual forward-looking trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2021.

I. Historical Experience

As described above, medical trend factors are based on our Medical Economics Unit's local trend and network experience, and pharmacy trends are based on national commercial group Rx trend analysis.

2. Rate Development & Change

Please refer to the file titled *PA_SG_18939_Off_1Q2021_Exhibits_v3.xlsx* for any exhibits referenced in the sections below.

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs and catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward-looking trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2021. The annual trend for this filing, applied quarterly, is 12.4%. The application of this factor is shown in Table 5A.

Worksheet 1 of the URRT illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment was discussed, previously. The risk adjustment is displayed on a paid-basis and the exchange user fee is estimated as a PMPM based on the target premium rate on Worksheet 1 of the URRT. These values have each been converted to percent of allowed claims in this Exhibit.

Single Risk Pool Adjustment Factors:

Change in Morbidity => The experience period data includes experience for community-rated policies issued to small employers in 2019 and medically underwritten policies renewed under the Transitional Policy. We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2021. The factor used is 1.029, which represents two years of morbidity change, from the 2019 experience period to the 2021 projection period

Change in Demographics => Experience data was normalized for projected changes in the age/gender mix and area mix using internally developed factors. Exhibits 5 and 6 contain detail on the calculations of

the impact of demographic mix shifts. The change in demographic factor is 1.000. The increase is due to the changes in geographic factors, which is discussed in section 5B of this memorandum.

Change in Network => Included in 'Change in Other' below.

Change in Benefits => Discussed in Section 1E above.

Change in Other => The 'Other' adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

Paid-to-Allowed Ratio => The projected paid to allowed ratio is 87.1%. Paid to allowed ratios are based on 2018 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

Risk Adjustment – Projection Period =>

We trended 2018 actual Risk Adjustment payments and 2019 Risk Adjustment accruals forward three and two years respectively. Resulting payment amounts were combined to determine our current risk transfer relative to the market.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2020 Notice of Benefit and Payment Parameters. The 2021 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost. We subtracted from that Risk Adjustment transfer 0.5% of premiums for National High Risk pool funding and added our anticipated High Risk Pool recoveries. High Risk Pool recoveries were estimated based on the average of member-level recoveries that we would have received under this program for 2018-2019 claims as a percent of premium, for Silver Off-Exchange plans.

As a result, we project a risk adjustment [REDACTED]. This value is shown in Worksheet I, Section III of the URRT. Note that the risk adjustment value in Table 5 reflects the impact of quarterly premium trend, as the incurred premium over the full year is used as the basis for risk transfer payments.

Reinsurance – Projection Period => There will be no reinsurance recoveries in 2020.

Exchange User Fee => The EUF is not applicable for this filing.

Projected Allowed non-EHB Claims PMPM => The products discussed in this filing provides coverage for only those benefits defined as Essential Health Benefits (EHB).

B. Retention Items

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2020 projections, and projected changes in expenses, inflation, and membership for 2021 for our National book of Small Group business. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including

competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2019, as well as Federal income tax and State Premium taxes. The risk adjustment user fee of \$0.19 PMPM is included in the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

C. Normalized Market-Adjusted Projected Allowed Total Claims

The age factors are based on the HHS Default Standard Age curve. The factors are shown in Exhibit C-2. Exhibit C-2 demonstrates the determination of the Plan-Level Average Age Factor. Plan membership is based on issuer's similar January 2020 plan membership and projected changes in the market.

To Age-Calibrate the Plan-Adjusted Index Rates, we project a premium-weighted average age factor for the 2021 membership using the prescribed age curve and the projected age for each plan, as illustrated on Exhibit C-2. The overall Age Calibration factor is developed in Column B of Exhibit C-1. This factor is based on the weighting of plan-adjusted index rate and membership weighted by each plan's average age factor membership. The Age-Calibrated Plan Adjusted Index Rate is determined multiplying each Plan Adjusted Index Rate by the Plan-Level Average Age Factor and then dividing by the weighted over-all average age factor.

The average age for the single risk pool is the age that most closely corresponds to the premium weighted overall average age factor.

Exhibit C-2 summarizes the rating area definitions and factors and displays the projected premium by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor and is applied in column F of Exhibit C-1. Projected area factors are shown in Exhibits 6 and C-2. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors.

The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

D. Components of Rate Change

The overall change in the weighted average Calibrated Plan Adjusted Index Rate is 7.3%, as indicated in Table 8 row A. The components of this rate change are as follows:

- The change in normalized allowed claims is worth 5.9%
- The change in allowable plan adjusted level components is worth 3.6%
- The change in retention components is worth -2.2%

3. Plan Rate Development

The following briefly describes how each set of adjustments was determined.

Pricing AV / Benefit Richness:

These adjustments are discussed in Section 2C above.

Benefits in addition to EHBs:

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). The factor for the impact of benefits in addition to EHBs is a 1.00.

Provider Network:

This adjustment reflects the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

Catastrophic Eligibility:

This filing does not include catastrophic plans.

Tobacco Surcharge Adjustment:

The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

Admin Costs / Taxes & Fees / Profit or Contingency:

These factors reflect the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the Retention section.

An AV Certification is included in this filing, titled *PA_SG_18939_AV Certification_OFF_1Q21_v1.pdf*.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

The Calibrated Plan Adjusted Index Rates for 2020 and 2021 are shown in Columns Z and AA. The 2021 rates in Column AA differ from the Calibrated Plan Adjusted Index Rates on Exhibit C-1 for two reasons: (1) The CPAIR on Exhibit C-1 are 1/1/2021 rates while the rates in Column AA are average 2021 rates, and (2) our internal modeling incorporates the average trend to develop a Net Risk Adjustment factor as indicated on Worksheet I of the URRT to go from the Projected Index Rate to the Market Adjusted Index Rate. This is not accounted for in Table 5. In addition, age and geographic calibration factors have been used in the rate development as follows:

- Age Calibration: The age calibration factor estimates the average age factor that will be used in the premium calculation for the expected enrollment population. The age calibration factor used to develop the 2021 CPAIR is 1.490. This is based on the assumption that the projected enrollment will mirror the interim enrollment as of February 2020.
- Geographic calibration: The geographic calibration factor estimates the average geographic factor of the expected enrollment population. The geographic calibration factor used to develop the 2021 CPAIR is 1.007. This is based on the assumption that the projected enrollment will mirror the interim enrollment as of February 2020.

5. Plan Factors

A. Age and Tobacco Factors

The age factors are based on the HHS Default Standard Age curve. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed for tobacco rating and factors of 1.0 have been entered.

B. Geographic Factors

The proposed geographic factors are identical to the current approved factors.

C. Network Factors

There is only one network included in this filing.

D. Service Area Composition

The Service Area composition for this rate filing is the same as the current approved 2020 rate filing.

E. Composite Rating

Pennsylvania has not sought or received approval of composite rating as such, we are not offering this option at this time.

6. Actuarial Certifications

Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [REDACTED], am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:
 - a. ASOP No. 5, Incurred Health and Disability Claims
 - b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
 - c. ASOP No. 12, Risk Classification
 - d. ASOP No. 23, Data Quality
 - e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
 - f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
 - g. ASOP No. 41, Actuarial Communications
 - h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act
2. The Projected Index Rate is:

- a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
 - b. Developed in compliance with the applicable Actuarial Standards of Practice,
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
 - d. Neither excessive, deficient, nor unfairly discriminatory.
3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Aetna Health Assurance of PA
Pennsylvania Small Group
EPO Products

Summary

Aetna is filing premium rates for Small Group plans in Pennsylvania.

The new rates will apply to plan years effective in 2021. The current membership and range of rate changes by product are:

<u>Product Name</u>	<u># Members as of February 2020</u>	<u>Range of Increases</u>
PA Silver OAEPO 6000 80% AHASPA	5	7.3% - 7.3%

Why We Need to Increase Premiums

Medical costs are going up and we are changing our rates to reflect this increase. We expect medical costs to go up 11.9% excluding the effect of benefit or cost sharing changes. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Examples of increasing medical costs we have experienced over the last year include:

- The cost of an inpatient hospital admission has increased 10.2%.
- The cost of pharmacy prescription has increased 13.5%.

What Else Affects Our Request to Increase Premiums

The projected demographics of the block are slightly different from our current demographics, and we are changing our rates to reflect this.

Changes to cost-sharing for some plans were made to comply with the actuarial value requirements or make our plans more attractive to consumers.

Our estimate of average population health and the expected risk adjustment transfers for Affordable Care Act (ACA) products have changed to reflect new data on market average premiums and population health. These changes are affected by the movement of business between the ACA market and other options, including transitional coverage.

Finally, changes to our retention formula were incorporated into our rates. These changes include administrative costs, profit, and ACA taxes and fees.

Will Premiums for All Small Groups Increase 7.3%?

No, increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

How does this request align to Minimum Loss Ratio Requirements (MLR)?

These rates are expected to produce an MLR equal to or above the 80% requirement for Small Group business. Under the ACA, at least 80% of the premiums collected by health plans are expected to pay for medical care and activities that improve health care quality for members. If the actual MLR turns out to be less than 80%, rebates will be issued to members in accordance with the law.

Aetna makes significant investments that benefit our members that the government does not allow us to use in this calculation. These investments include customer service, health quality activities like disease management programs, and the development of new information technologies.

What is Aetna doing to keep premiums affordable?

Aetna strives to keep our products as affordable as possible and to address the underlying cost of health care. We are:

- Developing new agreements, arrangements, and partnerships with health care providers that base provider compensation on the quality of care.
- Creating medical management programs that address potential health issues for members earlier, improving health outcomes and reducing the need for high-cost health care services.
- Working to reduce the ability of out-of-network providers to collect unreasonably excessive payments for services they provide.

We are dedicated to increasing transparency within the health care system and helping members best utilize the plans that they have. Members can access Aetna Navigator, a secure member website, which allows them to research their specific plan benefits, health care providers in a given area, and in some locations, the cost of certain health care services. The Aetna Navigator streamlined mobile app is also available to allow members to take their care on the go.

Actuarial Memorandum and Certification

General Information

Company Identifying Information:

Company Legal Name:	Aetna Health Assurance of PA
State:	PA
HIOS Issuer ID:	18939
Market:	Small Group
Effective Date:	01/01/2021
Rate Filing Tracking Number:	AETN-132308680
Policy Form(s):	AHASPA SG HCOC-2021-EPO 05
Form Filing Tracking Number:	AETN-132313503

Company Contact Information:

Name:
Telephone Number:
Email Address:

1. Purpose, Scope, and Effective Date

The purpose of this filing is to:

- 1) Provide support for the development of the Part I Unified Rate Review Template;
- 2) Provide support for the assumptions and premium rate development for the products supported by the policy forms referenced above;
- 3) Request approval of the proposed monthly premium rates; and
- 4) Provide benefit plan design summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation.

These rates are for plans issued in Pennsylvania beginning January 1, 2021. The rates comply with all rating guidelines under federal and state regulations. The filing covers plans that will be offered outside the public Marketplace in Pennsylvania.

2. Proposed Rate Increase

Monthly premium rates for Small Group Market products in Pennsylvania are being revised for effective dates January 1, 2021 through December 31, 2021.

A. Reason for Rate Increase(s):

Revised rates for these products reflect the following:

- Impact of medical claim trend (including changes in provider unit costs and increased utilization of medical cost services) and pharmacy trend;
- Revisions to our assumptions about market-wide population morbidity and the projected population distribution;
- Revisions to administrative expense projections;
- Modifications in cost sharing to ensure that plans comply with Actuarial Value requirements;
- Updates to our pricing models used to determine the impact of cost sharing designs; and
- Changes in provider networks and contracts.

B. Variation in Rate Changes by Plan/Product:

Rate changes do not differ by plan.

3. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in Pennsylvania through AHASPA. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d). Rates for plans that may be renewed outside the Single Risk Pool (due to either being grandfathered or permissible transitional offerings) are not covered in this filing.

4. Experience and Current Period Premium, Claims, and Enrollment

A. Paid Through Date:

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2019 through December 31, 2019 and paid through February 29, 2020.

B. Current Date: The current enrollment and premium is reported as of February 29, 2020.

C. Allowed and Incurred Claims Incurred During the Experience Period:

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

In addition to the fee-for-service and capitation payments discussed above, some of our provider contracts include provisions under which we share claim cost differences with the provider relative to a pre-determined target amount. These adjustments serve to increase our claims cost when results are favorable to the target and decrease our claims costs when results are unfavorable. We adjust both allowed and incurred claims by our current estimate of the impact of provider risk sharing provisions.

5. Benefit Categories

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in April 2020. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services is counted by service type and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

6. Projection Factors

A. Trend Factors (Cost/Utilization):

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Year 1 and Year 2 trends on Worksheet 1 specify annual trends, with 12 months of trend applied to each year.

Exhibit 8 shows the anticipated annual trend from the experience period to the rating period.

B. Changes in the Morbidity of the Population Insured:

The experience period data includes experience for:

- Community-rated policies issued to small employers in 2019

We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2021.

C. Changes in Demographics:

Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts.

D. Plan Design Changes:

The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2021 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

Exhibit 4 illustrates the impact of changes in covered benefits, and the weighted-average impact of experience reported on Worksheet 1. It also illustrates the calculation of the adjustment for induced demand related to changes in the level of cost sharing.

E. Other Adjustments:

The 'Other' adjustment includes the projected impact of changes in network composition and provider contracts. Exhibit 7 contains detail on these calculations.

7. Manual Rate Adjustments

A. Source and Appropriateness of Experience Data Used:

The source data for our manual rate is the experience incurred from January 1, 2018 to December 31, 2019 and paid through February 2020 for Aetna community-rated policies in the Pennsylvania Small Group market. The Small Group market experience is considered an appropriate source for the manual rate due to similarities in covered benefits and market dynamics to the current ACA Small Group market. The similar dynamics include: no individual medical underwriting and rating by gender, limits on age-rating, and caps for rating on the number of dependents, as well as plans benefits and cost-sharing.

B. Adjustments Made to the Data:

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend, as discussed in Exhibits 4-8. The 2018 experience was also adjusted for trend and population risk to get to 2019; the factors used to normalize the data were from the approved 2020 filing.

C. Inclusion of Capitation Payments:

The manual experience includes capitation for the same services that are expected to be capitated for the products in this filing in 2021.

8. Credibility of Experience

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

9. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs and catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Small Group Market Trend Adjustments: Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2021.

10. Market-Adjusted Index Rate

Worksheet 1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment and Exchange User Fees are discussed in Section 12. The risk adjustment is displayed on an allowed-basis and the exchange user fee is converted to percent of allowed claims in this development.

11. Reinsurance

There are no expected reinsurance recoveries.

12. Risk Adjustment

A. Risk Adjustment – Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2019 transfer estimates provided by the Bureau. The transfer is allocated to the member-level by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfer scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level.

B. Risk Adjustment – Projection Period

We trended 2018 actual Risk Adjustment payments and 2019 Risk Adjustment accruals forward three and two years respectively. Resulting payment amounts were combined to determine our current risk transfer relative to the market.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2021 Notice of Benefit and Payment Parameters. The 2021 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost. To that transfer, we subtracted 0.5% of premiums for National High Risk pool funding, and added our anticipated High Risk Pool recoveries. High Risk Pool recoveries were estimated based on the average of member-level recoveries that we would have received under this program for 2018-2019 claims as a percent of premium for Silver Off-Exchange plans.

As a result, we project a risk adjustment [REDACTED].

13. Exchange User Fees

Exchange User Fees are not applied in this filing.

14. Plan-Adjusted Index Rates

Section 3 of Worksheet 2 illustrates the development of the Plan Adjusted Index Rates and displays each plan-specific adjustment made to the Market Adjusted Index Rate. The following briefly describes how each set of adjustments was determined.

A. Actuarial Value, Cost Sharing:

The factors in Column 2 are the product of two adjustments:

1. We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. We also reviewed the projected experience and the projected membership by plan to estimate an overall paid-to-allowed ratio. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage.
2. We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2021 membership.

B. Distribution and Administrative Costs:

Section 3 of Worksheet 2 also reflects the adjustment for projected administrative costs, including sales, marketing, and profit & risk. These are discussed below in the 'Non-Benefit Expenses and Profit & Risk'

section, and include the Risk Adjustment User Fee which is not reflected in the Market-Adjusted Index Rate. These expense and profit assumptions do not vary by plan.

C. Non-Benefit Expenses and Profit & Risk

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2020 projections, and projected changes in expenses, inflation, and membership for 2021 for our National book of Small Group business.

A flat commission per policy per month will be paid to all brokers in Pennsylvania during open enrollment. Commissions do not vary by plan.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2021 as well as Federal income tax and State Premium taxes. The risk adjustment user fee of \$0.25 PMPM is included in the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in pricing our 2020 plans.

D. Provider Network, Delivery System, and Utilization Management:

The factors in Column 4 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

E. Benefits in addition to EHBs:

The factors in Column 5 adjust for the impact of benefits in addition to EHBs. The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). Hence, all factors in Column 5 are 1.00.

F. Catastrophic Plan Eligibility:

This filing does not include catastrophic plans

G. Experience Period Plan Adjusted Index Rates

Worksheet 2 of the URRT displays the Plan Adjusted Index Rates filed in 2019 for the experience period.

15. Calibration

Exhibit C-1 shows an example of how calibration is applied to all plan adjusted index rates.

A. Age Curve Calibration:

The age factors are based on the HHS Default Standard Age. The factors are shown in Exhibit C-2. Exhibit C-2 demonstrates the determination of the Plan-Level Average Age Factor. Plan membership is based on issuer's similar January 2020 plan membership and projected changes in the market.

To Age-Calibrate the Plan-Adjusted Index Rates, we project a premium-weighted average age factor for the 2021 membership using the prescribed age curve and the projected age for each plan, as illustrated on exhibit C-2. The overall Age Calibration factor is developed in Column B of Exhibit C-1. This factor is based on the weighting of plan-adjusted Index rate and membership weighted by each plan's average age factor membership. The Age-Calibrated Plan Adjusted Index Rate is determined multiplying each Plan Adjusted Index Rate by the Plan-Level Average Age Factor and then dividing by the weighted over-all average age factor.

The age that most closely corresponds to the premium weighted overall average age factor is the average age for the single risk pool.

B. Geographic Factor Calibration:

Exhibit C-2 summarizes the rating area definitions and factors and displays the projected premium by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor and is applied in column F of Exhibit C-1.

Projected area factors are shown in Exhibits 6 and C-2. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors.

16. Consumer-Adjusted Premium Rate Development

Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as:

Calibrated Plan Adjusted Index Rate * Age Factor * Area Factor * Tobacco Factor * Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation for a family of six, with more than three dependents under age 21, is shown in Exhibit 14.

17. Projected Loss Ratio

The expected 2021 MLR for this filing, as defined by PPACA and before any credibility adjustment, is shown in Exhibit 11.

18. AV Metal Values

The AV Metal Values on Worksheet 2 were based on the 2021 AV Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

19. Membership Projections

Exhibit 15/C-2 summarizes the membership projections by plan. Membership projections are based on historical experience, enrollment in ACA-compliant plans through January 2020, and our expectations for future sales as additional members move to these plans from grandfathered and transitional plans. We assume that total enrollment will be similar to our current enrollment.

Terminated Plans and Products

Exhibit 16 provides a plan and product crosswalk from 2019 to 2021. The crosswalk includes the list of products that have experience in the single risk pool experience period, and products that were made available in 2020 and 2021.

Consistent with the URRT instructions, experience for non-single risk pool terminated products is reported in aggregate under the terminated product with the largest membership in the experience period.

20. Plan Type

All plans are consistent with the plan type indicated on Worksheet 2.

21. Composite Premiums

Small employers will not be able to elect to have rates set using a composite approach.

22. Benefit Design

This filing includes one Silver plan.

Please refer to the corresponding policy forms for detailed benefit language. Information on the cost-sharing parameters of the covered benefit plans, including deductibles, copays, and Actuarial Values, is summarized in Exhibits A-1 and A-2. All benefit and cost sharing parameters comply with Pennsylvania benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

23. Marketing

Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including HHS Planfinder and our own website. In addition, members of our 2020 plans will be mailed a discontinuance or renewal letter, in accordance with CMS guidelines. Marketing and distribution approaches may change from time to time at management's discretion.

24. Underwriting

Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations.

25. Renewability

These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

26. Company Financial Condition

As of December 31, 2019, the capital and surplus held by Aetna Health Assurance of PA (Pennsylvania) was approximately \$82 million. This amount is disclosed in page 3, line 33 of the Company's statutory financial statement dated December 31, 2019. The Company issues commercial and Medicare Advantage coverage in various states for multiple business segments, including to large employer, small employer, and individual purchasers.

Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Experience Period MLR Rebates
- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Administrative Fees
- Experience Period Data – Small Group

Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [REDACTED] am a Fellow of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:
 - a. ASOP No. 5, Incurred Health and Disability Claims
 - b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
 - c. ASOP No. 12, Risk Classification
 - d. ASOP No. 23, Data Quality
 - e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
 - f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
 - g. ASOP No. 41, Actuarial Communications
 - h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act
2. The Projected Index Rate is:

- a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
 - b. Developed in compliance with the applicable Actuarial Standards of Practice,
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
 - d. Neither excessive, deficient, nor unfairly discriminatory.
3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
4. Adjustments to the MAIR for benefits the plan offers in addition to essential health benefits included in Worksheet 2, Section III were calculated in accordance with actuarial standards of practice.
5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

MLR Projection

			Formula
(a)	Premium (pmpm)	\$744.03	
(b)	Medical Cost (pmpm)	\$652.68	
(c)	Medical Benefit Ratio (MBR)	87.7%	= (c) / (b)
(d)	Quality Improvement Action (pmpm)	\$5.95	= (a) x 0.80%
(e)	Taxes and Fees (pmpm)	\$10.38	
(f)	Adjusted Premium (pmpm)	\$733.65	=(a) - (e)
(g)	Adjusted Claims (pmpm)	\$658.63	= (b) + (d)
	Medical Loss Ratio (MLR)	89.8%	=(g) / (f)

Notes:

ACA adjustments for QIA and taxes and fees are estimates based on historical experience and projected expenses.

Values reflect current actuarial projections and will differ from the final reported MLR.

This projection applies to the products included in this filing and is a standalone calculation for the 2021 calendar year. This projection differs from the MLR calculation specified by PPACA which includes three years of experience for all business in the MLR pool.

Exhibit 14

Sample Rate Calculation

The following steps outline the mathematical formula used to develop the member level rates for a sample small group. The input assumptions and the census provided below are for illustrative purposes only.

Sample Small Group Information:

Effective Date: 1/1/2021
 Rating Area: Rating Area 9
 Plan: PA Silver OAEPO 6000 80% AHASPA

<u>Group Census</u>	<u>Employee</u> <u>Age</u>	<u>Spouse</u> <u>Age</u>	<u>Child 1</u> <u>Age</u>	<u>Child 2</u> <u>Age</u>	<u>Child 3</u> <u>Age</u>
Employee 1	35	36	5	7	
Employee 2	56	52			
Employee 3	24	21			
Employee 4	52	49	19	17	16
Employee 5	65	65	25		
Employee 6	58	60	24		
Employee 7	56	51			
Employee 8	42	41			
Employee 9	33	34	5	6	7
Employee 10	25	28	2	1	

Age and Tobacco

Factors

	<u>Age Factors</u>				
	<u>Employee</u>	<u>Spouse</u>	<u>Child 1</u>	<u>Child 2</u>	<u>Child 3</u>
Employee 1	1.222	1.230	0.765	0.765	
Employee 2	2.333	1.952			
Employee 3	1.000	1.000			
Employee 4	1.952	1.706	0.941	0.885	0.859
Employee 5	3.000	3.000	1.004		
Employee 6	2.548	2.714	1.000		
Employee 7	2.333	1.865			
Employee 8	1.325	1.302			
Employee 9	1.198	1.214	0.765	0.765	0.765
Employee 10	1.004	1.087	0.765	0.765	

Calculation of Monthly Premium

Step 1: Multiply Market Base Rate x Rating Area Factor x Plan Factor x Effective Date Factor

Market Base Rate =	\$587.37
x Rating Area Factor (Rating Area 9)	0.9393
x Plan Factor	0.8442
x Effective Date Factor	1.0000
Market Base Rate adjusted for Plan/Area/Effective Date =	<u>\$465.76</u>

Step 2: Multiply Adjusted Market Base Rate in Step 1 by the Member level Age and Tobacco Factors:

Member Monthly Rates	Employee	Spouse	Child 1	Child 2	Child 3	Total
Employee 1	\$569.15	\$572.88	\$356.30	\$356.30		\$1,854.63
Employee 2	\$1,086.61	\$909.16				\$1,995.77
Employee 3	\$465.76	\$465.76				\$931.52
Employee 4	\$909.16	\$794.58	\$438.28	\$412.19	\$400.08	\$2,954.29
Employee 5	\$1,397.27	\$1,397.27	\$467.62			\$3,262.16
Employee 6	\$1,186.75	\$1,264.06	\$465.76			\$2,916.57
Employee 7	\$1,086.61	\$868.64				\$1,955.25
Employee 8	\$617.13	\$606.41				\$1,223.54
Employee 9	\$557.98	\$565.43	\$356.30	\$356.30	\$356.30	\$2,192.31
Employee 10	\$467.62	\$506.28	\$356.30	\$356.30		\$1,686.50
Group Total Monthly Premium:						\$20,972.54

Note: Member level monthly rates are rounded to the nearest penny.

Dear Ms. Altman:

The purpose of this filing revision is to provide details of the premium rate development and resulting proposed monthly premium rates for Small Group policies which will be offered off-Exchange in the state of PA for effective dates of January 1, 2021 and later. This filing is being provided to comply with regulatory rate filing requirements, and is not intended to be used for other purposes.

The health benefit plans proposed in this filing are in compliance with all state-specific benefit requirements and rating regulations, as well as the benefit plan requirements of the Patient Protection and Affordability Act (P.L. 111-148). This rate filing is intended for new business issued through the State of PA off-Exchange marketplace effective January 1, 2021.

All products and associated proposed monthly premium rates contained within this rate filing will be available to existing business upon their request. Existing business that is not considered grandfathered under PPACA regulation will be converted to the plans and rates in this filing upon renewal.

We have tried to present this information in a manner that will facilitate your Department's review. If there are changes we can make to improve the process or you would like us to present the information differently in the future, please let us know.

Please feel free to contact me at the above listed telephone number and/or e-mail address if you have any additional questions.

Sincerely,

A solid black rectangular box redacting the signature.

 FSA, MAAA
Aetna

June 30, 2020

Mr. Michael Gurgiolo
Actuarial Review Division
Bureau of Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Subject: Aetna HealthAssurance Pennsylvania, Inc.
Small Group Rate Filing
SERFF # AETN- 132308680

Dear Mr. Michael Gurgiolo:

I am writing in response to your objection letter sent via SERFF regarding our PA AHASPA HMO SG filing received on June 16, 2020. For convenience, your comments have been included as part of the response. This letter includes the previously supplied responses as well as additional responses.

1. We have the following questions related to the credibility of data:
 - a. Please provide support for applying 0% credibility to the experience data.
 - b. Please provide support for the manual rate data being fully credible based on 36,598 member months as noted in table 2b of the PA Rate Template.

The manual data consists of all ACA-compliant experience for 2018 and 2019 in Aetna plans. As the plan offerings for 2018 and 2019 were very similar in benefit design across all product types, we felt it appropriate to combine the experience and develop rates using expected product differentials. Zero credibility was assigned to the base data based on the expectation that the manual data was a more representative view of the performance of the full product offerings.

2. Please provide a quantitative development of the following adjustments included in Table 5 of the PA Rate Template, for both the experience and manual rate. Quantitative development should be provided for every item included in each of the below adjustments.
 - a. Change in Morbidity – All Other

Please refer to tab 'Response #2a' in the excel file 'AHASPA Objection Response 1 Tables.xlsx'

- b. Change in Network
 - i. The development is provided in Exhibit 7 for the actual experience, but not the manual rate

Please refer to tab 'Response #2b' in the excel file 'AHASPA Objection Response 1 Tables.xlsx'

- c. Change in Benefits
 - i. Exhibit 4 of the support Excel file seems to provide the necessary information for the actual experience but the manual adjustment does not tie to this Exhibit

Please refer to tab 'Response #2c' in the excel file 'AHASPA Objection Response 1 Tables.xlsx'

- d. Change in Other

Please refer to tab 'Response #2d' in the excel file 'AHASPA Objection Response 1 Tables.xlsx'

e. Change in Demographics

- i. The development is provided in Exhibits 5 and 6 for the actual experience, but not the manual rate

The development of the demographics change for the manual rate assumes the same age/gender distribution as the manual experience. The change is therefore a 1.00.

3. Please provide quantitative and qualitative support for the 87.1% Paid-to-Allowed ratio.

Paid to allowed ratios are based on 2018 & 2019 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trending deductible-leveraging.

4. Please provide quantitative development of the projected incurred risk adjustment PMPM included in Table 5 of the PA Rate Template. Specifically, provide the necessary quantitative and qualitative support, as well as the source and any adjustments to the source information, for each item included in the risk adjustment calculation (i.e., carrier and statewide PLRS, IDF, GCF, ARF, AV, premium)

Thank you for your review. Upon closer examination, we discovered a formula issue in the projection. With your approval, we propose not changing rates right now and instead wait for the 2019 Actual Risk Adjustment Transfer payments to be released. Once we have actuals, we will update the rate filing to reflect the actuals in the 2021 projection build up

The methodology that will be used to project the 2021 transfer payment is as follows: The 2018 and 2019 actual risk adjustment transfer payments will be trended to 2021. The resulting PMPMs will be weighted by the premium experience exposure; the resulting blended PMPM will be the 2021 projected risk adjustment transfer. The risk adjustment fee and high risk pool premium less recoveries will be subtracted; this risk adjustment transfer amount will be populated in Field 4.16 of URRT Worksheet II.

5. The utilization trends presented on WS #1 of the URRT do not tie to the utilization trends presented in the actuarial memorandum or Exhibit 8. Please reconcile.

The utilization trend shown in Exhibit 8 and the actuarial memorandum includes induced utilization. The utilization trend shown on the revised URRT matches Exhibit 8. Please see attachment 'AHASPA Objection Response 1 Tables.xlsx', tab 'Response #5', for the illustration of how the utilization trends differ between the files.

6. There are a few typos found in the actuarial memorandum. If a revised memorandum is needed, please consider fixing the following:
- a. Reference of cell AC15 in section 1C, which seems to refer to cell AZ15 instead.

This has been updated.

- b. Mention of Exhibit E-1 in section 2A, which seems to refer to Exhibit C-1.

References to Exhibit E-1 should have been replaced with references to Worksheet I of the URRT which now shows the development of the Market Adjusted Index Rate. The Actuarial Memo has been updated to reflect this.

c. The \$0.19 risk adjustment user fee mentioned in section 2D. Note, the correct user fee of \$0.25 is used within the exhibits.

This has been updated.

d. Mention of Exhibits E‐1 and E‐2 references in section 4, which seems to refer to Exhibits C‐1 and C‐2.

References to Exhibit E-1 should have been replaced with references to Worksheet I of the URRT which now shows the development of the Market Adjusted Index Rate. The Actuarial Memo has been updated to reflect this.

References to Exhibit E-2 should have been replaced with references to Exhibit C-1 which now shows the development of the Calibrated Plan Adjusted Index Rate. The Actuarial Memo has been updated to reflect this.

Exhibit C-2 does not show the development of MAIR or CPAIR.

7. Please provide an explanation for the change in profit and/or contingency from 2.00% in 2020 to 4.74% in 2021.

The 2% profit was mandated to us for 2020. The profit margin expectations for our organization have not changed; the 4.74% is consistent with our original 2020 filing.

8. Please provide detailed quantitative support for the trend assumptions included in Tables 3 and 3b of the PA Rate Template.
 - a. Service category cost trend
 - b. Service category utilization trend
 - c. Service category induced utilization trend

Please see attachment AHASPA Objection Response 1 Tables.xlsx, tab 'Response #5'

9. Please provide additional quantitative support for the leveraging adjustment applied in the determination of the quarterly trend amounts. The information provided in the "Trend Tie Out..." Excel file provides the general concept behind the adjustment but does not provide the necessary support for the 2.4% increase over the allowed trend amounts.

Leveraging for medical and pharmacy is developed using the Milliman Health Cost Guidelines Deductible Leveraging table. Based on the average deductible, a load factor is applied to the allowed trend to calculate the paid trend. An example is below.

Allowed Trend = 10.0%

Average Deductible = \$2,000

Lookup From Deductible Leveraging Table for \$2,000 = 1.15

*Leveraging Trend = (1 + Allowed Trend * Deductible Lookup)/(1 + Allowed Trend) - 1*

*Leveraging Trend = (1 + 0.1 * 1.15)/(1 + 0.1) - 1 = 1.3%*

Paid Trend = (1 + Allowed Trend)(1 + Leveraging Trend) - 1*

Paid Trend = (1 + 10%)(1 + 1.3%) - 1 = 11.5%*

The leveraging factor assumed by medical cost component is:

Service Type	Leveraging
Facility Inpatient	1.7%
Facility Outpatient	2.2%
Physician	1.8%
Capitation	0.0%
Pharmacy	1.5%

10. Though these are not small group quarterly filings, the company has pressed the “Adjust PA Act Memo Exhibits to be for a Small Group Quarterly Filing” button in cell G2 of the Tab I Data sheet to adjust the exhibits to show quarterly filing information. Please resubmit with PA Actuarial Memorandum Exhibits without this adjustment.

We have updated the file.

11. In the cover letter, please indicate the additional revenue that the company expects will be generated due to the requested adjustment.

The letter was updated: 2021 PA SG Cover Letter_AHASPA v2.pdf

12. In the cover letter, please indicate any rating area changes, including any changes in excepted counties, or indicate that there are no rating area changes proposed for 2021.

There are no changes. The letter was updated: 2021 PA SG Cover Letter_AHASPA v2.pdf

13. Please verify the source of the manual data provided.

The source data for the manual rate is experience incurred from 1/1/18-12/31/19 for Aetna community-rated policies in the Pennsylvania Small Group market.

14. The information shown in columns Z and AA of Table 10 should provide a direct year-over-year calibrated PAIR comparison to generate the rate increase shown in column AC. Please identify the source of the data shown in column Z; the Department anticipates that column Z of the current small group filing will consist of the data in column AA from the 2020 annual filing adjusted by the Q1 trend factor found in Cell J35 in Table 5A of that filing. This will result in the comparison of a Q1 2020 calibrated PAIR with a Q1 2021 calibrated PAIR. This will yield a proper apples-to-apples comparison.

We can confirm the source of the data in column Z of the updated PA Rate Template is the 2020 column AA data adjusted by the Q1 trend factor found in cell J35 of last year's filing.

15. Also, provide an exhibit showing the average quarterly rate change (Q1 2021/Q1 2020 - approved, Q2 2021/Q2 2020 - approved, etc.) groups will see if the proposed rates are approved, with these rate changes then weighted by enrollment to produce an aggregate change for the four quarters.

Please refer to tab ‘Response #15’ in the excel file ‘AHAPA Objection Response 1 Tables.xlsx’

16. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Confirmed.

17. Please provide an exhibit showing the financial gains and losses for calendar years 2014 – 2019 for the following categories: Member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy.

Please see attachment AHASPA Objection Response 1 Tables cont.xlsx, tab 'Response #17'.

18. Per the Department's published guidance, the Benefit Richness factors in Table 10 Column L should be developed based upon the following formula: $(\text{Plan Pricing AV in column K} * \text{CSR Defunding Adjustment in column P})^2 - (\text{Plan Pricing AV in column K} * \text{CSR Defunding Adjustment in column P}) + 1.24$. Further, the value developed by the quadratic formula must then be multiplied by a normalization constant such that the value in Cell L15 or L16 balances back to 1.000. Please modify the cells in Column L to explicitly show the quadratic formula and normalizing constant to demonstrate compliance with our guidance.

The required cells have been modified in the updated Rate Template to show the quadratic formula and normalizing constant.

19. Section 4.3 of the 2021 URR Instructions requires issuers to discuss the reason for rate increase(s): Issuers must provide the quantitative impact and a narrative description of all significant factors driving the proposed rate increase. As an example, these factors could include:
- Single risk pool experience which is more adverse than that assumed in the current rates
 - Medical inflation
 - Increased utilization
 - Prospective changes to benefits covered by the product or successor products
 - New taxes and fees imposed on the issuer
 - Anticipated changes in the average morbidity of the covered population that is market-wide, as opposed to issuer specific morbidity that is reflected in risk adjustment

Please see attachment AHASPA Objection Response 1 Tables cont.xlsx, tab 'Response #19'

20. In Table 2, please update the risk adjustment amount to reflect the risk adjustment transfer shared by the Department on May 23, 2020 from Jim Lavery.

This number in the updated Rate Template now reflects the risk adjustment amount provided by Jim Lavery.

21. Please provide by service category the emerging data and resulting trend for the current calendar year to-date as of the end of May.

Please refer to tab 'Response #21' in the excel file 'AHASPA Objection Response 1 Tables.xlsx'.

22. Regarding Trend:

- a. Was the data in Table 4 or 4b utilized in developing the proposed trend?
- b. Is the data in Table 4 or 4b raw unadjusted data or has it been normalized or otherwise adjusted? If the data has been adjusted, please provide an exhibit that quantitatively shows the unadjusted allowed monthly data for the 48 months. Also include the following monthly data:
 - i. The average age factor;
 - ii. The average geographic factor;
 - iii. The average tobacco factor; and
 - iv. The average benefit factor;
 - v. The normalized average pmpm (should match the allowed pmpms in column L of Table 4b).

Aetna trend is developed using service category weights from actual experience which is rolled up to a total annual trend. Additional discussion on the development of medical and pharmacy trend can be found below

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

23. Cell D16 of Table 5 should contain a formula, specifically the product of the 1.01 factor to reflect the repeal of the individual mandate and any other assumption that produces the amount shown in that cell. Please revise; I note that the formula could be as simple as 1.01×1 .

The formula in the updated Rate Template now contains a formula

24. Regarding Table 6:

- a. Please provide the proposed commission schedules for 2021.
- b. Using the proposed commission schedules, quantitatively show the development of the percent and pmpm amounts in cells C51 and D51.
- c. Using the 2019 SHCE in the Annual Statement, please quantitatively show the development of the Quality Improvement Initiatives percent and pmpm amount.
- d. We have repurposed row 54 to capture RA User Fees. Please provide the RA User Fee percentage and pmpm amount in cells C54 and D54.

Please refer to tab 'Response #24' in the excel file 'AHASPA Objection Response 1 Tables. There you will find the commissions by rating area as well as the other requested fees and PMPMs.

The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

The 0.8% of premium is a HHS permitted standard deduction for Quality Improvement Initiatives. They determined the allowance by studying historically reported averages across all issuers. Table 6 in the updated Rate Template shows the RA User Fee information of \$0.25 PMPM.

25. Please provide an exhibit that shows, by HIOS Plan ID, summary benefit and cost sharing changes for 2021 relative to the 2020 design for all plans to be offered in 2021. Include Pricing AV columns for 2020 and 2021. Please show the approved 2020 Pricing AVs for all plans in the 2020 column and the proposed 2021 Pricing AVs in the 2021 column. Also provide a supporting worksheet that shows the quantitative development of the proposed factors.

There were minimal changes between the benefits and cost sharing arrangements in the 2020 and 2021 plans, as demonstrated in the 'Response #26' tab in AHASPA Objection Response Tables. Internal pricing models were used to develop the pricing relativities using the plan designs of the 2021 portfolio. Please note that the internal pricing models were refreshed, and benefits slopes were updated since the 2020 pricing cycle. When the filed/approved Pricing AVs for 2020 are compared to the filed/proposed Pricing AVs for 2021, they are not on the same basis since the underlying models are different. Part of the annual pricing includes repricing older portfolios to ensure that pricing relativities are on the same basis within the pricing model. When the raw Pricing AVs are compared for 2020 and 2021, the YOY over change is a decrease due to increases in the 2021 OOP Max

26. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost pmpms for calendar years 2015 – 2019, as applicable.

Please see attachment AHASPA Objection Response 1 Tables cont.xlsx', tab 'Response #26'

27. The Department will contact the company shortly with information regarding the opportunity and parameters for the company to provide and support an updated Covid-19 impact assessment, if desired.

We will wait for the Department's guidance.

Dear Ms. Altman:

The purpose of this filing revision is to provide details of the premium rate development and resulting proposed monthly premium rates for Small Group policies which will be offered off-Exchange in the state of PA for effective dates of January 1, 2021 and later. This filing is being provided to comply with regulatory rate filing requirements, and is not intended to be used for other purposes.

The rates filed on July 20th reflect the following changes requested by the Bureau:

- Reduction of profit to 2.0%
- Inclusion of the PCORI fee
- Updated 2019 risk adjustment transfer amounts to reflect those that the Bureau provided on June 30th

- Updated 2020 risk adjustment transfer amount projection methodology
- No impact for COVID-19 was included in the revised rates.

We have modeled a wide range of scenarios which are informing our expectations of future claims costs. Since these items have wide ranges of values and estimates are non-credible at this point, especially for our non-credible block of membership in PA, our current filing excludes an impact for COVID-19.

The health benefit plans proposed in this filing are in compliance with all state-specific benefit requirements and rating regulations, as well as the benefit plan requirements of the Patient Protection and Affordability Act (P.L. 111-148). This rate filing is intended for new business issued through the State of PA off-Exchange marketplace effective January 1, 2021.

All products and associated proposed monthly premium rates contained within this rate filing will be available to existing business upon their request. Existing business that is not considered grandfathered under PPACA regulation will be converted to the plans and rates in this filing upon renewal.

We have tried to present this information in a manner that will facilitate your Department's review. If there are changes we can make to improve the process or you would like us to present the information differently in the future, please let us know.

Please feel free to contact me at the above listed telephone number and/or e-mail address if you have any additional questions.

Sincerely,

, FSA, MAAA
Aetna

July 17, 2020
Mr. Michael Gurgiolo
Insurance Department
Bureau of Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Subject: Aetna HealthAssurance Pennsylvania, Inc.
Small Group Rate Filing
SERFF # AETN- 132308680

Dear Mr. Michael Gurgiolo:

I am writing in response to your objection letter sent via SERFF regarding our PA AHASPA HMO SG filing received on July 9, 2020. For convenience, your comments have been included as part of the response.

1. As a follow-up to question 2a, please provide additional quantitative support for the ratios submitted on the 'Response #2a' tab of the support Excel file for the 'Morbidity - All Other' adjustment. This should include a detailed quantitative development of the interim, base, projection, and manual factors for both the experience and manual rate, not just the numerator and denominator that generated the provided ratios.

Please refer to tab 'Response #1' in the excel file 'AHASPA Objection Response 2 Tables.xlsx'.

2. As a follow-up to question 2b, please provide a detailed quantitative development of the base, interim, projection, and manual network factors which are displayed on the 'Response #2b' tab of the support Excel file.

Please refer to tab 'Response #2' in the excel file 'AHASPA Objection Response 2 Tables.xlsx' for the quantitative development. Factors are member-weighted averages of the network discounts for each plan.

3. As a follow-up to question 2c, please provide a detailed quantitative development of the base, interim, projection, and manual benefit factors which are displayed on the 'Response #2c' tab of the support Excel file. Additionally, please reconcile the discrepancy with the benefit factors displayed on the 'Response #2c' tab with the factors displayed as the "Change in Benefits" adjustment in Table 5.

The benefit factors displayed represent the Paid to Allowed ratios that come from our internal pricing models.

The 0.986 Plan Design Changes factor shown on WS1 of the URRT inadvertently includes Induced Utilization in the calculation. We corrected this issue by including Induced Utilization in the Section II table on WS1 of the URRT. The resulting Change in Benefits factor now matches the 1.0 shown in Table 5 as shown below.

From Table 5

Change in Benefits	1.000
--------------------	-------

From WS1 of URRT

Plan Design Changes	1.000
---------------------	-------

4. As a follow-up to question 2d, please provide a detailed quantitative development of the base, interim, projection, and manual factors for both the pooling impact and deductible suppression adjustments which are displayed on the 'Response #2d' tab of the support Excel file. Additionally, please reconcile the Table 5 Experience 'Change in Other' factor with the factor developed in the 'Response #2d' tab of support Excel file.

The Pooling adjustment is developed internally using a market specific pooling study. The pooling point chosen for manual experience was \$750,000 for medical claims and \$250,000 for pharmacy claims. The pooling point for base experience was \$500,000 for medical claims and \$250,000 for pharmacy claims. The medical pooling points differed as a result of the different membership thresholds attained by the respective populations used in base and manual calculations. The deductible suppression factor is developed internally using factors for each duration month and deductible level. The factors are applied to groups based on when they sign up for insurance.

5. As a follow-up to question 3, please provide the quantitative development of the 87.1% paid-to-allowed ratio. This should include the experience data, a description of the source of the data and why it is appropriate, as well as any adjustment factors which are applied, separately for the 2018 and 2019 data.

Please refer to tab 'Response #5' in the excel file 'AHASPA Objection Response 2 Tables.xlsx'.

Both the paid and allowed manual experience is for PA ACA members in the AHI, ALIC, and AHASPA legal entities. Given the decline in membership, the manual experience (paid and allowed) includes 2019 and 2018 data for credibility purposes. The projected P/A accounts for the impact of leveraging trend and the change in benefits from the experience period to the projection period.

6. As a follow-up to question 4, please provide the proposed methodology in the form of an Excel-based exhibit, supporting the trend applied to 2018 and 2019 payments, and understanding that the 2019 actual amounts may change. In addition, please provide support for how morbidity differences between the 2018 and 2019 risk adjustment results and the 2021 projected experience are accounted for such that the morbidity underlying the 2019 experience and manual rate used in the rate development is adjusted to align with the morbidity assumed in the projected risk adjustment amount.

Please refer to tab 'Response #6' in the excel file 'AHASPA Objection Response 2 Tables.xlsx' for an exhibit on trend applied to 2018 and 2019 payments.

Please refer to tab 'Response #1' in the excel file 'AHASPA Objection Response 2 Tables.xlsx' for detail on how morbidity differences between the 2019 risk adjustment results and the 2021 projected experience are accounted for. Change in the risk levels of membership mix from year to year are combined and projected to calculate the 2021 projected risk.

7. As a follow-up to questions 5 and 8, please provide additional quantitative support for the trend assumptions. The 'Response #5' tab detailed in the support Excel file separated out the utilization trend and induced utilization trend, but it did not provide the requested detailed quantitative support for the assumptions.

Please refer to tab 'Response #7a' in the excel file 'AHASPA Objection Response 2 Tables.xlsx' for the quantitative support of utilization trend and tab 'Response #7b' for the quantitative support of induced utilization trend.

In setting trend, we reference the PA-specific emerging experience in addition to national guidance in order to ensure that trend reflects the market. The continuous, active population in PA SG has been shrinking and due to credibility concerns with the PA emerging experience, national guidance – based on national SG experience – was used for PA utilization. In addition to the decline in population, the historical utilization trend (not normalized for demo, benefits, and catastrophic claims) has ranged from 9.6% to 26.2% over the last years; to mitigate large swings in rates for members, utilization trend was set using the national guidance.

8. As a follow-up to question 9, please provide the quantitative development of the leveraging factors by medical cost component as only an example was provided in the prior response.

Please refer to tab 'Response #8' in the excel file 'AHASPA Objection Response 2 Tables.xlsx' for the quantitative development of leveraging factors by medical cost component. Membership was used from all entities for increased credibility.

9. Please update the 2019 experience period risk adjustment amount in Table 2 to reflect the department calculated revised risk adjustment transfer amount sent to your company on June 30th 2020, or the final CMS transfer amount published on or before July 16th, if it differs from the Department's calculation.

The 2019 experience period risk adjustment amount in Table 2 has been updated to reflect the revised amount sent to us on June 30th.

10. If the projected risk adjustment transfer amount in Table 5 will be modified due to either the June 30th revisions or the final CMS transfer amount published on or before July 16th if it differs from the Department's calculation, please provide narrative and detailed supporting data to justify the proposed changes.

The risk adjustment amount in Table 5 utilizes the numbers given to us by Jim Laverty on June 30th

11. As directed by the Commissioner in previous filings, please revise the profit/contingency assumption to not exceed 2%.

The AFIT profit has been lowered to 2.00% and all materials have been updated accordingly.

12. On July 13th the Department will communicate its guidance based upon updated survey information from the issuers on their best estimate of the Covid-19 impact on 2021 rates. Responses to the round two questions are due on July 16th; please be sure that all documents submitted via SERFF on or after that date reflect the impact of Covid-19 and are consistent with Department's July 13th guidance.

The rates filed on July 20th reflect the following changes requested by the Bureau:

- *Reduction of profit to 2.0%*
- *Inclusion of the PCORI fee*
- *Updated 2019 risk adjustment transfer amounts to reflect those that the Bureau provided on June 30th*
- *Updated 2020 risk adjustment transfer amount projection methodology*
- *No impact for COVID-19 was included in the revised rates.*

We have modeled a wide range of scenarios which are informing our expectations of future claims costs. Since these items have wide ranges of values and estimates are non-credible at this point, especially for our non-credible block of membership in PA, our current filing excludes an impact for COVID-19.

13. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables and Federal Rates Template are identical.

We have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rates Template are either identical or only have minor differences due to rounding.

14. Please submit an amendment to update the Company Rate Information under the Rate/Rule Schedule tab if any information has changed since the initial filing.

We have submitted an amendment to update the Company Rate Information under the Rate/Rule Schedule tab.

15. Please ensure that the 7/16/20 versions of the following items are posted in SERFF with your July 16th response to this data call:

- Cover letter identifying all changes made and the reason for the change. Also show the revised rate change.
- PA Actuarial Memorandum
- PA Actuarial Memorandum Exhibits
- Departments Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no “NA”)
- URRT
- Federal rates template
- Part III actuarial memorandum
- Updated Rate Change Request Summary (Attachment 1)
- Public filing pdf with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits subsequent to the initial submission, in addition to all of the above items).

All of the above are posted in SERFF.
