Information About Our Search:

We will ask the life insurance companies conducting business in Pennsylvania, to search for a life insurance policy or annuity contract that was in-force at the time of the deceased's death. This means that the policy was in active status and was not surrendered or did not lapse.

If you do not receive a response from a life insurance company, within 90 days of submitting your request to us, that means that a life insurance policy or annuity contract was not found or you are not a beneficiary on the policy/contract or otherwise eligible to get this information. We have requested that the company contact you directly and copy us on the reply, if you are eligible to receive information or if additional information from you is needed to make a determination.
