

## 24 Hour Home Health Care

The above care should be offered when your doctors/specialists continue to request it. It shouldn't be denied by the insurance company performing the assessments.

I have incurred 2 injuries to date due to my service coordinators falsifying my assessments, lying, and withholding documents of medical records and doctors' letters.

They then retaliate by denying already approved medications for a year. I have notified the PA Health Law Projects which said I need a lawyer to file suit after their investigation.
